Invesco Quantitative Strategies Global Equity Low Volatility Low Carbon UCITS ETF (the "Fund")
A sub-fund of Invesco Markets II plc (the "Umbrella Fund")
EUR PfHdg Acc (ISIN: IE000XIBT2R7) (the "Share Class")

The Fund is managed by Invesco Investment Management Limited, part of the Invesco Group.

Objectives and Investment Policy

- The Fund is an actively-managed Exchange-Traded Fund (ETF), which aims to achieve a long-term return in excess of the MSCI World Index (the "**Index**") by investing in an actively-managed portfolio of global equities that meet environmental, social, and corporate governance ("**ESG**") criteria while limiting the volatility of the portfolio.
- In order to achieve its investment objective, the Fund will invest primarily in a portfolio of equity and equity-related securities of companies from developed markets worldwide whereby securities are selected by the Sub-Investment Manager based on three criteria: 1) compliance with the Fund's ESG policy (the "ESG Policy"); 2) attractiveness determined in accordance with the Sub-Investment Manager's quantitative investment model; and 3) consistency between the portfolio's expected risk characteristics and the Fund's investment objective.
- The "quantitative investment model" uses mathematical, logical and statistical techniques for stock selection purposes.
- The Fund will not seek to track the performance of an index. The Fund will hold an actively-managed portfolio of equities and equity-related securities with the aim of delivering superior risk-adjusted returns over the long term when compared with the average performance of global equity markets, for which the Index serves as a reference.
- The Fund's shares are listed on one or more Stock Exchange(s). Investors can buy or sell shares daily through an intermediary directly or on Stock Exchange(s) on which the shares are traded. In exceptional circumstances investors will be permitted to redeem their shares directly from Invesco Markets II plc in accordance with the redemption procedures set out in the prospectus, subject to any applicable laws and relevant charges.
- The Fund is an Article 8 Fund (it promotes environmental and/or social characteristics) for the purposes of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability related disclosures in the financial services sector ("**SFDR**").
- The Fund's base currency is USD. The portfolio-hedged Share Class currency is EUR. To minimise exposure to fluctuations in the exchange rate between the portfolio-hedged Share Class' currency and the base currencies of the Fund's underlying holdings, the portfolio-hedged Share Class enters into foreign exchange transactions (typically FX forwards).
- **Dividend Policy:** This Share Class does not pay you income, but instead reinvests it to grow your capital, in line with its stated objectives.
- **Net Asset Value:** This is calculated daily and the Fund is open for subscriptions and redemptions on each day the United States Federal Reserve System is open. Please refer to the prospectus for further information.

Risk and Reward Profile

Lower Risk — Higher Risk

Typically lower rewards — Typically higher rewards

1	2	3	4	5	**6**	7

- The Share Class is in risk category 6 due to the rises and falls of its price or simulated data in the past.
- As the Share Class' risk category has been calculated using historical data, it may not be a reliable indication of the Share Class' future risk profile.
- The risk category may change in the future and is not guaranteed.
- The lowest category does not mean a risk free investment.

Other Risks

- **General Investment Risk**: The value of investments, and income from them, can go down as well as up and you may not get back the full amount you invested.
- **Currency risk**: The Fund's performance may be adversely affected by variations in the exchange rates between the base currency of the Fund and the currencies to which the Fund is exposed.
- **Equity Risk**: The value of equities and equity-related securities can be affected by a number of factors including the activities and results of the issuer and general and regional economic and market conditions. This may result in fluctuations in the value of the Fund.
- **Securities lending**: The Fund may be exposed to the risk of the borrower defaulting on its obligation to return the securities at the end of the loan period and of being unable to sell the collateral provided to it if the borrower defaults.
- **Environmental, Social and Governance Risk**: The Fund intends to invest in securities of issuers that manage their ESG exposures better relative to their peers. This may affect the Fund's exposure to certain issuers and cause the Fund to forego certain investment opportunities. The Fund may perform differently to other funds, including underperforming other funds that do not seek to invest in securities of issuers based on their ESG ratings.
- **Currency hedging**: Currency hedging between the base currency of the Fund and the currency of the share class may not completely eliminate the currency risk between those two currencies and may affect the performance of the share class.
- For more information on risks, please see the Fund prospectus under "Risk Factors", which is available at etf.invesco.com (select your country and navigate to the Prospectus on the Documents section on the product page).
