Objectives and investment policy

The investment objective of the Sub-Fund is to track the performance of the Index, iBoxx MSCI Scored & Screened Tilted USD Asia ex-Japan High Yield Capped TCA Index, within an acceptable tracking error (which will take into account, amongst other things, the fees and expenses incurred) while seeking to provide investors with a total return, taking into account both capital and income returns, which reflects the return of the Index.

In order to achieve its investment objective, the Sub-Fund will invest in a portfolio of fixed income securities that, as far as possible and practicable, consist of the constituent securities of the Index. The types of fixed income securities in which the Sub-Fund may invest are US dollar-denominated, sub-investment grade, fixed-rate corporate securities issued by emerging market companies in Asia (excluding Japan).

The Sub-Fund will use an optimisation strategy and therefore may not hold every constituent of the Index and may not hold constituents in the same proportions as their weightings in the Index. When sampling is used, the Investment Manager will use industry standard tools that are readily available to all investment funds employing a sampling strategy.

The Index is constructed in such a way to screen issuers for ESG standards and product involvement as defined by MSCI ESG Research and excludes issuers in breach of the UN Global Compact or other notable controversies in relation to severe social or environmental impact.

In addition, ESG tilt and momentum factors are applied to ensure that the issuers of securities comprising the Index displaying higher levels of engagement and involvement in ESG activities are ranked higher in the Index than other issuers.

The index applies a 3% issuer cap and 50% sector cap. The Fund promotes environmental and social characteristics, as defined under Article 8 of SFDR.

- The Share Class of the Sub-Fund distributes income.

- This Sub-Fund may not be appropriate for short-term investment.

- The Share Class is denominated in GBP. The Sub-Fund is denominated in USD.

- In normal conditions, Authorised Participants may deal in shares directly with the Sub-Fund. Other investors can deal in shares daily through an intermediary on stock exchanges on which the shares are traded.

For more information on the Share Class of the Sub-Fund, please see the supplement for the Sub-Fund and the prospectus of the ICAV, available on the product pages of www.jhetf.com.

Risk and reward profile

Lower risk **Higher risk**

Typically lower rewards Typically higher rewards

1	2	3	4	5	**6**	7

This indicator is based on historical data and may not be a reliable indication of the future risk and reward profile of the Share Class.

The risk category shown is not guaranteed and may shift over time.

The lowest category (Category 1) does not mean 'risk free'.

The Share Class is rated 6 due to the nature of its investments and the frequency of price movement which include the following risks which may impact the value of the Share Class or expose it to losses.

- No capital protection: The value of your investment may go down as well as up and you may not get back the amount you invested.

- Liquidity risk: Lower liquidity means there are insufficient buyers or sellers to allow the Sub-Fund to sell or buy investments readily. Neither the Index provider nor the issuer make any representation or forecast on liquidity.

Index Tracking: The performance of the Sub-Fund is not expected to precisely match the performance of the index at all times and the deduction of fees and expenses means the Sub-Fund might deliver a lower total return than the index.

Credit Risk: An issuer of a bond (or money market instrument) may become unable or unwilling to pay interest or repay capital. If this happens or the market perceives this may happen, the value of the bond will fall.

Interest Rates: When interest rates rise (or fall), the prices of different securities will be affected differently. In particular, bond values generally fall when interest rates rise (or are expected to rise). This risk is typically greater the longer the maturity of a bond investment.

High Yield Bonds: While high yield (non-investment grade) bonds generally offer higher rates of interest than investment grade bonds, they are more speculative and more sensitive to adverse changes in market conditions.

Emerging Markets: Emerging markets expose investors to higher volatility and greater risk of loss than developed markets; they are susceptible to adverse political and economic events and may be less well-regulated with less robust custody and settlement procedures.

ESG Screening: The environmental, social and governance screening criteria are embedded with the index selection process, which seeks to exclude bonds issued by companies involved in certain activities. The investment manager is not Responsible for monitoring the screening process or confirming that all bonds which pass the screening process are issued by companies with adequate environmental, social or governance standards.

Derivatives: Derivatives may be used with the aim of reducing risk or managing the portfolio more efficiently. However, this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

Liquidity: Securities could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

Counterparty and Operational Risks: Losses could be incurred if a counterparty became unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

For more information on the risks to the Sub-Fund, please see the supplement for the Sub-Fund and the prospectus of Janus Henderson ICAV, available on the product pages of www.jhetf.com

The Index is the intellectual property of the index provider. The Share Class is not sponsored or endorsed by the index provider. Please refer to the Sub-Fund's prospectus for full disclaimer.

Charges for this Share Class

The charges you pay are used to pay the costs of running the Sub-Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge: None*

Exit charge: None*

Charges taken from the Sub-Fund over a year

Ongoing charges: 0.65%

Charges taken from the Sub-Fund under certain specific conditions

Performance fee: None

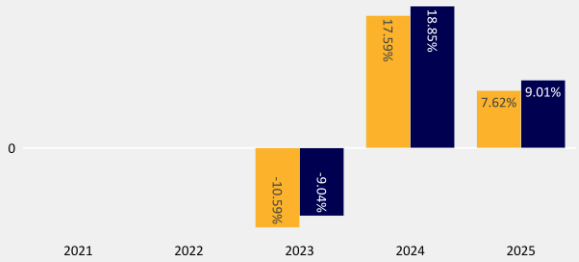

For more information about charges, please see the section "Fees and Expenses" of the Sub-Fund's prospectus and supplement, which is available a twww.jhetf.com.

Ongoing charges have been calculated on the total of charges taken from the assets of the Sub-Fund over the course of a year, in accordance with the Sub-Fund's supplement. This figure may vary from year to year. It excludes portfolio transaction costs and taxes or duty charges for portfolio re-balancing, except in the case of an entry/exit charge paid by the Sub-Fund when buying or selling units in another collective investment undertaking if any.

* Not applicable to secondary market investors. Secondary market investors (those who buy or sell shares on a stock exchange) may be charged certain fees by their stock broker. These charges, if any, can be obtained from such stock broker. Authorised Participants dealing directly with the Sub-Fund will pay the transaction costs related to their subscriptions and redemptions.

Past performance

- Past performance is not a reliable indicator of future returns.
- The Sub-Fund was launched on 6 September 2021
- The Share Class was launched on 9 June 2022.
- Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.
- The past performance has been calculated in GBP. The base currency of the Sub-fund and Index is in USD.
