What is this product?

Type

UBS (Irl) ETF Plc is an umbrella investment company with variable capital and segregated liability between sub-funds incorporated in Ireland and authorised by the Central Bank as an Undertaking for Collective Investment in Transferable Securities under the UCITS Regulations. The fund is a UCITS ETF.

Term

The Product does not have a maturity date (the Product has been established for an indefinite period of time). The Manufacturer may terminate the Product early. The amount you will receive upon early termination may be less than the amount you invested.
The recommended holding period (RHP) is displayed in the section "How long should I hold it and can I take money out early?".

Objectives

The Fund is passively managed and seeks to track performance of the MSCI Australia Universal Low Carbon Select 5% Issuer Capped Index (Net Total Return) (the 'Index'). The Index is designed to measure the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust Environmental, Social and Governance (ESG) profile as well as a positive trend in improving that profile, using minimal exclusions from the MSCI Australia Index. At least 90% of the securities in the Fund, excluding cash, money market funds and derivatives have an ESG rating. By adopting the ESG methodology of the Index, the Fund applies the extra-financial indicator upgrade approach for the purposes of the AMF Rules, aiming for a better non-financial indicator value. The weighted average environmental indicator (Carbon Intensity (1 and 2) emissions indicator of the Fund as the relevant extra-financial indicator of the Fund will be at least 20% lower than the weighted average environmental indicator of the Parent Index (as defined below) based on a reduction of carbon emission intensity.
The Fund will seek to hold all of the shares of the Index, in the same proportions as the Index, so that essentially the portfolio of the Fund will be a near mirror image of the Index. In seeking to implement its investment objective of tracking the performance of the Index, the Fund may also in exceptional circumstances hold securities which are not comprised in its Index, including, for example, securities in respect of which there has been an announcement or it is expected that they will shortly be included in the Index.
This sub-fund promotes environmental and/or social characteristics but does not have a sustainable investment objective.
The Fund will not enter into any securities lending.
Fund income is not paid out, but instead will be reinvested.
