

Key investor information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Xtrackers MSCI Next Generation Internet Innovation UCITS ETF

Share class: 1C, ISIN: IE00XOQ9TK4, Security code: DBX0R3, Currency: USD

a sub-fund of Xtrackers (IE) PLC. The management company is DWS Investment S.A., a member of the DWS Group.

Objectives and investment policy

The fund is passively managed. The aim is for your investment to track the performance before fees and expenses of the MSCI ACWI IMI Next Generation Internet Innovation Select ESG Screened 100 Index (index). The index is based on the MSCI ACWI IMI Index (Parent Index) and is designed to reflect the performance of the shares of large, medium, and small-capitalisation companies globally that derive, or are expected to derive, significant revenues from technological innovation in the internet sector. In order to be eligible for inclusion in the index, companies must be eligible for inclusion in the Parent Index and pass both thematic selection criteria and ESG screening criteria. The thematic selection criteria calculates a relevance score for potential constituents by assessing companies' exposure to business activities associated with the theme. Securities must meet a certain relevance score threshold to be eligible for inclusion. The ESG screening criteria excludes companies from the Parent Index, which: (i) are unrated by MSCI ESG Research; (ii) are assigned an MSCI ESG Rating of CCC; (iii) have any involvement in controversial weapons; (iv) are classified by MSCI in their Business Involvement Screening Research as breaching certain revenue thresholds in controversial activities, including, but not limited to, tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal and oil sands extraction; and/or (v) fail to comply with the United Nations Global

Compact principles. The remaining securities are then ranked by their market capitalisation and the top 100 are selected for inclusion. Securities are finally weighted by a product of their free-float adjusted market capitalisation and their relevance score. The index includes an issuer capping component, limiting the weight of each issuer to 4.5% at each quarterly rebalance. The index is administered by MSCI Limited. The index is calculated on a total return net basis, which means that all dividends and distributions by the companies are reinvested in the shares after tax. The index is reviewed semi-annually and rebalanced at least quarterly. The index is calculated in USD on a daily basis. To achieve the aim, the fund will attempt to replicate the index, before fees and expenses, by buying all or a substantial number of the securities in the index. The fund may employ techniques and instruments in order to manage risk, reduce costs and improve results. These techniques and instruments may include the use of financial contracts (derivatives). The fund may also engage in secured lending of its investments to certain eligible third parties subject to certain ESG criteria to generate additional income to offset the costs of the fund. The currency of the fund is USD. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares generally on a daily basis.

Risk and reward profile

The calculation of the risk and reward profile is based on simulated data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 6 because its share price may fluctuate strongly and the likelihood of both losses and gains may therefore be high. The following risks could be of particular significance for the fund: The fund will attempt to replicate the performance of the index less costs, but your investment is not expected to match the performance of the index precisely. Exceptional circumstances may arise, such as, but not limited to, disruptive market conditions, additional costs/taxes or extremely volatile markets, which may cause the fund's performance to be substantially different from the performance of the index. DWS entities and related companies may act in several roles in relation to the fund such as distributor and management company which may involve conflicts of interest. The fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up. The value of an investment in shares will depend on a number of factors including, but not limited to, market and economic conditions, sector, geographical region and political events. The fund is exposed to liquidity, operational, clearing, settlement, market suspension and custody risks linked to investments in the People's

Republic of China ("PRC") and Stock Connect. The fund may suffer difficulties or delays in enforcing its rights in A-shares given the securities regimes in the PRC and Hong Kong are different. The fund and the depositary cannot ensure that the fund's ownership of the securities in the PRC or title thereto is assured in all circumstances. The Board of Directors intends to make relevant provision on dividend and interest from A-shares if the tax on dividends is not withheld at source at the time when such income is received. Any such provision may be excessive or inadequate. Investors may be advantaged or disadvantaged depending on the time they subscribed and/or redeemed their shares. The ESG screening criteria are embedded within the index selection process, which seeks to exclude securities issued by companies involved in certain activities. The investment manager and sub-portfolio manager are not responsible for monitoring the screening process or confirming that all securities which pass the screening process are issued by companies with adequate ESG standards. The company is solely relying on the activities conducted by and information provided by the administrator of the index and MSCI ESG Research LLC for the ESG screening. ESG information from third-party data providers may be incomplete, inaccurate or unavailable. As a result, there is a risk that the index administrator may incorrectly assess a security or issuer, resulting in the incorrect inclusion or exclusion of a security in the index. The fund may use derivatives for investment purposes and to try to manage its investments more efficiently. This may not always be successful and may result in greater fluctuations in the value of the fund. This may negatively affect the value of the fund and your investments. A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the fund over a year	
Ongoing charges	0.35 %
Charges taken from the fund under certain specific conditions	
Performance fee	None
Securities lending fees	0.00 %

Secondary market investors (those who buy or sell shares on a stock exchange) may be charged certain fees by their stock broker. These charges, if any, can be obtained from such stock broker. Authorised participants dealing directly with the fund will pay the transaction costs related to their subscriptions and redemptions.

The ongoing charges shown here are a cost estimate. It excludes portfolio transaction costs and performance fees, if any.

Additional information on costs can be found in the cost section(s) of the prospectus.

To the extent the fund undertakes securities lending to generate revenue, the fund will ultimately be allocated 70% of the associated revenue, the securities lending agent, which will be a DWS entity or other Deutsche Bank entity, will be allocated 15% and the remaining 15% will be allocated to the DWS entity which monitors such activities, as set out in the prospectus. As securities lending revenue sharing does not increase the costs of running the fund, this has been excluded from the ongoing charges.

Past performance

There is not yet sufficient data available to provide you with useful information regarding earlier performance.

The 1C share class of Xtrackers MSCI Next Generation Internet Innovation UCITS ETF was launched in 2022.

Practical information
