iShares S&P 500 EUR Hedged UCITS ETF (Acc)

A sub-fund of iShares V plc

EUR Accu

ISIN: IE00B3ZW0K18

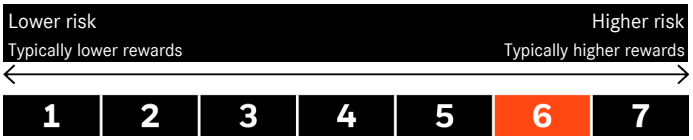

Manager: BlackRock Asset Management Ireland Limited

Objectives and Investment Policy

- The Fund aims to achieve a return on your investment, through a combination of capital growth and income on the Fund's assets, which reflects the return of S&P 500 EUR Hedged, the Fund's benchmark index (Index).
- The Index provides a return on the S&P 500 which measures the performance of the large-cap sector (i.e. leading companies with large market capitalisations) of the United States market. Market capitalisation is the share price multiplied by the number of shares issued. Companies are included in the Index based on a free float market capitalisation weighted basis. Free float means that only shares available to international investors, rather than all of a company's issued shares, are used to calculate the Index. Free float market capitalisation is the share price of a company multiplied by the number of shares available to international Investors. The Index also uses one month foreign exchange (FX) forward contracts to hedge each non-Euro currency in the Index back to Euro in accordance with the S&P Hedged Indices methodology. Hedging reduces the effect of fluctuations in the exchange rates between the currencies of the equity securities (e.g. shares) that make up the Index and Euro, the base currency of the Fund.
- The Fund is passively managed and aims to invest in equity securities (e.g. shares) that, so far as possible and practicable, make up the S&P 500, as well as FX forward contracts that, so far as possible and practicable, track the hedging methodology of the Index.
- The Fund intends to replicate the Index by holding the equity securities which make up the Index, in similar proportions to it. The investment manager may use financial derivative instruments ("FDIs") (i.e. investments the prices of which are based on one or more underlying assets) for direct investment purposes to produce a similar return to its Index.
- The Fund may also engage in short-term secured lending of its investments to certain eligible third parties to generate additional income to off-set the costs of the Fund.
- Recommendation: This Fund is suitable for medium to long term investment, though the Fund may also be suitable for shorter term exposure to the Index.
- Your shares will be accumulating shares (i.e. income will be included in their value).
- The Fund's base currency is Euro.
- The shares are listed on one or more stock exchanges and may be traded in currencies other than their base currency. The performance of your shares may be affected by this currency difference. In normal circumstances, only authorised participants (e.g. select financial institutions) may deal in shares (or interests in shares) directly with the Fund. Other investors can deal in shares (or interests in shares) daily through an intermediary on stock exchange (s) on which the shares are traded. Indicative net asset value is published on relevant stock exchanges websites.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

*Not applicable to secondary market investors. Investors dealing on a stock exchange will pay fees charged by their stock brokers. Such charges are publicly available on exchanges on which the shares are listed and traded, or can be obtained from stock brokers.

*Authorised participants dealing directly with the Fund will pay related transaction costs including, on redemptions, any applicable capital gains tax (CGT) and other taxes on underlying securities.

The ongoing charges figure is based on the fixed annualised fee charged to the Fund as set out in the Fund's prospectus. This figure excludes portfolio trade-related costs, except costs paid to the depositary and any entry/exit charge paid to an underlying collective investment scheme (if any).
