### Key Risks

The value of your investment may go down as well as up and past performance does not predict future returns. Investor capital may be at risk up to a total loss. The value of an investment in shares will depend on a number of factors including, but not limited to, market and economic conditions, sector, geographical region and political events. The Fund is exposed to market movements in a single country or region which may be adversely affected by political or economic developments, government action or natural events that do not affect a fund investing in broader markets. The Fund will use financial contracts (known as derivatives) to try to reduce the effect of currency fluctuations between the currency of its assets and the currency of the shares. This may not be effective and may prevent the Fund from benefitting from an increase in value of (or expose a Fund to the decrease in value of) a particular currency.

### Index key facts
