Invesco S&P 500 QVM UCITS ETF Dist

PQVM

Fund objective

The Invesco S&P 500 QVM UCITS ETF Dist aims to provide the net total return performance of the S&P 500 Quality, Value & Momentum Multi-Factor Net Total Return Index (the "Reference Index"), less the impact of fees. The fund distributes dividends on a quarterly basis.

An investment in this fund is an acquisition of units in a passively managed, index tracking fund rather than in the underlying assets owned by the fund.

Shares in issue	829,710
Distribution yield	0.79%
SFDR classification	Article 6

[1] Ongoing charge includes management fee, custody and administration costs but excludes transaction costs. Costs may increase or decrease as result of currency and exchange rate fluctuations. Consult the legal documents for further information on costs.

Investment risks

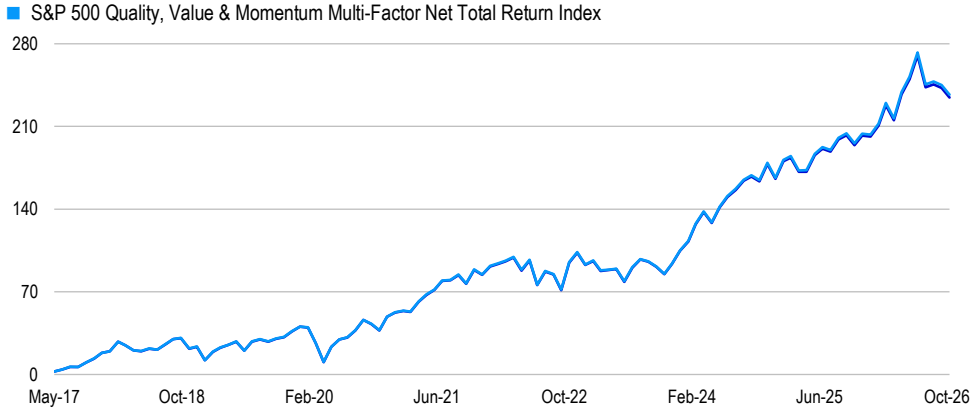

For complete information on risks, refer to the legal documents. The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. The Fund may be exposed to the risk of the borrower defaulting on its obligation to return the securities at the end of the loan period and of being unable to sell the collateral provided to it if the borrower defaults. The Fund might be concentrated in a specific region or sector or be exposed to a limited number of positions, which might result in greater fluctuations in the value of the Fund than for a fund that is more diversified. The value of equities and equity-related securities can be affected by a number of factors including the activities and results of the issuer and general and regional economic and market conditions. This may result in fluctuations in the value of the Fund.

About the index

The Reference Index aims to represent the performance of those companies within the S&P 500 Index which have the highest aggregate exposure to three investment factors: quality, value and momentum. To determine the components of the Reference Index, all companies included in the S&P 500 Index are assigned scores based on their performance against these three factors. These scores are then combined on an equal-weighted basis into a final factor composite. All companies are then ranked by their final factor composite with the top 100 companies being selected for inclusion in the Index, subject to a buffer rule which aims to reduce turnover. The weight for each component in the Benchmark will range between 0.05% and the lessor of 5% or 20 times its market capitalisation weight. The weight of each sector is capped at 40% for the purposes of seeking to avoid sector concentration.

Past performance does not predict future returns.

Indexed performance, % growth since inception

Cumulative performance as at 31 October 2026 (%)

	1Y	3Y	5Y	10Y	Fund inception

Source: Invesco, Bloomberg L.P., FactSet. Index/Benchmark performance is shown in the index/benchmark currency. ETF performance shown is calculated with reference to the Net Asset Value, inclusive of net reinvested income and net of ongoing charges and portfolio transaction costs, in USD. The figures do not reflect the actual share price, the impact of the bid/offer spread or broker commissions. Returns may increase or decrease as a result of currency fluctuations. ETF NAV performance differs from that of the index due to the ongoing charges and portfolio transaction costs and due to the fact that the ETF does not necessarily always hold all the securities in the index in their respective weighting. This ETF does not charge an entry fee.

Important information

For information on our funds and the relevant risks, refer to the Key Information Documents/Key Investor Information Documents (local languages) and Prospectus (English), and the financial reports, available from www.invesco.eu. A summary of investor rights is available in English from www.invesco.com/ie-manco/en/home.html. The management company may terminate marketing arrangements.

This is marketing material and not financial advice. It is not intended as a recommendation to buy or sell any particular asset class, security or strategy. Regulatory requirements that require impartiality of investment/investment strategy recommendations are therefore not applicable nor are any prohibitions to trade before publication.

If investors are unsure if this product is suitable for them, they should seek advice from a financial adviser.

Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

Views and opinions are based on current market conditions and are subject to change.

UCITS ETF's units / shares purchased on the secondary market cannot usually be sold directly back to UCITS ETF. Investors must buy and sell units / shares on a secondary market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees for doing so. In addition, investors may pay more than the current net asset value when buying units / shares and may receive less than the current net asset value when selling them.

Issued by Invesco Asset Management Limited, Perpetual Park, Perpetual Park Drive, Henley-on-Thames, Oxfordshire RG9 1HH, UK. Authorised and regulated by the Financial Conduct Authority. This fund is authorised overseas, not in the UK. The UK Financial Ombudsman Service is unlikely to be able to consider complaints about this fund, its management company, or its depositary. Any losses related to the management company or depositary are unlikely to be covered by the UK Financial Services Compensation Scheme.

Glossary

Benchmark: An index against which the ETF is measured, in terms of relative performance, risk and other useful comparisons.

Distribution Yield: The distribution yield is a measurement of cash flow being paid. It's the sum of the distributions over 12 months divided by the net asset value (NAV) of the fund.

ETF: Exchange traded fund. A type of fund that is traded on the stockmarket like ordinary shares. ETFs can be bought and sold during trading hours, like ordinary shares, whereas other types of funds are priced once a day only.

Factors: An investment approach that seeks to identify and invest in securities that display certain quantifiable characteristics. Common examples of factors include Value, Quality and Momentum. A factor strategy may seek to target just one factor or combine multiple factors.

Hedged: The intended result of reducing the portfolio's exposure to a specific risk, such as the risk of fluctuations between currency exchange rates ("currency hedging").

ISA: Individual Savings Account. A type of investment account in the UK in which the tax on income is lower than usual, and there is no tax on profits made from an increase in the value of shares.

Physical Replication: Physical funds invest directly in constituents of the benchmark index.

Replication Method: Strategy employed by the fund to achieve its objective.

SIPP: Self-Invested Pension Plan. A type of UK pension for which a person makes their own investment decisions.

UCITS: Undertakings for Collective Investment in Transferable Securities. European regulatory framework for an investment vehicle that can be marketed across the European Union.

UK Reporting Status: Indicates whether or not the fund has United Kingdom fund tax status, this can lead to a UK investor receiving favourable tax rates on any gain or disposal of holdings in the fund.
