Xtrackers MSCI AC World ESG Screened UCITS ETF

Share class: 1C, ISIN: IE00BGHQ0G80, Security code: A1W8SB, Currency: EUR

a sub-fund of Xtrackers (IE) plc. The management company is DWS Investment S.A., a member of the DWS Group.

Objectives and investment policy

The fund is passively managed. The aim is for your investment to track the performance of the MSCI ACWI Select ESG Screened Index (index). The index is based on the MSCI AC World Index (Parent Index), which is designed to reflect the performance of the shares of large and medium capitalisation companies in global developed and emerging market countries. In order to be eligible for inclusion in the index, companies must be eligible for inclusion in the Parent Index and must meet certain ESG screening criteria. The index excludes companies from the Parent Index, which: (i) are unrated by MSCI ESG Research, (ii) have any involvement in controversial weapons, (iii) breach certain revenue thresholds in controversial activities, including, but not limited to, civilian, conventional and nuclear weapons, tobacco, thermal coal, unconventional and/or arctic oil and gas extraction and palm oil, (iv) are assigned an MSCI ESG Rating of CCC and (v) are not in compliance with the United Nations Global Compact principles, have an MSCI Controversies Score of 0 or have an insufficient MSCI ESG Controversies Score related to certain biodiversity and/or environmental controversies. The index also includes a carbon emission reduction rule, whereby if having applied the above exclusions, the Greenhouse Gas ("GHG") intensity of the index has been insufficiently reduced compared to the Parent Index, constituents are excluded by descending order of GHG intensity until a relevant reduction threshold is achieved. The remaining securities are then weighted by their free-float adjusted market capitalisation and are also subject to certain regional,

country and sector weight adjustments. The index is administered by MSCI Limited. The index is calculated on a total return net basis, which means that all dividends and distributions by the companies are reinvested in the shares after tax. The index is reviewed and rebalanced on a quarterly basis. The index is calculated in Euro on a daily basis. To achieve the aim, the fund will attempt to replicate the index, before fees and expenses, by buying a portfolio of securities that may comprise the constituents of the index or other unrelated investments as determined by DWS. The fund may employ techniques and instruments in order to manage risk, reduce costs and improve results. These techniques and instruments may include the use of financial contracts (derivatives). The fund may also engage in secured lending of its investments to certain eligible third parties subject to certain ESG criteria to generate additional income to offset the costs of the fund. Certain information (including the latest share prices of the fund, indicative net asset values, full disclosure on the composition of the fund's portfolio and information on the index constituents) are available on your local DWS website or at www.Xtrackers.com. Transaction costs and taxes, unexpected fund costs and market conditions such as volatility or liquidity issues may affect the ability of the fund to track the index. The anticipated level of tracking error in normal market conditions is 1 per cent. The currency of the fund is EUR. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares generally on a daily basis.

Risk and reward profile

The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 6 because its share price may fluctuate strongly and the likelihood of both losses and gains may therefore be high. The following risks could be of particular significance for the fund: The fund will attempt to replicate the performance of the index less costs, but your investment is not expected to match the performance of the index precisely. Exceptional circumstances may arise, such as, but not limited to, disruptive market conditions, additional costs/taxes or extremely volatile markets, which may

cause the fund's performance to be substantially different from the performance of the index. DWS entities and related companies may act in several roles in relation to the fund such as distributor and management company which may involve conflicts of interest. The fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up. The value of an investment in shares will depend on a number of factors including, but not limited to, market and economic conditions, sector, geographical region and political events. The index is rules based and is not capable of being adjusted to take into account changing market circumstances. As a result you may be negatively affected by, or may not benefit from, the lack of such adjustments in changing market circumstances. The fund may use derivatives for investment purposes and to try to manage its investments more efficiently. This may not always be successful and may result in greater fluctuations in the value of the fund. This may negatively affect the value of the fund and your investments.

A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the fund over a year	
Ongoing charges	0.25 %
Charges taken from the fund under certain specific conditions	
Performance fee	None
Securities lending fees	0.00 %

Secondary market investors (those who buy or sell shares on a stock exchange) may be charged certain fees by their stock broker. These charges, if any, can be obtained from such stock broker. Authorised participants dealing directly with the fund will pay the transaction costs related to their subscriptions and redemptions.

The ongoing charges figure is based on expenses for the fiscal year ending 31.12.2022. It may vary from year to year. It excludes portfolio transaction costs and performance fees, if any.

Additional information on costs can be found in the cost section(s) of the prospectus.

To the extent the fund undertakes securities lending to generate revenue, the fund will ultimately be allocated 70% of the associated revenue, the securities lending agent, which will be a DWS entity or other Deutsche Bank entity, will be allocated 15% and the remaining 15% will be allocated to the DWS entity which monitors such activities, as set out in the sales prospectus and supplement. As securities lending revenue sharing does not increase the costs of running the fund, this has been excluded from the composition of costs.

Past performance

Past performance is not a reliable indicator of future performance. All costs and fees that were withdrawn from the 1C share class of Xtrackers MSCI AC World ESG Screened UCITS ETF were deducted during the calculation. The 1C share class of Xtrackers MSCI AC World ESG Screened UCITS ETF was launched in 2014.

— As of 20 October 2021 the fund changed its investment objective to reflect the performance of the MSCI ACWI Select ESG Screened Index. The past performance shown from 2015 up to 2020 (inclusive), is that of the MSCI AC World EUR TR Net Index. 2021 shows a combined performance of both indices.
