SPDR S&P 500 ESG Screened UCITS ETF (the "Fund"), a sub-fund of SSGA SPDR ETFs Europe I plc (a UCITS compliant Exchange Traded Fund).
Share Class: SPDR S&P 500 ESG Screened UCITS ETF (Acc) (ISIN IE00BH4GPZ28)

Objectives and Investment Policy

Investment Objective The objective of the Fund is to track the U.S. equity market performance of large cap equity securities.

Investment Policy The Fund seeks to track the performance of the S&P 500 ESG Exclusions II Index (the "Index") as closely as possible.

The Fund is an index tracking fund (also known as a passively managed fund).

The Fund invests primarily in securities included in the Index. These securities include the top 500 companies in the U.S. equity market which are weighted by market capitalization, while screening out securities based on their exposure to controversial weapons, civilian firearms, tobacco, thermal coal, and companies deemed not compliant with United Nations Global Compact principles. The Fund seeks to hold all the securities of the Index with the approximate weightings as in that Index. The Fund will use a replication strategy to create a near mirror-image of the Index. In limited circumstances the Fund may purchase securities that are not included in the Index.

The Fund may use financial derivative instruments (that is, financial contracts whose prices are dependent on one or more underlying assets) in order to manage the portfolio efficiently.

Save in exceptional circumstances, the Fund will generally only issue and redeem shares to certain institutional investors. However, shares of the Fund may be purchased or sold through brokers on one or more stock exchanges. The Fund trades on these stock exchanges at market prices which may fluctuate throughout the day. Market prices may be greater or less than the daily net asset value of the Fund.

The Fund does not currently engage in securities lending.

Shareholders may redeem shares on any UK business day (other than days on which relevant financial markets are closed for business and/or the day preceding any such day provided that a list of such closed market days will be published for the Fund on www.ssga.com); and any other day at the Directors' discretion (acting reasonably) provided Shareholders are notified in advance of any such days.

Any income earned by the Fund will be retained and reflected in an increase in the value of the shares.

The Fund's shares are issued in U.S. Dollars.

Please refer to the Prospectus for more information.

Risk and Reward Profile

Risk Disclaimer The risk category above is not a measure of capital loss or gains but of how significant the rises and falls in the Fund's return have been historically.

For example a fund whose return has experienced significant rises and falls will be in a higher risk category, whereas a fund whose return has experienced less significant rises and falls will be in a lower risk category.

The lowest category (i.e., category 1) does not mean that a fund is a risk free investment.

As the Fund's risk category has been calculated using historical simulated proxy data, it may not be a reliable indication of the Fund's future risk profile.

The Fund's risk category shown is not guaranteed and may change in the future.

Why is this Fund in this category? The Fund is in risk category 6 as its return has experienced very high rises and falls historically.

The following are material risks relevant to the Fund which are not adequately captured by the risk category.

Concentration Risk: When the Fund focuses its investments in a particular way, the issues affecting the investments will have a greater effect than if the Fund was more diversified. This concentration may also limit the Fund's liquidity.

Index Tracking Risk: The Fund's performance may not exactly track the Index. This can result from market fluctuations, changes in the composition of the Index, transaction costs, the costs of making changes to the Fund's portfolio and other Fund expenses.

Liquidity Risk: It may be difficult for the Fund to buy or sell certain investments in difficult market conditions. Consequently the price obtained when selling securities may be lower than under normal market conditions.

Screening Risk: There is a risk that the index provider may make errors, such as incorrect assessment of the screen criteria and/or include incorrect/exclude correct constituents in the screening process.

Please refer to the Prospectus for full details about the risks associated with this Fund.
