L&G US Energy Infrastructure MLP UCITS ETF

Share Class USD Distributing ETF - ISIN: IE00BHZKHS06. The Fund is a sub-fund of Legal & General UCITS ETF Plc (the "**Company**").
Managed by LGIM Managers (Europe) Limited, a member of the Legal & General group (the "**Manager**")

OBJECTIVES AND INVESTMENT POLICY

- The L&G US Energy Infrastructure MLP UCITS ETF (the "**Fund**") is a passively managed exchange traded fund ("**ETF**") that aims to track the performance of the Solactive US Energy Infrastructure MLP Index TR (the "**Index**"), subject to the deduction of the ongoing charges and other costs associated with operating the Fund.
- Dealing.** Shares in this share class (the "**Shares**") are denominated in USD and can be bought and sold on stock exchanges by ordinary investors using an intermediary (e.g. a stockbroker). In normal circumstances, only Authorised Participants may buy and sell Shares directly with the Company. Authorised Participants may redeem their Shares on demand in accordance with the "Dealing Timetable" published on www.lgim.com.
- Index.** The Index is comprised of Master Limited Partnerships ("**MLPs**") that are publicly traded on US stock exchanges that derive the majority of their revenues from owning and operating assets used in energy logistics, including: pipelines, storage facilities and other assets used for transporting, storing, gathering, and processing natural gas, natural gas liquids, crude oil and/or refined products. An MLP is only eligible for inclusion in the Index if it: (1) is of a sufficient size (determined by reference to the total market value of its units); (2) is sufficiently "liquid" (a measure of how actively its units are traded on a daily basis); and (3) makes at least one "distribution" payment to investors each year (similar to a dividend paid by a company). The eligible MLPs are then ranked according to their (1) "forward looking distribution yield" (i.e. the projected value of their future distributions) and (2) "distribution stability" (i.e. how consistent their distributions are in terms of value). The top 25 ranking MLPs are then selected for inclusion in the Index and are weighted equally.
- Replication.** In order to track the Index, the Company will primarily enter into "total return swap" agreements with one or more "swap counterparties" (i.e. investment banks) pursuant to which the Fund receives the financial performance of the Index from the swap counterparties in return for a fee. Under the swap agreements, the Fund receives payments from the swap counterparties when the Index increases and makes payments to the swap counterparties when the Index decreases. Swaps enable the Fund to efficiently track the upward or downward performance of the Index without having to purchase the shares of the companies comprised in the Index. The swap arrangements are "unfunded" which means that the Fund retains all investor subscription money (rather than transferring it to the swap counterparty) and invests it in a diversified portfolio of low risk assets.
- Dividend Policy.** This Share Class aims to pay quarterly dividends out of the Fund's net income by electronic transfer.

RISK AND REWARD PROFILE

- The Fund is rated 7 due to the nature of its investments and its risks. The rating is calculated based on historical data and may not be a reliable indication of the Fund's future risk profile. The risk category may shift over time. The lowest category on the above scale does not mean "risk free".
- While there is no legislation currently aimed at MLPs, a removal or alteration of MLPs' tax treatment could negatively affect performance. Further, legislation aimed at the oil and gas industry could affect MLPs. In addition, in the event that the Fund gains exposure to the Index through direct acquisition of the components of the Index, there may be certain withholding tax implications on capital gains and/or income which may affect the ability for the Fund to track the Index accurately. Some MLPs have significant exposure to commodity price fluctuations, including partnerships involved in oil and gas production, gathering and processing, and coal. In addition, MLP unit prices tend to move with a potential high correlation to commodity prices. MLPs are regulated across a number of industries. Interstate pipelines in the US are regulated by the Federal Energy Regulatory Commission. Coal is one of the most heavily regulated industries in the country, being subject to regulation by federal, state, and local authorities in the US. A change in the regulation of hydraulic fracking could reduce drilling activity and infrastructure needs. Any number of regulatory hurdles could affect MLPs' ability to grow.

The risk and reward indicator may not take account of the following risks of investing in the Fund :

- The Fund may have underlying investments that are valued in currencies that are different from USD, in which case exchange rate fluctuations will impact the value of your investment. In addition, the return in the currency of this share class may be different to the return in your own currency.
- If a swap counterparty is no longer willing or able to continue entering into swaps with the Fund, the Fund may not be able to continue tracking the Index and may need to close.
- If a swap counterparty increases the cost of entering into swaps with the Fund, the Fund's performance will be negatively impacted.
- Third party service providers (such as counterparties entering into FDIs with the Fund or the Company's depository) may go bankrupt and fail to pay money due to the Fund or return property belonging to the Fund.
- If the Index provider stops calculating the Index or if the Fund's license to track the Index is terminated, the Fund may have to be closed.
- It may not always be possible to buy and sell Shares on a stock exchange or at prices closely reflecting the NAV.
- There is no capital guarantee or protection on the value of the Fund. Investors can lose all the capital invested in the Fund.

Please refer to the "Risk Factors" section of the Company's Prospectus and the Fund Supplement.
