# USD Emerging Markets Sovereign Bond UCITS ETF

Class: JPM USD Emerging Markets Sovereign Bond UCITS ETF - USD (acc)

## Fund overview

ISIN IE00BJ06C937		
<b>Investment objective:</b> The Sub-Fund aims to provide an exposure to the performance of bonds issued by the governments or quasi-government entities of emerging markets countries globally which are denominated in US Dollars.		
<b>Investment policy:</b> The Sub-Fund pursues a passively managed (indextracking) strategy.		
<b>Investment approach</b> <ul style="list-style-type: none"><li>• Seeks to provide returns that correspond to those of its Index by using the optimisation methodology.</li><li>• The Index is comprised of USD-denominated emerging markets sovereigns and quasi-sovereigns, and follows a rules-based methodology that aims to filter out the riskiest countries in the universe, while maintaining consistent exposure to the high yield segment of the EM market.</li></ul>		
<b>Investor profile:</b> Typical investors in the Sub-Fund are expected to be investors who want to take exposure to the markets covered by the Index and are prepared to accept the risks associated with an investment of this type, including the volatility of such market.

## Key risks

The value of your investment may fall as well as rise and you may get back less than you originally invested.

To the extent that the Sub-Fund uses financial derivative instruments, the risk profile and the volatility of the Sub-Fund may increase. That notwithstanding, the risk profile of the Sub-Fund is not expected to significantly deviate from that of the Index as a result of its use of financial derivative instruments.

The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. These risks are typically increased for below investment grade debt securities which may also be subject to higher volatility and lower liquidity than investment grade debt securities. The credit worthiness of unrated debt securities is not measured by reference to an independent credit rating agency.

Emerging markets may be subject to increased political, regulatory and economic instability, less developed custody and settlement practices, poor transparency and greater financial risks. Emerging market currencies may be subject to volatile price movements.

Emerging market and below investment grade debt securities may also be subject to higher volatility and lower liquidity than non-emerging market and investment grade debt securities respectively. The Sub-Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Sub-Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.

Further information about risks can be found in the "Risk Information" section of the Prospectus.

## General Disclosures

Before investing, obtain and review the current prospectus, Key Investor Information Document (KIID), and any applicable local offering document. These documents, as well as the annual and semi-annual reports and the articles of incorporation, are available in English from your financial adviser, your J.P. Morgan Asset Management regional contact, the fund's issuer (see below) or at <https://am.jpmorgan.com/gb/en/asset-management/per/>. Morgan Asset Management in accordance with our EMEA Privacy Policy [www.jpmorgan.com/emea-privacy-policy](http://www.jpmorgan.com/emea-privacy-policy).

The Fund does not rely on external support for guaranteeing the liquidity of the Fund or stabilising the NAV per share. The Sub-Fund is rated by an external credit rating agency. Such rating is financed by the Sub-Fund.

The Sub-Fund has received approval of a derogation from the CSSF (Commission de Surveillance du Secteur Financier) to invest up to 100% of its assets in different money market instruments issued or guaranteed separately by certain organisations. The Sub-Fund intends to invest more than 5% of its assets in the organisations listed in the Prospectus.

For additional information on the sub-fund's target market please refer to the Prospectus.

The risk indicator is based on the historic volatility of the Net Asset Value of the Share Class over the last five years and may not be a reliable indication of the future risk profile of the Share Class. The risk and reward category shown above is not guaranteed to remain unchanged and may change over time. A Share Class with the lowest risk rating does not mean a risk-free investment. See the Key Investor Information Document (KIID) for details.

The possible difference between the current ongoing charge as

stated in this document and those mentioned in the KIID, is caused by the fact that the costs mentioned in the KIID are an estimate based on the actual costs incurred over the past year.

## Performance information

Source: J.P. Morgan Asset Management. Share class performance is shown based on the NAV (net asset value) of the share class with income (gross) reinvested including actual ongoing charges excluding any entry and exit fees. Performance is shown based on the NAV which may not be the same as the market price of the ETF. Individual shareholders may realise returns that are different to the NAV based returns.

The return of your investment may change as a result of currency fluctuations if your investment is made in a currency other than that used in the past performance calculation.

Indices do not include fees or operating expenses and you cannot invest in them.

The benchmark is for comparative purposes only unless specifically referenced in the Sub-Funds' Investment Objective and Policy.

## Definitions

**NAV** Net Asset Value of a fund's assets less its liabilities per Share.

**Correlation** measures the strength and direction of the relationship between movements in fund and benchmark returns. A correlation of 1.00 indicates that fund and benchmark returns move in lockstep in the same direction.

**Alpha (%)** a measure of excess return generated by a manager compared to the benchmark. An alpha of 1.00 indicates that a fund has outperformed its benchmark by 1%.

**Beta** measures a fund's sensitivity to market movements (as represented by the fund's benchmark). A beta of 1.10 suggests the fund could perform 10% better than the benchmark in up markets and 10% worse in down markets, assuming all other factors remain constant. Usually the higher betas represent riskier investments.

**Annualised volatility (%)** measures the extent to which returns vary up and down over a given period.

**Sharpe ratio** performance of an investment adjusting for the amount of risk taken (compared a risk-free investment). The higher the Sharpe ratio the better the returns compared to the risk taken.

**Tracking error (%)** measures how much a fund's returns deviate from those of the benchmark. The lower the number the closer the fund's historic performance has followed its benchmark.

**Information ratio** measures if a manager is outperforming or underperforming the benchmark and accounts for the risk taken to achieve the returns. A manager who outperforms a benchmark by 2% p.a. will have a higher IR than a manager with the same outperformance but who takes more risk.
