Ossiam US ESG Low Carbon Equity Factors UCITS ETF - 1A (USD)

STRATEGY DESCRIPTION

The Ossiam US ESG Low Carbon Equity Factors UCITS ETF aims to deliver the net total return of a selection of listed US equities assessed on the basis of their ESG (Environment, Social, Governance) characteristics and exposure to equity factors (Momentum, Size, Value and Volatility). The fund’s investment process is systematic. It first selects 80% of the best ESG-rated stocks which are then filtered to exclude companies in breach of a pre-defined set of criteria. The pool of stocks is then used to build two distinct portfolios which will eventually be equally weighted in the final portfolio: a Stock Factor Portfolio and a Sector Factor Portfolio. Only stocks with the highest exposure to the above-mentioned factors enter the Stock Factor Portfolio and are weighted according to their exposures to these factors while managing a carbon footprint below 40% compared to the benchmark. For the Sector Factor Portfolio, the strategy only considers Value and Momentum factors. The weights of the sectors are adjusted up or down based on their relative attractiveness toward both factors compared to the benchmark. Stocks in the Sector Factor Portfolio are also weighted so that the carbon footprint of the final portfolio is reduced by 40% compared to the benchmark.

Key benefits:

- Provide exposure to a selection of US equities
- Exploit well-established equity factors in order to achieve stable and sustainable long-term growth with controlled tracking error
- Apply a dynamic weighting methodology based on four factors (Momentum, Size, Value and Volatility)
- Improve the ESG profile with significant reduction in carbon footprint

ESG Investing Methodological Limits: By using ESG criteria in the investment policy, the relevant Fund’s objective would in particular be to better manage sustainability risk. ESG criteria may be generated using Ossia’s proprietary models, third party models and data or a combination of both. The assessment criteria may change over time or vary depending on the sector or industry in which the relevant issuer operates. Applying ESG criteria to the investment process may lead Ossia to invest in or exclude securities for non-financial reasons, irrespective of market opportunities available. ESG data received from third parties may be incomplete, inaccurate, or unavailable from time to time. As a result, there is a risk that Ossia may incorrectly assess a security or issuer, resulting in the incorrect direct or indirect inclusion or exclusion of a security in the portfolio of a Fund.

Sustainability risk: The Fund is subject to sustainability risks as defined in the Regulation 2019/2088 (article 2(22)) by environmental, social or governance event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of the investment. More information on the framework related to the incorporation of Sustainability can be found on the website of the Management Company. This product promotes environmental or social characteristics but does not have as its objective a sustainable investment. It might invest partially in assets that have a sustainable objective, for instance qualified as sustainable according to the EU classification.

The proxy voting and engagement policy is available on our website www.ossiam.com. Please refer to the fund prospectus and the corporate website of the Investment Manager for more information on the ESG assessment methodology of the fund.
