

JPMorgan ETFs (Ireland) ICAV -

BetaBuilders US Treasury Bond 0-1 yr UCITS

ETF

Class: JPM BetaBuilders US Treasury Bond 0-1 yr UCITS ETF - USD (acc)

Fund overview

ISIN		Valor
IE00BJK3WF00		48376041
Investment objective: The Sub-Fund seeks to provide an exposure to the performance of US Dollar-denominated fixed rate government bonds issued by the US Treasury with a maturity of less than one year.		
Investment policy: The Sub-Fund pursues a passively managed (index-tracking) strategy.		
Investment approach		
<ul style="list-style-type: none">• Seeks to provide returns that correspond to those of its Index by using the optimisation methodology.• The Index is a market cap weighted benchmark comprised of US Dollar-denominated fixed rate government bonds that have been issued by the US Treasury with remaining maturity of less than one year.		
Investor profile: Typical investors in the Sub-Fund are expected to be investors who want to take exposure to the market covered by the Index and are prepared to accept the risks associated with an investment of this type, including the volatility of such market.

Key risks

The value of your investment may fall as well as rise and you may get back less than you originally invested.

The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. Issuers of debt securities may fail to meet payment obligations or the credit rating of debt securities may be downgraded.

The Sub-Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Sub-Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.

The single market in which the Sub-Fund invests may be subject to particular political and economic risks, and as a result, the Sub-Fund may be more volatile than more broadly diversified funds.

Further information about risks can be found in the "Risk Information" section of the Prospectus.

General Disclosures

This is a marketing communication.

Before investing, obtain and review the current prospectus (available in English), Key Information Document (KID) (available in English) and any applicable local offering document. These documents, as well as the annual and semi-annual reports and the articles of incorporation, are available free from your financial adviser, your J.P. Morgan Asset Management regional contact, the fund's issuer (see below) or at www.jpnam.ch.

A summary of investor rights is available in French at <https://am.jpmorgan.com/ch-fr/droits-des-investisseurs>. J.P. Morgan Asset Management may decide to terminate the arrangements made for the marketing of its collective investment undertakings in accordance with Article 93a of Directive 2009/65/EC and Article 32a of Directive 2011/61/EU.

JPMorgan Asset Management (Switzerland) LLC herewith informs investors that with respect to its distribution activities in and from Switzerland it receives commissions pursuant to Art. 34 para. 2bis of the Swiss Collective Investment Schemes Ordinance dated 22 November 2006. These commissions are paid out of the management fee as defined in the fund documentation. Further information regarding these commissions, including their calculation method, may be obtained upon written request from JPMorgan Asset Management (Switzerland) LLC, Dreikönigstrasse 37, 8002 Zurich.

Risk Indicator - The risk indicator assumes you keep the product for 5 year(s). The risk of the product may be significantly higher if held for less than the recommended holding period.

Current ongoing charge comprises annual management fee and operating & administrative expenses. Excludes transaction costs and may differ from ongoing costs as per KID which are an estimate based on the actual costs incurred over the past year.

Performance information

Source: J.P. Morgan Asset Management. Share class performance is shown based on the NAV (net asset value) of the share class with income (gross) reinvested including actual ongoing charges excluding any entry and exit fees. Performance is shown based on the NAV which may not be the same as the market price of the ETF. Individual shareholders may realise returns that are different to the NAV based returns.

The return of your investment may change as a result of currency fluctuations if your investment is made in a currency other than that used in the past performance calculation.

Indices do not include fees or operating expenses and you cannot invest in them.

The benchmark is for comparative purposes only unless specifically referenced in the Sub-Funds' Investment Objective and Policy.

Definitions

NAV Net Asset Value of a fund's assets less its liabilities per Share.

Correlation measures the strength and direction of the relationship between movements in fund and benchmark returns. A correlation of 1.00 indicates that fund and benchmark returns move in lockstep in the same direction.

Alpha (%) a measure of excess return generated by a manager compared to the benchmark. An alpha of 1.00 indicates that a fund has outperformed its benchmark by 1%.

Beta measures a fund's sensitivity to market movements (as represented by the fund's benchmark). A beta of 1.10 suggests the fund could perform 10% better than the benchmark in up markets and 10% worse in down markets, assuming all other factors remain constant. Usually the higher betas represent riskier investments.

Annualised volatility (%) measures the extent to which returns vary up and down over a given period.

Sharpe ratio performance of an investment adjusting for the amount of risk taken (compared a risk-free investment). The higher the Sharpe ratio the better the returns compared to the risk taken.

Tracking error (%) measures how much a fund's returns deviate from those of the benchmark. The lower the number the closer the fund's historic performance has followed its benchmark.

Information ratio measures if a manager is outperforming or underperforming the benchmark and accounts for the risk taken to achieve the returns. A manager who outperforms a benchmark by 2% p.a. will have a higher IR than a manager with the same outperformance but who takes more risk.
