Audited Annual Report

# JPMorgan ETFs (Ireland) ICAV

(An Irish collective asset-management vehicle constituted as an umbrella fund with segregated liability between Sub-Funds)

(CBI Reg No C171821)

31 December 2022

Report for the attention of Investors in Switzerland

Certain of the Sub-Funds or Share Classes of the Fund are not authorised for offer in Switzerland. Accordingly, no reference is made to these Sub-Funds or Share Classes in this annual report. The attention of the investors is drawn to the fact that certain figures in this annual report are expressed on a consolidated basis and, thus, include the assets of those Sub-Funds or Share Classes which are not registered in Switzerland.

Board of Directors' Report For the year ended 31 December 2022

The Board of Directors (the "Board") is pleased to present the Audited Annual Report of JPMorgan ETFs (Ireland) ICAV (the "Fund") for the year ended 31 December 2022.

#### **Board of Directors**

Lorcan Murphy (Independent Non-Executive Director, Chairman and Irish resident. A member of the Board since July 2017) is an Independent Non-Executive Director and marketing and distribution consultant for a number of Irish and UK companies providing 20 years' knowledge of global mutual funds, spanning operational management, risk management, compliance, product development and asset gathering. He is former Head of Private Wealth, EMEA and former Head of Pooled Funds Group with Barclays Global Investors Ltd. Mr Murphy has been admitted to the Institute of Chartered Accountants in Ireland and has a Bachelor of Business Science degree (Economics major) from Trinity College Dublin.

Daniel J. Watkins (Connected Non-Executive Director. A member of the Board since July 2017) is the Chief Executive Officer of Asia Pacific, J.P. Morgan Asset Management. He is responsible for overseeing the Asset Management Asia Pacific business, which operates in seven locations and includes more than 1,400 employees. Mr Watkins is a member of the Asset Management Operating Committee and the firm-wide Asia Pacific Management team. Mr Watkins has been an employee since 1997. Prior to taking his current role in 2019, he was Deputy CEO of JPMorgan Asset Management Europe and Global Head of AM Client Services and Business Platform. Mr Watkins has also held a number of positions at JPMorgan namely Head of Europe COO and Global IM Operations, Head of the European Operations Team, Head of the European Transfer Agency, Head of Luxembourg Operations, manager of European Transfer Agency and London Investment Operations and manager of the Flemings Investment Operations Teams. Mr Watkins obtained a BA in Politics from the University of York and is a qualified Financial Advisor. Mr Watkins is currently a Director of several JPMorgan managed Luxembourg and Irish domiciled investment funds and also several Asia Pacific legal entities.

Bronwyn Wright (Independent Non-Executive Director and Irish resident. A member of the Board since July 2017) is a former Managing Director for a global financial institution, having worked in Capital Markets and Banking, where she was Head of Securities and Fund Services for Ireland with responsibility for the management, growth and strategic direction of the securities and fund services business which included funds, custody, security finance and global agency and trust. Due to her role in managing, leading and growing the European fiduciary business, Ms Wright has extensive knowledge of regulatory requirements and best market practice in the UK, Luxembourg, Jersey and Ireland. She has sat and chaired the boards of the applicable legal vehicles for the fiduciary businesses in each jurisdiction. Due to her engagement in due diligence exercises she also understands the Nordics, Germany and Asia. She has also been engaged in pre-acquisition due diligence in Asia and led a post-acquisition integration across EMEA.

Ms Wright holds a degree in Economics and Politics as well as a Masters degree in Economics from University College Dublin. Ms Wright is past chairperson of the Irish Funds Industry Association Committee for Trustee Services. Bronwyn has contributed to the Irish Funds educational development in various capacities, including co-author of a Diploma in Mutual Funds, virtual web based lectures in financial services and part of an executive committee for a PhD finance programme. She has written numerous industry articles and chairs and participates in industry seminars in Europe and the US.

Samantha McConnell (Independent Non-Executive Director and Irish resident. A member of the Board since April 2020) has over 25 years' experience in the investment and pensions industry covering administration, investment services, change and integration management as well as expert in devising solutions to complex issues. She has acted as an independent, Non-Executive Director (INED) on a wide range of Boards including fund, MIFID, AIFIM and SuperManco entities for over seven years. She is the Chair of the investment committee in two of the AIFM boards as well as Chair of one of the MIFID entities. Ms McConnell is a Non-Executive Director for CFA Ireland and was previously an Executive Director of Willis Human Capital & Benefits (Willis Towers Watson's MIFID regulated entity in Ireland).

Ms McConnell holds a first-class honours degree in commerce from University College Dublin and graduated first in Ireland in the ACCA exams. She is a CFA Charterholder, a holder of the Institute of Directors Diploma in Company Direction where she graduated first in UK & Ireland and was awarded the Graduate of Merit award from the Institute of Directors.

## Structure of the Fund

The Fund is a variable capital investment company, organised as an "Irish Collective Asset-management Vehicle ("ICAV")", under the laws of the Republic of Ireland. The Board has appointed JPMorgan Asset Management (Europe) S.à r.l. ("JPMAME") as Management Company of the Fund. The Fund is organised as an "umbrella" with a number of Sub-Funds each of which has its own investment objective, policies and restrictions.

The Fund was authorised as an ICAV by the Central Bank of Ireland ("CBI") on 18 July 2017.

The objective of the ICAV is the collective investment in transferable securities and/or other liquid financial assets of capital raised from the public, operating on the principle of risk spreading in accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) (the "UCITS Regulations").

The Fund qualifies as an Undertaking for Collective Investment in Transferable Securities ("UCITS") under the EC Directive 2009/65/EC of 13 July 2009 and is subject to the Irish Collective Asset-management Vehicles Act 2015 (the "ICAV Act") and the UCITS Regulations. The Fund may therefore be offered for sale in European Union Member States, subject to notification in countries other than the Republic of Ireland. In addition, applications to register the Fund and its Sub-Funds may be made in other countries.

The Fund currently has 32 Sub-Funds of which 28 are registered in Switzerland. All of the Sub-Funds and Share Classes are registered for offer and distribution in the Republic of Ireland and a number of the Sub-Funds and Share Classes are registered for distribution in the following jurisdictions: Austria, Belgium, Croatia, Denmark, Finland, France, Germany, Italy, Liechtenstein, Luxembourg, The Netherlands, Norway, Portugal, Singapore, Spain, Sweden, Switzerland and the United Kingdom.

Certain share classes of all 32 Sub-Funds, are listed on one or more exchanges, the Euronext Dublin, London Stock Exchange, Borsa Italiana, Deutsche Borse, the Six Swiss Exchange, Mexican Stock Exchange (BMV) and Cboe Europe.

#### Role and Responsibility of the Board of Directors

The Directors' are responsible for preparing the directors' report and the financial statements in accordance with applicable law and the ICAV Act, the UCITS Regulations and International Financial Reporting Standards ("IFRS"), as adopted by the European Union.

The Directors are responsible for ensuring that accounting records as outlined in Sections 109-113 of the ICAV Act are kept by the Fund. To achieve this, JPMAME have appointed Brown Brothers Harriman Fund Administration Services (Ireland) Limited as administrator of the Fund (the "Administrator"). The accounting records are maintained at the offices of the Administrator at 30 Herbert Street, Dublin 2, Ireland.

The ICAV Act requires the directors to prepare financial statements for each financial year. Under the ICAV Act, the Directors have elected to prepare the financial statements in accordance with International Financial Reporting Standards as adopted by the European Union. Under the ICAV Act, the Directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the assets, liabilities and financial position of the Sub-Funds as at the financial year end date and of the profit or loss of the Sub-Funds for the financial year and otherwise comply with the ICAV Act.

Board of Directors' Report (continued) For the year ended 31 December 2022

In preparing those financial statements, the Directors are required to:

- · select suitable accounting policies and then apply them consistently;
- · make judgments and estimates that are reasonable and prudent;
- state whether they have been prepared in accordance with the applicable accounting standards, identify those standards, and note the effect and the
  reasons for any material departure from those standards; and
- · prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Fund will continue in business.

The financial statements are published on the Management Company's website. The Directors, together with the Management Company are responsible for the maintenance and integrity of the financial information included on this website. Legislation in the Republic of Ireland governing the presentation and dissemination of the financial statements may differ from legislation in other jurisdictions.

The Directors are responsible for ensuring the maintenance of adequate accounting records which disclose with reasonable accuracy at any time the assets, liabilities, financial position and profit or loss of the Sub-Funds and enable them to ensure that the financial statements comply with the ICAV Act and the UCITS Regulations. They have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the Fund. In this regard they have entrusted the assets of the Fund to Brown Brothers Harriman Trustee Services (Ireland) Limited (the "Depositary") for safe-keeping. The Directors have general responsibility for taking such steps as are reasonably open to them to prevent and detect fraud and other irregularities. The Directors are also responsible for preparing a Directors' Report that complies with the requirements of the ICAV Act.

#### **Board Governance**

A management agreement between the Fund and JPMAME sets out the matters over which the Board has delegated to the Management Company. This includes management of the Fund's assets and the provision of administration, registration, domiciliation agent and marketing services. All other matters are reserved for approval by the Board and a schedule setting out such matters for clarity is in place between the Board and the Management Company. The matters reserved for the Board include determination of each Sub-Fund's investment objective and policies, investment restrictions and powers, amendments to the Prospectus and Supplements, reviewing and approving key investment and financial data, including the annual accounts, as well as the appointment of, and review of the services provided by, the Management Company, Auditor and Depositary.

Prior to each Board meeting the Directors receive detailed and timely information allowing them to be prepared for the items under discussion during the meeting. For each quarterly meeting the Board requests, and receives, reports from, amongst others, the Management Company, the investment managers, risk management as well as proposals for changes to existing Sub-Funds or proposals to launch new ones as appropriate. Senior representatives of each of these functions attend Board meetings by invitation to enable the Directors to question the reports presented to them.

The Directors take decisions in the interests of the Fund and its shareholders as a whole and refrain from taking part in any deliberation or decision which creates a conflict of interest between their personal interests and those of the Fund and its shareholders. The subject of conflicts of interest is documented in the Prospectus and the Management Company's policy on conflicts of interest is available for inspection on the website: https://am.jpmorgan.com/content/dam/jpm-am-aem/emea/lu/en/communications/lux-communication/conflicts-of-interest-ce-en.pdf

The Board can take independent professional advice if necessary and at the Fund's expense.

## **Board Composition**

The Board is chaired by Mr Murphy and currently consists of two Independent Non-Executive Directors and one Connected Non-Executive Director. The Board defines a Connected Non-Executive Director as someone who is employed by JPMorgan Chase & Co. or any of its affiliates but who is not directly involved in the primary business of the Fund which in this case is investment management and an Independent Non-Executive Director as someone who is free of any business, family or other relationship with the Fund or JPMorgan Chase & Co. or any of its affiliates.

In appointing a Director the Board takes into account the relative mix and composition of the Board, which as a whole has a breadth of investment knowledge, financial skills, as well as other experience relevant to the Fund's business.

The Board does not limit the number of years of Directors' service and it does take into account the nature and requirements of the fund industry and of the Fund's business when appointing Directors. The terms of each Director's appointment are set out in a letter of appointment.

#### Induction and Training

All new Directors will receive an induction incorporating relevant information regarding the Fund and their duties and responsibilities as a Director. In addition, the Board takes active steps to keep up to date with developments relevant to the Fund and have ensured that a formal training programme is in place.

## **Board Evaluation**

The Board carries out an annual review of its performance, which is formally documented every other year.

#### **Board Remuneration**

The Board believes that the remuneration of its members should reflect the responsibilities and experience of the Board as a whole and be fair and appropriate given the size, complexity and investment objectives of the Fund. The remuneration is reviewed on an annual basis. The Chairman is paid EUR 45,000 and the other Directors EUR 40,000 per annum. The Connected Non-Executive Director has agreed to waive his remuneration. No element of the remuneration paid by the Fund to the Directors is performance related.

## Board Meetings and Committees

The Board meets quarterly but if necessary additional meetings will be arranged. Given the scope and nature of the business of the Fund, the Board does not currently consider it necessary to have a formal Audit or Remuneration Committee or indeed any other standing committees. However, this is kept under review. All Board related matters are therefore currently approved by the Board or, where there are specific matters that need further consideration, a Sub-Committee of the Board could be formed for this specific purpose. Such circumstances could be where the Board requests some amendments to the Prospectus and where it is not appropriate to wait till the next quarterly Board meeting for this to be approved. These Sub-Committee meetings are usually formed of a minimum of two Directors.

There were nine Board meetings held during the year. Four of these were quarterly Board meetings where, amongst other matters, the agenda included those items highlighted under the section above called 'Role and Responsibility of the Board of Directors.' The remainder were ad hoc Board meetings.

#### Internal Contro

Investment management and all administrative services are provided by the Management Company or its delegates and custody of assets is provided by Brown Brothers Harriman Trustee Services (Ireland) Limited. The Board's system of internal control therefore mainly comprises monitoring the services provided by the Management Company and the Depositary, including the operational and compliance controls established by them to meet the Fund's obligations to shareholders as set out in the Prospectus, Instrument of Incorporation as well as all relevant regulations. The Management Company formally

Board of Directors' Report (continued)

For the year ended 31 December 2022

reports to the Board on a quarterly basis on the various activities it is responsible for and in addition shall inform the Board without delay of any material administrative or accounting matters.

Corporate Governance and Irish Funds Industry Association Code of Conduct

The Board is responsible for ensuring that a high level of corporate governance is met and considers that the Fund has complied with the best practices in the Irish funds industry and the Listing Rules of the Euronext Dublin, London Stock Exchange, Borsa Italiana, Deutsche Borse, the Six Swiss Exchange, Mexican Stock Exchange (BMV) and the Cboe Europe, where applicable.

In particular the Board has adopted the Irish Funds Industry Association Code of Conduct (the "Code") which sets provisions on good governance in the following areas:

- 1. Composition of the Board
- 2. Chairperson
- 3. Independent Directors
- 4. Role of the Board
- 5. Appointments
- 6. Meetings
- 7. Reserved Powers
- 8. Compliance
- 9. Delegates
- 10. Risk Management, Audit, Control & Compliance

The Board considers that the Fund has been in compliance with the principles in all material aspects throughout the financial year ended 31 December 2022. The Board will undertake an annual review of ongoing compliance with the Code.

The Code can be obtained from the Irish Funds website at https://www.irishfunds.ie/regulatory-technical/corporate-governance.

#### Proxy Voting Policy

The Board delegates responsibility for proxy voting to the Management Company. The Management Company manages the voting rights of the shares entrusted in a prudent and diligent manner, based exclusively on the reasonable judgement of what will best serve the financial interests of clients. So far as is practicable, the Management Company will vote at all of the meetings called by companies in which they are invested.

A copy of the J.P. Morgan Asset Management Global Proxy Voting Policy is available from the Fund's registered office upon request or on the website: https://am.jpmorgan.com/content/dam/jpm-am-aem/global/en/institutional/communications/lux-communication/corporate-governance-principles-an d-voting-guidelines.pdf

#### **Directors and Officers Indemnity Insurance**

The Fund's Instrument of Incorporation indemnifies the Directors against expenses reasonably incurred in connection with any claim against them arising in the course of their duties or responsibilities as long as they have not acted fraudulently or dishonestly. To protect shareholders against any such claim, the Board has taken out Directors and Officers Indemnity Insurance which indemnifies the Directors against certain liabilities arising in the course of their duties and responsibilities but does not cover against any negligent, fraudulent or dishonest actions on their part.

## Review of Performance and Fund Business

A review of the Fund's performance and activities for the year ended 31 December 2022 is included in the Investment Manager's Report.

#### Risk Management Objectives and Policies

The principal risks faced by the Fund are the investment risks associated with the portfolio of investments of each of the Sub-Funds and the operational risks associated with their management and administration.

The main risks of the Sub-Funds and the policies and procedures to manage financial risks are outlined in Note 10.

## Directors' Interests in Shares of the Fund

No Director, nor the Company Secretary, had any beneficial interest in the shares of the Fund during the year.

Other than as disclosed in Note 12 to the financial statements, there were no contracts or agreements of any significance in relation to the business of the Fund in which the Directors had any interest, as defined in the Act, at any time during the year.

## Transactions with Connected Persons

The UCITS Regulations require that any transaction carried out with the Fund by a manager or depositary to the UCITS, the delegates or sub-delegates of the manager or depositary, and any associated or group companies of such a manager, depositary, delegate or sub-delegate ("connected persons") must be carried out as if negotiated at arm's length. Transactions must be in the best interests of the shareholders.

The Directors are satisfied that there are arrangements (evidenced by written procedures) in place, to ensure that the obligations set out in Regulation 41(1) of the Central Bank UCITS Regulations are applied to all transactions with connected persons, and are satisfied that transactions with connected parties entered into during the year complied with the obligations set out in Regulation 41(1) of the Central Bank UCITS Regulations.

The connected persons are the Management Company and the Investment Manager; the Administrator and the Depositary. The relevant fees charged by these connected persons are detailed in Note 12.

## **Key Performance Indicators**

The key performance indicators monitored for each Sub-Fund include the performance of the Sub-Funds and compliance with investment restrictions and risk limits. The performance of the Sub-Funds is reviewed in the Investment Manager's Reports on pages 6 to 10.

#### Distributions

All distributions declared for the Sub-Funds during the year are disclosed in Note 13.

## **Employees**

The Fund had no employees during the year ended 31 December 2022.

Board of Directors' Report (continued) For the year ended 31 December 2022

## **Future Developments**

The Fund will continue to act as an investment vehicle as set out in the Prospectus.

#### **Independent Auditor**

PricewaterhouseCoopers, Chartered Accountants and Registered Auditors, were appointed in accordance with the ICAV Act and have expressed their willingness to continue in office.

#### **Annual General Meeting**

The Board have exercised their discretion and dispensed with annual general meetings in accordance with the Act and the Fund's Instrument of Incorporation.

## **Privacy Policy**

The Management Company complies with a privacy policy that has been issued by J.P. Morgan Asset Management which can be accessed at www.jpmorgan.com/emea-privacy-policy. This policy was updated to comply with the General Data Protection Regulation.

## Environmental Social Governance ("ESG")

In accordance with Article 11(1) of Regulation (EU) 2019/2088, for financial products promoting environmental or social characteristics and objectives, details of these are shown in Appendix 6.

## Significant events

As at the year end, the Fund's net assets amounted to USD 10.4 billion.

Please refer to Notes 19 and 20 and to Appendix 5 for details of the significant events during the year and after the year end.

On behalf of the Board

Lorcan Murphy Director

Date: 20 April 2023

Bronwyn Wright Director

Date: 20 April 2023

Investment Manager's Report For the year ended 31 December 2022

## JPMorgan ETFs (Ireland) ICAV - Global Equity Multi-Factor UCITS ETF JPMorgan ETFs (Ireland) ICAV - Global Research Enhanced Index Equity (ESG) UCITS ETF

After three consecutive years of strong positive returns, 2022 turned out to be a challenging one for global equities. Economic implications of the Russian invasion of Ukraine, elevated inflation, monetary policy tightening, supply chain disruptions and recessionary fears led to increased volatility and negatively impacted investor sentiment. However, the final quarter of the year brought in some relief.

Expectations for the path of monetary policy has seen a major shift with central banks turning more hawkish as they continue to face challenges in bringing inflation under control. The US Federal Reserve (Fed) increased rates at its fastest pace since the early '80's and the Federal funds rate target range is now at 4.25% - 4.50%, having started the year at 0% - 0.25%. While the European Central Bank also lifted rates swiftly from negative territory and the Bank of England delivered nine consecutive interest rates hike, resulting in a 14-year high of 3.50%. Currencies, as an extension of interest rates, were also volatile as the US dollar rose materially given the Fed's leadership in the monetary tightening, a key challenge for markets during the year.

Against this backdrop, the overall economic situation changed materially through the year, fuelling worries about a possible recession. The US economy showed signs of softening as elevated inflation, weaker demand and higher borrowing costs continued to impact activity levels. Weak demand conditions were broad-based, though manufacturing firms saw a steeper decrease in new orders compared to their services sector counterparts based on the December month S&P Global Flash US Purchasing Managers' Index (PMI) figures. Additionally, existing home sales fell for the 10th straight month in November as the housing market was squeezed by higher mortgage rates.

JPMorgan ETFs (Ireland) ICAV - Beta Builders US Equity UCITS ETF
JPMorgan ETFs (Ireland) ICAV - Beta Builders US Small Cap Equity UCITS ETF
JPMorgan ETFs (Ireland) ICAV - US Research Enhanced Index Equity (ESG) UCITS ETF

The S&P 500 Index had its worst year since 2008, returning -18.11% for 2022. The communication services and consumer discretionary sector were the worst performing sectors during the year, returning -39.89% and -37.03% respectively. The energy and utilities sector were the sole positive performers, returning 65.72% and 1.47%, respectively.

Developed markets equity experienced their worst first-half performance in more than two decades. U.S. companies faced rising interest rates, a contraction in manufacturing and weaker consumer sentiment. Earnings forecasts for 2023 were sharply reduced toward the end of the year amid increasing concerns about the potential for an economic recession.

The S&P 500 Index outperformed the Russell 2000 Index, which returned -20.43%, and the Russell 3000 Value Index returned -7.99%, while the Russell 3000 Growth Index returned -28.97%.

# JPMorgan ETFs (Ireland) ICAV - Europe Research Enhanced Index Equity (ESG) UCITS ETF JPMorgan ETFs (Ireland) ICAV - Eurozone Research Enhanced Index Equity (ESG) UCITS ETF

Europe remains in the eye of the storm, where even after ten months of the war in Ukraine there are no signs of a ceasefire. Inflationary pressures and the resultant squeeze on real incomes continued to moderate demand and the seasonally adjusted S&P Global Eurozone Flash PMI® Composite Output Index fell below the crucial 50.0 mark, indicating a contraction. Higher energy prices are getting more and more reflected in European production prices and Eurozone inflation continues to remain at elevated levels.

## JPMorgan ETFs (Ireland) ICAV - UK Equity Core UCITS ETF

U.K. equities remained broadly flat for 2022, one of the best performing regions during the year. This was largely due to the composition of the U.K. market, as investors found more attractive valuations compared with other regions. Meanwhile, the Bank of England continued to tighten monetary policy as the war in Ukraine drove energy prices higher and led to record high inflationary pressures and a drop in consumer confidence. Spiralling food and energy prices continued to intensify the squeeze on households. Consequently, consumer confidence fell to an all-time low in September and the PMI business survey is in contractionary territory.

## JPMorgan ETFs (Ireland) ICAV - Japan Research Enhanced Index Equity (ESG) UCITS ETF

Japanese equity markets recorded negative returns in 2022, following three consecutive positive years. During 2022, the TOPIX declined -2.9% in local currency terms. In December, the Bank of Japan unveiled plans to increase the upper limit on the 10-year Japanese government bond, which impacted the domestic equity market toward the end of the year. During 2022, the Japanese yen declined against the U.S. dollar, at one point reaching a 32-year low of 150 yen to dollar. Sectors that enjoyed gains during the year included the mining, banks and marine transportation sectors, while the electric appliances, services and precision instruments sectors were leading decliners. The rise in U.S. interest rates drove investors to buy up financial sector stocks and other sectors that had attractive valuations. At the same time, the sell-off of stocks in high-growth sectors, including semiconductors and software stocks, resulted in substantial negative returns for quality factors.

## JPMorgan ETFs (Ireland) ICAV - Global Emerging Markets Research Enhanced Index Equity (ESG) UCITS ETF

Emerging markets equity ended the year down 20% in USD terms impacted by Russia's invasion of Ukraine, higher interest rates, a strong U.S. dollar, and China's zero-covid policies and its property sector weakness. The asset class lagged behind developed markets equity, albeit marginally. After falling for three consecutive quarters, emerging markets showed signs of a recovery in the fourth quarter, climbing nearly 10%, as China lifted its strict pandemic policies and provided support for the property sector. For the full year, Eastern Europe was the worst-performing region, mostly due to declines in Russia, and to a lesser extent also in Hungary and Poland. In Asia, equities in South Korea, Taiwan and China all slumped, while higher commodity prices provided support for Latin American equities led by Chile, Peru and Brazil.

## JPMorgan ETFs (Ireland) ICAV - China A Research Enhanced Index Equity (ESG) UCITS ETF

China's equity markets slumped for most of 2022, amid the nation's strict pandemic lock-downs, inflationary pressures, a tumbling property market, a strong U.S. dollar, rising interest rates and the increased potential for an economic recession in some developed markets. The fourth quarter of 2022 saw a marked shift in the economic fundamentals for China, which bolstered the equity market. China's central bank and its financial regulator unveiled credit support measures targeting the real estate sector and the Chinese government rescinded pandemic containment policies in the final months of 2022.

## JPMorgan ETFs (Ireland) ICAV - AC Asia Pacific ex Japan Research Enhanced Index Equity (ESG) UCITS ETF

Asian Pacific equities largely fell in 2022. However, the markets rallied in the fourth quarter, boosted, first by a set of Chinese government credit support measures for the real estate market and then by a rapid re-opening following China's decision to lift strict anti-pandemic policies.

Investment Manager's Report (continued) For the year ended 31 December 2022

## JPMorgan ETFs (Ireland) ICAV - Climate Change Solutions UCITS ETF

The names aligned to the theme of Climate Change Solutions experienced diverging fortunes over the first and second halves of the year. Russia's invasion of Ukraine and the ongoing conflict there caused a sharp tightening of demand for oil and natural gas and saw the energy sector outperform meaningfully. This was especially detrimental to names aligned to the theme on a relative return basis. During this first half of the year many names exposed to materials and farming products performed especially well.

The second half of the year and in particular the final quarter bought relief to our investment universe as economic data suggested inflation had peaked in the US prompting speculation that the overall pace of interest rate hikes may moderate. Companies aligned to renewable energy, electrification and automation performed especially well in the second half of the year.

Despite a volatile year, we expect to see capital being deployed by companies in the solutions space continue to grow as technology becomes more widely adopted and the pace of innovation increases. We expect the overall cost of many of these solutions to diminish as the economies of scale are felt more widely, leading to more and more adoption around the world.

#### JPMorgan ETFs (Ireland) ICAV - Carbon Transition Global Equity (CTB) UCITS ETF

From a relative performance perspective, Security selection in Health Care and Communication sectors contributed to performance. Overweight positions in Cigna, Eli Lilly & Co, Merck & Co and AbbVie within the Health Care sector added value as the stocks rallied over the year. An underweight position in Netflix within the Communications sector helped performance as the stock detracted. At an individual security level, an overweight position in ConocoPhillips contributed to performance as the stock rose over the period. Security selection in the Information Materials and Energy sectors were the main detractors to performance. Underweight positions in Exxon Mobil and Chevron within the Energy sector detracted from performance as the stocks rallied in 2022.

This sub-fund seeks to achieve a reduction in carbon intensity without relying on exclusions or sector deviations while focusing on individual security selection by overweighting winners of the carbon transition and avoiding the companies that face greater risk. The portfolio takes a comprehensive approach to transition readiness that considers both risks and opportunities by evaluating companies based on how well they manage Greenhouse gas emissions, Resources and Climate related risks. This results in a meaningful reduction in carbon intensity relative to the MSCI World Index.

JPMorgan ETFs (Ireland) ICAV - BetaBuilders EUR Govt Bond 1-3 yr UCITS ETF JPMorgan ETFs (Ireland) ICAV - BetaBuilders EUR Govt Bond UCITS ETF JPMorgan ETFs (Ireland) ICAV - BetaBuilders US Treasury Bond 0-1 yr UCITS ETF JPMorgan ETFs (Ireland) ICAV - BetaBuilders US Treasury Bond 1-3 yr UCITS ETF JPMorgan ETFs (Ireland) ICAV - BetaBuilders US Treasury Bond UCITS ETF
```

In 2022, with the Fed late to remove monetary policy accommodation, labour markets tightening, supply chain constraints lingering, and Russia's war on Ukraine sparking an energy crisis, headline and core inflation accelerated to four-decade highs. This forced the Fed to tighten aggressively, delivering 425bp of hikes in 2022, outpacing every tightening cycle over the last 30 years. Against this backdrop, Treasury yields across the curve rose to their highest levels in more than 12 years, though spread products were reasonably well behaved, as the economy has been surprisingly resilient to tightening financial conditions as labour markets remained fairly tight and job growth remained buoyant. With aggressively tight monetary policy in the major economies, inflation has started to moderate, however, remains elevated. Going into the new year, investors are paying close attention to the labour market trajectory as it will determine the course of monetary policy over the year. While there are headwinds to growth outlook due to lagged impact from monetary policy tightening and recession remains our base case coming into the year, falling energy prices in Europe and reopening in China are offering investors some reasons for optimism.

In terms of central bank actions, the European Central Bank (ECB) announced rate hikes of 75 basis points (bps) each in October and November, while the Federal Reserve (Fed) hiked rates by 75bps in November and 50bps in December. The statement language released by the Fed was almost identical to the November statement, suggesting the committee continues to lean hawkish. In the UK, a combination of high inflation and solid labour markets continued to support hawkish action from the central bank.

```
JPMorgan ETFs (Ireland) ICAV - EUR Ultra-Short Income UCITS ETF JPMorgan ETFs (Ireland) ICAV - RMB Ultra-Short Income UCITS ETF JPMorgan ETFs (Ireland) ICAV - USD Ultra-Short Income UCITS ETF
```

The EUR and USD ultra-short income ETFs each underperformed its benchmark in 2022. The rise in short-dated yields during the year, which ultimately meant that bonds with longer maturities fell sharply. The 2-year EUR and GBP government bond yields rose by about 300 basis points during the year, while the 2-year USD Treasury bond yields rose by about 350 basis points. The Sub-Funds' strategy of holding a short-duration position for most of the year helped to minimise volatility.

Meanwhile, China's zero-covid policies, property sector weakness and declining exports pushed its economy to the brink of recession. Slower economic growth drove yields lower on bonds and money market securities and China's currency depreciated sharply against the U.S. dollar. These factors, combined with rising U.S. interest rates and higher U.S. Treasury bond yields prompted investors to pivot away from Chinese bonds. The RMB ultra-short income ETF outperformed its benchmark during the period from launch in March 2022 to the end of the year.

We expect cheaper valuations and more stable investor expectations about U.S. Federal Reserve monetary policy should allow ultra-short income ETFs to deliver returns for 2023.

JPMorgan ETFs (Ireland) ICAV - EUR Corporate Bond 1-5 yr Research Enhanced Index (ESG) UCITS ETF JPMorgan ETFs (Ireland) ICAV - EUR Corporate Bond Research Enhanced Index (ESG) UCITS ETF JPMorgan ETFs (Ireland) ICAV - USD Corporate Bond Research Enhanced Index (ESG) UCITS ETF
```

Geopolitical risks, inflation and central banking remained at the forefront of investors' minds over the year. However, there were some reasons for optimism. Global supply chain constraints continued to ease, and European governments took further steps to dampen the impact of the energy crisis and mitigate the risks of a harsh recession. Flash Purchasing Managers' Indices (PMIs) for October confirmed an economic slowdown in many developed markets. While recession risks were clearly rising, we continued to see factors that may help to mitigate the depth of any downturn. In the US, labour markets remained strong and the housing market appears to pose far fewer systemic risks compared to the problems that led to the global financial crisis. Europe announced new plans to tackle the energy crisis that included a price cap and a common purchases system. These measures, together with new fiscal stimulus support of €40bn, is expected to help both households and businesses. With storage tanks full and the weather proving unseasonably warm, gas prices continued to move lower.

In December inflation concerns remained, though it seemed the approach of central banks was softening, and a slower pace of rate hikes could be expected in early 2023. US Inflation came in below expectations for the second consecutive month and reinforced the turning tide on inflation as nearly every major category showed easing price pressures. In Europe, inflation data continues to show signs of softening, however the ECB remain clear that whilst the pace of rate hikes could slow, their intention is to continue tightening to quash inflation.

Investment Manager's Report (continued) For the year ended 31 December 2022

## JPMorgan ETFs (Ireland) ICAV - Global High Yield Corporate Bond Multi-Factor UCITS ETF

The past year was one of the worst for high yield bonds, with both the U.S. high yield (USHY) and European high yield (EHY) markets falling by more than 11%. The year began with a 4.3% USHY market yield and a 2.9% EHY market yield, before quickly climbing and ultimately more than doubling through the year. However, high yield market fundamentals remained solid by most measures, as companies had paid down debt and refinanced when interest rates were low. Additionally, the default rate remained muted and technicals turned from balanced to supportive during the year. New issuance was down significantly in 2022, following record issuance in 2020 and 2021. Overall, high yield markets outperformed higher quality fixed income and equities.

The high yield asset class entered 2023 from a position of strength. Bonds rated BB account for about 50% of the USHY market and more than 66% of the EHY market, and default rates are below 1% for both. The technical backdrop is positive with muted new issuance and tight supply. The USHY market is pricing in a default rate of about 4%, which is at the high end of our base case estimates. USHY yields are greater than their 15-year average, and both yields and yield spreads offer an attractive entry point for investors. Within EHY, we do not expect financial conditions to ease, given the effects of inflation on consumer savings and corporate earnings and borrowing costs that remain substantially higher than current coupons. We see the European real estate sector as the most exposed to refinancing and default risk.

## JPMorgan ETFs (Ireland) ICAV - USD Emerging Markets Sovereign Bond UCITS ETF

As a smaller asset class tracking a large geographical area, emerging markets bond returns are sensitive to external developments, especially when those events elevate investors' risk perception.

Russia's invasion of Ukraine in late February 2022, led to multilateral sanctions that froze Russian assets around the world. European energy prices rose rapidly amid broad fears of a supply shock. The global grain market briefly went into backwardation as countries scrambled for physical grain supplies, which put further pressure on emerging markets.

During the year, emerging markets central bankers began to reap the benefit of raising rates more aggressively in the early phases of the inflationary cycle, finding themselves ahead of developed market central banks. The result was an early cooling of inflation, balanced by a stabilising emerging markets economic growth rate. Generally, the first three quarters of the year were dominated by technical-driven selling in emerging markets and the final quarter saw a gradual increase in investor support for asset prices amid resilience in emerging market economies.

China's moves to rescind pandemic restrictions and re-open its economy also contributed to the improvement in investor sentiment toward the end of the year.

During the year, the portfolio shifted from a defensive posture to a more moderate stance toward risk via longer duration exposure and an emerging markets currencies sleeve that included active positions in the Thai baht, Czech Republic and Chilean interest rates.

We continue to believe emerging markets corporate fundamentals are strong, though the challenges of slowing global growth remain are beginning to be felt more meaningfully. Looking ahead, we expect to see differentiation in emerging markets corporate issuers in 2023, as companies with strong balance sheets should be able to continue to access capital, while weaker issuers may struggle. That said, we believe valuations in emerging markets corporate bonds continues to provide investment opportunities. Overall, the portfolio maintains a shorter duration than its benchmark, balanced against a foreign exchange position beta that is slightly long of the benchmark.

## JPMorgan ETFs (Ireland) ICAV - BetaBuilders China Aggregate Bond UCITS ETF

2022 was a challenging year for China's economy and bond market owing to a combination of domestic and global factors. Stringent Covid-19 containment measures (so-called zero-Covid policy) weighed heavily on growth, impacting practically all sectors of China's economy.

In response, Chinese authorities announced multiple fiscal and monetary policy measures to stimulate growth and in November started relaxing its zero-Covid policy, including easing travel restrictions and quarantine rules. In addition, the government presented a comprehensive package to support the real estate sector in order to stimulate investment and housing construction activity. This helped to stabilise economic activity in the fourth quarter of 2022. However, monetary tightening in the US coupled with monetary easing in China resulted in a weaker CNY exchange rate, which adversely impacted local currency bond market returns in USD in 2022.

\*Please note that JPMorgan ETFs (Ireland) ICAV - US Equity Multi-Factor UCITS ETF was closed in the fourth quarter and has been excluded from the commentary.

Report of the Depositary to the Shareholders For the year ended 31 December 2022

We have enquired into the conduct of the JPMorgan ETFs (Ireland) ICAV (the "Fund") for the year ended 31 December 2022 in our capacity as Depositary to the Fund.

This report including the opinion has been prepared for and solely for the Shareholders in the Fund, in accordance with Part 5 of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended, ("the UCITS Regulations"), and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

#### Responsibilities of the Depositary

Our duties and responsibilities are outlined in Part 5 of the UCITS Regulations. One of those duties is to enquire into the conduct of the Fund in each annual accounting period and report thereon to the Shareholders. Our report shall state whether, in our opinion, the Fund has been managed in that period in accordance with the provisions of the Fund's Instrument of Incorporation of the Fund and the UCITS Regulations. It is the overall responsibility of the Fund to comply with these provisions. If the Fund has not so complied, we as Depositary must state why this is the case and outline the steps which we have taken to rectify the situation.

## **Basis of Depositary Opinion**

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in Part 5 of the UCITS Regulations and to ensure that, in all material respects, the Fund has been managed (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of the Instrument of Incorporation of the Fund and the appropriate regulations and (ii) otherwise in accordance with the Fund constitutional documentation and the appropriate regulations.

#### Opinion

In our opinion, the Fund has been managed during the year, in all material respects:

(i) in accordance with the limitations imposed on the investment and borrowing powers of the Fund by the Instrument of Incorporation of the Fund, the UCITS Regulations and the Central Bank UCITS Regulations, and

(ii) otherwise in accordance with the provisions of the Instrument of Incorporation of the Fund, the UCITS Regulations and the Central Bank UCITS Regulations.

Brown Brothers Harriman Trustee Services (Ireland) Limited, 30 Herbert Street, Dublin 2, Ireland

20 April 2023

## Independent auditors' report to the shareholders of the Sub-Funds of JPMorgan ETFs (Ireland) ICAV

## Report on the audit of the financial statements

#### Opinion

In our opinion, JPMorgan ETFs (Ireland) ICAV's financial statements:

- give a true and fair view of the Sub-Funds' assets, liabilities and financial position as at 31 December 2022 and of their results and cash flows for the year then ended;
- · have been properly prepared in accordance with International Financial Reporting Standards ("IFRSs") as adopted by the European Union; and
- have been properly prepared in accordance with the requirements of the Irish Collective Asset-management Vehicles Act 2015 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended).

We have audited the financial statements, included within the Audited Annual Report, which comprise:

- the Statement of Financial Position as at 31 December 2022;
- the Statement of Comprehensive Income for the year then ended;
- · the Statement of Cash Flows for the year then ended;
- · the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares for the year then ended;
- the Schedule of Investments for each of the Sub-Funds as at 31 December 2022; and
- the notes to the financial statements for each of the Sub-Funds, which include a description of the significant accounting policies.

Our opinion is consistent with our reporting to the Board of Directors.

## Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) ("ISAs (Ireland)") and applicable law.

Our responsibilities under ISAs (Ireland) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Independence

We remained independent of the ICAV in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, which includes IAASA's Ethical Standard as applicable to listed public interest entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

To the best of our knowledge and belief, we declare that non-audit services prohibited by IAASA's Ethical Standard were not provided to the ICAV.

We have provided no non-audit services to the ICAV in the period from 1 January 2022 to 31 December 2022.

#### Emphasis of matter - financial statements prepared on a basis other than going concern

In forming our opinion on the financial statements, which is not modified, we draw attention to note 2 to the financial statements which describes the reasons why the financial statements of JPMorgan ETFs (Ireland) ICAV - US Equity Multi-Factor UCITS ETF have been prepared on a basis other than going concern.

#### Our audit approach

#### Overview

#### Materiality

- Overall materiality: 50 basis points (2021: 50 basis points) of Net Assets Value ("NAV") at 31 December 2022 (2021: 31 December 2021) for each of the ICAV's Sub-Funds.
- Performance materiality: 75% of overall materiality.

#### Audit scope

The ICAV is an open-ended investment ICAV with variable capital and engages JPMorgan Asset Management (Europe) S.a.r.l (the "Management Company") to manage certain duties and responsibilities with regards to the day-to-day management of the ICAV. We tailored the scope of our audit taking into account the types of investments within the Sub-Funds, the involvement of the third parties referred to below, the accounting processes and controls, and the industry in which the ICAV operates. We look at each of the Sub-Funds at an individual level.

#### Key audit matters

· Valuation and existence of financial assets and liabilities at fair value through profit or loss.

## The scope of our audit

As part of designing our audit, we determined materiality and assessed the risks of material misstatement in the financial statements. In particular, we looked at where the directors made subjective judgements, for example the selection of pricing sources to value the investment portfolio. As in all of our audits, we also addressed the risk of management override of internal controls, including evaluating whether there was evidence of bias by the directors that represented a risk of material misstatement due to fraud.

## Key audit matters

Key audit matters are those matters that, in the auditors' professional judgement, were of most significance in the audit of the financial statements of the current period and include the most significant assessed risks of material misstatement (whether or not due to fraud) identified by the auditors, including those which had the greatest effect on: the overall audit strategy; the allocation of resources in the audit; and directing the efforts of the engagement team. These matters, and any comments we make on the results of our procedures thereon, were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. This is not a complete list of all risks identified by our audit.

## Key audit matter

Valuation and existence of financial assets and liabilities at fair value through profit or loss.

See accounting policy 2(c) of the financial statements for further details.

The financial assets and financial liabilities at fair value through profit or loss included in the Statement of Financial Position of each Sub-Fund are held in the Sub-Fund's name at 31 December 2022.

The financial assets and liabilities at fair value through profit or loss included in the Statement of Financial Position of each Sub-Fund are measured at fair value in line with International Financial Reporting Standards as adopted by the European Union as disclosed in Note 2(c) of the financial statements.

This is considered a key audit matter as it represents the principal element of the financial statements.

## How our audit addressed the key audit matter

We obtained independent confirmation from the Depositary and external counterparties (as applicable) of the investment portfolio held as at 31 December 2022, agreeing the amounts held to the accounting records.

For some Forward currency contracts where we did not receive counterparty confirmations, and which have already matured we liquidated these to bank statements to verify that they were in existence as at 31 December 2022.

We tested the valuation of investments by independently agreeing to third party vendor sources where possible. For some short-term investments (commercial paper and certificates of deposit) which we could not price using independent third-party vendors, we corroborated management's price source and we engaged internal experts to perform an independent valuation and compared their results to the portfolio.

For some equity positions where we could not price using independent third-party vendors, we corroborated management's price source.

No material issues were identified from the results of these procedures.

#### How we tailored the audit scope

We tailored the scope of our audit to ensure that we performed enough work to be able to give an opinion on the financial statements as a whole, taking into account the structure of the ICAV, the accounting processes and controls, and the industry in which it operates.

The Board of Directors control the affairs of the ICAV and are responsible for the overall investment policy which is determined by them. The ICAV engages the Management Company to manage certain duties and responsibilities with regards to the day to day management of the ICAV. The Management Company has delegated certain responsibilities to J.P. Morgan Investment Inc and JPMorgan Asset Management (UK) Limited (the 'Investment Managers') and to Brown Brothers Harriman Fund Administration Services (Ireland) Limited (the 'Administrator'). The financial statements, which remain the responsibility of the Board of Directors, are prepared on their behalf by the Administrator. The ICAV has appointed BrownBrothers Harriman Trustee Services (Ireland) Limited (the "Depositary") to act as Depositary of the ICAV's assets. In establishing the overall approach to our audit we assessed the risk of material misstatement at a Sub-Fund level, taking into account the nature, likelihood and potential magnitude of any misstatement. As part of our risk assessment, we considered the ICAV's interaction with the Administrator, and we assessed the control environment in place at the Administrator.

#### Materiality

The scope of our audit was influenced by our application of materiality. We set certain quantitative thresholds for materiality. These, together with qualitative considerations, helped us to determine the scope of our audit and the nature, timing and extent of our audit procedures on the individual financial statement line items and disclosures and in evaluating the effect of misstatements, both individually and in aggregate on the financial statements as a whole.

Based on our professional judgement, we determined materiality for the financial statements of each of the ICAV's Sub-Funds as follows:

| Overall materiality and how we determined it | 50 basis points (2021: 50 basis points) of Net Assets Value ("NAV") at 31 December 2022 (2021: 31 December 2021) for each of the ICAV's Sub-Funds.                                       |
|--|--|
| Rationale for benchmark applied              | We have applied this benchmark because the main objective of the ICAV is to provide investors with a total return at a sub-fund level, taking account of the capital and income returns. |

We use performance materiality to reduce to an appropriately low level the probability that the aggregate of uncorrected and undetected misstatements exceeds overall materiality. Specifically, we use performance materiality in determining the scope of our audit and the nature and extent of our testing of account balances, classes of transactions and disclosures, for example in determining sample sizes. Our performance materiality was 75% of overall materiality.

In determining the performance materiality, we considered a number of factors - the history of misstatements, risk assessment and aggregation risk and the effectiveness of controls - and concluded that an amount at the upper end of our normal range was appropriate.

We agreed with the Board of Directors that we would report to them misstatements identified during our audit above 5 basis points of each sub-fund's NAV, for NAV per share impacting differences (2021: 5 basis points of each sub-fund's NAV, for NAV per share impacting differences) as well as misstatements below that amount that, in our view, warranted reporting for qualitative reasons.

#### Conclusions relating to going concern

With the exception of JPMorgan ETFs (Ireland) ICAV - US Equity Multi-Factor UCITS ETF where a basis of accounting other than going concern has been adopted as set out in the Emphasis of matter - financial statements prepared on a basis other than going concern above, our evaluation of the directors' assessment of the Sub-Funds' ability to continue to adopt the going concern basis of accounting included:

- · Reviewing the liquidity profile of the assets and liabilities, for any significant mismatches, as detailed in note 10 Financial risk management Liquidity risk:
- Agreeing the liquidity terms surrounding the ICAV and Sub-Funds' ability to manage liquidity risk through redemption limits, if necessary, as per note 10 Financial risk management Liquidity risk, to the legal documents;
- Performing subsequent event testing around capital activity to determine whether material redemption requests have been presented to the Sub-Funds; and
- · Discussing management's plans to assess if there is a plan to terminate any of the Sub-Funds.

With the exception of JPMorgan ETFs (Ireland) ICAV - US Equity Multi-Factor UCITS ETF where a basis of accounting other than going concern has been adopted as set out in the Emphasis of matter - financial statements prepared on a basis other than going concern above, based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Sub-Funds' ability to continue as a going concern for a period of at least twelve months from the date on which the financial statements are authorised for issue.

With the exception of JPMorgan ETFs (Ireland) ICAV - US Equity Multi-Factor UCITS ETF where a basis of accounting other than going concern has been adopted as set out in the Emphasis of matter - financial statements prepared on a basis other than going concern above, in auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

However, because not all future events or conditions can be predicted, this conclusion is not a guarantee as to the Sub-Funds' ability to continue as a going concern.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

## Reporting on other information

The other information comprises all of the information in the Audited Annual Report other than the financial statements and our auditors' report thereon. The directors are responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon. In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

Based on the responsibilities described above and our work undertaken in the course of the audit, the Irish Collective Asset-management Vehicles Act 2015 requires us to also report the opinion as described below:

Board of Directors' Report

· In our opinion, based on the work undertaken in the course of the audit, the information given in the Board of Directors' Report for the year ended 31 December 2022 is consistent with the financial statements.

## Responsibilities for the financial statements and the audit

Responsibilities of the directors for the financial statements

As explained more fully in the Role and Responsibility of the Board of Directors the directors are responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view.

The directors are also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Sub-Funds' ability to continue as going concerns, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the ICAV or to cease operations, or have no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud, is detailed below.

Based on our understanding of the ICAV and industry, we identified that the principal risks of non-compliance with laws and regulations related to breaches of Irish legislation and Central Bank of Ireland regulations, and we considered the extent to which non-compliance might have a material effect on the financial statements. We also considered those laws and regulations that have a direct impact on the preparation of the financial statements such as the Irish Collective Asset-management Vehicles Act 2015 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended). We evaluated management's incentives and opportunities for fraudulent manipulation of the financial statements (including the risk of override of controls), and determined that the principal risks were related to management override of controls.

Audit procedures performed by the engagement team included:

- · Inquiry of management to identify any instances of non-compliance with laws and regulations;
- · Identifying and testing journal entries, where any such journal entries, that met our specific risk based criteria, were identified;
- · Designing audit procedures to incorporate unpredictability;
- · Reviewing relevant minutes of the meetings of the board of directors; and
- · Reviewing financial statement disclosures and agreeing to supporting documentation to assess compliance with applicable laws and regulations.

There are inherent limitations in the audit procedures described above. We are less likely to become aware of instances of non-compliance with laws and regulations that are not closely related to events and transactions reflected in the financial statements. Also, the risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion.

Our audit testing might include testing complete populations of certain transactions and balances, possibly using data auditing techniques. However, it typically involves selecting a limited number of items for testing, rather than testing complete populations. We will often seek to target particular items for testing based on their size or risk characteristics. In other cases, we will use audit sampling to enable us to draw a conclusion about the population from which the sample is selected.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA website at:

https://www.iaasa.ie/getmedia/b2389013-1cf6-458b-9b8f-a98202dc9c3a/Description of auditors responsibilities for audit.pdf.

This description forms part of our auditors' report.

## Use of this report

This report, including the opinions, has been prepared for and only for the shareholders of each of the Sub-Funds as a body in accordance with section 120 of the Irish Collective Asset-management Vehicles Act 2015 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

## Other required reporting

## Irish Collective Asset-management Vehicles Act 2015 exception reporting

#### Directors' remuneration

Under the Irish Collective Asset-management Vehicles Act 2015 we are required to report to you if, in our opinion, the disclosures of directors' remuneration specified by section 117 of that Act have not been made. We have no exceptions to report arising from this responsibility.

## Appointment

We were appointed by the Board of Directors on 8 October 2018 to audit the financial statements for the year ended 31 December 2018 and subsequent financial periods. The period of total uninterrupted engagement is 5 years, covering the years ended 31 December 2018 to 31 December 2022.

Aoife O'Connor for and on behalf of PricewaterhouseCoopers Chartered Accountants and Statutory Audit Firm Dublin 20 April 2023

Notes to the Audited Financial Statements For the year ended 31 December 2022

#### 1. Organisation

The JPMorgan ETFs (Ireland) ICAV (the "Fund" or the "ICAV") was registered in Ireland pursuant to the Irish Collective Asset-management Vehicles Act 2015 on 18 July 2017 under registration number C171821 and is authorized by the Central Bank of Ireland (the "Central Bank") as an Undertaking for Collective Investments in Transferable Securities ("UCITS") pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) ("UCITS Regulations").

The ICAV has appointed JPMorgan Asset Management (Europe) S.à r.l., (the "Management Company") as its management company pursuant to the management agreement signed on 28 September 2017. The Management Company was incorporated in Luxembourg on 20 April 1988. The Management Company is regulated by the Commission de Surveillance du Secteur Financier in Luxembourg and authorised to act as a management company to UCITS and as an Alternative Investment Fund Manager ("AIFM").

The objective of the ICAV is to invest in transferable securities in accordance with the UCITS Regulations. The ICAV has been structured as an umbrella fund with segregated liability between Sub-Funds. Each Sub-Fund will bear its own liabilities, under applicable Irish law, none will have access to the assets of a Sub-Fund in satisfaction of a liability of any other Sub-Fund. The Directors may establish Sub-Funds that will seek to track an Index ("Index Tracking Sub-Funds") or will be managed actively by the Management Company to seek to achieve a specific investment objective, which may include outperforming an Index ("Actively Managed Sub-Funds").

The portfolio of assets maintained for each Sub-Fund will be invested in accordance with the investment objectives and policies applicable to such Sub-Fund as specified in the Prospectus and Supplements. Shares may be divided into different Share Classes to accommodate, amongst other things, different dividend policies, charges, fee arrangements (including different fee structures), currencies, or to provide for foreign exchange hedging in accordance with the policies and requirements of the Central Bank from time to time.

As at 31 December 2022, there were thirty-two registered Sub-Funds of which the following are registered in Switzerland:

### Actively Managed Sub-Funds:

- · JPMorgan ETFs (Ireland) ICAV AC Asia Pacific ex Japan Research Enhanced Index Equity (ESG) UCITS ETF (launched on 15 February 2022)
- · JPMorgan ETFs (Ireland) ICAV China A Research Enhanced Index Equity (ESG) UCITS ETF (launched on 15 February 2022)
- · JPMorgan ETFs (Ireland) ICAV Climate Change Solutions UCITS ETF (launched on 14 June 2022)
- · JPMorgan ETFs (Ireland) ICAV EUR Corporate Bond 1-5 yr Research Enhanced Index (ESG) UCITS ETF (launched on 6 December 2018)
- · JPMorgan ETFs (Ireland) ICAV EUR Corporate Bond Research Enhanced Index (ESG) UCITS ETF (launched on 6 December 2018)
- JPMorgan ETFs (Ireland) ICAV EUR Ultra-Short Income UCITS ETF (launched on 6 June 2018)
- · JPMorgan ETFs (Ireland) ICAV Europe Research Enhanced Index Equity (ESG) UCITS ETF (launched on 10 October 2018)
- · JPMorgan ETFs (Ireland) ICAV Eurozone Research Enhanced Index Equity (ESG) UCITS ETF (launched on 26 April 2022)
- · JPMorgan ETFs (Ireland) ICAV Global Emerging Markets Research Enhanced Index Equity (ESG) UCITS ETF\* (launched on 6 December 2018)
- · JPMorgan ETFs (Ireland) ICAV Global Research Enhanced Index Equity (ESG) UCITS ETF (launched on 10 October 2018)
- JPMorgan ETFs (Ireland) ICAV Japan Research Enhanced Index Equity (ESG) UCITS ETF (launched on 29 March 2022)
- · JPMorgan ETFs (Ireland) ICAV RMB Ultra-Short Income UCITS ETF (launched on 1 March 2022)
- JPMorgan ETFs (Ireland) ICAV UK Equity Core UCITS ETF (launched on 14 June 2022)
- · JPMorgan ETFs (Ireland) ICAV US Research Enhanced Index Equity (ESG) UCITS ETF (launched on 10 October 2018)
- · JPMorgan ETFs (Ireland) ICAV USD Corporate Bond Research Enhanced Index (ESG) UCITS ETF (launched on 6 December 2018)
- · JPMorgan ETFs (Ireland) ICAV USD Ultra-Short Income UCITS ETF (launched on 15 February 2018)

#### Index Tracking Sub-Funds:

- · JPMorgan ETFs (Ireland) ICAV BetaBuilders China Aggregate Bond UCITS ETF (launched on 17 March 2022)
- · JPMorgan ETFs (Ireland) ICAV BetaBuilders EUR Govt Bond 1-3 yr UCITS ETF (launched on 15 February 2018)
- · JPMorgan ETFs (Ireland) ICAV BetaBuilders EUR Govt Bond UCITS ETF (launched on 25 April 2019)
- · JPMorgan ETFs (Ireland) ICAV BetaBuilders US Equity UCITS ETF (launched on 3 April 2019)
- · JPMorgan ETFs (Ireland) ICAV BetaBuilders US Small Cap Equity UCITS ETF (launched on 9 August 2022)
- · JPMorgan ETFs (Ireland) ICAV BetaBuilders US Treasury Bond 0-1 yr UCITS ETF (launched on 9 July 2019)
- · JPMorgan ETFs (Ireland) ICAV BetaBuilders US Treasury Bond 1-3 yr UCITS ETF (launched on 6 June 2018)
- JPMorgan ETFs (Ireland) ICAV BetaBuilders US Treasury Bond UCITS ETF (launched on 25 April 2019)
   JPMorgan ETFs (Ireland) ICAV Carbon Transition Global Equity (CTB) UCITS ETF (launched on 4 November 2020)
- JPMorgan ETFs (Ireland) ICAV Global Equity Multi-Factor UCITS ETF (launched on 9 July 2019)
- JPMorgan ETFs (Ireland) ICAV Global High Yield Corporate Bond Multi-Factor UCITS ETF (launched on 4 February 2020)
- · JPMorgan ETFs (Ireland) ICAV USD Emerging Markets Sovereign Bond UCITS ETF (launched on 15 February 2018)

JPMorgan ETFs (Ireland) ICAV - US Equity Multi-Factor UCITS ETF was liquidated on 23 November 2022 and therefore is no longer available for subscription.

<sup>\*</sup>JPMorgan Funds - Global Emerging Markets Research Enhanced Index Equity Fund merged into JPMorgan ETFs (Ireland) ICAV - Global Emerging Markets Research Enhanced Index Equity (ESG) UCITS ETF on 20 May 2022.

Notes to the Audited Financial Statements (continued)

For the year ended 31 December 2022

### 2. Significant accounting policies

#### a. Basis of preparation

The financial statements are prepared in accordance with International Financial Reporting Standards as adopted by the European Union ("IFRS") and applied in accordance with the provisions of the ICAV Act 2015, the Central Bank (Supervision and Enforcement) Act 2013 Section 48 (1) UCITS Regulations 2015 (the "Central Bank Regulations"), and the UCITS Regulations.

The financial statements are prepared on a going concern basis and on a historical cost basis, as modified by the revaluation of financial assets and financial liabilities classified at fair value through profit or loss except for JPMorgan ETFs (Ireland) ICAV - US Equity Multi-Factor UCITS ETF which was liquidated on 23 November 2022. The Financial Statements for this Sub-Fund have been prepared on a non-going concern basis of accounting

The year-end valuation as of 31 December 2022 was completed as at 30 December 2022 which was the last business day of the year. The year-end valuation as of 31 December 2021 was completed as at 31 December 2021 which was the last business day of the year.

The preparation of the financial statements in conformity with IFRS requires the Board to make estimates, assumptions and judgements that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting year. Although these estimates, assumptions and judgements are based on management's best knowledge of current events and actions, actual results may ultimately differ from those estimates, assumptions and judgements.

New Standards and amendments to existing standards

(i) Standards and amendments to existing standards effective 1 January 2022:

There are no standards, amendments to standards or interpretations that are effective for annual periods beginning on 1 January 2022 that have a material effect on the financial statements of the ICAV.

(ii) New standards, amendments and interpretations effective after 1 January 2022 and have not been early adopted:

A number of new standards, amendments to standards and interpretations are effective for annual periods beginning after 1 January 2022, and have not been early adopted in preparing these financial statements. None of these are expected to have a material effect on the financial statements of the ICAV.

#### b. Foreign currency

### (i) Functional and presentational currency

The financial statements are presented in the currency of the primary economic environment in which the Sub-Funds operate (the "presentational currency"). The presentational currency is the same as the functional currency. The functional currencies for the Sub-Funds are presented in the following table:

| Cub Finals   | C        |
|--|----------|
| Sub-Funds  | Currency |

<sup>&</sup>lt;sup>6</sup>JPMorgan Funds - Global Emerging Markets Research Enhanced Index Equity Fund merged into JPMorgan ETFs (Ireland) ICAV - Global Emerging Markets Research Enhanced Index Equity (ESG) UCITS ETF on 20 May 2022.

<sup>7</sup>Sub-Fund launched on 29 March 2022.

<sup>8</sup>Sub-Fund launched on 1 March 2022.

<sup>9</sup>Sub-Fund liquidated on 23 November 2022.

Notes to the Audited Financial Statements (continued) For the year ended 31 December 2022

#### 2. Significant accounting policies (continued)

### b. Foreign currency (continued)

#### (ii) Transactions and balances

Assets and liabilities denominated in other currencies are translated into the functional currency using exchange rates prevailing on the date of determination of the net asset value. Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the date of the transaction. Resulting gains and losses are recognised in the Statement of Comprehensive Income.

#### c. Financial Assets and Financial Liabilities at Fair Value through Profit or Loss

#### (i) Classification

The Fund classifies its investments as financial assets and financial liabilities at fair value through profit or loss.

Financial instruments include equities, collective investment schemes, bonds, futures and forwards. All derivatives in a net receivable position are reported as financial assets at fair value through profit or loss. All derivatives in a net payable position are reported as financial liabilities at fair value through the profit or loss.

Financial assets that are not at fair value through profit or loss include cash and cash equivalents, margin cash, accrued income, receivable from securities sold and other assets. Financial liabilities that are not at fair value through profit or loss include accrued expenses and other payables.

#### (ii) Recognition and derecognition

Purchases and sales of investments are accounted for on the day the trade transaction takes place. Financial assets are derecognised when the rights to receive cash flows from the investments have expired or the risks and rewards of ownership have all been substantially transferred. Financial liabilities are derecognised when the obligation specified in the contract is discharged, cancelled or expires. Realised gains and losses on disposals are reflected as "Net gain/(loss) in fair value on financial assets and financial liabilities at fair value through profit or loss" in the Statement of Comprehensive Income.

#### (iii) Measurement

#### Initial measurement

Financial assets at fair value through profit or loss are initially recognised at fair value which equates to cost at the date of recognition. All transaction costs for such instruments are recognised directly in the Statement of Comprehensive Income as incurred. Financial assets that are not at fair value through profit or loss are measured at amortised cost.

#### Subsequent measurement

Subsequent to initial measurement, the Sub-Funds re-measure financial assets and financial liabilities at fair value through profit or loss. Changes in the fair value are recognised in the Statement of Comprehensive Income.

#### (iv) Fair value estimation

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

#### Investments

Each asset which is quoted, listed or traded on or under the rules of any Recognised Market shall be valued using the index method of valuations. Accordingly, depending on the terms of the relevant index, such assets will be valued at (a) closing bid price, (b) last bid price, (c) last traded price, (d) closing mid-market price or (e) last mid-market price on the relevant Recognised Market at the Valuation Point, as specified in the Relevant Supplement. Prices will be obtained for this purpose by the Administrator from independent sources, such as recognised pricing services or brokers specialising in the relevant markets.

If the investment is normally quoted, listed or traded on or under the rules of more than one Recognised Market, the relevant Recognised Market shall be either (a) that which is the main market for the investment or (b) the market which the Management Company determines provides the fairest criteria in a value for the security, as the Management Company may determine.

If prices for quoted, listed or traded investment on the relevant Recognised Market are not available at the relevant time, or are unrepresentative of its fair value in the opinion of the Management Company, such investment shall be valued at such value as shall be estimated with care and in good faith as the probable realisation value of the investment by a competent professional person, firm or corporation appointed for such purpose by the Management Company and approved for the purpose by the Depositary. As at 31 December 2022, securities which were fair valued are identified with an asterisk (\*) in the Schedule of Investments. As at 31 December 2021, fair valued securities were held by JPMorgan ETFs (Ireland) ICAV - Global Emerging Markets Research Enhanced Index Equity (ESG) UCITS ETF and JPMorgan ETFs (Ireland) ICAV - Global Research Enhanced Index Equity (ESG) UCITS ETF.

The value of any investment which is not normally quoted, listed or traded on or under the rules of a Recognised Market, will be valued at its probable realisation value estimated with care and in good faith by the Management Company or by a competent person, firm or corporation appointed by the Management Company and approved for such purpose by the Depositary.

Time deposits with credit institutions are valued at par which equates to fair value.

Investments in collective investment schemes are valued on the basis of the latest available net asset value per unit or share as published by the collective investment scheme. The change in the net asset value of these units is recognised within "Net gain/(loss) in fair value on financial assets and financial liabilities at fair value through profit or loss" in the Statement of Comprehensive Income.

### Forward Currency Contracts

Unrealised gains or losses on outstanding Forward Currency Contracts are valued on the basis of currency exchange rates prevailing at the relevant valuation date. The changes in such amounts are included in the Statement of Comprehensive Income under "Net gain/(loss) in fair value on financial assets and financial liabilities at fair value through profit or loss". When a contract is closed, the realised gain/(loss) is recorded under "Net gain/(loss) in fair value on financial assets and financial liabilities at fair value through profit or loss" in the Statement of Comprehensive Income.

### Financial Futures Contracts

Regulated financial futures contracts are valued at the exchange quoted settlement price. Initial margin deposits are made upon entering into the contracts and can be either in cash or securities. During the period the contracts are open, changes in the value of the contracts are recognised as unrealised gains and losses by "marking-to-market" on a daily basis to reflect the market value of the contracts at the end of each business day's trading. Variation margin payments are made or received, depending upon whether losses or gains are incurred. When a contract is closed, the Sub-Fund records a realised gain or loss equal to the difference between the proceeds from, or cost of, the closing transaction and the initial cost of the contract in "Net gain/(loss) in fair value on financial assets and financial liabilities at fair value through profit or loss" in the Statement of Comprehensive Income. Unrealised gains or losses are recorded under "Net gain/(loss) in fair value on financial liabilities at fair value through profit or loss" in the Statement of Comprehensive Income.

Notes to the Audited Financial Statements (continued) For the year ended 31 December 2022

#### 2. Significant accounting policies (continued)

#### d. Income recognition

#### (i) Dividend income

Dividend income is recognised in the Statement of Comprehensive Income when the right to receive payment is established. Dividend income is shown gross of any non-recoverable withholding tax, which is disclosed separately as withholding tax in the Statement of Comprehensive Income.

(ii) Interest income and interest from financial assets at fair value through profit or loss

Interest is recognised on a time-proportionate basis using the effective interest method. Interest income includes interest from cash and cash equivalents. Interest from financial assets at fair value through profit or loss includes interest from debt securities. The income is recorded gross of any withholding tax, which is disclosed separately as withholding tax in the Statement of Comprehensive Income.

#### (iii) Securities lending income

Securities lending income is earned from lending securities owned by the Sub-Funds to a number of third party borrowers. Securities lending income is recognised on an accrual basis. The information on securities lending income earned by the ICAV during the year ended 31 December 2021 are detailed in Note 18 and the Securities Financing Transactions appendix. The securities lending income is accounted for on a cash basis on the 16th day of each month following the month that the revenue was generated, net of lending fees paid to the lending agent. An element of the securities lending income will include the proceeds related to the re-investment of cash collateral, if any. Cash collateral received in relation to securities lending transactions as at the reporting date is recorded as Cash collateral received in the Statement of Financial Position.

#### e. Due from/to brokers

Margin and collateral cash provided by the Sub-Funds to a counterparty in relation to financial futures contracts are recorded as Due from/to brokers in the Statement of Financial Position. Margin cash is valued at amortised cost plus accrued interest which approximates fair value.

#### f. Fees and expenses

All of the following fees and expenses in respect of a Sub-Fund or Share Class are recognised in the Statement of Comprehensive Income on an accruals basis and are paid annually to the Management Company:

- (i) All the ordinary operating and administrative expenses of the ICAV or Share Class, including, but not limited to, Directors', Auditors', legal advisors', Administrator's, Depositary's and other service providers' fees and expenses. This also includes formation expenses such as organisation and registration costs; accounting expenses covering fund accounting and administrative services; transfer agency expenses covering registrar and transfer agency services; administrative services and domiciliary agent services; the fees and reasonable out-of-pocket expenses of the paying agents and representatives; legal fees and expenses; ongoing registration, listing and quotation fees, including translation expenses; the cost of publication of the Share prices and postage, telephone, facsimile transmission and other electronic means of communication; and the costs of printing and distributing the Prospectus and Supplements, KIID(s), reports, accounts and any explanatory memoranda, any necessary translation fees, as well as an annual fund servicing fee which is retained by the Management Company in respect of the services that it provides to the ICAV; and
- (ii) The annual management and advisory fee.

The above fees and expenses will not exceed the relevant Total Expense Ratio ("TER") described in the Prospectus. The actual fees and expenses charged to each share class are detailed in Appendix 2 to this report. If expenses exceed the TER in relation to operating the funds, the Management Company will cover any shortfall from its own assets. This will be separately disclosed as a "Fee Waiver" in the Notes to the Audited Financial Statements. Fees and expenses are disclosed in Note 4 and 5.

Subject to the investment restrictions described in this Prospectus, Sub-Funds may invest in other UCITS eligible collective investment schemes, including exchange traded funds managed by the Management Company or any other member of JPMorgan Chase & Co. In accordance with the Prospectus, no double-charging of management and advisory fees will occur. The avoidance of a double-charge of the Annual Management and Advisory Fee on such assets is achieved by either: a) excluding the assets from the net assets on which the Annual Management and Advisory Fee are calculated; or b) investing in Undertakings via Share Classes that do not accrue an Annual Management and Advisory Fee or other equivalent fees payable to the relevant adviser's group; or c) the Annual Management and Advisory Fee being netted off by a rebate to the ICAV or Sub-Fund of the annual management and advisory fee (or equivalent) charged to the underlying Undertakings; or d) charging only the difference between the Annual Management and Advisory Fee of the ICAV or Sub-Fund and the Annual Management and Advisory Fee (or equivalent) charged to the underlying Undertakings.

### g. Transaction costs

Transaction costs are defined as the incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument. Transaction costs include brokerage fees and depositary agent fees relating to purchase or sale of financial instruments including derivatives (except OTC derivatives).

For some financial instruments, such as debt securities and forward currency contracts, transaction costs are embedded in the price of the instruments and are not separately identifiable. Identifiable transaction costs incurred during the year ended 31 December 2022 and 31 December 2021 are recognised as an expense for financial reporting purposes in the Statement of Comprehensive Income.

Details of transaction costs for each Sub-Fund incurred during the year ended 31 December 2022 and 31 December 2021 are disclosed in Note 7.

### h. Net gains or losses on investments

Net gains or losses on investments include changes in fair value of financial assets and financial liabilities and the realised gains or losses from disposal of financial assets and financial liabilities.

Realised gains and losses on sales of investments are calculated on the average book cost. The associated foreign exchange movement between the date of purchase and date of sale of investments is included in realised gains and losses on investments. Unrealised gains and losses on holdings of investments are calculated on the total book cost and include the associated unrealised gains and losses on foreign exchange.

#### i. Taxation

The dividend and interest income of the ICAV from some of its securities, as well as interest earned on its cash deposits in certain countries, may be subject to withholding taxes and capital gain taxes at varying rates, which normally cannot be recovered. Investment income is recorded gross of withholding taxes and capital gain taxes which are recognised as separate line items in the Statement of Comprehensive Income.

Notes to the Audited Financial Statements (continued) For the year ended 31 December 2022

### 2. Significant accounting policies (continued)

#### j. Share policy

Shares in the Sub-Funds are redeemable at the option of the shareholders and are presented as "Net assets attributable to holders of redeemable participating shares" in the Statement of Financial Position. They are carried at the redemption amount that would be payable at the year end date if the shareholder exercised the right to redeem shares in the Sub-Funds and are classified as financial liabilities.

Each Sub-Fund may have either Accumulating Share Classes or Distributing Share Classes or both.

Investors in a Sub-Fund are entitled to their share of the relevant Sub-Fund's income and net realised gains on its investments. Each Sub-Fund typically earns income in the form of dividends from stocks, interest from debt securities and, if any, securities lending income. Each Sub-Fund realises capital gains or losses whenever it sells securities. Depending on the underlying market, if there are capital gains, the Sub-Fund may be subject to a capital gains tax in that underlying market.

With respect to the Accumulating Share Classes in all Sub-Funds, the Directors have determined to accumulate all net investment income and net realised capital gains attributable to such Accumulating Share Classes and therefore do not intend to declare dividends in respect of Shares in such Share Classes.

Pursuant to the Instrument of Incorporation, the Directors may declare dividends, in respect of Shares in any Distributing Share Class out of net income (including dividend and interest income) and/or the excess of realised and unrealised gains over realised and unrealised losses in respect of investments of the Sub-Funds.

Distributions are recognised in the Statement of Comprehensive Income as finance costs.

The ICAV classifies all Shares as financial liabilites. Under normal circumstances, Shares of the Sub-Funds with single Share Class would be treated as equity in accordance with IAS 32 "Financial Statements: Presentation". For such Sub-Funds, the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares would be referred to as Statement of Changes in Equity. Distributions, if any, would be presented in the Statement of Changes in Equity as dividends paid.

#### 3. Cash, cash equivalents and bank overdrafts

Cash balances and overdrafts, if any, at year end are held either by Brown Brothers Harriman & Co. or on overnight deposit with a third party institution approved by the Board or directly with a sub-custodian. Cash equivalents include deposits held at call and short-term highly liquid investments that are readily convertible to known amounts of cash with maturity period of three months or less and which are subject to an insignificant risk of changes in value. Bank overdrafts are included within liabilities.

#### 4. Fees and expenses payable

Notes to the Audited Financial Statements (continued) For the year ended 31 December 2022

#### 8. Share Capital

The authorised share capital of the ICAV is 500,000,000,000 Shares of no par value divided into 2 Subscriber Shares of no par value and 500,000,000,000 shares of no par value. The Directors are empowered to issue up to all of the Shares of the ICAV on such terms as they think fit. The Subscriber Shares entitle the holders to attend and vote at any general meetings of the ICAV but do not entitle the holders to participate in the profits or assets of the ICAV except for a return of capital on a winding-up. The Shares entitle the holders to attend and vote at general meetings of the ICAV and (other than the Subscriber Shares) to participate equally in the profits and assets of the Sub-Fund to which the Shares relate, subject to any differences between fees, charges and expenses applicable to different Share Classes. The ICAV may from time to time by ordinary resolution increase its capital, consolidate the Shares or any of them into a smaller number of Shares, sub-divide the Shares or any of them into a larger number of Shares or cancel any Shares not taken or agreed to be taken by any person. The ICAV may by special resolution from time to time reduce its share capital in any way permitted by law. At a meeting of Shareholders, on a show of hands, each Shareholder shall have one vote and, on a poll, each Shareholder shall have one vote for each whole Share held by such Shareholder.

The following table shows the number of shares in issue at the reporting date together with the movements during the year ended 31 December 2022:

 $<sup>^\</sup>dagger$  Share Class launched in the current reporting year.

The capital of the ICAV is represented by the net assets attributable to holders of shares. The amount of net assets attributable to holders of shares can change significantly on a daily basis as the ICAV is subject to daily subscriptions and redemptions at the discretion of shareholders. The ICAV's objective when managing capital is to safeguard the ICAV's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain a strong capital base to support the development of the investment activities of the ICAV. Details of restrictions on redemptions are outlined in Note 10.1 (c).

#### 9. Net asset value per share

The net asset value per share (the dealing NAV) is calculated by dividing the NAV of the portfolio attributable to each share class by the shares in issue at the Statement of Financial Position date, as detailed in the table below.

|  |            | Net asset value<br>attributable<br>to holders of<br>redeemable<br>participating<br>shares | Net asset<br>value per<br>share | Net asset value<br>attributable<br>to holders of<br>redeemable<br>participating<br>shares | Net asset<br>value per<br>share | Net asset value<br>attributable<br>to holders of<br>redeemable<br>participating<br>shares | Net asset<br>value per<br>share |

#### 10. Financial risk management

#### 10.1 Financial risk factors

The ICAV's activities expose it to a variety of financial risks: market risk (including price risk, foreign currency risk and interest rate risk); credit, counterparty and global exposure risk; and liquidity risk.

The Fund is also exposed to operational risks resulting from inadequate or failed processes or systems or due to external events that are neither market nor credit-related. Operational risk is inherent in the Management Company's activities and can manifest itself in various ways, including fraudulent acts, business interruptions, and inappropriate behaviour of employees, failure to comply with applicable laws and regulations or failure of vendors to perform in accordance with their arrangements. To monitor and control operational risk, J.P. Morgan Chase & Co. group of companies (the "Firm") maintains an Operational Risk Management Framework designed to enable the Firm to maintain a sound and well-controlled operational environment.

The Management Company has a risk management process in respect of each Sub-Fund which enables it to accurately measure, monitor and manage the various risks associated with the Fund.

#### (a) Market risk

Market risk represents the potential loss a Sub-Fund might suffer through holding market positions resulting from these main components: (i) price risk; (ii) foreign currency risk; and (iii) interest rate risk.

### (i) Price risk

The ICAV is exposed to bond and equity securities price risk and financial derivative instruments price risk. This arises from investments held by Sub-Funds for which prices in the future are uncertain.

The Sub-Funds' market price risk is managed through diversification and selection of securities and other financial instruments, subject to compliance with the "Investment Restrictions" in the Prospectus and the UCITS Regulations.

The Sub-Funds are currently exposed to price risk due to their investments in equities, bonds and certain financial derivative instruments. The percentage of the net assets held in these investments are disclosed in the respective Schedule of Investments. The sensitivity analysis assumes a change in the market price of the equities and bonds while holding all other variables constant. In practice all other variables are unlikely to remain constant, and changes in some of the variables may be correlated. In addition, as the sensitivity analysis uses historical data as a basis for determining future events, it does not encompass all possible scenarios, particularly those that are of an extreme nature.

Based on historic movements and volatilities in these market prices, and management's knowledge and experience of the financial markets, a 10% and 5% movement in the market prices is considered 'reasonably possible' over a 12 month period as at 31 December 2022 and 31 December 2021, respectively.

At 31 December 2022 and 31 December 2021, had the fair value of investments increased by 10% and 5%, respectively, with all other variables held constant, the net asset attributable to shareholders for each Sub-Fund would have increased as set out in the table below:

| Price Risk Sensitivity Analys | sis |

<sup>&</sup>lt;sup>4</sup>Sub-Fund launched on 15 February 2022.

#### Index Tracking Risk

The Index Tracking Sub-Funds' investment policies as described in the Prospectus will be to track the performance of the relevant Index and consequently, none of the Sub-Fund, the Directors or the Management Company provides any warranty or guarantee for Index provider errors. Changes in the investments of any Sub-Fund and re-weightings of the relevant Index may give rise to various transaction costs (including in relation to the settlement of foreign currency transactions), operating expenses or inefficiencies which may adversely impact a Sub-Fund's tracking of an Index.

The Management Company employs a range of techniques designed to select those Index Securities which will create the representative sample that tracks the performance of the Index as closely as possible, including optimisation and stratified sampling techniques. Tracking error limits are monitored daily.

### (ii) Currency risk

Since the instruments held by a Sub-Fund may be denominated in currencies different from its functional currency, the Sub-Fund may be affected unfavourably by exchange control regulations or fluctuations in currency rates.

As at 31 December 2022, the investments of the BetaBuilders EUR Govt Bond 1-3 yr UCITS ETF, the BetaBuilders EUR Govt Bond UCITS ETF, the BetaBuilders US Small Cap Equity UCITS ETF and the EUR Corporate Bond 1-5 yr Research Enhanced Index (ESG) UCITS ETF were acquired in the functional currency of the Sub-Fund, thus there is no foreign currency exposure.

As at 31 December 2021, the investments of the BetaBuilders EUR Govt Bond 1-3 yr UCITS ETF, the BetaBuilders EUR Govt Bond UCITS ETF, the EUR Corporate Bond 1-5 yr Research Enhanced Index (ESG) UCITS ETF, the US Equity Multi-Factor UCITS ETF, the US Research Enhanced Index Equity (ESG) UCITS ETF and the USD Ultra-Short Income UCITS ETF were acquired in the functional currency of the Sub-Fund, thus there is no foreign currency exposure.

The tables overleaf summarise the Sub-Funds' exposure to currency risk and the sensitivity of the Sub-Fund's financial assets and liabilities to changes in foreign currency movements at 31 December 2022 and 31 December 2021. The analysis is based on the assumption that the relevant foreign exchange rates increased/decreased by the percentage disclosed in the tables overleaf, with all other variables held constant. The Investment Manager believes that a variation of 5% of the Sub-Fund's base currency against the non-base currency basket represents a reasonable estimate of how such currency exchange rates could vary.

<sup>&</sup>lt;sup>5</sup>Sub-Fund launched on 14 June 2022. <sup>6</sup>Sub-Fund launched on 26 April 2022

<sup>&</sup>lt;sup>7</sup>JPMorgan Funds - Global Emerging Markets Research Enhanced Index Equity Fund merged into JPMorgan ETFs (Ireland) ICAV - Global Emerging Markets Research Enhanced Index Equity (ESG) UCITS ETF on 20 May 2022.

For the year ended 31 December 2022

#### 10. Financial risk management (continued)

#### 10.1 Financial risk factors (continued)

#### (a) Market risk (continued)

(iii) Interest rate risk (continued)

The Sub-Funds are also exposed to interest rate risk on cash balances and bank overdrafts, if any. The underlying collective investment schemes may face interest rate risk; however, the Management Company monitors the exposure as part of their market risk analysis.

The Sub-Funds may also have indirect exposure to interest rate risk through their investments into ETFs, however, the Management Company monitors the exposure as part of their market risk analysis.

The Sub-Funds may also have indirect exposure to interest rate risk through their investments into financial futures contracts, whereby the value of the underlying asset may fluctuate as a result of a change in interest rates.

The sensitivity analysis is based on a change in one variable while holding all other variables constant. In practice this is unlikely to occur, and changes in some of the assumptions may be correlated. As the sensitivity analysis uses historical data as a basis for determining future events, it does not encompass all possible scenarios, particularly those that are of an extreme nature.

At 31 December 2022 and 31 December 2021 had market interest rates strengthened by 5%, the Net assets attributable to holders of redeemable participating shares of the Sub-Funds would have decreased as set out in the following tables. The Investment Manager believes that a variation of 5% represents a reasonable estimate of how interest rates may have potentially varied.

A weakening of the interest rate would have resulted in an equal and opposite effect on the financial statements, assuming that all other variables remained constant.

Short-term financial assets and financial liabilities are those with a residual maturity date of less than one year and long-term financial assets and financial liabilities are those with a residual maturity date of greater than one year.

Interest rate risk as at 31 December 2022:

 $<sup>{}^*\!\</sup>text{The non-interest bearing category includes equities, payables, receivables and financial derivative instruments.}$ 

#### LIBOR Replacement Risk

Many financial instruments use or may use a floating rate based on LIBOR, the offered rate at which major international banks can obtain wholesale, unsecured funding. LIBOR may be a significant factor in determining the Fund's payment obligations under a derivative investment, the cost of financing to the Fund or an investment's value or return to the Fund, and may be used in other ways that affect the Fund's investment performance. The United Kingdom's Financial Conduct Authority announced a phase out of the LIBOR. Although many LIBOR rates were phased out by the end of 2021, a selection of widely used USD LIBOR rates will continue to be published through June 2023 in order to assist with the transition. The Fund may be exposed to financial instruments tied to LIBOR to determine payment obligations, financing terms, hedging strategies or investment value. The transition process away from LIBOR might lead to increased volatility and illiquidity in markets for, and reduce the effectiveness of new hedges placed against, instruments whose terms currently include LIBOR. The ultimate effect of the LIBOR transition process on the Fund is uncertain. As at 31 December 2022 and 31 December 2021, the EUR Corporate Bond Research Enhanced Index (ESG) UCITS ETF, the EUR Corporate Bond 1-5 yr Research Enhanced Index (ESG) UCITS ETF, the EUR Ultra-Short Income UCITS ETF, the USD Corporate Bond Research Enhanced Index (ESG) UCITS ETF and the USD Ultra-Short Income UCITS ETF held securities that use a floating rate based on LIBOR.

Notes to the Audited Financial Statements (continued) For the year ended 31 December 2022

### 10. Financial risk management (continued)

### 10.1 Financial risk factors (continued)

### (b) Credit, counterparty and global exposure risk

The Sub-Funds are exposed to credit risk, which is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

Adherence to investment guidelines and to investment and borrowing powers set out in the Memorandum and Articles of Association and the Prospectus mitigate the risk of excessive exposure to any particular type of issuer.

Securities and investments in cash equivalents are maintained by the Depositary in segregated accounts. In the event of the insolvency or bankruptcy of the Depositary, the Sub-Funds will be treated as a general creditor of its Depositary, on deposits held at call in relation to cash holdings of the Sub-Funds. The Sub-Funds are exposed to credit risk of the Depositary. As at 31 December 2022 and 31 December 2021, cash is held by the Depositary or on overnight deposits with third party institutions that have a long term credit rating which is above investment grade. The Depositary has a long-term credit rating as per Fitch of A+ as at 31 December 2022 (31 December 2021: A+).

As the Sub-Funds may reinvest cash collateral received under securities lending agreements, there is a risk that the value on return of the reinvested cash collateral may not be sufficient to cover the amount required to be repaid to the counterparty. As at 31 December 2022, all of the cash collateral received in respect of securities lending transactions was reinvested into Reverse Repurchase Transactions with Societe Generale and Natixis acting as counterparties. The counterparties have a long-term credit rating as per Fitch of A- and A+, respectively. There was no cash collateral received as at 31 December 2021. The further information on cash collateral received with relation to securities lending transactions is detailed in Note 18 and the Securities Financing Transactions appendix.

The ICAV's policy allows the Sub-Funds to use derivative financial instruments to both moderate and create certain risk exposures. All securities investments present a risk of loss of capital. The maximum loss of capital on financial derivative instruments is limited to the notional contract values of those positions. As at 31 December 2022 and 31 December 2021, the Sub-Funds held forward currency contracts and financial futures contracts.

As at 31 December 2022, the Sub-Funds' financial assets exposed to counterparty credit risk amounted to the following:

|  | Currency                  | Exposure excluding cash collateral | Cash collateral<br>pledged | Cash collateral<br>received | Credit rating |

Certain Sub-Funds apply a VaR ("Value-at-Risk") approach to calculate their global exposure, and this will be specified for each applicable Sub-Fund in the Relevant Supplement. A global exposure calculation using the VaR approach should consider all the positions of the relevant Sub-Fund.

VaR is a means of measuring the potential loss to a Sub-Fund due to market risk and is expressed as the maximum potential loss measured at a 99% one-tailed confidence level over a one month time horizon. The holding period for the purpose of calculating global exposure, is 20 days.

Sub-Funds using the VaR approach are required to disclose their expected level of leverage which is stated in the Relevant Supplement. The expected level of leverage disclosed for each Sub-Fund is an indicative level and is not a regulatory limit. The Sub-Fund's actual level of leverage might significantly exceed the expected level from time to time however the use of Financial Derivative Instruments ("FDI") will remain consistent with the Sub-Fund's investment objective and risk profile and comply with its VaR limit. In this context leverage is a measure of the aggregate derivative usage and is calculated as the sum of the notional exposure of the FDI used, without the use of netting arrangements As the calculation neither takes into account whether a particular FDI increases or decreases investment risk, nor takes into account the varying sensitivities of the notional exposure of the FDI to market movements, this may not be representative of the level of investment risk within a Sub-Fund.

During the year ended 31 December 2022 and 31 December 2021 none of the Sub-Funds applied a VaR approach to calculate their global exposure.

All Sub-Fund's global exposure and leverage are calculated using the commitment approach and the Sub-Funds' global exposure does not exceed 100% of Net Asset Value. The commitment approach converts each Sub-Fund's FDI positions into the equivalent positions in the underlying assets and seeks to ensure that the FDI risk is monitored in terms of any future "commitments" to which it is (or may be) obligated.

The table below details global exposure and the leverage employed as at 31 December 2022 for the Sub-Funds that use commitment approach and held FDI positions during the year ended 31 December 2022.

#### Offsetting

The ICAV complies with the amendment to IFRS 7 "Disclosures - Offsetting Financial Assets and Financial Liabilities", and amendments to IAS32, which requires entities to disclose both gross and net information for derivatives and other financial instruments that are either offset in the Statement of Financial Position or subject to an enforceable master netting arrangement or similar agreement.

The regulatory guidance permits the offsetting of buying and selling positions on financial derivative instruments with identical underlying assets (reference rates, reference assets, etc.), and the offsetting of financial derivative instruments and assets held directly by a UCITS that are identical to those that underlie the offset derivatives.

As at 31 December 2022 and 31 December 2021, there were no netting arrangements with derivative counterparties in the Sub-Funds. All of the derivative assets and liabilities of the Sub-Funds are held with counterparties and margin balances are maintained by the Sub-Funds for the purpose of providing collateral on these derivative positions.

### (c) Liquidity risk

Liquidity risk is defined as the risk that a fund could not meet requests to redeem shares issued by the Sub-Fund without significant dilution of the remaining investors' interests. The Sub-Funds manage their liquidity risk by investing mainly in readily realisable securities. The main liability of the Sub-Funds is the redemption of any shares that investors wish to sell. They therefore invest the majority of their assets in investments that are traded in an active market. All of the Sub-Funds' financial liabilities are payable in one year or less or on demand.

If a redeeming Shareholder requests redemption of a number of Shares representing 5% or more of the Net Asset Value of a Sub-Fund, the Management Company may, in its sole discretion, redeem the Shares by way of a redemption in kind and in such circumstances the Management Company will, if requested by the redeeming Shareholder, sell the investments on behalf of the Shareholder. (The cost of the sale can be charged to the Shareholder). Where a redemption is requested for a number of Shares representing less than 5% of the Net Asset Value of a Sub-Fund, the Management Company may only redeem the Shares by way of a redemption in kind with the consent of the redeeming Shareholder.

If redemption requests on any Dealing Day represent 10% or more of the Net Asset Value of a Sub-Fund, the Management Company may, in its discretion, refuse to redeem any Shares in excess of 10% (at any time including after the cut-off time on the Dealing Day). Any request for redemption on such Dealing Day shall be reduced rateably and the redemption requests shall be treated as if they were received on each subsequent Dealing Day until all Shares to which the original request related have been redeemed.

The Sub-Funds may periodically invest in derivative contracts traded over the counter rather than in an organised market. As a result, the Sub-Funds may not be able to liquidate quickly their investments in these instruments at an amount close to their fair value to meet its liquidity requirements, or be able to respond to specific events such as deterioration in the creditworthiness of any particular issuer. The residual contractual maturities of the majority of the financial liabilities held by the Fund are (except for redemptions and dividend payable to the shareholders) all within three months.

#### 10.2 Fair Value Estimation

The Sub-Funds are required to classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Level 1: Inputs that are quoted market prices (unadjusted) in active markets for identical instruments;
- Level 2: Inputs other than quoted prices included within Level 1 that are observable either directly (i.e. as prices) or indirectly (i.e. derived from prices).
   This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques in which all significant inputs are directly or indirectly observable from market data; and
- Level 3: Inputs that are unobservable. This category includes all instruments for which the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments but for which significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3

Notes to the Audited Financial Statements (continued) For the year ended 31 December 2022

### 10. Financial risk management (continued)

### 10.2 Fair Value Estimation (continued)

measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' requires significant judgement by the ICAV. The ICAV considers observable data to be market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The following table analyses within the fair value hierarchy the Sub-Funds' financial assets and liabilities measured at fair value at 31 December 2022:

|   | Currency             | Level 1    | Level 2    | Level 3 | Total       |

| Equities   | USD      | (72.007)  | -       | 72.007  |

As at 31 December 2021, certain Equity securities were transferred from Level 1 to Level 3 as a result of a decrease in the quotes available for valuation of these securities.

Notes to the Audited Financial Statements (continued) For the year ended 31 December 2022

### 10. Financial risk management (continued)

### 10.2 Fair Value Estimation (continued)

Transfers between levels of the fair value hierarchy, for the purpose of preparing the above tables, are deemed to have occurred at the end of the reporting year.

The Level 3 positions held by the Sub-Funds as at 31 December 2022 had been valued using the following valuation techniques a) a 99% haircut from the last appropriate traded price that was thought to be indicative of their respective market prices, for Russian equities due to the positions being untradeable or b) at the latest available price or on the basis of their reasonably foreseeable sales price determined with prudence and in good faith by the Board of Directors that was thought to be indicative of their respective market prices, but where each had unobservable inputs assumed in their valuations for non-Russian equities. The Level 3 positions held by the Sub-Funds as at 31 December 2021 had been valued at the latest available price or on the basis of their reasonably foreseeable sales price determined with prudence and in good faith by the Board of Directors that was thought to be indicative of their respective market prices, but where each had unobservable inputs assumed in their valuations.

The following tables present a reconciliation of the closing balance for Level 3 securities held by the Sub-Funds as at 31 December 2022.

Notes to the Audited Financial Statements (continued) For the year ended 31 December 2022

### 10. Financial risk management (continued)

#### 10.2 Fair Value Estimation (continued)

All other current assets and current liabilities included in the Statement of Financial Position as at 31 December 2022 and 31 December 2021 are carried at values that reflect a reasonable approximation of their fair value.

As at 31 December 2022 and 31 December 2021, cash, bank overdraft and amounts due from brokers are classified as Level 1. Cash equivalents are classified as Level 2. All other assets and liabilities not measured at fair value but for which fair value is disclosed are classified as Level 2.

#### 11. Taxation of the ICAV

The ICAV is an investment undertaking as defined in Section 739B of the Taxes Consolidation Act 1997, as amended ("TCA"). The ICAV will not be liable to Irish tax in respect of its income and gains, other than on the occurrence of a chargeable event.

Generally a chargeable event arises on any distribution, redemption, repurchase, cancellation, transfer of shares or on the ending of a 'Relevant Period'. A 'Relevant Period' being an eight year period beginning with the acquisition of the shares by the shareholder and each subsequent period of eight years beginning immediately after the preceding Relevant Period.

No Irish tax will arise on the ICAV in respect of chargeable events in respect of:

- a) A shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the ICAV; or the ICAV has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations; and
- b) Certain exempted Irish tax resident shareholders who have provided the ICAV with the necessary signed statutory declarations.

Dividends, interest and capital gains (if any) received on investments by the ICAV may be subject to taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the ICAV or its shareholders.

The Directors intend to seek UK reporting fund status for all Share Classes. For further information on UK reporting fund status including details of the reportable income of each relevant Share Class (available annually within 6 months of the end of the relevant reporting period), please go to the Website.

### 12. Related party transactions and holdings

Related party disclosures

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the party in making financial or operational decisions. In the opinion of the Directors, the list of related parties under IAS 24 "Related Party Transactions" is as follows:

- · The Directors of the Fund and their dependents
- · The Investment Managers J.P. Morgan Investment Inc and JPMorgan Asset Management (UK) Limited
- · The Management Company JPMorgan Asset Management (Europe) S.à r.l.
- · The Secretary of the ICAV J.P. Morgan Administration Services (Ireland) Limited
- · The securities lending agent J.P. Morgan SE Luxembourg Branch (J.P. Morgan Bank Luxembourg S.A. until 22 January 2022)
- JPMorgan Liquidity Funds
- · JPMorgan Chase & Co. and its subsidiaries.

The Board of Directors is not aware of any transactions with related parties during the the year ended 31 December 2022 and 31 December 2021 other than those disclosed in these financial statements.

As at 31 December 2022 and 31 December 2021, certain Sub-Funds had made investments in JPMorgan Liquidity Funds which is deemed to be related party of the ICAV. Details of investments in JPMorgan Liquidity Funds are outlined in Sub-Funds' Schedules of Investments. The table below details the percentage of net assets of JPMorgan Liquidity Funds held by each Sub-Fund as at the reporting date:

Directors' Fees

Each Director is entitled to a fee by way of remuneration for their services at a rate to be determined from time to time by the Directors. All Directors are entitled to reimbursement by the ICAV of expenses properly incurred in connection with the business of the ICAV or discharge of their duties.

The aggregate emoluments of the Directors for the year ended 31 December 2022 was USD 145,318 (31 December 2021: USD 132,298), of which USD Nil is outstanding at the year end (31 December 2021: USD Nil).

The only remuneration paid to Directors is an annual fee. This is waived by Mr. Watkins.

<sup>\*</sup> Currencies not held at 31 December 2022 or 31 December 2021.

### 15. Commission Sharing Arrangements

The Investment Managers may enter into commission sharing arrangements only where there is a direct and identifiable benefit to the clients of the Investment Managers, including the ICAV, and where the Investment Managers are satisfied that the transactions generating the shared commissions are made in good faith, in strict compliance with applicable regulatory requirements and in the best interests of the ICAV and the Shareholders. Any such arrangement must be made by the Investment Manager on terms commensurate with best market practice. Due to their local regulatory rights, certain Investment Managers may make use of soft commission to pay for research or execution services. Other jurisdictions may have other arrangements in place to pay for such services in accordance with local regulatory obligations.

For the year ended 31 December 2022, JPMorgan ETFs (Ireland) ICAV - BetaBuilders US Equity UCITS ETF paid USD 55 of soft dollar commissions attributed to research (31 December 2021: USD 933).

For the year ended 31 December 2022, JPMorgan ETFs (Ireland) ICAV - US Research Enhanced Index Equity (ESG) UCITS ETF paid USD 145,219 of soft dollar commissions attributed to research (31 December 2021: USD 43,168).

Notes to the Audited Financial Statements (continued) For the year ended 31 December 2022

### 16. Efficient portfolio management

The ICAV may employ investment techniques and use financial derivative instruments for efficient portfolio management of the assets of any Sub-Fund including hedging against market movements, currency exchange or interest rate risks subject to the conditions and within the limits laid down by the Central Bank and the Prospectus. The ICAV did not employ any efficient portfolio management techniques in the form of investment in repurchase or reverse repurchase agreements during the year ended 31 December 2022 and 31 December 2021. The information on securities lending transactions entered by the ICAV during the year ended 31 December 2022 and 31 December 2021 are detailed in Note 18 and the Securities Financing Transactions appendix.

The use of FDI by any Sub-Fund for investment purposes or for efficient portfolio management will be described in the Relevant Supplement to the Prospectus. In this context, efficient portfolio management means the reduction of risks, including the risk of tracking error between the performance of a Sub-Fund and the performance of the Index tracked by the relevant Sub-Fund, the reduction of costs to the ICAV, the generation of additional capital or income for the ICAV and hedging against market movements, currency exchange or interest rate risks, subject to the general restrictions outlined in the "Investment Restrictions" section of the Prospectus. To the extent that a Sub-Fund uses FDI, there may be a risk that the volatility of the Sub-Fund's Net Asset Value may increase.

### 17. Commitments and contingent liabilities

There were no significant commitments or contingent liabilities as at 31 December 2022 and 31 December 2021.

#### 18. Securities Lending

The Sub-Fund may lend portions of its securities portfolio to third parties for the purpose of generating additional income or for reducing costs, to the maximum extent allowed by and within the limits set forth in the securities lending agency agreement.

A significant proportion of the income generated from the securities lending program is credited to participating Sub-Funds, with a portion of the income being paid to the securities lending agent of the ICAV for its role. Borrowers of securities lent by participating Sub-Funds are approved by the Management Company after appropriate assessment of such borrowers' status and financial standing. The Management Company waives the incremental income received from the portion of income generated from the securities lending program, for its oversight of the program; hence, 90% of any incremental income earned from the securities lending is accrued to the applicable Sub-Fund, whilst the remaining 10% income is paid to the securities lending agent which arranges the transaction. The net income earned from the securities lending program is detailed in the Statement of Comprehensive Income.

For each loan of securities the securities lending agent accepts cash and non-cash collateral on behalf of the ICAV participating in the Securities Lending Programme. Non-cash collateral is limited to securities issued or fully guaranteed by the United States government or issued and unconditionally guaranteed by any agencies thereof or issued or fully guaranteed by any of the G-10 sovereigns.

Until 31 January 2022, Brown Brothers Harriman & Co. was the securities lending agent of the ICAV. Effective 1 February 2022, the securities lending agent is J.P. Morgan SE - Luxembourg Branch (J.P. Morgan Bank Luxembourg S.A. until 22 January 2022).

Valuation of securities on loan and received collateral as at 31 December 2022 and 31 December 2021 is detailed below:

|   | Securities Lent Market Value |                     | Cash Co             | ollateral*          | Non-Cash Collateral |                     |  |

The CBI requires a schedule of material changes in the composition of the portfolio during the year. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the year and aggregate disposals greater than one per cent of the total value of sales. At a minimum the largest 20 purchases and 20 sales must be given or all purchases and sales if less than 20. A full listing of the portfolio changes for the year is available, upon request, at no extra cost from the Administrator.

#### 3. Securities Financing Transactions

The ICAV engages in Securities Financing Transactions (as defined in Article 3 of Regulation (EU) 2015/2365, Securities Financing Transactions include repurchase transactions, securities or commodities lending and securities or commodities borrowing, buy-sell back transactions or sell-buy back transactions and margin lending transactions) through its exposure on securities lending transactions during the year. In accordance with Article 13 of the Regulation, the information on securities lending transactions are detailed below.

Collateral received or granted with respect to Securities Financing Transactions are disclosed on a trade date basis of accounting.

#### Global Data

#### Amount of securities on loan

The total value of securities on loan as a proportion of the Sub-Funds' total lendable assets as at the reporting date is detailed below. Total lendable assets represent the aggregate value of asset types forming part of the Sub-Funds' securities lending programme.

| Sub-Fund   | % of Total Lendable Assets |
|--|----------------------------|

#### Maturity tenor of securities lending agreements

#### Securities lending transactions

The ICAV's securities lending transactions have open maturity.

Country in which counterparties are established

#### Securities lending transactions

The following table provides details of the country of incorporation of counterparties across securities lending transactions:

| Counterparty                  | Country of Incorporation | Counterparty | Country of Incorporation |
|-------------------------------|--------------------------|--------------|--------------------------|
| Bank of America Merrill Lynch | United States of America | Jefferies    | United States of America |
| Bank of Nova Scotia           | Canada                   | RBC          | Canada                   |
| BNP Paribas                   | France                   | UBS          | Switzerland              |
| HSBC                          | United Kingdom           | Wells Fargo  | United States of America |

Unaudited Appendix (continued)

# 3. Securities Financing Transactions (continued)

Settlement and clearing

All Sub-Funds engaged in securities lending agreements utilise bi-lateral settlement and clearing with their respective counterparty.

# Reuse of collateral

Share of collateral received that is reused and reinvestment return

Non-cash collateral received by way of title transfer collateral arrangement in relation to securities lending transactions, reverse repurchase agreements and OTC derivative transactions, cannot be sold, reinvested or pledged.

#### Securities lending transactions

As at the year end, all of the cash collateral received in respect of securities lending was re-invested into Reverse Repurchase Transactions with high quality government bonds as collateral. This is managed by the Securities Lending Agent based solely on the approved guidelines and agreement issued by JPMorgan Asset Management (Europe) S.à r.l..

Income earned by the Sub-Funds from the reinvestment of cash collateral, net of any interest payable to the relevant counterparty, amounted to USD 113,716 for the year ended 31 December 2022 and is recorded under the "Securities lending income" in the Statement of Comprehensive Income.

Details relating to the permitted reuse of cash collateral are disclosed in the latest Prospectus available from https://am.jpmorgan.com/ie/en/asset-management

# Safekeeping of Collateral

Collateral received

#### Securities lending transactions

All collateral received, if any, is held at J.P. Morgan Chase Bank ("JPM") in its capacity as tri-party collateral manager in an account designated as client assets on JPM's books and records and therefore segregated from those of the borrower, J.P. Morgan SE and the tri-party collateral manager.

Collateral granted

# Securities lending transactions

As at the reporting date, there was no collateral granted with respect to securities lending transactions.

# Return and cost

# Securities lending transactions

The total income earned from securities lending transactions is split between the relevant Sub-Funds and the securities lending agent. Detail of this split is disclosed in Note 18 to the Financial Statements.

Unaudited Appendix (continued)

#### 4. UCITS Remuneration Disclosures

JPMorgan Asset Management (Europe) S.à r.l. (the "Management Company") is the authorised manager of JPMorgan ETFs (Ireland) ICAV (the "Fund") and is part of the J.P. Morgan Chase & Co. group of companies. In this section, the terms "J.P. Morgan" or "Firm" refer to that group, and each of the entities in that group globally, unless otherwise specified.

This section of the annual report has been prepared in accordance with the Undertakings for Collective Investment in Transferable Securities (the "UCITS Directive") and the 'Guidelines on sound remuneration policies' issued by the European Securities and Markets Authority under the UCITS Directive. The information in this section is in respect of the most recent complete remuneration period ("Performance Year") as at the reporting date.

#### **Remuneration Policy**

A summary of the Remuneration Policy applying to the Management Company (the "Remuneration Policy") can be found at https://am.jpmorgan.com/lu/en/asset-management/adv/funds/policies/ (the "Remuneration Policy Statement"). This Remuneration Policy Statement includes details of how remuneration and benefits are calculated, including the financial and non-financial criteria used to evaluate performance, the responsibilities and composition of the Firm's Compensation and Management Development Committee, and the measures adopted to avoid or manage conflicts of interest. A copy of this policy can be requested free of charge from the Management Company.

The Remuneration Policy applies to all employees of the Management Company, including individuals whose professional activities may have a material impact on the risk profile of the Management Company or the UCITS Funds it manages ("UCITS Identified Staff"). The UCITS Identified Staff include members of the Board of the Management Company (the "Board"), senior management, the heads of relevant Control Functions, and holders of other key functions. Individuals are notified of their identification and the implications of this status on at least an annual basis.

The Board reviews and adopts the Remuneration Policy on an annual basis, and oversees its implementation, including the classification of UCITS Identified Staff. The Board last reviewed and adopted the Remuneration Policy that applied to the 2022 Performance Year in July 2022 with no material changes and was satisfied with its implementation.

#### **Quantitative Disclosures**

The table below provides an overview of the aggregate total remuneration paid to staff of the Management Company in respect of the 2022 Performance Year and the number of beneficiaries.

Due to the Firm's structure, the information needed to provide a further breakdown of remuneration attributable to the Company is not readily available and would not be relevant or reliable. However, for context, the Management Company manages 43 Alternative Investment Funds (with 47 Sub-Funds) and 6 UCITS (with 177 Sub-Funds) as at 31 December 2022, with a combined AUM as at that date of USD 14,508m and USD 397,350m respectively.

|                       | Fixed remuneration | Variable remuneration | Total remuneration | Number of beneficiaries |
|-----------------------|--------------------|-----------------------|--------------------|-------------------------|
| All staff (USD '000s) | 49,005             | 26,160                | 75,165             | 362                     |

No performance fee was paid to any employees by JPMorgan ETFs (Ireland) ICAV in the year.

The aggregate total remuneration paid to UCITS Identified Staff in respect of the 2022 Performance Year was USD 105,367k, of which USD 7,459k relates to Senior Management and USD 97,908k relates to other UCITS Identified Staff<sup>1</sup>.

Prospectus and Supplement Changes

The Board agreed the following amendments to the Prospectus and Supplements of the Fund:

#### 21 February 2022

The following Sub-Funds were uplifted to Article 8 SFDR:

- JPMorgan ETFs (Ireland) ICAV EUR Ultra-Short Income UCITS ETF
- JPMorgan ETFs (Ireland) ICAV USD Ultra-Short Income UCITS ETF

#### 16 March 2022

# Supplement Changes:

JPMorgan ETFs (Ireland) ICAV - Japan Research Enhanced Index Equity (ESG) UCITS ETF: change of investment manager.

#### 21 March 2022

# Prospectus Changes:

- Incorporation of addendum dated 9 December 2021
- · Update to Sub-Fund list to include recently noted Sub-Funds and renamed Sub-Funds
- · Amendments to allow reinvestment of cash collateral, including haircut policies for cash collateral, in relation to Securities Lending
- · Update to LIBOR Discontinuance or Unavailability Risk and Liquidity Risk
- · Update to include minimum subscription and redemption amounts on the Secondary Market
- Change of NAV per share calculation to nearest four decimal places
- Updates to Directors of the Management Company
- Updates to Schedule II Recognised Markets
- · Addition of information for investors in Australia
- Change of address of UK Facilities Agent

# Supplement Changes:

The supplements for the following Sub-Funds have been updated to reflect changes to the dealing deadlines:

- JPMorgan ETFs (Ireland) ICAV BetaBuilders EUR Govt Bond 1-3 yr UCITS ETF
- JPMorgan ETFs (Ireland) ICAV BetaBuilders EUR Govt Bond UCITS ETF
- JPMorgan ETFs (Ireland) ICAV Betabuilders US Equity UCITS ETF
- JPMorgan ETFs (Ireland) ICAV BetaBuilders US Treasury Bond 0-1 yr UCITS ETF
- JPMorgan ETFs (Ireland) ICAV Betabuilders US Treasury Bond 1-3 yr UCITS ETF
- JPMorgan ETFs (Ireland) ICAV BetaBuilders US Treasury Bond UCITS ETF
- JPMorgan ETFs (Ireland) ICAV Carbon Transition Global Equity (CTB) UCITS ETF
- JPMorgan ETFs (Ireland) ICAV EUR Corporate Bond 1-5 yr Research Enhanced Index (ESG) UCITS ETF
- JPMorgan ETFs (Ireland) ICAV EUR Corporate Bond Research Enhanced Index (ESG) UCITS ETF
- JPMorgan ETFs (Ireland) ICAV Global Emerging Markets Research Enhanced Index Equity (ESG) UCITS ETF
- JPMorgan ETFs (Ireland) ICAV Global Equity Multi-Factor UCITS ETF
- JPMorgan ETFs (Ireland) ICAV Global High Yield Corporate Bond Multi-Factor UCITS ETF
- JPMorgan ETFs (Ireland) ICAV Global Research Enhanced Index Equity (ESG) UCITS ETF
- · JPMorgan ETFs (Ireland) ICAV US Equity Multi-Factor UCITS ETF
- JPMorgan ETFs (Ireland) ICAV US Research Enhanced Index Equity (ESG) UCITS ETF
- JPMorgan ETFs (Ireland) ICAV USD Corporate Bond Research Enhanced Index (ESG) UCITS ETF
- JPMorgan ETFs (Ireland) ICAV USD Emerging Markets Sovereign Bond UCITS ETF
- JPMorgan ETFs (Ireland) ICAV USD Ultra-Short Income UCITS ETF

The supplements for the remaining Sub-Funds have been redated as required by the CBI as a result of the Prospectus update.

# 13 April 2022

# Prospectus Changes:

# Extension of Fee Waiver:

• JPMorgan ETFs (Ireland) ICAV - EUR Ultra-Short Income UCITS ETF

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: JPMorgan ETFs (Ireland) ICAV - AC Asia Pacific ex Japan Research Enhanced Index Equity (ESG) UCITS ETF

Legal entity identifier: 549300LNQU42VQZXYH59

# Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?   |  |  |  |  |
|---|--|--|--|--|
| • • Yes   | • No   |  |  |  |
| It made sustainable investments with an environmental objective: %  | It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 52.34% of sustainable investments   |  |  |  |
| in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective |  |  |  |
| It made sustainable investments with a social objective: %  | It promoted E/S characteristics, but did not make any sustainable investments  |  |  |  |

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund set out to promote a broad range of environmental, social and governance characteristics through its investment inclusion criteria, specifically with a minimum asset allocation of 51% of investments having environmental and / or social characteristics and a minimum of 10% of investments being sustainable investments. This commitment was met throughout the reference period (15 February 2022 - 31 December 2022). At the end of the reference period, the Sub-Fund held 76.68% of investments with environmental and / or social characteristics and 52.34% of sustainable investments.

These investments were determined by the application of an inclusion and exclusion criteria which applied at both an asset and product level. The inclusion criteria is underpinned by an ESG score assigned to all investments within the strategy to identify those that may be considered to have environmental and / or social characteristics and those that meet the thresholds for being considered as sustainable investment.

The ESG score takes into account the following indicators: effective management of toxic emissions, waste, good environmental record and social characteristics such as effective sustainability disclosures, positive scores on labour relations and management of safety issues.

Through its exclusion criteria (which applied both full and partial exclusions); the Sub-Fund promoted certain norms and values including supporting the protection of internationally proclaimed human rights. The Sub-Fund fully excluded companies that are involved in the manufacture of controversial weapons and applied maximum revenue or production thresholds to others such as those that are involved in thermal coal and tobacco.

In relation to the consideration of Good Governance, all investments (excluding cash and derivatives) were screened to exclude known violators of good governance practices. In addition, for those investments considered to have environmental and/or social characteristics or qualifying sustainable investments, additional considerations applied. For these investments, the Sub-Fund incorporated a peer group comparison and screened out companies that did not score in the top 80% relative to peers based on good governance indicators.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics. The extent to which the promoted environmental and social characteristics were met may be understood by considering the actual % of assets allocated to the relevant companies for the Reference Period exhibiting such characteristics.

In summary: the Sub-Fund met its pre-contractual committed minimums related to environmental and / or social characteristics and sustainable investments policy throughout the reference period. The Sub-Fund applied screens with the aim of excluding all potential investments prohibited under its exclusion policy throughout this period. The extent to which the norms and values promoted by the Sub-Fund were met is based on whether the Sub-Fund held any companies during the Reference Period that would have been prohibited under the exclusion policy. The Investment Manager has no indication that such companies were held. The Investment Manager informs that the continuity of the percentage values and information disclosed cannot be guaranteed in the future and is subject to the constantly evolving legal and regulatory landscape. The duration of the reference period can be less than 12 months if the fund was launched, closed or changed its Article 8/9 status during this time.

# Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

# How did the sustainability indicators perform?

A combination of the Investment Manager's proprietary ESG scoring methodology: consisting of the Investment Manager's proprietary ESG score, and / or third-party data was used as part of the inclusion criteria to measure the attainment of the environmental and / or social characteristics that the Sub-Fund promotes.

The methodology was based on a company's management of relevant environmental or social issues such as its toxic emissions, waste management, labour relations and safety issues, diversity / independence of the board of directors and data privacy. To be included in the 51% of assets considered to be promoting environmental and/or social characteristics, a company must score in the top 80% relative to its peers on either its environmental score or social score and meet the good governance conditions outlined above.

At the end of the reference period, the Sub-Fund held 76.68% of investments with environmental and / or social characteristics and 52.34% of sustainable investments.

In respect of the applied norms and values based exclusions, the Investment Manager utilised data to measure a company's participation in the relevant activities. Screening on that data resulted in full exclusions on certain potential investments and partial exclusions based on maximum percentage thresholds on revenue or production as envisaged through the exclusions policy. Throughout the reference period, and at no point, were the exclusion rules breached. A subset of the "Adverse Sustainability Indicators" as set out in the EU SFDR Regulatory Technical Standards was also incorporated in the screening.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics and therefore the performance of the indicators in respect of specific environmental or social characteristics is not set out here.

# ...and compared to previous periods?

Not applicable for 2022

# What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the Sub-Fund partially made was comprised of any individual or combination of the following during the Reference Period:

Environmental Objectives: (i) climate risk mitigation, (ii) transition to a circular economy

Social Objectives: (i) inclusive and sustainable communities - increased female executive representation, (ii) inclusive and sustainable communities - increased female representation on boards of directors, and (iii) provision of a decent working environment and culture

Contribution to such objectives may be understood by considering the actual % of assets allocated to sustainable investments for the Reference Period. The Sub-Fund was required to invest 10% in sustainable investments. At no time during the period did the Sub-Fund hold sustainable investments below its committed minimum. At the end of the reference period, 52.34% of its assets were sustainable investments.

# Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and

anti-bribery matters.

# How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments that the Sub-Fund intended to make were subject to a screening process that sought to identify and exclude, from qualifying as a sustainable investment, those companies which the Investment Manager considered the worst performing companies, based on a threshold determined by the Investment Manager, in relation to certain environmental considerations. As a consequence, only those companies demonstrating the best indicators relative to both absolute and relative measures were considered sustainable investments.

Such considerations include climate change, protection of water and marine resources, transition to a circular economy, pollution and protection of biodiversity and ecosystems. In addition, the Investment Manager also applied a screen that sought to identify and exclude those companies that the Investment Manager considers to be in violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights based on data supplied by third-party service providers.

# \_\_ How were the indicators for adverse impacts on sustainability factors taken into account?

The indicators for adverse impacts on sustainability factors in Table 1 of Annex 1 and certain indicators, as determined by the Investment Manager, in Tables 2 and 3 of Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account as further described below. The Investment Manager used either the metrics in the EU SFDR Regulatory Technical Standards, or where this was not possible due to data limitations or other technical issues, a representative proxy. The Investment Manager consolidated the consideration of certain indicators into a "primary" indicator as set out further below and may have used an additional broader set of indicators than referenced below.

The relevant indicators in Table 1 of Annex 1 of the EU SFDR Regulatory Technical Standards consist of 9 environmental and 5 social and employee related indicators. The environmental indicators are listed at 1-9 and relate to green-house gas emissions (1-3), exposure to fossil fuel, share of non-renewable energy consumption and production, energy consumption intensity, activities negatively affecting biodiversity sensitive areas, emissions to water and hazardous waste (4-9 respectively). Indicators 10 – 14 relate to a company's social and employee matters and cover violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises, lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles, unadjusted gender pay gap, Board gender diversity and exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons) respectively.

The Investment Manager's approach included both quantitative and qualitative aspects to take the above indicators into account. It used particular indicators for screening, seeking to exclude companies that may cause significant harm. It used a subset for engagement with certain companies, seeking to influence best practice and it used certain of them as indicators of positive sustainability performance, by applying a minimum threshold in respect of the indicator to qualify as a sustainable investment. The data needed to take the indicators into account, where available, may have been obtained from investee companies themselves and / or supplied by third-party service providers (including proxy data). Data inputs that are self-reported by companies or supplied by third-party providers may be based on data sets and assumptions that may be insufficient, of poor quality or contain biased information. Due to dependency on third-parties, the Investment Manager cannot guarantee the accuracy or completeness of such data.

#### Screening

Certain of the indicators were taken into account through the values and norms-based screening to implement exclusions. These exclusions took into account indicators 10 and 14 in relation to UN Global Compact principles and OECD Guidelines for Multinational Enterprises and controversial weapons. The Investment Manager also applied a purpose-built screen. Due to certain technical considerations, such as data coverage in respect of specific indicators, the Investment Manager either applied the specific indicator per Table 1 or a representative proxy, as determined by the Investment Manager to screen investee companies in respect of the relevant environmental or social & employee matters. For example, greenhouse gas emissions are associated with several indicators and corresponding metrics in Table 1, such as greenhouse gas emissions, carbon footprint and greenhouse gas intensity (indicators 1-3). The Investment Manager used greenhouse gas intensity data (indicator 3), data in respect of non-renewable

energy consumption and production (indicator 5) and data on energy consumption intensity (indicator 6) to perform its screening in respect of greenhouse gas emissions.

In connection with the purpose-built screening and in respect of activities negatively affecting biodiversity sensitive areas and the emissions to water (indicators 7 and 8), due to data limitations, third-party representative proxy data was used, rather than the specific indicators per Table 1. The Investment Manager also took into account indicator 9 in relation to hazardous waste in respect of the purpose built screen.

#### Engagement

In addition to screening out certain companies as described above, the Investment Manager engaged on an ongoing basis with selected underlying investee companies. A subset of the indicators were used, subject to certain technical considerations such as data coverage, as the basis for engaging with selected underlying investee companies in accordance with the approach taken by the Investment Manager on stewardship and engagement. The indicators used in respect of such engagement include indicators 3, 5 and 13 in relation to greenhouse gas intensity, share of non-renewable energy and board gender diversity from Table 1. It also used indicators 2 in Table 2 and 3 in Table 3 in relation to emissions or air pollutants and number of days lost to injuries, accidents, fatalities or illness.

#### Indicators of sustainability

The Investment Manager used indicators 3 and 13 in relation to GHG Intensity and board gender diversity as indicators of sustainability to assist in qualifying an investment as a sustainable investment. One of the pathways required a company to be considered as an operational peer group leader to qualify as a sustainable investment. This required scoring against the indicator in the top 20% relative to peers.

# \_\_ Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms based portfolio exclusions as described above under "To what extent were the environmental and / or social characteristics promoted by this financial product met?" were applied to seek alignment with these guidelines and principles. Third-party data was used to identify potential violators. Unless an exception was granted, the Sub-Fund prohibited relevant investments in these issuers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered select principal adverse impacts on sustainability factors through values and norms-based screening to implement exclusions. Indicators 10 and 14 in relation to violations of the UN Global Compact and controversial weapons from the EU SFDR Regulatory Technical Standards were used in respect of such screening. The Sub-Fund also used certain of the indicators as part of the "Do No Significant Harm" screen as detailed in the response to the question directly above to demonstrate that an investment qualified as a sustainable investment.

A subset of the above-mentioned Adverse Sustainability Indicators were used to determine engagement with investee companies based on their respective PAI performance.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

15/02/2022 - 31/12/2022

# What were the top investments of this financial product?

| Largest Investments                                      | Sector                 | % Assets | Country             |

# What was the proportion of sustainability-related investments?

# What was the asset allocation?

At the end of the reference period, the Sub-Fund allocated 76.68% of its assets to companies that exhibited positive environmental and / or social characteristics and 52.34% of assets to sustainable investments. The Sub-Fund did not commit to investing any proportion of assets specifically in securities exhibiting positive environmental characteristics or specifically in positive social characteristics nor is there any commitment to any specific individual or combination of environmental or social objectives.

Ancillary cash, cash equivalents, money market funds and derivatives for EPM are not included in the % of assets set out in the table below. These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

# #1A Sustainable: 52.34% #1A Sustainable: 52.34% Other Environmental: 36.39% #1B Other E/S characteristics: 24.34% Social: 15.95%

# Asset allocation

describes the share of investments in specific assets.

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

# In which economic sectors were the investments made?

Although the Sub-Fund promoted certain environmental and social characteristics through its inclusion and exclusion criteria, it may have invested across a broad range of sectors – please refer to the list below. In addition, the Investment Manager engaged on an ongoing basis with selected underlying investee companies. Investments within sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels, will be included in the table below if held. Ancillary cash, cash equivalents, money market funds and derivatives for EPM are included in the denominator for the % of assets set out in the table below.

| Sector Sub-sector      |   | % Assets |  |
|------------------------|---|----------|--|
| Communication Services | Media & Entertainment                     | 6.49     |  |
| Communication Services | Telecommunication Services                | 1.29     |  |
| Consumer Discretionary | Automobiles And Components                | 2.55     |  |
| Consumer Discretionary | Consumer Durables And<br>Apparel          | 1.84     |  |
| Consumer Discretionary | Consumer Services                         | 1.67     |  |
| Consumer Discretionary | Retailing                                 | 6.63     |  |
| Consumer Staples       | Food And Staples Retailing                | 1.64     |  |
| Consumer Staples       | Food Beverage And Tobacco                 | 3.67     |  |
| Consumer Staples       | Household And Personal Products           | 1.04     |  |
| Energy                 | Energy                                    | 4.89     |  |
| Financials             | Banks                                     | 14.44    |  |
| Financials             | Diversified Financials                    | 4.33     |  |
| Financials             | Insurance                                 | 5.42     |  |
| Health Care            | Health Care Equipment And Services        | 0.90     |  |
| Health Care            | Pharmaceuticals Biotech & Life Sciences   | 3.60     |  |
| Industrials            | Capital Goods                             | 2.87     |  |
| Industrials            | Commercial & Professional Services        | 0.47     |  |
| Industrials            | Transportation                            | 1.96     |  |
| Information Technology | Semiconductors And<br>Semiconductor Equip | 8.72     |  |
| Information Technology | Software And Services                     | 2.79     |  |
| Information Technology | Technology Hardware And<br>Equipment      | 5.69     |  |
| Materials              | Materials                                 | 8.49     |  |
| Real Estate            | Real Estate                               | 3.76     |  |
| Utilities              | Utilities                                 | 2.49     |  |

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the

# To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Data on EU Taxonomy alignment is currently very limited, in particular with regards to fossil gas and nuclear energy. We expect this to improve over time as more companies disclose their alignment, and the data becomes more available.

The Sub-Fund has made no minimum commitment to sustainable investment with environmental objectives aligned to the EU Taxonomy.

Therefore, the precontractual disclosure document for the Sub-Fund indicates the extent of targeted sustainable

criteria include comprehensive safety and waste management rules. Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee company today.
- capital expenditure (Capex) shows the green investments made by investee companies, relevant to a transition to a green economy.
- operational expenditure (Opex) reflects the green operational activities of investee companies.

investments with an environmental objective aligned with the EU Taxonomy as 0.00%. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have environmental and / or social characteristics and sustainable investments (as defined by SFDR).

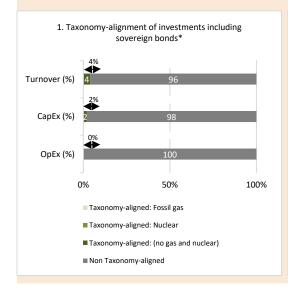

The below graphs illustrate the actual extent of investments in sustainable investments with an environmental objective aligned with the EU Taxonomy as measured at the end of the reference period.

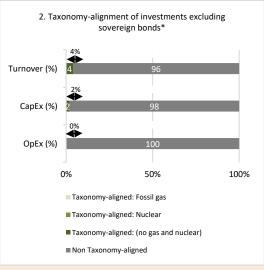

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes
In fossil gas
In nuclear energy

X No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 6% of the total investment

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Further to the above, the Sub-Fund has made no minimum commitment to making EU Taxonomy aligned investments – including Transitioning and Enabling activities. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have environmental and / or social characteristics and sustainable investments.

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The calculated share of Transitioning activities represents 0.02% and the calculated share of Enabling activities represents 1.26%, at the end of the reference period.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

# What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 36.39% of assets at the end of the reference period.

# What was the share of socially sustainable investments?

The share of socially sustainable investments was 15.95% of assets at the end of the reference period.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 23.32% of assets in "other" investments were comprised of companies that did not meet the criteria described in response to above question entitled, "How did the sustainability indicators perform?" to qualify as exhibiting positive environmental or social characteristics. They are investments for diversification purposes. Ancillary cash, cash equivalents, money market funds and derivatives for EPM are not included in the % of assets included in the asset allocation diagram above, including under "other". These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

All investments, including "other" investments were subject to the following ESG Minimum Safeguards / principle:

- The minimum safeguards as outlined by Article 18 of the EU Taxonomy Regulation (including alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights), as implemented by the Investment Manager.
- Application of good governance practices (these include sound management structures, employee relations, remuneration of staff and tax compliance), as implemented by the Investment Manager.
- Compliance with the Do No Significant Harm principle as prescribed under the definition of sustainable investment in EU SFDR.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The following binding elements of the investment strategy were applied during the reference period to select the investments to attain each of the environmental or social characteristics:

- The requirement to invest at least 51% of assets in companies with positive environmental and / or social characteristics.
- The values and norms based screening to implement full exclusions in relation to companies that are involved in certain activities such as manufacturing controversial weapons and applying maximum revenue, production or distribution percentage thresholds to others such as those that are involved in thermal coal and tobacco.
- The requirement for all companies in the portfolio to follow good governance practices.

The Sub- Fund also committed to investing at least 10% of assets in sustainable investments.

Further information on engagement is available in the answer to the question "How were the indicators for adverse impacts on sustainability factors taken into account?"

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. How does the reference benchmark differ from a broad market index?
Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: JPMorgan ETFs (Ireland) ICAV - China A Research Enhanced Index Equity (ESG) UCITS ETF

Legal entity identifier: 549300MS7NNGMGDD0A09

# Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?   |  |  |  |  |
|---|--|--|--|--|
| • • Yes   | • No   |  |  |  |
| It made sustainable investments with an environmental objective: %  | It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 38.73% of sustainable investments   |  |  |  |

| It made sustainable investments with a social objective: %  | It promoted E/S characteristics, but did not make any sustainable investments  |  |  |  |

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund set out to promote a broad range of environmental, social and governance characteristics through its investment inclusion criteria, specifically with a minimum asset allocation of 51% of investments having environmental and / or social characteristics and a minimum of 10% of investments being sustainable investments. This commitment was met throughout the reference period (15 February 2022 - 31 December 2022). At the end of the reference period, the Sub-Fund held 80.15% of investments with environmental and / or social characteristics and 38.73% of sustainable investments.

These investments were determined by the application of an inclusion and exclusion criteria which applied at both an asset and product level. The inclusion criteria is underpinned by an ESG score assigned to all investments within the strategy to identify those that may be considered to have environmental and / or social characteristics and those that meet the thresholds for being considered as sustainable investment.

The ESG score takes into account the following indicators: effective management of toxic emissions, waste, good environmental record and social characteristics such as effective sustainability disclosures, positive scores on labour relations and management of safety issues.

Through its exclusion criteria (which applied both full and partial exclusions); the Sub-Fund promoted certain norms and values including supporting the protection of internationally proclaimed human rights. The Sub-Fund fully excluded companies that are involved in the manufacture of controversial weapons and applied maximum revenue or production thresholds to others such as those that are involved in thermal coal and tobacco.

In relation to the consideration of Good Governance, all investments (excluding cash and derivatives) were screened to exclude known violators of good governance practices. In addition, for those investments considered to have environmental and/or social characteristics or qualifying sustainable investments, additional considerations applied. For these investments, the Sub-Fund incorporated a peer group comparison and screened out companies that did not score in the top 80% relative to peers based on good governance indicators.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics. The extent to which the promoted environmental and social characteristics were met may be understood by considering the actual % of assets allocated to the relevant companies for the Reference Period exhibiting such characteristics.

In summary: the Sub-Fund met its pre-contractual committed minimums related to environmental and / or social characteristics and sustainable investments policy throughout the reference period. The Sub-Fund applied screens with the aim of excluding all potential investments prohibited under its exclusion policy throughout this period. The extent to which the norms and values promoted by the Sub-Fund were met is based on whether the Sub-Fund held any companies during the Reference Period that would have been prohibited under the exclusion policy. The Investment Manager has no indication that such companies were held. The Investment Manager informs that the continuity of the percentage values and information disclosed cannot be guaranteed in the future and is subject to the constantly evolving legal and regulatory landscape. The duration of the reference period can be less than 12 months if the fund was launched, closed or changed its Article 8/9 status during this time.

# Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

# How did the sustainability indicators perform?

A combination of the Investment Manager's proprietary ESG scoring methodology: consisting of the Investment Manager's proprietary ESG score, and / or third-party data was used as part of the inclusion criteria to measure the attainment of the environmental and / or social characteristics that the Sub-Fund promotes.

The methodology was based on a company's management of relevant environmental or social issues such as its toxic emissions, waste management, labour relations and safety issues, diversity / independence of the board of directors and data privacy. To be included in the 51% of assets considered to be promoting environmental and/or social characteristics, a company must score in the top 80% relative to its peers on either its environmental score or social score and meet the good governance conditions outlined above.

At the end of the reference period, the Sub-Fund held 80.15% of investments with environmental and / or social characteristics and 38.73% of sustainable investments.

In respect of the applied norms and values based exclusions, the Investment Manager utilised data to measure a company's participation in the relevant activities. Screening on that data resulted in full exclusions on certain potential investments and partial exclusions based on maximum percentage thresholds on revenue or production as envisaged through the exclusions policy. Throughout the reference period, and at no point, were the exclusion rules breached. A subset of the "Adverse Sustainability Indicators" as set out in the EU SFDR Regulatory Technical Standards was also incorporated in the screening.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics and therefore the performance of the indicators in respect of specific environmental or social characteristics is not set out here.

# ...and compared to previous periods?

Not applicable for 2022

# What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the Sub-Fund partially made was comprised of any individual or combination of the following during the Reference Period:

Environmental Objectives: (i) climate risk mitigation, (ii) transition to a circular economy

Social Objectives: (i) inclusive and sustainable communities - increased female executive representation, (ii) inclusive and sustainable communities - increased female representation on boards of directors, and (iii) provision of a decent working environment and culture

Contribution to such objectives may be understood by considering the actual % of assets allocated to sustainable investments for the Reference Period. The Sub-Fund was required to invest 10% in sustainable investments. At no time during the period did the Sub-Fund hold sustainable investments below its committed minimum. At the end of the reference period, 38.73% of its assets were sustainable investments.

# Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and

anti-bribery matters.

# How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments that the Sub-Fund intended to make were subject to a screening process that sought to identify and exclude, from qualifying as a sustainable investment, those companies which the Investment Manager considered the worst performing companies, based on a threshold determined by the Investment Manager, in relation to certain environmental considerations. As a consequence, only those companies demonstrating the best indicators relative to both absolute and relative measures were considered sustainable investments.

Such considerations include climate change, protection of water and marine resources, transition to a circular economy, pollution and protection of biodiversity and ecosystems. In addition, the Investment Manager also applied a screen that sought to identify and exclude those companies that the Investment Manager considers to be in violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights based on data supplied by third-party service providers.

# \_\_ How were the indicators for adverse impacts on sustainability factors taken into account?

The indicators for adverse impacts on sustainability factors in Table 1 of Annex 1 and certain indicators, as determined by the Investment Manager, in Tables 2 and 3 of Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account as further described below. The Investment Manager used either the metrics in the EU SFDR Regulatory Technical Standards, or where this was not possible due to data limitations or other technical issues, a representative proxy. The Investment Manager consolidated the consideration of certain indicators into a "primary" indicator as set out further below and may have used an additional broader set of indicators than referenced below.

The relevant indicators in Table 1 of Annex 1 of the EU SFDR Regulatory Technical Standards consist of 9 environmental and 5 social and employee related indicators. The environmental indicators are listed at 1-9 and relate to green-house gas emissions (1-3), exposure to fossil fuel, share of non-renewable energy consumption and production, energy consumption intensity, activities negatively affecting biodiversity sensitive areas, emissions to water and hazardous waste (4-9 respectively). Indicators 10 – 14 relate to a company's social and employee matters and cover violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises, lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles, unadjusted gender pay gap, Board gender diversity and exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons) respectively.

The Investment Manager's approach included both quantitative and qualitative aspects to take the above indicators into account. It used particular indicators for screening, seeking to exclude companies that may cause significant harm. It used a subset for engagement with certain companies, seeking to influence best practice and it used certain of them as indicators of positive sustainability performance, by applying a minimum threshold in respect of the indicator to qualify as a sustainable investment. The data needed to take the indicators into account, where available, may have been obtained from investee companies themselves and / or supplied by third-party service providers (including proxy data). Data inputs that are self-reported by companies or supplied by third-party providers may be based on data sets and assumptions that may be insufficient, of poor quality or contain biased information. Due to dependency on third-parties, the Investment Manager cannot guarantee the accuracy or completeness of such data.

#### Screening

Certain of the indicators were taken into account through the values and norms-based screening to implement exclusions. These exclusions took into account indicators 10 and 14 in relation to UN Global Compact principles and OECD Guidelines for Multinational Enterprises and controversial weapons. The Investment Manager also applied a purpose-built screen. Due to certain technical considerations, such as data coverage in respect of specific indicators, the Investment Manager either applied the specific indicator per Table 1 or a representative proxy, as determined by the Investment Manager to screen investee companies in respect of the relevant environmental or social & employee matters. For example, greenhouse gas emissions are associated with several indicators and corresponding metrics in Table 1, such as greenhouse gas emissions, carbon footprint and greenhouse gas intensity (indicators 1-3). The Investment Manager used greenhouse gas intensity data (indicator 3), data in respect of non-renewable

energy consumption and production (indicator 5) and data on energy consumption intensity (indicator 6) to perform its screening in respect of greenhouse gas emissions.

In connection with the purpose-built screening and in respect of activities negatively affecting biodiversity sensitive areas and the emissions to water (indicators 7 and 8), due to data limitations, third-party representative proxy data was used, rather than the specific indicators per Table 1. The Investment Manager also took into account indicator 9 in relation to hazardous waste in respect of the purpose built screen.

#### Engagement

In addition to screening out certain companies as described above, the Investment Manager engaged on an ongoing basis with selected underlying investee companies. A subset of the indicators were used, subject to certain technical considerations such as data coverage, as the basis for engaging with selected underlying investee companies in accordance with the approach taken by the Investment Manager on stewardship and engagement. The indicators used in respect of such engagement include indicators 3, 5 and 13 in relation to greenhouse gas intensity, share of non-renewable energy and board gender diversity from Table 1. It also used indicators 2 in Table 2 and 3 in Table 3 in relation to emissions or air pollutants and number of days lost to injuries, accidents, fatalities or illness.

#### Indicators of sustainability

The Investment Manager used indicators 3 and 13 in relation to GHG Intensity and board gender diversity as indicators of sustainability to assist in qualifying an investment as a sustainable investment. One of the pathways required a company to be considered as an operational peer group leader to qualify as a sustainable investment. This required scoring against the indicator in the top 20% relative to peers.

# \_\_ Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms based portfolio exclusions as described above under "To what extent were the environmental and / or social characteristics promoted by this financial product met?" were applied to seek alignment with these guidelines and principles. Third-party data was used to identify potential violators. Unless an exception was granted, the Sub-Fund prohibited relevant investments in these issuers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered select principal adverse impacts on sustainability factors through values and norms-based screening to implement exclusions. Indicators 10 and 14 in relation to violations of the UN Global Compact and controversial weapons from the EU SFDR Regulatory Technical Standards were used in respect of such screening. The Sub-Fund also used certain of the indicators as part of the "Do No Significant Harm" screen as detailed in the response to the question directly above to demonstrate that an investment qualified as a sustainable investment.

A subset of the above-mentioned Adverse Sustainability Indicators were used to determine engagement with investee companies based on their respective PAI performance.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 15/02/2022 - 31/12/2022

# What were the top investments of this financial product?

| Largest Investments                                   | Sector                 | % Assets | Country |

# What was the proportion of sustainability-related investments?

# What was the asset allocation?

At the end of the reference period, the Sub-Fund allocated 80.15% of its assets to companies that exhibited positive environmental and / or social characteristics and 38.73% of assets to sustainable investments. The Sub-Fund did not commit to investing any proportion of assets specifically in securities exhibiting positive environmental characteristics or specifically in positive social characteristics nor is there any commitment to any specific individual or combination of environmental or social objectives.

Ancillary cash, cash equivalents, money market funds and derivatives for EPM are not included in the % of assets set out in the table below. These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

# #1 Aligned with E/S characteristics: 80.15% #18 Other E/S characteristics: 41.42% #2 Other: 19.85% #18 Other E/S characteristics: 41.42% Social: 16.26%

# Asset allocation

describes the share of investments in specific assets.

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

# In which economic sectors were the investments made?

Although the Sub-Fund promoted certain environmental and social characteristics through its inclusion and exclusion criteria, it may have invested across a broad range of sectors – please refer to the list below. In addition, the Investment Manager engaged on an ongoing basis with selected underlying investee companies. Investments within sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels, will be included in the table below if held. Ancillary cash, cash equivalents, money market funds and derivatives for EPM are included in the denominator for the % of assets set out in the table below.

| Sector                 | Sub-sector                                | % Assets |
|------------------------|---|----------|

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the

# To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Data on EU Taxonomy alignment is currently very limited, in particular with regards to fossil gas and nuclear energy. We expect this to improve over time as more companies disclose their alignment, and the data becomes more available.

The Sub-Fund has made no minimum commitment to sustainable investment with environmental objectives aligned to the EU Taxonomy.

Therefore, the precontractual disclosure document for the Sub-Fund indicates the extent of targeted sustainable

criteria include comprehensive safety and waste management rules. Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee company today.
- capital expenditure (Capex) shows the green investments made by investee companies, relevant to a transition to a green economy.
- operational expenditure (Opex) reflects the green operational activities of investee companies.

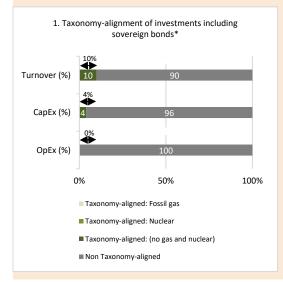

investments with an environmental objective aligned with the EU Taxonomy as 0.00%. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have environmental and / or social characteristics and sustainable investments (as defined by SFDR).

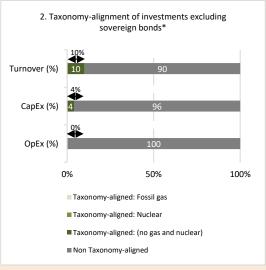

The below graphs illustrate the actual extent of investments in sustainable investments with an environmental objective aligned with the EU Taxonomy as measured at the end of the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

| Yes           |                   |
|---------------|-------------------|
| In fossil gas | In nuclear energy |
| <b>X</b> No   |                   |

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 14% of the total investment

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Further to the above, the Sub-Fund has made no minimum commitment to making EU Taxonomy aligned investments – including Transitioning and Enabling activities. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have environmental and / or social characteristics and sustainable investments.

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The calculated share of Transitioning activities represents 0.00% and the calculated share of Enabling activities represents 6.71%, at the end of the reference period.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

# What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 22.47% of assets at the end of the reference period.

# What was the share of socially sustainable investments?

The share of socially sustainable investments was 16.26% of assets at the end of the reference period.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 19.85% of assets in "other" investments were comprised of companies that did not meet the criteria described in response to above question entitled, "How did the sustainability indicators perform?" to qualify as exhibiting positive environmental or social characteristics. They are investments for diversification purposes. Ancillary cash, cash equivalents, money market funds and derivatives for EPM are not included in the % of assets included in the asset allocation diagram above, including under "other". These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

All investments, including "other" investments were subject to the following ESG Minimum Safeguards / principle:

- The minimum safeguards as outlined by Article 18 of the EU Taxonomy Regulation (including alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights), as implemented by the Investment Manager.
- Application of good governance practices (these include sound management structures, employee relations, remuneration of staff and tax compliance), as implemented by the Investment Manager.
- Compliance with the Do No Significant Harm principle as prescribed under the definition of sustainable investment in EU SFDR.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The following binding elements of the investment strategy were applied during the reference period to select the investments to attain each of the environmental or social characteristics:

- The requirement to invest at least 51% of assets in companies with positive environmental and / or social characteristics.
- The values and norms based screening to implement full exclusions in relation to companies that are involved in certain activities such as manufacturing controversial weapons and applying maximum revenue, production or distribution percentage thresholds to others such as those that are involved in thermal coal and tobacco.
- The requirement for all companies in the portfolio to follow good governance practices.

The Sub- Fund also committed to investing at least 10% of assets in sustainable investments.

Further information on engagement is available in the answer to the question "How were the indicators for adverse impacts on sustainability factors taken into account?"

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. • How does the reference benchmark differ from a broad market index?
Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: JPMorgan ETFs (Ireland) ICAV - EUR Corporate Bond 1-5 yr Research Enhanced Index (ESG) UCITS ETF

# Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?   |  |  |  |  |
|---|--|--|--|--|
| • • Yes   | • No   |  |  |  |
| It made sustainable investments with an environmental objective: %  | It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 47.66% of sustainable investments   |  |  |  |
| in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective |  |  |  |
| It made sustainable investments with a social objective: %  | It promoted E/S characteristics, but did not make any sustainable investments  |  |  |  |

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund set out to promote a broad range of environmental, social and governance characteristics through its investment inclusion criteria, specifically with a minimum asset allocation of 51% of investments having environmental and / or social characteristics and a minimum of 10% of investments being sustainable investments. This commitment was met throughout the reference period (1 March 2022 - 31 December 2022). At the end of the reference period, the Sub-Fund held 70.77% of investments with environmental and / or social characteristics and 47.66% of sustainable investments.

These investments were determined by the application of an inclusion and exclusion criteria which applied at both an asset and product level. The inclusion criteria is underpinned by an ESG score assigned to all investments within the strategy to identify those that may be considered to have environmental and / or social characteristics and those that meet the thresholds for being considered as sustainable investment.

The ESG score takes into account the following indicators: effective management of toxic emissions, waste, good environmental record and social characteristics such as effective sustainability disclosures, positive scores on labour relations and management of safety issues.

Through its exclusion criteria (which applied both full and partial exclusions); the Sub-Fund promoted certain norms and values including supporting the protection of internationally proclaimed human rights. The Sub-Fund fully excluded issuers that are involved in the manufacture of controversial weapons and applied maximum revenue or production thresholds to others such as those that are involved in thermal coal and tobacco.

In relation to the consideration of Good Governance, all investments (excluding cash and derivatives) were screened to exclude known violators of good governance practices. In addition, for those investments considered to have environmental and/or social characteristics or qualifying sustainable investments, additional considerations applied. For these investments, the Sub-Fund incorporated a peer group comparison and screened out issuers that did not score in the top 80% relative to peers based on good governance indicators.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics. The extent to which the promoted environmental and social characteristics were met may be understood by considering the actual % of assets allocated to the relevant issuers for the Reference Period exhibiting such characteristics.

In summary: the Sub-Fund met its pre-contractual committed minimums related to environmental and / or social characteristics and sustainable investments policy throughout the reference period. The Sub-Fund applied screens with the aim of excluding all potential investments prohibited under its exclusion policy throughout this period. The extent to which the norms and values promoted by the Sub-Fund were met is based on whether the Sub-Fund held any issuers during the Reference Period that would have been prohibited under the exclusion policy. The Investment Manager has no indication that such issuers were held. The Investment Manager informs that the continuity of the percentage values and information disclosed cannot be guaranteed in the future and is subject to the constantly evolving legal and regulatory landscape. The duration of the reference period can be less than 12 months if the fund was launched, closed or changed its Article 8/9 status during this time.

# Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

# How did the sustainability indicators perform?

A combination of the Investment Manager's proprietary ESG scoring methodology: consisting of the Investment Manager's proprietary ESG score, and / or third-party data was used as part of the inclusion criteria to measure the attainment of the environmental and / or social characteristics that the Sub-Fund promotes.

The methodology was based on an issuer's management of relevant environmental or social issues such as its toxic emissions, waste management, labour relations and safety issues, diversity / independence of the board of directors and data privacy. To be included in the 51% of assets considered to be promoting environmental and/or social characteristics, an issuer must score in the top 80% relative to its peers on either its environmental score or social score and meet the good governance conditions outlined above.

At the end of the reference period, the Sub-Fund held 70.77% of investments with environmental and / or social characteristics and 47.66% of sustainable investments.

In respect of the applied norms and values-based exclusions, the Investment Manager utilised data to measure an issuer's participation in the relevant activities. Screening on that data resulted in full exclusions on certain potential investments and partial exclusions based on maximum percentage thresholds on revenue or production as envisaged through the exclusions policy. Throughout the reference period, and at no point, were the exclusion rules breached. A subset of the "Adverse Sustainability Indicators" as set out in the EU SFDR Regulatory Technical Standards was also incorporated in the screening.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics and therefore the performance of the indicators in respect of specific environmental or social characteristics is not set out here.

# ...and compared to previous periods?

Not applicable for 2022

# What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the Sub-Fund partially made was comprised of any individual or combination of the following or be linked to an environmental or social objective through the use of proceeds of the issue:

Environmental Objectives: (i) climate risk mitigation, (ii) transition to a circular economy

Social Objectives: (i) inclusive and sustainable communities - increased female executive representation, (ii) inclusive and sustainable communities - increased female representation on boards of directors and (iii) providing a decent working environment and culture.

Contribution to such objectives was determined by either: (i) products and services sustainability indicators, which may have included the percentage of revenue derived from providing products and / or services that contribute to the relevant sustainable objective, such as an issuer producing solar panels or clean energy technology that meets the Investment Manager's proprietary thresholds contributing to climate risk mitigation; (ii) the use of proceeds of the issue, if such use was designated as linked to a specific environmental or social objective, or (iii) was an operational peer group leader contributing to the relevant objective. Being a peer group leader is defined as scoring in the top 20% relative to the SubFund's benchmark based on certain operational sustainability indicators. For example, scoring in the top 20% relative to the Benchmark on total waste impact contributes to a transition to a circular economy. The test for supranational and sovereign issuers may consider the issuer's mission or contributions, as peer group leaders or improvers, to positive environmental and social objectives subject to certain criteria.

The Sub-Fund was required to invest 10% in sustainable investments. At no time during the period did the Sub-Fund hold sustainable investments below its committed minimum. At the end of the reference period, 47.66% of its assets were sustainable investments.

# How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments that the Sub-Fund intended to make were subject to a screening process that sought to identify and exclude, from qualifying as a sustainable investment, those issuers which the Investment Manager considered the worst performing issuers, based on a threshold determined by the Investment Manager, in relation to certain environmental considerations. As a consequence, only those issuers demonstrating the best indicators relative to both absolute and relative measures were considered sustainable investments.

Such considerations include climate change, protection of water and marine resources, transition to a circular economy, pollution and protection of biodiversity and ecosystems. In addition, the Investment Manager also applied a screen that sought to identify and exclude those issuers that the Investment Manager considers to be in violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights based on data supplied by third-party service providers.

# \_\_ How were the indicators for adverse impacts on sustainability factors taken into account?

The indicators for adverse impacts on sustainability factors in Table 1 of Annex 1 and certain indicators, as determined by the Investment Manager, in Tables 2 and 3 of Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account as further described below. The Investment Manager used either the metrics in the EU SFDR Regulatory Technical Standards, or where this was not possible due to data limitations or other technical issues, a representative proxy. The Investment Manager consolidated the consideration of certain indicators into a "primary" indicator as set out further below and may have used an additional broader set of indicators than referenced below.

The relevant indicators in Table 1 of Annex 1 of the EU SFDR Regulatory Technical Standards consist of 9 environmental and 5 social and employee related indicators. The environmental indicators are listed at 1-9 and relate to green-house gas emissions (1-3), exposure to fossil fuel, share of non-renewable energy consumption and production, energy consumption intensity, activities negatively affecting biodiversity sensitive areas, emissions to water and hazardous waste (4-9 respectively).

Indicators 10 - 14 relate to an issuer's social and employee matters and cover violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises, lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles, unadjusted gender pay gap, Board gender diversity and exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons) respectively.

The Investment Manager also took into account PAI 16 in relation to Investee countries subject to social violations.

The Investment Manager's approach included both quantitative and qualitative aspects to take the above indicators into account. It used particular indicators for screening, seeking to exclude issuers that may cause significant harm. It used a subset for engagement with certain issuers, seeking to influence best practice and it used certain of them as indicators of positive sustainability performance, by applying a minimum threshold in respect of the indicator to qualify as a sustainable investment. The data needed to take the indicators into account, where available, may have been obtained from investee issuers

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

themselves and / or supplied by third-party service providers (including proxy data). Data inputs that are self-reported by issuers or supplied by third-party providers may be based on data sets and assumptions that may be insufficient, of poor quality or contain biased information. Due to dependency on third-parties, the Investment Manager cannot guarantee the accuracy or completeness of such data.

#### Screening

Certain of the indicators were taken into account through the values and norms-based screening to implement exclusions. These exclusions took into account indicators 10, 14 and 16 in relation to UN Global Compact principles and OECD Guidelines for Multinational Enterprises, controversial weapons and investee countries subject to social violations. The Investment Manager also applied a purpose-built screen. Due to certain technical considerations, such as data coverage in respect of specific indicators, the Investment Manager either applied the specific indicator per Table 1 or a representative proxy, as determined by the Investment Manager to screen investee issuers in respect of the relevant environmental or social & employee matters. For example, greenhouse gas emissions are associated with several indicators and corresponding metrics in Table 1, such as greenhouse gas emissions, carbon footprint and greenhouse gas intensity (indicators 1-3). The Investment Manager currently uses greenhouse gas intensity data (indicator 3), data in respect of non-renewable energy consumption and production (indicator 5) and data on energy consumption intensity (indicator 6) to perform its screening in respect of greenhouse gas emissions. In connection with the purpose-built screening and in respect of activities negatively affecting biodiversity sensitive areas and the emissions to water (indicators 7 and 8), due to data limitations, the Investment Manager used a third-party representative proxy rather than the specific indicators per Table 1. The Investment Manager also took into account indicator 9 in relation to hazardous waste in respect of the purpose-built screen.

# Engagement

In addition to screening out certain issuers as described above, the Investment Manager engaged on an ongoing basis with selected underlying investee issuers. A subset of the indicators was used, subject to certain technical considerations such as data coverage, as the basis for engaging with selected underlying investee issuers in accordance with the approach taken by the Investment Manager on stewardship and engagement. The indicators used in respect of such engagement include indicators 3, 5 and 13 in relation to greenhouse gas intensity, share of non-renewable energy and board gender diversity from Table 1. It also used indicators 2 in Table 2 and 3 in Table 3 in relation to emission of air pollutants and number of days lost to injuries, accidents, fatalities or illness.

# Indicators of sustainability

The Investment Manager used indicators 3 and 13 in relation to GHG Intensity and board gender diversity as indicators of sustainability to assist in qualifying an investment as a sustainable investment. One of the pathways requires an issuer to be considered as an operational peer group leader to qualify as a sustainable investment. This requires scoring against the indicator in the top 20% relative to the Benchmark.

# \_\_ Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms based portfolio exclusions as described above under "To what extent were the environmental and / or social characteristics promoted by this financial product met?" were applied to seek alignment with these guidelines and principles. Third-party data was used to identify potential violators. Unless an exception was granted, the Sub-Fund prohibited relevant investments in these issuers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered select principal adverse impacts on sustainability factors through values and norms-based screening to implement exclusions. Indicators 10, 14 and 16 in relation to violations of the UN Global Compact and

controversial weapons from the EU SFDR Regulatory Technical Standards were used in respect of such screening. The Sub-Fund also used certain of the indicators as part of the "Do No Significant Harm" screen as detailed in the response to the guestion directly above to demonstrate that an investment gualified as a sustainable investment.

A subset of the above-mentioned Adverse Sustainability Indicators were used to determine engagement with investee issuers based on their respective PAI performance.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/03/2022 - 31/12/2022

# What were the top investments of this financial product?

| Largest Investments                      | Sector     | % Assets | Country        |

# What was the proportion of sustainability-related investments?

# What was the asset allocation?

At the end of the reference period, the Sub-Fund allocated 70.77% of its assets to issuers that exhibited positive environmental and / or social characteristics and 47.66% of assets to sustainable investments. The Sub-Fund did not commit to investing any proportion of assets specifically in securities exhibiting positive environmental characteristics or specifically in positive social characteristics nor is there any commitment to any specific individual or combination of environmental or social objectives.

Ancillary cash, cash equivalents, money market funds and derivatives for EPM are not included in the % of assets set out in the table below. These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

# #1A Sustainable: 47.66% #1A Sustainable: 47.66% Other Environmental: 35.27% #1B Other E/S characteristics: 23.11% Social: 12.39%

# Asset allocation

describes the share of investments in specific assets.

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

# In which economic sectors were the investments made?

Although the Sub-Fund promoted certain environmental and social characteristics through its inclusion and exclusion criteria, it may have invested across a broad range of sectors - please refer to the list below. In addition, the Investment Manager engaged on an ongoing basis with selected underlying investee issuers. Investments within sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels, will be included in the table below if held. Ancillary cash, cash equivalents, money market funds and derivatives for EPM are included in the denominator for the % of assets set out in the table below.

| Sector     | Sub-sector           | % Assets |
|------------|----------------------|----------|
| Finance    | Banking              | 38.90    |

| Industrial | Energy               | 4.23     |
| Industrial | Technology           | 3.35     |
| Industrial | Transportation       | 3.51     |
| Utilities  | Electric             | 3.84     |
| Utilities  | Natural Gas          | 3.19     |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet

# To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Data on EU Taxonomy alignment is currently very limited, in particular with regards to fossil gas and nuclear energy. We expect this to improve over time as more issuers disclose their alignment, and the data becomes more available.

The Sub-Fund has made no minimum commitment to sustainable investment with environmental objectives aligned to the EU Taxonomy.

Therefore, the precontractual disclosure document for the Sub-Fund indicates the extent of targeted sustainable investments with an environmental objective aligned with the EU Taxonomy as 0.00%. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have environmental and / or social characteristics and sustainable investments (as defined by SFDR).

The below graphs illustrate the actual extent of investments in sustainable investments with an environmental objective aligned with the EU Taxonomy as measured at the end of the reference period.

| Did the financial product invest in fossil gas and/or nuclear energy related |
|--|
| activities complying with the EU Taxonomy ?                                  |

| Yes           |                  |
|---------------|------------------|
| In fossil gas | In nuclear energ |

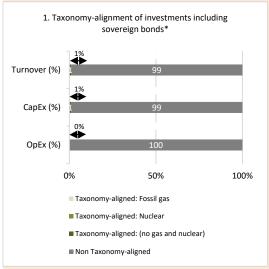

available and that have greenhouse gas emission levels corresponding to the best performance.

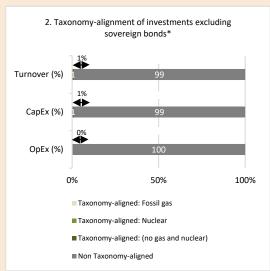

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee company today.
- capital expenditure (Capex) shows the green investments made by investee companies, relevant to a transition to a green economy.
- operational expenditure (Opex) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 2% of the total investment

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

# What was the share of investments made in transitional and enabling activities?

Further to the above, the Sub-Fund has made no minimum commitment to making EU Taxonomy aligned investments – including Transitioning and Enabling activities. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have environmental and / or social characteristics and sustainable investments.

The calculated share of Transitioning activities represents 0.00% and the calculated share of Enabling activities represents 0.04%, at the end of the reference period.

# How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

are sustainable investments with an environmental objective that do not take into account the criteria for

# What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 35.27% of assets at the end of the reference period.

environmentally sustainable economic activities under Regulation (EU) 2020/852.

# What was the share of socially sustainable investments?

The share of socially sustainable investments was 12.39% of assets at the end of the reference period.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 29.23% of assets in "other" investments were comprised of issuers that did not meet the criteria described in response to above question entitled, "How did the sustainability indicators perform?" to qualify as exhibiting positive environmental or social characteristics. They are investments for diversification purposes. Ancillary cash, cash equivalents, money market funds and derivatives for EPM were not included in the % of assets included in the asset allocation diagram above, including under "other". These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

All investments, including "other" investments were subject to the following ESG Minimum Safeguards / principle:

- The minimum safeguards as outlined by Article 18 of the EU Taxonomy Regulation (including alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights), as implemented by the Investment Manager.
- Application of good governance practices (these include sound management structures, employee relations, remuneration of staff and tax compliance), as implemented by the Investment Manager.
- Compliance with the Do No Significant Harm principle as prescribed under the definition of sustainable investment in EU SFDR.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The following binding elements of the investment strategy were applied during the reference period to select the investments to attain each of the environmental or social characteristics:

- The requirement to invest at least 67% of assets in issuers with positive or improving E/S characteristics.
- The values and norms-based screening to implement full exclusions in relation issuers that are involved in certain activities such as manufacturing controversial weapons and applying maximum revenue, production or distribution percentage thresholds to others such as those that are involved in thermal coal and tobacco.
- The requirement for all issuers in the portfolio to follow good governance practices.
- The Sub-Fund also committed to investing at least 40% of assets in sustainable investments.

Further information on engagement is available in the answer to the question "How were the indicators for adverse impacts on sustainability factors taken into account?"

# How did this financial product perform compared to the reference sustainable benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. How does the reference benchmark differ from a broad market index?

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: JPMorgan ETFs (Ireland) ICAV - EUR Corporate Bond Research Enhanced Index (ESG) UCITS ETF

Legal entity identifier: 549300Z5FR0TBRCVY095

# Environmental and/or social characteristics

|   | with a social objective  |  |
| investments with a social objective: %  | It promoted E/S characteristics, but did not make any sustainable investments  |  |

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund set out to promote a broad range of environmental, social and governance characteristics through its investment inclusion criteria, specifically with a minimum asset allocation of 51% of investments having environmental and / or social characteristics and a minimum of 10% of investments being sustainable investments. This commitment was met throughout the reference period (1 March 2022 - 31 December 2022). At the end of the reference period, the Sub-Fund held 76.45% of investments with environmental and / or social characteristics and 49.70% of sustainable investments.

These investments were determined by the application of an inclusion and exclusion criteria which applied at both an asset and product level. The inclusion criteria is underpinned by an ESG score assigned to all investments within the strategy to identify those that may be considered to have environmental and / or social characteristics and those that meet the thresholds for being considered as sustainable investment.

The ESG score takes into account the following indicators: effective management of toxic emissions, waste, good environmental record and social characteristics such as effective sustainability disclosures, positive scores on labour relations and management of safety issues.

Through its exclusion criteria (which applied both full and partial exclusions); the Sub-Fund promoted certain norms and values including supporting the protection of internationally proclaimed human rights. The Sub-Fund fully excluded issuers that are involved in the manufacture of controversial weapons and applied maximum revenue or production thresholds to others such as those that are involved in thermal coal and tobacco.

In relation to the consideration of Good Governance, all investments (excluding cash and derivatives) were screened to exclude known violators of good governance practices. In addition, for those investments considered to have environmental and/or social characteristics or qualifying sustainable investments, additional considerations applied. For these investments, the Sub-Fund incorporated a peer group comparison and screened out issuers that did not score in the top 80% relative to peers based on good governance indicators.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics. The extent to which the promoted environmental and social characteristics were met may be understood by considering the actual % of assets allocated to the relevant issuers for the Reference Period exhibiting such characteristics.

In summary: the Sub-Fund met its pre-contractual committed minimums related to environmental and / or social characteristics and sustainable investments policy throughout the reference period. The Sub-Fund applied screens with the aim of excluding all potential investments prohibited under its exclusion policy throughout this period. The extent to which the norms and values promoted by the Sub-Fund were met is based on whether the Sub-Fund held any issuers during the Reference Period that would have been prohibited under the exclusion policy. The Investment Manager has no indication that such issuers were held. The Investment Manager informs that the continuity of the percentage values and information disclosed cannot be guaranteed in the future and is subject to the constantly evolving legal and regulatory landscape. The duration of the reference period can be less than 12 months if the fund was launched, closed or changed its Article 8/9 status during this time.

# Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

# How did the sustainability indicators perform?

A combination of the Investment Manager's proprietary ESG scoring methodology: consisting of the Investment Manager's proprietary ESG score, and / or third-party data was used as part of the inclusion criteria to measure the attainment of the environmental and / or social characteristics that the Sub-Fund promotes.

The methodology was based on an issuer's management of relevant environmental or social issues such as its toxic emissions, waste management, labour relations and safety issues, diversity / independence of the board of directors and data privacy. To be included in the 51% of assets considered to be promoting environmental and/or social characteristics, an issuer must score in the top 80% relative to its peers on either its environmental score or social score and meet the good governance conditions outlined above.

At the end of the reference period, the Sub-Fund held 76.45% of investments with environmental and / or social characteristics and 49.70% of sustainable investments.

In respect of the applied norms and values-based exclusions, the Investment Manager utilised data to measure an issuer's participation in the relevant activities. Screening on that data resulted in full exclusions on certain potential investments and partial exclusions based on maximum percentage thresholds on revenue or production as envisaged through the exclusions policy. Throughout the reference period, and at no point, were the exclusion rules breached. A subset of the "Adverse Sustainability Indicators" as set out in the EU SFDR Regulatory Technical Standards was also incorporated in the screening.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics and therefore the performance of the indicators in respect of specific environmental or social characteristics is not set out here.

# ...and compared to previous periods?

Not applicable for 2022

# What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the Sub-Fund partially made was comprised of any individual or combination of the following or be linked to an environmental or social objective through the use of proceeds of the issue:

Environmental Objectives: (i) climate risk mitigation, (ii) transition to a circular economy

Social Objectives: (i) inclusive and sustainable communities - increased female executive representation, (ii) inclusive and sustainable communities - increased female representation on boards of directors and (iii) providing a decent working environment and culture.

Contribution to such objectives was determined by either: (i) products and services sustainability indicators, which may have included the percentage of revenue derived from providing products and / or services that contribute to the relevant sustainable objective, such as an issuer producing solar panels or clean energy technology that meets the Investment Manager's proprietary thresholds contributing to climate risk mitigation; (ii) the use of proceeds of the issue, if such use was designated as linked to a specific environmental or social objective, or (iii) was an operational peer group leader contributing to the relevant objective. Being a peer group leader is defined as scoring in the top 20% relative to the SubFund's benchmark based on certain operational sustainability indicators. For example, scoring in the top 20% relative to the Benchmark on total waste impact contributes to a transition to a circular economy. The test for supranational and sovereign issuers may consider the issuer's mission or contributions, as peer group leaders or improvers, to positive environmental and social objectives subject to certain criteria.

The Sub-Fund was required to invest 10% in sustainable investments. At no time during the period did the Sub-Fund hold sustainable investments below its committed minimum. At the end of the reference period, 49.70% of its assets were sustainable investments.

# How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments that the Sub-Fund intended to make were subject to a screening process that sought to identify and exclude, from qualifying as a sustainable investment, those issuers which the Investment Manager considered the worst performing issuers, based on a threshold determined by the Investment Manager, in relation to certain environmental considerations. As a consequence, only those issuers demonstrating the best indicators relative to both absolute and relative measures were considered sustainable investments.

Such considerations include climate change, protection of water and marine resources, transition to a circular economy, pollution and protection of biodiversity and ecosystems. In addition, the Investment Manager also applied a screen that sought to identify and exclude those issuers that the Investment Manager considers to be in violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights based on data supplied by third-party service providers.

# \_\_ How were the indicators for adverse impacts on sustainability factors taken into account?

The indicators for adverse impacts on sustainability factors in Table 1 of Annex 1 and certain indicators, as determined by the Investment Manager, in Tables 2 and 3 of Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account as further described below. The Investment Manager used either the metrics in the EU SFDR Regulatory Technical Standards, or where this was not possible due to data limitations or other technical issues, a representative proxy. The Investment Manager consolidated the consideration of certain indicators into a "primary" indicator as set out further below and may have used an additional broader set of indicators than referenced below.

The relevant indicators in Table 1 of Annex 1 of the EU SFDR Regulatory Technical Standards consist of 9 environmental and 5 social and employee related indicators. The environmental indicators are listed at 1-9 and relate to green-house gas emissions (1-3), exposure to fossil fuel, share of non-renewable energy consumption and production, energy consumption intensity, activities negatively affecting biodiversity sensitive areas, emissions to water and hazardous waste (4-9 respectively).

Indicators 10 - 14 relate to an issuer's social and employee matters and cover violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises, lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles, unadjusted gender pay gap, Board gender diversity and exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons) respectively.

The Investment Manager also took into account PAI 16 in relation to Investee countries subject to social violations.

The Investment Manager's approach included both quantitative and qualitative aspects to take the above indicators into account. It used particular indicators for screening, seeking to exclude issuers that may cause significant harm. It used a subset for engagement with certain issuers, seeking to influence best practice and it used certain of them as indicators of positive sustainability performance, by applying a minimum threshold in respect of the indicator to qualify as a sustainable investment. The data needed to take the indicators into account, where available, may have been obtained from investee issuers

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

themselves and / or supplied by third-party service providers (including proxy data). Data inputs that are self-reported by issuers or supplied by third-party providers may be based on data sets and assumptions that may be insufficient, of poor quality or contain biased information. Due to dependency on third-parties, the Investment Manager cannot guarantee the accuracy or completeness of such data.

#### Screening

Certain of the indicators were taken into account through the values and norms-based screening to implement exclusions. These exclusions took into account indicators 10, 14 and 16 in relation to UN Global Compact principles and OECD Guidelines for Multinational Enterprises, controversial weapons and investee countries subject to social violations. The Investment Manager also applied a purpose-built screen. Due to certain technical considerations, such as data coverage in respect of specific indicators, the Investment Manager either applied the specific indicator per Table 1 or a representative proxy, as determined by the Investment Manager to screen investee issuers in respect of the relevant environmental or social & employee matters. For example, greenhouse gas emissions are associated with several indicators and corresponding metrics in Table 1, such as greenhouse gas emissions, carbon footprint and greenhouse gas intensity (indicators 1-3). The Investment Manager currently uses greenhouse gas intensity data (indicator 3), data in respect of non-renewable energy consumption and production (indicator 5) and data on energy consumption intensity (indicator 6) to perform its screening in respect of greenhouse gas emissions. In connection with the purpose-built screening and in respect of activities negatively affecting biodiversity sensitive areas and the emissions to water (indicators 7 and 8), due to data limitations, the Investment Manager used a third-party representative proxy rather than the specific indicators per Table 1. The Investment Manager also took into account indicator 9 in relation to hazardous waste in respect of the purpose-built screen.

# Engagement

In addition to screening out certain issuers as described above, the Investment Manager engaged on an ongoing basis with selected underlying investee issuers. A subset of the indicators was used, subject to certain technical considerations such as data coverage, as the basis for engaging with selected underlying investee issuers in accordance with the approach taken by the Investment Manager on stewardship and engagement. The indicators used in respect of such engagement include indicators 3, 5 and 13 in relation to greenhouse gas intensity, share of non-renewable energy and board gender diversity from Table 1. It also used indicators 2 in Table 2 and 3 in Table 3 in relation to emission of air pollutants and number of days lost to injuries, accidents, fatalities or illness.

# Indicators of sustainability

The Investment Manager used indicators 3 and 13 in relation to GHG Intensity and board gender diversity as indicators of sustainability to assist in qualifying an investment as a sustainable investment. One of the pathways requires an issuer to be considered as an operational peer group leader to qualify as a sustainable investment. This requires scoring against the indicator in the top 20% relative to the Benchmark.

# \_\_ Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms based portfolio exclusions as described above under "To what extent were the environmental and / or social characteristics promoted by this financial product met?" were applied to seek alignment with these guidelines and principles. Third-party data was used to identify potential violators. Unless an exception was granted, the Sub-Fund prohibited relevant investments in these issuers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered select principal adverse impacts on sustainability factors through values and norms-based screening to implement exclusions. Indicators 10, 14 and 16 in relation to violations of the UN Global Compact and

controversial weapons from the EU SFDR Regulatory Technical Standards were used in respect of such screening. The Sub-Fund also used certain of the indicators as part of the "Do No Significant Harm" screen as detailed in the response to the guestion directly above to demonstrate that an investment gualified as a sustainable investment.

A subset of the above-mentioned Adverse Sustainability Indicators were used to determine engagement with investee issuers based on their respective PAI performance.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/03/2022 - 31/12/2022

#### What were the top investments of this financial product?

| Largest Investments                      | Sector     | % Assets | Country        |
|--|------------|----------|----------------|
| VOLKSWAGEN INTERNATIONAL<br>FINANCE NV   | Industrial | 2.35     | Netherlands    |

#### What was the proportion of sustainability-related investments?

#### What was the asset allocation?

At the end of the reference period, the Sub-Fund allocated 76.45% of its assets to issuers that exhibited positive environmental and / or social characteristics and 49.70% of assets to sustainable investments. The Sub-Fund did not commit to investing any proportion of assets specifically in securities exhibiting positive environmental characteristics or specifically in positive social characteristics nor is there any commitment to any specific individual or combination of environmental or social objectives.

Ancillary cash, cash equivalents, money market funds and derivatives for EPM are not included in the % of assets set out in the table below. These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

# #1A Sustainable: 49.70% #1A Sustainable: 49.70% Other Environmental: 37.61% #2 Other: 23.55% #2 Other: 23.55% #2 Other: 23.55%

#### Asset allocation

describes the share of investments in specific assets.

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made?

Although the Sub-Fund promoted certain environmental and social characteristics through its inclusion and exclusion criteria, it may have invested across a broad range of sectors - please refer to the list below. In addition, the Investment Manager engaged on an ongoing basis with selected underlying investee issuers. Investments within sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels, will be included in the table below if held. Ancillary cash, cash equivalents, money market funds and derivatives for EPM are included in the denominator for the % of assets set out in the table below.

| Sector     | Sub-sector           | % Assets |
|------------|----------------------|----------|
| Finance    | Banking              | 33.82    |
| Finance    | Financial Other      | 1.24     |
| Finance    | Insurance            | 6.33     |
| Finance    | REITs                | 4.00     |
| Industrial | Basic Industry       | 3.23     |
| Industrial | Capital Goods        | 4.63     |
| Industrial | Communications       | 7.28     |
| Industrial | Consumer Cyclical    | 8.58     |
| Industrial | Consumer Noncyclical | 14.60    |
| Industrial | Energy               | 2.81     |
| Industrial | Industrial Other     | 1.26     |
| Industrial | Technology           | 2.55     |
| Industrial | Transportation       | 3.58     |
| Utilities  | Electric             | 3.51     |
| Utilities  | Natural Gas          | 1.95     |
| Utilities  | Utility - Other      | 0.40     |

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. Transitional activities

are economic activities

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Data on EU Taxonomy alignment is currently very limited, in particular with regards to fossil gas and nuclear energy. We expect this to improve over time as more issuers disclose their alignment, and the data becomes more available.

The Sub-Fund has made no minimum commitment to sustainable investment with environmental objectives aligned to the EU Taxonomy.

Therefore, the precontractual disclosure document for the Sub-Fund indicates the extent of targeted sustainable investments with an environmental objective aligned with the EU Taxonomy as 0.00%. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have environmental and / or social characteristics and sustainable investments (as defined by SFDR).

The below graphs illustrate the actual extent of investments in sustainable investments with an environmental objective aligned with the EU Taxonomy as measured at the end of the reference period.

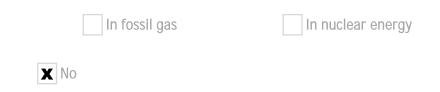

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

| Yes |
|-----|
|     |

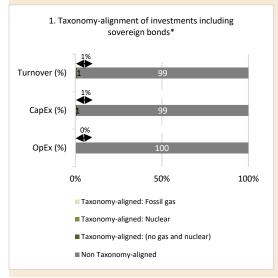

for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

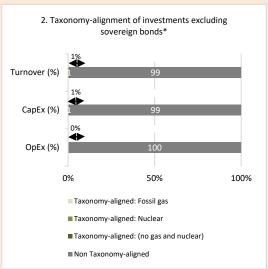

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee company today.
- capital expenditure (Capex) shows the green investments made by investee companies, relevant to a transition to a green economy.
- operational expenditure (Opex) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 2% of the total investment

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

#### What was the share of investments made in transitional and enabling activities?

Further to the above, the Sub-Fund has made no minimum commitment to making EU Taxonomy aligned investments – including Transitioning and Enabling activities. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have environmental and / or social characteristics and sustainable investments.

The calculated share of Transitioning activities represents 0.00% and the calculated share of Enabling activities represents 0.08%, at the end of the reference period.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

are sustainable investments with an environmental objective that do not take into account the criteria for

# What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 37.61% of assets at the end of the reference period.

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

environmentally sustainable economic activities under Regulation (EU) 2020/852.

#### What was the share of socially sustainable investments?

The share of socially sustainable investments was 12.09% of assets at the end of the reference period.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 23.55% of assets in "other" investments were comprised of issuers that did not meet the criteria described in response to above question entitled, "How did the sustainability indicators perform?" to qualify as exhibiting positive environmental or social characteristics. They are investments for diversification purposes. Ancillary cash, cash equivalents, money market funds and derivatives for EPM were not included in the % of assets included in the asset allocation diagram above, including under "other". These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

All investments, including "other" investments were subject to the following ESG Minimum Safeguards / principle:

- The minimum safeguards as outlined by Article 18 of the EU Taxonomy Regulation (including alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights), as implemented by the Investment Manager.
- Application of good governance practices (these include sound management structures, employee relations, remuneration of staff and tax compliance), as implemented by the Investment Manager.
- Compliance with the Do No Significant Harm principle as prescribed under the definition of sustainable investment in EU SFDR.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The following binding elements of the investment strategy were applied during the reference period to select the investments to attain each of the environmental or social characteristics:

- The requirement to invest at least 67% of assets in issuers with positive or improving E/S characteristics.
- The values and norms-based screening to implement full exclusions in relation issuers that are involved in certain activities such as manufacturing controversial weapons and applying maximum revenue, production or distribution percentage thresholds to others such as those that are involved in thermal coal and tobacco.
- The requirement for all issuers in the portfolio to follow good governance practices.
- The Sub-Fund also committed to investing at least 40% of assets in sustainable investments.

Further information on engagement is available in the answer to the question "How were the indicators for adverse impacts on sustainability factors taken into account?"

# How did this financial product perform compared to the reference sustainable benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

| How did this financial product perform compared with the reference benchmark? |

| How did this financial product perform compared with the broad market index?  |

Not applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: JPMorgan ETFs (Ireland) ICAV - EUR Ultra-Short Income UCITS ETF

Legal entity identifier: 549300VLYW8C82SV8738

#### Environmental and/or social characteristics

#### Did this financial product have a sustainable investment objective? Yes X No It made sustainable investments It promoted Environmental/Social (E/S) characteristics and while it did with an environmental objective: not have as its objective a sustainable investment, it had a proportion of 35.03% of sustainable investments in economic activities that qualify with an environmental objective in as environmentally sustainable economic activities that qualify as under the EU Taxonomy environmentally sustainable under the EU Taxonomy in economic activities that do not with an environmental objective in X qualify as environmentally economic activities that do not qualify sustainable under the EU as environmentally sustainable under Taxonomy the EU Taxonomy X with a social objective It made sustainable It promoted E/S characteristics, but investments with a social did not make any sustainable investments objective: %

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund set out to promote a broad range of environmental, social and governance characteristics through its investment inclusion criteria, specifically with an asset allocation of 51% of investments having environmental and / or social characteristics and 10% of investments being sustainable investments. This commitment was met throughout the reference period (21 February 2022 - 31 December 2022). At the end of the reference period, the Sub-Fund held 76.21% of investments with environmental and / or social characteristics and 35.03% of sustainable investments.

These investments were determined by the application of an inclusion and exclusion criteria which applied at both an asset and product level. The inclusion criteria is underpinned by an ESG score assigned to all investments within the strategy to identify those that may be considered to have environmental and / or social characteristics and those that meet the thresholds for being considered as sustainable investment.

The ESG score takes into account related indicators, including (but not limited to) effective management of toxic emissions, waste, good environmental record and social characteristics such as effective sustainability disclosures, positive scores on labour relations and management of safety issues.

Through its exclusion criteria (which applied both full and partial exclusions); the Sub-Fund promoted certain norms

and values including supporting the protection of internationally proclaimed human rights. The Sub-Fund fully excluded issuers that are involved in the manufacture of controversial weapons and applied maximum revenue or production thresholds to others such as those that are involved in thermal coal and tobacco.

In relation to the consideration of Good Governance, all investments (excluding cash and derivatives) were screened to exclude known violators of good governance practices. In addition, for those investments considered to have environmental and/or social characteristics or qualifying sustainable investments, additional considerations applied. For these investments, the Sub-Fund incorporated a peer group comparison and screened out issuers that did not score in the top 80% relative to peers based on good governance indicators.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics. The extent to which the promoted environmental and social characteristics were met may be understood by considering the actual % of assets allocated to the relevant companies for the reference period exhibiting such characteristics.

In summary: the Sub-Fund met its pre-contractual committed minimums related to environmental and / or social characteristics and sustainable investments policy throughout the reference period. The Sub-Fund applied screens with the aim of excluding all potential investments prohibited under its exclusion policy throughout this period. The extent to which the norms and values promoted by the Sub-Fund were met is based on whether the Sub-Fund held any issuers during the reference period that would have been prohibited under the exclusion policy. The Investment Manager has no indication that such issuers were held. The Investment Manager informs that the continuity of the percentage values and information disclosed cannot be guaranteed in the future and is subject to the constantly evolving legal and regulatory landscape.

#### Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

#### How did the sustainability indicators perform?

A combination of the Investment Manager's proprietary ESG scoring methodology: consisting of the Investment Manager's proprietary ESG score, and / or third-party data was used as part of the inclusion criteria to measure the attainment of the environmental and / or social characteristics that the Sub-Fund promotes.

The methodology was based on an issuer's management of relevant environmental or social issues such as its toxic emissions, waste management, labour relations and safety issues, diversity / independence of the board of directors and data privacy. To be included in the 51% of assets considered to be promoting environmental and/or social characteristics, an issuer must score in the top 80% relative to its peers on either its environmental score or social score and meet the good governance conditions outlined above.

At the end of the reference period, the Sub-Fund held 76.21% of investments with environmental and / or social characteristics and 35.03% of sustainable investments.

In respect of the applied norms and values-based exclusions, the Investment Manager utilised data to measure an issuer's participation in the relevant activities. Screening on that data resulted in full exclusions on certain potential investments and partial exclusions based on maximum percentage thresholds on revenue or production as envisaged through the exclusions policy. Throughout the reference period, and at no point, were the exclusion rules breached. A subset of the "Adverse Sustainability Indicators" as set out in the EU SFDR Regulatory Technical Standards was also incorporated in the screening.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics and therefore the performance of the indicators in respect of specific environmental or social characteristics is not set out here.

#### ...and compared to previous periods?

Not applicable for 2022

#### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the Sub-Fund partially made was comprised of any individual or combination of the following or be linked to an environmental or social objective through the use of proceeds of the issue:

Environmental Objectives: (i) climate risk mitigation, (ii) transition to a circular economy

Social Objectives: (i) inclusive and sustainable communities - increased female executive representation, (ii) inclusive and sustainable communities - increased female representation on boards of directors and (iii) providing a decent working environment and culture.

Contribution to such objectives was determined by either (i) products and services sustainability indicators, which may include the percentage of revenue derived from providing products and / or services that contribute to the relevant sustainable objective, such as company producing solar panels or clean energy technology that meets the Investment Manager's proprietary thresholds contributing to climate risk mitigation; or (ii) being an operational peer group leader contributing to the relevant objective. Being a peer group leader is defined as scoring in the top 20% relative to the Sub-Fund's benchmark based on certain operational sustainability indicators. For example, scoring in the top 20% relative to the Benchmark on total waste impact contributes to a transition to a circular economy.

The Sub-Fund was required to invest 10% in sustainable investments. At no time during the period did the Sub-Fund hold sustainable investments below its committed minimum. At the end of the reference period, 35.03% of its assets were sustainable investments.

### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? The sustainable investments that the Sub-Fund intended to make were subject to a screening process

The sustainable investments that the Sub-Fund intended to make were subject to a screening process that sought to identify and exclude, from qualifying as a sustainable investment, those companies which the Investment Manager considered the worst performing companies, based on a threshold determined by the Investment Manager, in relation to certain environmental considerations. As a consequence, only those companies demonstrating the best indicators relative to both absolute and relative measures were considered sustainable investments.

Such considerations include climate change, protection of water and marine resources, transition to a circular economy, pollution and protection of biodiversity and ecosystems. In addition, the Investment Manager also applied a screen that sought to identify and exclude those companies that the Investment Manager considers to be in violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights based on data supplied by third party service providers.

## \_ How were the indicators for adverse impacts on sustainability factors taken into account?

The indicators for adverse impacts on sustainability factors in Table 1 of Annex 1 and certain indicators, as determined by the Investment Manager, in Tables 2 and 3 of Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account as further described below. The Investment Manager used either the metrics in the EU SFDR Regulatory Technical Standards, or where this was not possible due to data limitations or other technical issues, a representative proxy. The Investment Manager consolidated the consideration of certain indicators into a "primary" indicator as set out further below and may have used an additional broader set of indicators than referenced below.

The relevant indicators in Table 1 of Annex 1 of the EU SFDR Regulatory Technical Standards consist of 9 environmental and 5 social and employee related indicators. The environmental indicators are listed at 1-9 and relate to green-house gas emissions (1-3), exposure to fossil fuel, share of non-renewable energy consumption and production, energy consumption intensity, activities negatively affecting biodiversity sensitive areas, emissions to water and hazardous waste (4-9 respectively).

Indicators 10 - 14 relate to an issuer's social and employee matters and cover violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises, lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles, unadjusted gender pay gap, Board gender diversity and exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons) respectively.

The Investment Manager also took into account PAI 16 in relation to Investee countries subject to social violations.

The Investment Manager's approach included both quantitative and qualitative aspects to take the above indicators into account. It used particular indicators for screening, seeking to exclude issuers that may cause significant harm. It used a subset for engagement with certain issuers, seeking to influence best practice and it used certain of them as indicators of positive sustainability performance, by applying a minimum threshold in respect of the indicator to qualify as a sustainable investment. The data needed to take the indicators into account, where available, may have been obtained from investee companies themselves and / or supplied by third-party service providers (including proxy data). Data inputs that are self-reported by companies or supplied by third-party providers may be based on data sets and assumptions that may be insufficient, of poor quality or contain biased information. Due to dependency on third-parties, the Investment Manager cannot guarantee the accuracy or completeness of such data.

Screening

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Certain of the indicators were taken into account through the values and norms-based screening to implement exclusions. These exclusions took into account indicators 10, 14 and 16 in relation to UN Global Compact principles and OECD Guidelines for Multinational Enterprises, controversial weapons and investee countries subject to social violations. The Investment Manager also applied a purpose-built screen. Due to certain technical considerations, such as data coverage in respect of specific indicators, the Investment Manager either applied the specific indicator per Table 1 or a representative proxy, as determined by the Investment Manager to screen investee issuers in respect of the relevant environmental or social & employee matters. For example, greenhouse gas emissions are associated with several indicators and corresponding metrics in Table 1, such as greenhouse gas emissions, carbon footprint and greenhouse gas intensity (indicators 1-3). The Investment Manager currently uses greenhouse gas intensity data (indicator 3), data in respect of non-renewable energy consumption and production (indicator 5) and data on energy consumption intensity (indicator 6) to perform its screening in respect of greenhouse gas emissions. In connection with the purpose-built screening and in respect of activities negatively affecting biodiversity sensitive areas and the emissions to water (indicators 7 and 8), due to data limitations, the Investment Manager used a third-party representative proxy rather than the specific indicators per Table 1. The Investment Manager also took into account indicator 9 in relation to hazardous waste in respect of the purpose-built screen.

#### Engagement

In addition to screening out certain issuers as described above, the Investment Manager engaged on an ongoing basis with selected underlying investee issuers. A subset of the indicators was used, subject to certain technical considerations such as data coverage, as the basis for engaging with selected underlying investee issuers in accordance with the approach taken by the Investment Manager on stewardship and engagement. The indicators used in respect of such engagement include indicators 3, 5 and 13 in relation to greenhouse gas intensity, share of non-renewable energy and board gender diversity from Table 1. It also used indicators 2 in Table 2 and 3 in Table 3 in relation to emission of air pollutants and number of days lost to injuries, accidents, fatalities or illness.

#### Indicators of sustainability

The Investment Manager used indicators 3 and 13 in relation to GHG Intensity and board gender diversity as indicators of sustainability to assist in qualifying an investment as a sustainable investment. One of the pathways requires an issuer to be considered as an operational peer group leader to qualify as a sustainable investment. This requires scoring against the indicator in the top 20% relative to the Benchmark.

#### \_\_ Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms based portfolio exclusions as described above under "To what extent were the environmental and / or social characteristics promoted by this financial product met?" were applied to seek alignment with these guidelines and principles. Third-party data was used to identify potential violators. Unless an exception was granted, the Sub-Fund prohibited relevant investments in these issuers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered select principal adverse impacts on sustainability factors through values and norms-based screening to implement exclusions. Indicators 10, 14 and 16 in relation to violations of the UN Global Compact and controversial weapons from the EU SFDR Regulatory Technical Standards were used in respect of such screening. The Sub-Fund also used certain of the indicators as part of the "Do No Significant Harm" screen as detailed in the response to the question directly above to demonstrate that an investment qualified as a sustainable investment.

A subset of the above-mentioned Adverse Sustainability Indicators were used to determine engagement with investee companies based on their respective PAI performance.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 21/02/2022 - 31/12/2022

#### What were the top investments of this financial product?

| Largest Investments   | Sector                      | % Assets | Country        |
|---|-----------------------------|----------|----------------|

#### What was the proportion of sustainability-related investments?

#### What was the asset allocation?

At the end of the reference period, the Sub-Fund allocated 76.21% of its assets to issuers that exhibited positive environmental and / or social characteristics and 35.03% of assets to sustainable investments. The Sub-Fund did not commit to investing any proportion of assets specifically in securities exhibiting positive environmental characteristics or specifically in positive social characteristics nor is there any commitment to any specific individual or combination of environmental or social objectives.

Ancillary cash, cash equivalents, money market funds and derivatives for EPM are not included in the % of assets set out in the table below. These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

# #1A Sustainable: 35.03% #1A Sustainable: 35.03% Other Environmental: 22.74% Taxonomy-aligned: 0.00% Other Environmental: 22.74% Figure 4.118% When the state of the stat

#### Asset allocation

describes the share of investments in specific assets.

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made?

Although the Sub-Fund promoted certain environmental and social characteristics through its inclusion and exclusion criteria, it may have invested across a broad range of sectors – please refer to the list below. In addition, the Investment Manager engaged on an ongoing basis with selected underlying investee issuers. Investments within sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels, will be included in the table below if held. Ancillary cash, cash equivalents, money market funds and derivatives for EPM are included in the denominator for the % of assets set out in the table below.

| Sector                      | Sub-sector            | % Assets |
|-----------------------------|-----------------------|----------|

| Non-US Govt Related Credit  | Foreign Local Govt    | 0.93     |
| Non-US Govt Related Credit  | Sovereign             | 1.27     |
| Non-US Govt Related Credit  | Supranational         | 1.27     |
| Utilities                   | Electric              | 3.61     |
| Utilities                   | Natural Gas           | 0.56     |

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

# To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Data on EU Taxonomy alignment is currently very limited, in particular with regards to fossil gas and nuclear energy. We expect this to improve over time as more issuers disclose their alignment, and the data becomes more available.

The Sub-Fund has made no minimum commitment to sustainable investment with environmental objectives aligned to the EU Taxonomy.

Therefore, the precontractual disclosure document for the Sub-Fund indicates the extent of targeted sustainable investments with an environmental objective aligned with the EU Taxonomy as 0.00%. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have environmental and / or social characteristics and sustainable investments (as defined by SFDR).

The below graphs illustrate the actual extent of investments in sustainable investments with an environmental

#### **Enabling activities**

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

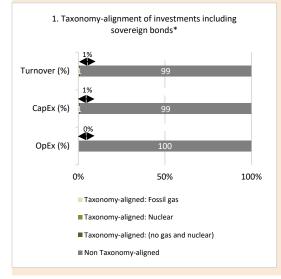

- **turnover** reflects the "greenness" of investee company today.
- capital expenditure (Capex) shows the green investments made by investee companies, relevant to a transition to a green economy.
- operational expenditure (Opex) reflects the green operational activities of investee companies.

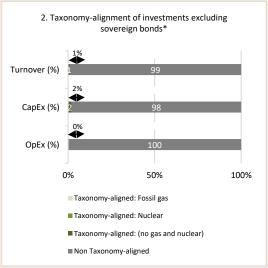

objective aligned with the EU Taxonomy as measured at the end of the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

| Yes           |                   |
|---------------|-------------------|
| In fossil gas | In nuclear energy |
| <b>X</b> No   |                   |

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 3% of the total investment

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

#### What was the share of investments made in transitional and enabling activities?

Further to the above, the Sub-Fund has made no minimum commitment to making EU Taxonomy aligned investments - including Transitioning and Enabling activities. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have environmental and / or social characteristics and sustainable investments.

The calculated share of Transitioning activities represents 0.02% and the calculated share of Enabling activities represents 0.05%, at the end of the reference period.

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

# What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 22.74% of assets at the end of the reference period.

#### What was the share of socially sustainable investments?

The share of socially sustainable investments was 12.29% of assets at the end of the reference period.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 23.79% of assets in "other" investments were comprised of issuers that did not meet the criteria described in response to above question entitled, "How did the sustainability indicators perform?" to qualify as exhibiting positive environmental or social characteristics. They are investments for diversification purposes. Ancillary cash, cash equivalents, money market funds and derivatives for EPM were not included in the % of assets included in the asset allocation diagram above, including under "other". These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

All investments, including "other" investments were subject to the following ESG Minimum Safeguards / principle:

- The minimum safeguards as outlined by Article 18 of the EU Taxonomy Regulation (including alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights), as implemented by the Investment Manager.
- Application of good governance practices (these include sound management structures, employee relations, remuneration of staff and tax compliance), as implemented by the Investment Manager.
- Compliance with the Do No Significant Harm principle as prescribed under the definition of sustainable investment in EU SFDR.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The following binding elements of the investment strategy were applied during the reference period to select the investments to attain each of the environmental or social characteristics:

- The requirement to invest at least 51% of assets in issuers with positive environmental and / or social characteristics.
- The values and norms based screening to implement full exclusions in relation to issuers that are involved in certain activities such as manufacturing controversial weapons and applying maximum revenue, production or distribution percentage thresholds to others such as those that are involved in thermal coal and tobacco.
- The requirement for all issuers in the portfolio to follow good governance practices.

The Sub- Fund also committed to investing at least 10% of assets in sustainable investments.

Further information on engagement is available in the answer to the question "How were the indicators for adverse impacts on sustainability factors taken into account?"

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: JPMorgan ETFs (Ireland) ICAV - Europe Research Enhanced Index Equity (ESG) UCITS ETF

Legal entity identifier: 549300RYCHMI4P7EKH68

#### Environmental and/or social characteristics

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund set out to promote a broad range of environmental, social and governance characteristics through its investment inclusion criteria, specifically with a minimum asset allocation of 51% of investments having environmental and / or social characteristics and a minimum of 10% of investments being sustainable investments. This commitment was met throughout the reference period (1 January 2022 - 31 December 2022). At the end of the reference period, the Sub-Fund held 90.08% of investments with environmental and / or social characteristics and 71.53% of sustainable investments.

These investments were determined by the application of an inclusion and exclusion criteria which applied at both an asset and product level. The inclusion criteria is underpinned by an ESG score assigned to all investments within the strategy to identify those that may be considered to have environmental and / or social characteristics and those that meet the thresholds for being considered as sustainable investment.

The ESG score takes into account the following indicators: effective management of toxic emissions, waste, good environmental record and social characteristics such as effective sustainability disclosures, positive scores on labour relations and management of safety issues.

Through its exclusion criteria (which applied both full and partial exclusions); the Sub-Fund promoted certain norms and values including supporting the protection of internationally proclaimed human rights. The Sub-Fund fully excluded companies that are involved in the manufacture of controversial weapons and applied maximum revenue or production thresholds to others such as those that are involved in thermal coal and tobacco.

In relation to the consideration of Good Governance, all investments (excluding cash and derivatives) were screened to exclude known violators of good governance practices. In addition, for those investments considered to have environmental and/or social characteristics or qualifying sustainable investments, additional considerations applied. For these investments, the Sub-Fund incorporated a peer group comparison and screened out companies that did not score in the top 80% relative to peers based on good governance indicators.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics. The extent to which the promoted environmental and social characteristics were met may be understood by considering the actual % of assets allocated to the relevant companies for the Reference Period exhibiting such characteristics.

In summary: the Sub-Fund met its pre-contractual committed minimums related to environmental and / or social characteristics and sustainable investments policy throughout the reference period. The Sub-Fund applied screens with the aim of excluding all potential investments prohibited under its exclusion policy throughout this period. The extent to which the norms and values promoted by the Sub-Fund were met is based on whether the Sub-Fund held any companies during the Reference Period that would have been prohibited under the exclusion policy. The Investment Manager has no indication that such companies were held. The Investment Manager informs that the continuity of the percentage values and information disclosed cannot be guaranteed in the future and is subject to the constantly evolving legal and regulatory landscape. The duration of the reference period can be less than 12 months if the fund was launched, closed or changed its Article 8/9 status during this time.

#### Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

#### How did the sustainability indicators perform?

A combination of the Investment Manager's proprietary ESG scoring methodology: consisting of the Investment Manager's proprietary ESG score, and / or third-party data was used as part of the inclusion criteria to measure the attainment of the environmental and / or social characteristics that the Sub-Fund promotes.

The methodology was based on a company's management of relevant environmental or social issues such as its toxic emissions, waste management, labour relations and safety issues, diversity / independence of the board of directors and data privacy. To be included in the 51% of assets considered to be promoting environmental and/or social characteristics, a company must score in the top 80% relative to its peers on either its environmental score or social score and meet the good governance conditions outlined above.

At the end of the reference period, the Sub-Fund held 90.08% of investments with environmental and / or social characteristics and 71.53% of sustainable investments.

In respect of the applied norms and values based exclusions, the Investment Manager utilised data to measure a company's participation in the relevant activities. Screening on that data resulted in full exclusions on certain potential investments and partial exclusions based on maximum percentage thresholds on revenue or production as envisaged through the exclusions policy. Throughout the reference period, and at no point, were the exclusion rules breached. A subset of the "Adverse Sustainability Indicators" as set out in the EU SFDR Regulatory Technical Standards was also incorporated in the screening.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics and therefore the performance of the indicators in respect of specific environmental or social characteristics is not set out here.

#### ...and compared to previous periods?

Not applicable for 2022

#### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the Sub-Fund partially made was comprised of any individual or combination of the following during the Reference Period:

Environmental Objectives: (i) climate risk mitigation, (ii) transition to a circular economy

Social Objectives: (i) inclusive and sustainable communities - increased female executive representation, (ii) inclusive and sustainable communities - increased female representation on boards of directors, and (iii) provision of a decent working environment and culture

Contribution to such objectives may be understood by considering the actual % of assets allocated to sustainable investments for the Reference Period. The Sub-Fund was required to invest 10% in sustainable investments. At no time during the period did the Sub-Fund hold sustainable investments below its committed minimum. At the end of the reference period, 71.53% of its assets were sustainable investments.

# Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and

anti-bribery matters.

#### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments that the Sub-Fund intended to make were subject to a screening process that sought to identify and exclude, from qualifying as a sustainable investment, those companies which the Investment Manager considered the worst performing companies, based on a threshold determined by the Investment Manager, in relation to certain environmental considerations. As a consequence, only those companies demonstrating the best indicators relative to both absolute and relative measures were considered sustainable investments.

Such considerations include climate change, protection of water and marine resources, transition to a circular economy, pollution and protection of biodiversity and ecosystems. In addition, the Investment Manager also applied a screen that sought to identify and exclude those companies that the Investment Manager considers to be in violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights based on data supplied by third-party service providers.

### \_\_ How were the indicators for adverse impacts on sustainability factors taken into account?

The indicators for adverse impacts on sustainability factors in Table 1 of Annex 1 and certain indicators, as determined by the Investment Manager, in Tables 2 and 3 of Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account as further described below. The Investment Manager used either the metrics in the EU SFDR Regulatory Technical Standards, or where this was not possible due to data limitations or other technical issues, a representative proxy. The Investment Manager consolidated the consideration of certain indicators into a "primary" indicator as set out further below and may have used an additional broader set of indicators than referenced below.

The relevant indicators in Table 1 of Annex 1 of the EU SFDR Regulatory Technical Standards consist of 9 environmental and 5 social and employee related indicators. The environmental indicators are listed at 1-9 and relate to green-house gas emissions (1-3), exposure to fossil fuel, share of non-renewable energy consumption and production, energy consumption intensity, activities negatively affecting biodiversity sensitive areas, emissions to water and hazardous waste (4-9 respectively). Indicators 10 – 14 relate to a company's social and employee matters and cover violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises, lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles, unadjusted gender pay gap, Board gender diversity and exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons) respectively.

The Investment Manager's approach included both quantitative and qualitative aspects to take the above indicators into account. It used particular indicators for screening, seeking to exclude companies that may cause significant harm. It used a subset for engagement with certain companies, seeking to influence best practice and it used certain of them as indicators of positive sustainability performance, by applying a minimum threshold in respect of the indicator to qualify as a sustainable investment. The data needed to take the indicators into account, where available, may have been obtained from investee companies themselves and / or supplied by third-party service providers (including proxy data). Data inputs that are self-reported by companies or supplied by third-party providers may be based on data sets and assumptions that may be insufficient, of poor quality or contain biased information. Due to dependency on third-parties, the Investment Manager cannot guarantee the accuracy or completeness of such data.

#### Screening

Certain of the indicators were taken into account through the values and norms-based screening to implement exclusions. These exclusions took into account indicators 10 and 14 in relation to UN Global Compact principles and OECD Guidelines for Multinational Enterprises and controversial weapons. The Investment Manager also applied a purpose-built screen. Due to certain technical considerations, such as data coverage in respect of specific indicators, the Investment Manager either applied the specific indicator per Table 1 or a representative proxy, as determined by the Investment Manager to screen investee companies in respect of the relevant environmental or social & employee matters. For example, greenhouse gas emissions are associated with several indicators and corresponding metrics in Table 1, such as greenhouse gas emissions, carbon footprint and greenhouse gas intensity (indicators 1-3). The Investment Manager used greenhouse gas intensity data (indicator 3), data in respect of non-renewable

energy consumption and production (indicator 5) and data on energy consumption intensity (indicator 6) to perform its screening in respect of greenhouse gas emissions.

In connection with the purpose-built screening and in respect of activities negatively affecting biodiversity sensitive areas and the emissions to water (indicators 7 and 8), due to data limitations, third-party representative proxy data was used, rather than the specific indicators per Table 1. The Investment Manager also took into account indicator 9 in relation to hazardous waste in respect of the purpose built screen.

#### Engagement

In addition to screening out certain companies as described above, the Investment Manager engaged on an ongoing basis with selected underlying investee companies. A subset of the indicators were used, subject to certain technical considerations such as data coverage, as the basis for engaging with selected underlying investee companies in accordance with the approach taken by the Investment Manager on stewardship and engagement. The indicators used in respect of such engagement include indicators 3, 5 and 13 in relation to greenhouse gas intensity, share of non-renewable energy and board gender diversity from Table 1. It also used indicators 2 in Table 2 and 3 in Table 3 in relation to emissions or air pollutants and number of days lost to injuries, accidents, fatalities or illness.

#### Indicators of sustainability

The Investment Manager used indicators 3 and 13 in relation to GHG Intensity and board gender diversity as indicators of sustainability to assist in qualifying an investment as a sustainable investment. One of the pathways required a company to be considered as an operational peer group leader to qualify as a sustainable investment. This required scoring against the indicator in the top 20% relative to peers.

#### \_\_ Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms based portfolio exclusions as described above under "To what extent were the environmental and / or social characteristics promoted by this financial product met?" were applied to seek alignment with these guidelines and principles. Third-party data was used to identify potential violators. Unless an exception was granted, the Sub-Fund prohibited relevant investments in these issuers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered select principal adverse impacts on sustainability factors through values and norms-based screening to implement exclusions. Indicators 10 and 14 in relation to violations of the UN Global Compact and controversial weapons from the EU SFDR Regulatory Technical Standards were used in respect of such screening. The Sub-Fund also used certain of the indicators as part of the "Do No Significant Harm" screen as detailed in the response to the question directly above to demonstrate that an investment qualified as a sustainable investment.

A subset of the above-mentioned Adverse Sustainability Indicators were used to determine engagement with investee companies based on their respective PAI performance.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/01/2022 - 31/12/2022

#### What were the top investments of this financial product?

| Largest Investments              | Sector                 | % Assets | Country        |

Asset allocation

assets.

describes the share of

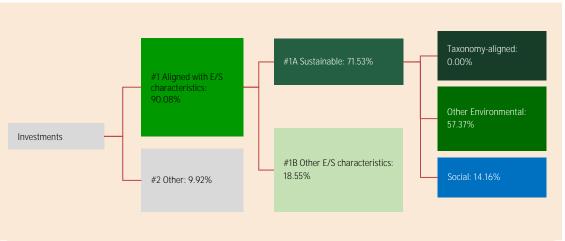

#### What was the proportion of sustainability-related investments?

#### What was the asset allocation?

At the end of the reference period, the Sub-Fund allocated 90.08% of its assets to companies that exhibited positive environmental and / or social characteristics and 71.53% of assets to sustainable investments. The Sub-Fund did not commit to investing any proportion of assets specifically in securities exhibiting positive environmental characteristics or specifically in positive social characteristics nor is there any commitment to any specific individual or combination of environmental or social objectives.

Ancillary cash, cash equivalents, money market funds and derivatives for EPM are not included in the % of assets set out in the table below. These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

# investments in specific

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made?

Although the Sub-Fund promoted certain environmental and social characteristics through its inclusion and exclusion criteria, it may have invested across a broad range of sectors – please refer to the list below. In addition, the Investment Manager engaged on an ongoing basis with selected underlying investee companies. Investments within sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels, will be included in the table below if held. Ancillary cash, cash equivalents, money market funds and derivatives for EPM are included in the denominator for the % of assets set out in the table below.

| Sector                 | Sub-sector                                | % Assets |
|------------------------|---|----------|

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the

# To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Data on EU Taxonomy alignment is currently very limited, in particular with regards to fossil gas and nuclear energy. We expect this to improve over time as more companies disclose their alignment, and the data becomes more available.

The Sub-Fund has made no minimum commitment to sustainable investment with environmental objectives aligned to the EU Taxonomy.

Therefore, the precontractual disclosure document for the Sub-Fund indicates the extent of targeted sustainable

criteria include comprehensive safety and waste management rules. Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee company today.
- capital expenditure (Capex) shows the green investments made by investee companies, relevant to a transition to a green economy.
- operational expenditure (Opex) reflects the green operational activities of investee companies.

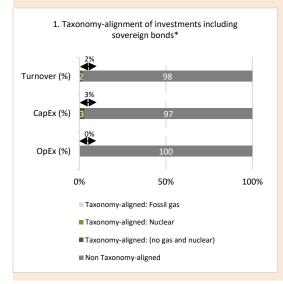

investments with an environmental objective aligned with the EU Taxonomy as 0.00%. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have environmental and / or social characteristics and sustainable investments (as defined by SFDR).

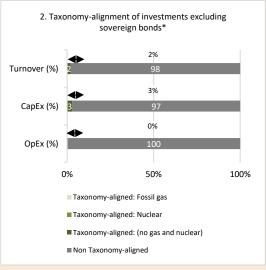

The below graphs illustrate the actual extent of investments in sustainable investments with an environmental objective aligned with the EU Taxonomy as measured at the end of the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes In fossil gas In nuclear energy

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 5% of the total investment

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Further to the above, the Sub-Fund has made no minimum commitment to making EU Taxonomy aligned investments – including Transitioning and Enabling activities. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have environmental and / or social characteristics and sustainable investments.

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The calculated share of Transitioning activities represents 0.00% and the calculated share of Enabling activities represents 1.12%, at the end of the reference period.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

# What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 57.37% of assets at the end of the reference period.

#### What was the share of socially sustainable investments?

The share of socially sustainable investments was 14.16% of assets at the end of the reference period.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 9.92% of assets in "other" investments were comprised of companies that did not meet the criteria described in response to above question entitled, "How did the sustainability indicators perform?" to qualify as exhibiting positive environmental or social characteristics. They are investments for diversification purposes. Ancillary cash, cash equivalents, money market funds and derivatives for EPM are not included in the % of assets included in the asset allocation diagram above, including under "other". These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

All investments, including "other" investments were subject to the following ESG Minimum Safeguards / principle:

- The minimum safeguards as outlined by Article 18 of the EU Taxonomy Regulation (including alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights), as implemented by the Investment Manager.
- Application of good governance practices (these include sound management structures, employee relations, remuneration of staff and tax compliance), as implemented by the Investment Manager.
- Compliance with the Do No Significant Harm principle as prescribed under the definition of sustainable investment in EU SFDR.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The following binding elements of the investment strategy were applied during the reference period to select the investments to attain each of the environmental or social characteristics:

- The requirement to invest at least 51% of assets in companies with positive environmental and / or social characteristics.
- The values and norms based screening to implement full exclusions in relation to companies that are involved in certain activities such as manufacturing controversial weapons and applying maximum revenue, production or distribution percentage thresholds to others such as those that are involved in thermal coal and tobacco.
- The requirement for all companies in the portfolio to follow good governance practices.

The Sub- Fund also committed to investing at least 10% of assets in sustainable investments.

Further information on engagement is available in the answer to the question "How were the indicators for adverse impacts on sustainability factors taken into account?"

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund set out to promote a broad range of environmental, social and governance characteristics through its investment inclusion criteria, specifically with a minimum asset allocation of 51% of investments having environmental and / or social characteristics and a minimum of 10% of investments being sustainable investments. This commitment was met throughout the reference period (26 January 2022 - 31 December 2022). At the end of the reference period, the Sub-Fund held 87.83% of investments with environmental and / or social characteristics and 69.09% of sustainable investments.

These investments were determined by the application of an inclusion and exclusion criteria which applied at both an asset and product level. The inclusion criteria is underpinned by an ESG score assigned to all investments within the strategy to identify those that may be considered to have environmental and / or social characteristics and those that meet the thresholds for being considered as sustainable investment.

The ESG score takes into account the following indicators: effective management of toxic emissions, waste, good environmental record and social characteristics such as effective sustainability disclosures, positive scores on labour relations and management of safety issues.

Through its exclusion criteria (which applied both full and partial exclusions); the Sub-Fund promoted certain norms and values including supporting the protection of internationally proclaimed human rights. The Sub-Fund fully excluded companies that are involved in the manufacture of controversial weapons and applied maximum revenue or production thresholds to others such as those that are involved in thermal coal and tobacco.

In relation to the consideration of Good Governance, all investments (excluding cash and derivatives) were screened to exclude known violators of good governance practices. In addition, for those investments considered to have environmental and/or social characteristics or qualifying sustainable investments, additional considerations applied. For these investments, the Sub-Fund incorporated a peer group comparison and screened out companies that did not score in the top 80% relative to peers based on good governance indicators.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics. The extent to which the promoted environmental and social characteristics were met may be understood by considering the actual % of assets allocated to the relevant companies for the Reference Period exhibiting such characteristics.

In summary: the Sub-Fund met its pre-contractual committed minimums related to environmental and / or social characteristics and sustainable investments policy throughout the reference period. The Sub-Fund applied screens with the aim of excluding all potential investments prohibited under its exclusion policy throughout this period. The extent to which the norms and values promoted by the Sub-Fund were met is based on whether the Sub-Fund held any companies during the Reference Period that would have been prohibited under the exclusion policy. The Investment Manager has no indication that such companies were held. The Investment Manager informs that the continuity of the percentage values and information disclosed cannot be guaranteed in the future and is subject to the constantly evolving legal and regulatory landscape. The duration of the reference period can be less than 12 months if the fund was launched, closed or changed its Article 8/9 status during this time.

#### Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

#### How did the sustainability indicators perform?

A combination of the Investment Manager's proprietary ESG scoring methodology: consisting of the Investment Manager's proprietary ESG score, and / or third-party data was used as part of the inclusion criteria to measure the attainment of the environmental and / or social characteristics that the Sub-Fund promotes.

The methodology was based on a company's management of relevant environmental or social issues such as its toxic emissions, waste management, labour relations and safety issues, diversity / independence of the board of directors and data privacy. To be included in the 51% of assets considered to be promoting environmental and/or social characteristics, a company must score in the top 80% relative to its peers on either its environmental score or social score and meet the good governance conditions outlined above.

At the end of the reference period, the Sub-Fund held 87.83% of investments with environmental and / or social characteristics and 69.09% of sustainable investments.

In respect of the applied norms and values based exclusions, the Investment Manager utilised data to measure a company's participation in the relevant activities. Screening on that data resulted in full exclusions on certain potential investments and partial exclusions based on maximum percentage thresholds on revenue or production as envisaged through the exclusions policy. Throughout the reference period, and at no point, were the exclusion rules breached. A subset of the "Adverse Sustainability Indicators" as set out in the EU SFDR Regulatory Technical Standards was also incorporated in the screening.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics and therefore the performance of the indicators in respect of specific environmental or social characteristics is not set out here.

#### ...and compared to previous periods?

Not applicable for 2022

#### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the Sub-Fund partially made was comprised of any individual or combination of the following during the Reference Period:

Environmental Objectives: (i) climate risk mitigation, (ii) transition to a circular economy

Social Objectives: (i) inclusive and sustainable communities - increased female executive representation, (ii) inclusive and sustainable communities - increased female representation on boards of directors, and (iii) provision of a decent working environment and culture

Contribution to such objectives may be understood by considering the actual % of assets allocated to sustainable investments for the Reference Period. The Sub-Fund was required to invest 10% in sustainable investments. At no time during the period did the Sub-Fund hold sustainable investments below its committed minimum. At the end of the reference period, 69.09% of its assets were sustainable investments.

# Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and

anti-bribery matters.

#### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments that the Sub-Fund intended to make were subject to a screening process that sought to identify and exclude, from qualifying as a sustainable investment, those companies which the Investment Manager considered the worst performing companies, based on a threshold determined by the Investment Manager, in relation to certain environmental considerations. As a consequence, only those companies demonstrating the best indicators relative to both absolute and relative measures were considered sustainable investments.

Such considerations include climate change, protection of water and marine resources, transition to a circular economy, pollution and protection of biodiversity and ecosystems. In addition, the Investment Manager also applied a screen that sought to identify and exclude those companies that the Investment Manager considers to be in violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights based on data supplied by third-party service providers.

### \_\_ How were the indicators for adverse impacts on sustainability factors taken into account?

The indicators for adverse impacts on sustainability factors in Table 1 of Annex 1 and certain indicators, as determined by the Investment Manager, in Tables 2 and 3 of Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account as further described below. The Investment Manager used either the metrics in the EU SFDR Regulatory Technical Standards, or where this was not possible due to data limitations or other technical issues, a representative proxy. The Investment Manager consolidated the consideration of certain indicators into a "primary" indicator as set out further below and may have used an additional broader set of indicators than referenced below.

The relevant indicators in Table 1 of Annex 1 of the EU SFDR Regulatory Technical Standards consist of 9 environmental and 5 social and employee related indicators. The environmental indicators are listed at 1-9 and relate to green-house gas emissions (1-3), exposure to fossil fuel, share of non-renewable energy consumption and production, energy consumption intensity, activities negatively affecting biodiversity sensitive areas, emissions to water and hazardous waste (4-9 respectively). Indicators 10 – 14 relate to a company's social and employee matters and cover violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises, lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles, unadjusted gender pay gap, Board gender diversity and exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons) respectively.

The Investment Manager's approach included both quantitative and qualitative aspects to take the above indicators into account. It used particular indicators for screening, seeking to exclude companies that may cause significant harm. It used a subset for engagement with certain companies, seeking to influence best practice and it used certain of them as indicators of positive sustainability performance, by applying a minimum threshold in respect of the indicator to qualify as a sustainable investment. The data needed to take the indicators into account, where available, may have been obtained from investee companies themselves and / or supplied by third-party service providers (including proxy data). Data inputs that are self-reported by companies or supplied by third-party providers may be based on data sets and assumptions that may be insufficient, of poor quality or contain biased information. Due to dependency on third-parties, the Investment Manager cannot guarantee the accuracy or completeness of such data.

#### Screening

Certain of the indicators were taken into account through the values and norms-based screening to implement exclusions. These exclusions took into account indicators 10 and 14 in relation to UN Global Compact principles and OECD Guidelines for Multinational Enterprises and controversial weapons. The Investment Manager also applied a purpose-built screen. Due to certain technical considerations, such as data coverage in respect of specific indicators, the Investment Manager either applied the specific indicator per Table 1 or a representative proxy, as determined by the Investment Manager to screen investee companies in respect of the relevant environmental or social & employee matters. For example, greenhouse gas emissions are associated with several indicators and corresponding metrics in Table 1, such as greenhouse gas emissions, carbon footprint and greenhouse gas intensity (indicators 1-3). The Investment Manager used greenhouse gas intensity data (indicator 3), data in respect of non-renewable

energy consumption and production (indicator 5) and data on energy consumption intensity (indicator 6) to perform its screening in respect of greenhouse gas emissions.

In connection with the purpose-built screening and in respect of activities negatively affecting biodiversity sensitive areas and the emissions to water (indicators 7 and 8), due to data limitations, third-party representative proxy data was used, rather than the specific indicators per Table 1. The Investment Manager also took into account indicator 9 in relation to hazardous waste in respect of the purpose built screen.

#### Engagement

In addition to screening out certain companies as described above, the Investment Manager engaged on an ongoing basis with selected underlying investee companies. A subset of the indicators were used, subject to certain technical considerations such as data coverage, as the basis for engaging with selected underlying investee companies in accordance with the approach taken by the Investment Manager on stewardship and engagement. The indicators used in respect of such engagement include indicators 3, 5 and 13 in relation to greenhouse gas intensity, share of non-renewable energy and board gender diversity from Table 1. It also used indicators 2 in Table 2 and 3 in Table 3 in relation to emissions or air pollutants and number of days lost to injuries, accidents, fatalities or illness.

#### Indicators of sustainability

The Investment Manager used indicators 3 and 13 in relation to GHG Intensity and board gender diversity as indicators of sustainability to assist in qualifying an investment as a sustainable investment. One of the pathways required a company to be considered as an operational peer group leader to qualify as a sustainable investment. This required scoring against the indicator in the top 20% relative to peers.

#### \_\_ Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms based portfolio exclusions as described above under "To what extent were the environmental and / or social characteristics promoted by this financial product met?" were applied to seek alignment with these guidelines and principles. Third-party data was used to identify potential violators. Unless an exception was granted, the Sub-Fund prohibited relevant investments in these issuers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered select principal adverse impacts on sustainability factors through values and norms-based screening to implement exclusions. Indicators 10 and 14 in relation to violations of the UN Global Compact and controversial weapons from the EU SFDR Regulatory Technical Standards were used in respect of such screening. The Sub-Fund also used certain of the indicators as part of the "Do No Significant Harm" screen as detailed in the response to the question directly above to demonstrate that an investment qualified as a sustainable investment.

A subset of the above-mentioned Adverse Sustainability Indicators were used to determine engagement with investee companies based on their respective PAI performance.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 26/01/2022 - 31/12/2022

#### What were the top investments of this financial product?

| Largest Investments             | Sector                 | % Assets | Country     |

#### What was the proportion of sustainability-related investments?

#### What was the asset allocation?

At the end of the reference period, the Sub-Fund allocated 87.83% of its assets to companies that exhibited positive environmental and / or social characteristics and 69.09% of assets to sustainable investments. The Sub-Fund did not commit to investing any proportion of assets specifically in securities exhibiting positive environmental characteristics or specifically in positive social characteristics nor is there any commitment to any specific individual or combination of environmental or social objectives.

Ancillary cash, cash equivalents, money market funds and derivatives for EPM are not included in the % of assets set out in the table below. These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

# #1A Sustainable: 69.09% #1A Sustainable: 69.09% Other Environmental: 50.84% Taxonomy-aligned: 0.00% Other Environmental: 50.84% Social: 18.25%

#### Asset allocation

describes the share of investments in specific assets.

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made?

Although the Sub-Fund promoted certain environmental and social characteristics through its inclusion and exclusion criteria, it may have invested across a broad range of sectors – please refer to the list below. In addition, the Investment Manager engaged on an ongoing basis with selected underlying investee companies. Investments within sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels, will be included in the table below if held. Ancillary cash, cash equivalents, money market funds and derivatives for EPM are included in the denominator for the % of assets set out in the table below.

| Sector                 | Sub-sector                                | % Assets |
|------------------------|---|----------|
| Communication Services | Media & Entertainment                     | 0.13     |
| Communication Services | Telecommunication Services                | 4.24     |

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the

# To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Data on EU Taxonomy alignment is currently very limited, in particular with regards to fossil gas and nuclear energy. We expect this to improve over time as more companies disclose their alignment, and the data becomes more available.

The Sub-Fund has made no minimum commitment to sustainable investment with environmental objectives aligned to the EU Taxonomy.

Therefore, the precontractual disclosure document for the Sub-Fund indicates the extent of targeted sustainable

criteria include comprehensive safety and waste management rules. Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee company today.
- capital expenditure (Capex) shows the green investments made by investee companies, relevant to a transition to a green economy.
- operational expenditure (Opex) reflects the green operational activities of investee companies.

investments with an environmental objective aligned with the EU Taxonomy as 0.00%. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have environmental and / or social characteristics and sustainable investments (as defined by SFDR).

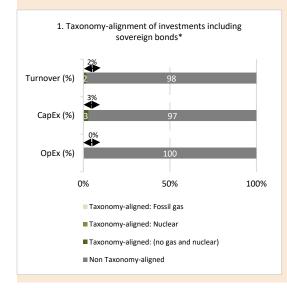

The below graphs illustrate the actual extent of investments in sustainable investments with an environmental objective aligned with the EU Taxonomy as measured at the end of the reference period.

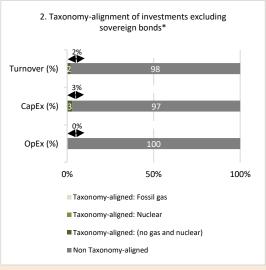

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes
In fossil gas
In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 5% of the total investment

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Further to the above, the Sub-Fund has made no minimum commitment to making EU Taxonomy aligned investments – including Transitioning and Enabling activities. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have environmental and / or social characteristics and sustainable investments.

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The calculated share of Transitioning activities represents 0.00% and the calculated share of Enabling activities represents 1.41%, at the end of the reference period.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 50.84% of assets at the end of the reference period.

#### What was the share of socially sustainable investments?

The share of socially sustainable investments was 18.25% of assets at the end of the reference period.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 12.17% of assets in "other" investments were comprised of companies that did not meet the criteria described in response to above question entitled, "How did the sustainability indicators perform?" to qualify as exhibiting positive environmental or social characteristics. They are investments for diversification purposes. Ancillary cash, cash equivalents, money market funds and derivatives for EPM are not included in the % of assets included in the asset allocation diagram above, including under "other". These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

All investments, including "other" investments were subject to the following ESG Minimum Safeguards / principle:

- The minimum safeguards as outlined by Article 18 of the EU Taxonomy Regulation (including alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights), as implemented by the Investment Manager.
- Application of good governance practices (these include sound management structures, employee relations, remuneration of staff and tax compliance), as implemented by the Investment Manager.
- Compliance with the Do No Significant Harm principle as prescribed under the definition of sustainable investment in EU SFDR.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The following binding elements of the investment strategy were applied during the reference period to select the investments to attain each of the environmental or social characteristics:

- The requirement to invest at least 51% of assets in companies with positive environmental and / or social characteristics.
- The values and norms based screening to implement full exclusions in relation to companies that are involved in certain activities such as manufacturing controversial weapons and applying maximum revenue, production or distribution percentage thresholds to others such as those that are involved in thermal coal and tobacco.
- The requirement for all companies in the portfolio to follow good governance practices.

The Sub- Fund also committed to investing at least 10% of assets in sustainable investments.

Further information on engagement is available in the answer to the question "How were the indicators for adverse impacts on sustainability factors taken into account?"

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: JPMorgan ETFs (Ireland) ICAV - Global Emerging Markets Research Enhanced Index Equity (ESG) UCITS ETF

Legal entity identifier: 549300P25ZMF0U5P3212

#### Environmental and/or social characteristics

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund set out to promote a broad range of environmental, social and governance characteristics through its investment inclusion criteria, specifically with a minimum asset allocation of 51% of investments having environmental and / or social characteristics and a minimum of 10% of investments being sustainable investments. This commitment was met throughout the reference period (1 January 2022 - 31 December 2022). At the end of the reference period, the Sub-Fund held 78.16% of investments with environmental and / or social characteristics and 52.64% of sustainable investments.

These investments were determined by the application of an inclusion and exclusion criteria which applied at both an asset and product level. The inclusion criteria is underpinned by an ESG score assigned to all investments within the strategy to identify those that may be considered to have environmental and / or social characteristics and those that meet the thresholds for being considered as sustainable investment.

The ESG score takes into account the following indicators: effective management of toxic emissions, waste, good environmental record and social characteristics such as effective sustainability disclosures, positive scores on labour relations and management of safety issues.

Through its exclusion criteria (which applied both full and partial exclusions); the Sub-Fund promoted certain norms and values including supporting the protection of internationally proclaimed human rights. The Sub-Fund fully excluded companies that are involved in the manufacture of controversial weapons and applied maximum revenue or production thresholds to others such as those that are involved in thermal coal and tobacco.

In relation to the consideration of Good Governance, all investments (excluding cash and derivatives) were screened to exclude known violators of good governance practices. In addition, for those investments considered to have environmental and/or social characteristics or qualifying sustainable investments, additional considerations applied. For these investments, the Sub-Fund incorporated a peer group comparison and screened out companies that did not score in the top 80% relative to peers based on good governance indicators.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics. The extent to which the promoted environmental and social characteristics were met may be understood by considering the actual % of assets allocated to the relevant companies for the Reference Period exhibiting such characteristics.

In summary: the Sub-Fund met its pre-contractual committed minimums related to environmental and / or social characteristics and sustainable investments policy throughout the reference period. The Sub-Fund applied screens with the aim of excluding all potential investments prohibited under its exclusion policy throughout this period. The extent to which the norms and values promoted by the Sub-Fund were met is based on whether the Sub-Fund held any companies during the Reference Period that would have been prohibited under the exclusion policy. The Investment Manager has no indication that such companies were held. The Investment Manager informs that the continuity of the percentage values and information disclosed cannot be guaranteed in the future and is subject to the constantly evolving legal and regulatory landscape. The duration of the reference period can be less than 12 months if the fund was launched, closed or changed its Article 8/9 status during this time.

#### Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

#### How did the sustainability indicators perform?

A combination of the Investment Manager's proprietary ESG scoring methodology: consisting of the Investment Manager's proprietary ESG score, and / or third-party data was used as part of the inclusion criteria to measure the attainment of the environmental and / or social characteristics that the Sub-Fund promotes.

The methodology was based on a company's management of relevant environmental or social issues such as its toxic emissions, waste management, labour relations and safety issues, diversity / independence of the board of directors and data privacy. To be included in the 51% of assets considered to be promoting environmental and/or social characteristics, a company must score in the top 80% relative to its peers on either its environmental score or social score and meet the good governance conditions outlined above.

At the end of the reference period, the Sub-Fund held 78.16% of investments with environmental and / or social characteristics and 52.64% of sustainable investments.

In respect of the applied norms and values based exclusions, the Investment Manager utilised data to measure a company's participation in the relevant activities. Screening on that data resulted in full exclusions on certain potential investments and partial exclusions based on maximum percentage thresholds on revenue or production as envisaged through the exclusions policy. Throughout the reference period, and at no point, were the exclusion rules breached. A subset of the "Adverse Sustainability Indicators" as set out in the EU SFDR Regulatory Technical Standards was also incorporated in the screening.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics and therefore the performance of the indicators in respect of specific environmental or social characteristics is not set out here.

#### ...and compared to previous periods?

Not applicable for 2022

#### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the Sub-Fund partially made was comprised of any individual or combination of the following during the Reference Period:

Environmental Objectives: (i) climate risk mitigation, (ii) transition to a circular economy

Social Objectives: (i) inclusive and sustainable communities - increased female executive representation, (ii) inclusive and sustainable communities - increased female representation on boards of directors, and (iii) provision of a decent working environment and culture

Contribution to such objectives may be understood by considering the actual % of assets allocated to sustainable investments for the Reference Period. The Sub-Fund was required to invest 10% in sustainable investments. At no time during the period did the Sub-Fund hold sustainable investments below its committed minimum. At the end of the reference period, 52.64% of its assets were sustainable investments.

# Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and

anti-bribery matters.

#### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments that the Sub-Fund intended to make were subject to a screening process that sought to identify and exclude, from qualifying as a sustainable investment, those companies which the Investment Manager considered the worst performing companies, based on a threshold determined by the Investment Manager, in relation to certain environmental considerations. As a consequence, only those companies demonstrating the best indicators relative to both absolute and relative measures were considered sustainable investments.

Such considerations include climate change, protection of water and marine resources, transition to a circular economy, pollution and protection of biodiversity and ecosystems. In addition, the Investment Manager also applied a screen that sought to identify and exclude those companies that the Investment Manager considers to be in violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights based on data supplied by third-party service providers.

### \_\_ How were the indicators for adverse impacts on sustainability factors taken into account?

The indicators for adverse impacts on sustainability factors in Table 1 of Annex 1 and certain indicators, as determined by the Investment Manager, in Tables 2 and 3 of Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account as further described below. The Investment Manager used either the metrics in the EU SFDR Regulatory Technical Standards, or where this was not possible due to data limitations or other technical issues, a representative proxy. The Investment Manager consolidated the consideration of certain indicators into a "primary" indicator as set out further below and may have used an additional broader set of indicators than referenced below.

The relevant indicators in Table 1 of Annex 1 of the EU SFDR Regulatory Technical Standards consist of 9 environmental and 5 social and employee related indicators. The environmental indicators are listed at 1-9 and relate to green-house gas emissions (1-3), exposure to fossil fuel, share of non-renewable energy consumption and production, energy consumption intensity, activities negatively affecting biodiversity sensitive areas, emissions to water and hazardous waste (4-9 respectively). Indicators 10 – 14 relate to a company's social and employee matters and cover violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises, lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles, unadjusted gender pay gap, Board gender diversity and exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons) respectively.

The Investment Manager's approach included both quantitative and qualitative aspects to take the above indicators into account. It used particular indicators for screening, seeking to exclude companies that may cause significant harm. It used a subset for engagement with certain companies, seeking to influence best practice and it used certain of them as indicators of positive sustainability performance, by applying a minimum threshold in respect of the indicator to qualify as a sustainable investment. The data needed to take the indicators into account, where available, may have been obtained from investee companies themselves and / or supplied by third-party service providers (including proxy data). Data inputs that are self-reported by companies or supplied by third-party providers may be based on data sets and assumptions that may be insufficient, of poor quality or contain biased information. Due to dependency on third-parties, the Investment Manager cannot guarantee the accuracy or completeness of such data.

#### Screening

Certain of the indicators were taken into account through the values and norms-based screening to implement exclusions. These exclusions took into account indicators 10 and 14 in relation to UN Global Compact principles and OECD Guidelines for Multinational Enterprises and controversial weapons. The Investment Manager also applied a purpose-built screen. Due to certain technical considerations, such as data coverage in respect of specific indicators, the Investment Manager either applied the specific indicator per Table 1 or a representative proxy, as determined by the Investment Manager to screen investee companies in respect of the relevant environmental or social & employee matters. For example, greenhouse gas emissions are associated with several indicators and corresponding metrics in Table 1, such as greenhouse gas emissions, carbon footprint and greenhouse gas intensity (indicators 1-3). The Investment Manager used greenhouse gas intensity data (indicator 3), data in respect of non-renewable

energy consumption and production (indicator 5) and data on energy consumption intensity (indicator 6) to perform its screening in respect of greenhouse gas emissions.

In connection with the purpose-built screening and in respect of activities negatively affecting biodiversity sensitive areas and the emissions to water (indicators 7 and 8), due to data limitations, third-party representative proxy data was used, rather than the specific indicators per Table 1. The Investment Manager also took into account indicator 9 in relation to hazardous waste in respect of the purpose built screen.

#### Engagement

In addition to screening out certain companies as described above, the Investment Manager engaged on an ongoing basis with selected underlying investee companies. A subset of the indicators were used, subject to certain technical considerations such as data coverage, as the basis for engaging with selected underlying investee companies in accordance with the approach taken by the Investment Manager on stewardship and engagement. The indicators used in respect of such engagement include indicators 3, 5 and 13 in relation to greenhouse gas intensity, share of non-renewable energy and board gender diversity from Table 1. It also used indicators 2 in Table 2 and 3 in Table 3 in relation to emissions or air pollutants and number of days lost to injuries, accidents, fatalities or illness.

#### Indicators of sustainability

The Investment Manager used indicators 3 and 13 in relation to GHG Intensity and board gender diversity as indicators of sustainability to assist in qualifying an investment as a sustainable investment. One of the pathways required a company to be considered as an operational peer group leader to qualify as a sustainable investment. This required scoring against the indicator in the top 20% relative to peers.

#### \_\_ Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms based portfolio exclusions as described above under "To what extent were the environmental and / or social characteristics promoted by this financial product met?" were applied to seek alignment with these guidelines and principles. Third-party data was used to identify potential violators. Unless an exception was granted, the Sub-Fund prohibited relevant investments in these issuers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered select principal adverse impacts on sustainability factors through values and norms-based screening to implement exclusions. Indicators 10 and 14 in relation to violations of the UN Global Compact and controversial weapons from the EU SFDR Regulatory Technical Standards were used in respect of such screening. The Sub-Fund also used certain of the indicators as part of the "Do No Significant Harm" screen as detailed in the response to the question directly above to demonstrate that an investment qualified as a sustainable investment.

A subset of the above-mentioned Adverse Sustainability Indicators were used to determine engagement with investee companies based on their respective PAI performance.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/01/2022 - 31/12/2022

#### What were the top investments of this financial product?

| Largest Investments   | Sector                 | % Assets | Country             |
|---|------------------------|----------|---------------------|
| TAIWAN SEMICONDUCTOR<br>MANUFACTURING COMPANY<br>LIMITED          | Information Technology | 5.92     | Taiwan              |

#### What was the proportion of sustainability-related investments?

#### What was the asset allocation?

At the end of the reference period, the Sub-Fund allocated 78.16% of its assets to companies that exhibited positive environmental and / or social characteristics and 52.64% of assets to sustainable investments. The Sub-Fund did not commit to investing any proportion of assets specifically in securities exhibiting positive environmental characteristics or specifically in positive social characteristics nor is there any commitment to any specific individual or combination of environmental or social objectives.

Ancillary cash, cash equivalents, money market funds and derivatives for EPM are not included in the % of assets set out in the table below. These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

# #1 Aligned with E/S characteristics: 78.16% #18 Other E/S characteristics: 25.52% #2 Other: 21.84% #18 Other E/S characteristics: 25.52% #3 Social: 16.88%

#### Asset allocation

describes the share of investments in specific assets.

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made?

Although the Sub-Fund promoted certain environmental and social characteristics through its inclusion and exclusion criteria, it may have invested across a broad range of sectors – please refer to the list below. In addition, the Investment Manager engaged on an ongoing basis with selected underlying investee companies. Investments within sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels, will be included in the table below if held. Ancillary cash, cash equivalents, money market funds and derivatives for EPM are included in the denominator for the % of assets set out in the table below.

| Sector                 | Sub-sector                                | % Assets |
|------------------------|---|----------|
| Communication Services | Media & Entertainment                     | 6.68     |
| Communication Services | Telecommunication Services                | 3.28     |
| Consumer Discretionary | Automobiles And Components                | 2.75     |
| Consumer Discretionary | Consumer Durables And Apparel             | 1.79     |
| Consumer Discretionary | Consumer Services                         | 1.37     |
| Consumer Discretionary | Retailing                                 | 7.58     |
| Consumer Staples       | Food And Staples Retailing                | 2.55     |

| Financials             | Insurance                                 | 3.70     |
| Health Care            | Health Care Equipment And Services        | 1.07     |
| Health Care            | Pharmaceuticals Biotech & Life Sciences   | 2.35     |
| Industrials            | Capital Goods                             | 2.87     |
| Industrials            | Transportation                            | 2.05     |
| Information Technology | Semiconductors And<br>Semiconductor Equip | 8.75     |
| Information Technology | Software And Services                     | 2.81     |
| Information Technology | Technology Hardware And<br>Equipment      | 6.81     |
| Materials              | Materials                                 | 8.25     |
| Real Estate            | Real Estate                               | 2.00     |
| Utilities              | Utilities                                 | 2.41     |

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety

# To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Data on EU Taxonomy alignment is currently very limited, in particular with regards to fossil gas and nuclear energy. We expect this to improve over time as more companies disclose their alignment, and the data becomes more available.

The Sub-Fund has made no minimum commitment to sustainable investment with environmental objectives aligned to the EU Taxonomy.

Therefore, the precontractual disclosure document for the Sub-Fund indicates the extent of targeted sustainable investments with an environmental objective aligned with the EU Taxonomy as 0.00%. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have environmental and /

and waste management rules. Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee company today.
- capital expenditure (Capex) shows the green investments made by investee companies, relevant to a transition to a green economy.
- operational expenditure (Opex) reflects the green operational activities of investee companies.

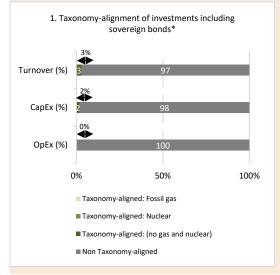

or social characteristics and sustainable investments (as defined by SFDR).

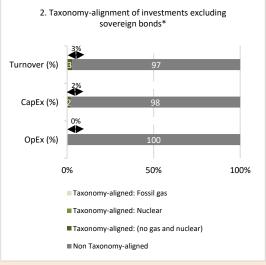

The below graphs illustrate the actual extent of investments in sustainable investments with an environmental objective aligned with the EU Taxonomy as measured at the end of the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

| Yes           |                  |
|---------------|------------------|
| In fossil gas | In nuclear energ |
| <b>X</b> No   |                  |

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 5% of the total investment

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

#### What was the share of investments made in transitional and enabling activities?

Further to the above, the Sub-Fund has made no minimum commitment to making EU Taxonomy aligned investments – including Transitioning and Enabling activities. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have environmental and / or social characteristics and sustainable investments.

The calculated share of Transitioning activities represents 0.00% and the calculated share of Enabling activities represents 1.47%, at the end of the reference period.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 35.76% of assets at the end of the reference period.

#### What was the share of socially sustainable investments?

The share of socially sustainable investments was 16.88% of assets at the end of the reference period.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 21.84% of assets in "other" investments were comprised of companies that did not meet the criteria described in response to above question entitled, "How did the sustainability indicators perform?" to qualify as exhibiting positive environmental or social characteristics. They are investments for diversification purposes. Ancillary cash, cash equivalents, money market funds and derivatives for EPM are not included in the % of assets included in the asset allocation diagram above, including under "other". These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

All investments, including "other" investments were subject to the following ESG Minimum Safeguards / principle:

- The minimum safeguards as outlined by Article 18 of the EU Taxonomy Regulation (including alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights), as implemented by the Investment Manager.
- Application of good governance practices (these include sound management structures, employee relations, remuneration of staff and tax compliance), as implemented by the Investment Manager.
- Compliance with the Do No Significant Harm principle as prescribed under the definition of sustainable investment in EU SFDR.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The following binding elements of the investment strategy were applied during the reference period to select the investments to attain each of the environmental or social characteristics:

- The requirement to invest at least 51% of assets in companies with positive environmental and / or social characteristics.
- The values and norms based screening to implement full exclusions in relation to companies that are involved in certain activities such as manufacturing controversial weapons and applying maximum revenue, production or distribution percentage thresholds to others such as those that are involved in thermal coal and tobacco.
- The requirement for all companies in the portfolio to follow good governance practices.

The Sub- Fund also committed to investing at least 10% of assets in sustainable investments.

Further information on engagement is available in the answer to the question "How were the indicators for adverse impacts on sustainability factors taken into account?"

# How did this financial product perform compared to the reference sustainable benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

How did this financial product perform compared with the reference benchmark?
 Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment

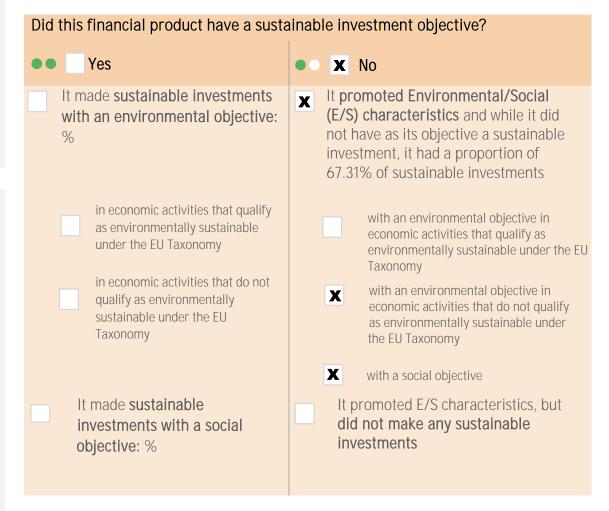

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: JPMorgan ETFs (Ireland) ICAV - Global Research Enhanced Index Equity (ESG) UCITS ETF

Legal entity identifier: 5493003MML3DKPLHHR48

#### Environmental and/or social characteristics

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund set out to promote a broad range of environmental, social and governance characteristics through its investment inclusion criteria, specifically with a minimum asset allocation of 51% of investments having environmental and / or social characteristics and a minimum of 10% of investments being sustainable investments. This commitment was met throughout the reference period (1 January 2022 - 31 December 2022). At the end of the reference period, the Sub-Fund held 83.81% of investments with environmental and / or social characteristics and 67.31% of sustainable investments.

These investments were determined by the application of an inclusion and exclusion criteria which applied at both an asset and product level. The inclusion criteria is underpinned by an ESG score assigned to all investments within the strategy to identify those that may be considered to have environmental and / or social characteristics and those that meet the thresholds for being considered as sustainable investment.

The ESG score takes into account the following indicators: effective management of toxic emissions, waste, good environmental record and social characteristics such as effective sustainability disclosures, positive scores on labour relations and management of safety issues.

Through its exclusion criteria (which applied both full and partial exclusions); the Sub-Fund promoted certain norms and values including supporting the protection of internationally proclaimed human rights. The Sub-Fund fully excluded companies that are involved in the manufacture of controversial weapons and applied maximum revenue or production thresholds to others such as those that are involved in thermal coal and tobacco.

In relation to the consideration of Good Governance, all investments (excluding cash and derivatives) were screened to exclude known violators of good governance practices. In addition, for those investments considered to have environmental and/or social characteristics or qualifying sustainable investments, additional considerations applied. For these investments, the Sub-Fund incorporated a peer group comparison and screened out companies that did not score in the top 80% relative to peers based on good governance indicators.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics. The extent to which the promoted environmental and social characteristics were met may be understood by considering the actual % of assets allocated to the relevant companies for the Reference Period exhibiting such characteristics.

In summary: the Sub-Fund met its pre-contractual committed minimums related to environmental and / or social characteristics and sustainable investments policy throughout the reference period. The Sub-Fund applied screens with the aim of excluding all potential investments prohibited under its exclusion policy throughout this period. The extent to which the norms and values promoted by the Sub-Fund were met is based on whether the Sub-Fund held any companies during the Reference Period that would have been prohibited under the exclusion policy. The Investment Manager has no indication that such companies were held. The Investment Manager informs that the continuity of the percentage values and information disclosed cannot be guaranteed in the future and is subject to the constantly evolving legal and regulatory landscape. The duration of the reference period can be less than 12 months if the fund was launched, closed or changed its Article 8/9 status during this time.

#### Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

#### How did the sustainability indicators perform?

A combination of the Investment Manager's proprietary ESG scoring methodology: consisting of the Investment Manager's proprietary ESG score, and / or third-party data was used as part of the inclusion criteria to measure the attainment of the environmental and / or social characteristics that the Sub-Fund promotes.

The methodology was based on a company's management of relevant environmental or social issues such as its toxic emissions, waste management, labour relations and safety issues, diversity / independence of the board of directors and data privacy. To be included in the 51% of assets considered to be promoting environmental and/or social characteristics, a company must score in the top 80% relative to its peers on either its environmental score or social score and meet the good governance conditions outlined above.

At the end of the reference period, the Sub-Fund held 83.81% of investments with environmental and / or social characteristics and 67.31% of sustainable investments.

In respect of the applied norms and values based exclusions, the Investment Manager utilised data to measure a company's participation in the relevant activities. Screening on that data resulted in full exclusions on certain potential investments and partial exclusions based on maximum percentage thresholds on revenue or production as envisaged through the exclusions policy. Throughout the reference period, and at no point, were the exclusion rules breached. A subset of the "Adverse Sustainability Indicators" as set out in the EU SFDR Regulatory Technical Standards was also incorporated in the screening.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics and therefore the performance of the indicators in respect of specific environmental or social characteristics is not set out here.

#### ...and compared to previous periods?

Not applicable for 2022

#### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the Sub-Fund partially made was comprised of any individual or combination of the following during the Reference Period:

Environmental Objectives: (i) climate risk mitigation, (ii) transition to a circular economy

Social Objectives: (i) inclusive and sustainable communities - increased female executive representation, (ii) inclusive and sustainable communities - increased female representation on boards of directors, and (iii) provision of a decent working environment and culture

Contribution to such objectives may be understood by considering the actual % of assets allocated to sustainable investments for the Reference Period. The Sub-Fund was required to invest 10% in sustainable investments. At no time during the period did the Sub-Fund hold sustainable investments below its committed minimum. At the end of the reference period, 67.31% of its assets were sustainable investments.

# Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and

anti-bribery matters.

#### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments that the Sub-Fund intended to make were subject to a screening process that sought to identify and exclude, from qualifying as a sustainable investment, those companies which the Investment Manager considered the worst performing companies, based on a threshold determined by the Investment Manager, in relation to certain environmental considerations. As a consequence, only those companies demonstrating the best indicators relative to both absolute and relative measures were considered sustainable investments.

Such considerations include climate change, protection of water and marine resources, transition to a circular economy, pollution and protection of biodiversity and ecosystems. In addition, the Investment Manager also applied a screen that sought to identify and exclude those companies that the Investment Manager considers to be in violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights based on data supplied by third-party service providers.

### \_\_ How were the indicators for adverse impacts on sustainability factors taken into account?

The indicators for adverse impacts on sustainability factors in Table 1 of Annex 1 and certain indicators, as determined by the Investment Manager, in Tables 2 and 3 of Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account as further described below. The Investment Manager used either the metrics in the EU SFDR Regulatory Technical Standards, or where this was not possible due to data limitations or other technical issues, a representative proxy. The Investment Manager consolidated the consideration of certain indicators into a "primary" indicator as set out further below and may have used an additional broader set of indicators than referenced below.

The relevant indicators in Table 1 of Annex 1 of the EU SFDR Regulatory Technical Standards consist of 9 environmental and 5 social and employee related indicators. The environmental indicators are listed at 1-9 and relate to green-house gas emissions (1-3), exposure to fossil fuel, share of non-renewable energy consumption and production, energy consumption intensity, activities negatively affecting biodiversity sensitive areas, emissions to water and hazardous waste (4-9 respectively). Indicators 10 – 14 relate to a company's social and employee matters and cover violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises, lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles, unadjusted gender pay gap, Board gender diversity and exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons) respectively.

The Investment Manager's approach included both quantitative and qualitative aspects to take the above indicators into account. It used particular indicators for screening, seeking to exclude companies that may cause significant harm. It used a subset for engagement with certain companies, seeking to influence best practice and it used certain of them as indicators of positive sustainability performance, by applying a minimum threshold in respect of the indicator to qualify as a sustainable investment. The data needed to take the indicators into account, where available, may have been obtained from investee companies themselves and / or supplied by third-party service providers (including proxy data). Data inputs that are self-reported by companies or supplied by third-party providers may be based on data sets and assumptions that may be insufficient, of poor quality or contain biased information. Due to dependency on third-parties, the Investment Manager cannot guarantee the accuracy or completeness of such data.

#### Screening

Certain of the indicators were taken into account through the values and norms-based screening to implement exclusions. These exclusions took into account indicators 10 and 14 in relation to UN Global Compact principles and OECD Guidelines for Multinational Enterprises and controversial weapons. The Investment Manager also applied a purpose-built screen. Due to certain technical considerations, such as data coverage in respect of specific indicators, the Investment Manager either applied the specific indicator per Table 1 or a representative proxy, as determined by the Investment Manager to screen investee companies in respect of the relevant environmental or social & employee matters. For example, greenhouse gas emissions are associated with several indicators and corresponding metrics in Table 1, such as greenhouse gas emissions, carbon footprint and greenhouse gas intensity (indicators 1-3). The Investment Manager used greenhouse gas intensity data (indicator 3), data in respect of non-renewable

energy consumption and production (indicator 5) and data on energy consumption intensity (indicator 6) to perform its screening in respect of greenhouse gas emissions.

In connection with the purpose-built screening and in respect of activities negatively affecting biodiversity sensitive areas and the emissions to water (indicators 7 and 8), due to data limitations, third-party representative proxy data was used, rather than the specific indicators per Table 1. The Investment Manager also took into account indicator 9 in relation to hazardous waste in respect of the purpose built screen.

#### Engagement

In addition to screening out certain companies as described above, the Investment Manager engaged on an ongoing basis with selected underlying investee companies. A subset of the indicators were used, subject to certain technical considerations such as data coverage, as the basis for engaging with selected underlying investee companies in accordance with the approach taken by the Investment Manager on stewardship and engagement. The indicators used in respect of such engagement include indicators 3, 5 and 13 in relation to greenhouse gas intensity, share of non-renewable energy and board gender diversity from Table 1. It also used indicators 2 in Table 2 and 3 in Table 3 in relation to emissions or air pollutants and number of days lost to injuries, accidents, fatalities or illness.

#### Indicators of sustainability

The Investment Manager used indicators 3 and 13 in relation to GHG Intensity and board gender diversity as indicators of sustainability to assist in qualifying an investment as a sustainable investment. One of the pathways required a company to be considered as an operational peer group leader to qualify as a sustainable investment. This required scoring against the indicator in the top 20% relative to peers.

#### \_\_ Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms based portfolio exclusions as described above under "To what extent were the environmental and / or social characteristics promoted by this financial product met?" were applied to seek alignment with these guidelines and principles. Third-party data was used to identify potential violators. Unless an exception was granted, the Sub-Fund prohibited relevant investments in these issuers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered select principal adverse impacts on sustainability factors through values and norms-based screening to implement exclusions. Indicators 10 and 14 in relation to violations of the UN Global Compact and controversial weapons from the EU SFDR Regulatory Technical Standards were used in respect of such screening. The Sub-Fund also used certain of the indicators as part of the "Do No Significant Harm" screen as detailed in the response to the question directly above to demonstrate that an investment qualified as a sustainable investment.

A subset of the above-mentioned Adverse Sustainability Indicators were used to determine engagement with investee companies based on their respective PAI performance.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/01/2022 - 31/12/2022

#### What were the top investments of this financial product?

| Largest Investments   | Sector                 | % Assets | Country       |
|---|------------------------|----------|---------------|
| APPLE INC   | Information Technology | 4.12     | United States |

| NESTLE SA   | Consumer Staples       | 0.73     | Switzerland   |
| THERMO FISHER SCIENTIFIC INC                                | Health Care            | 0.71     | United States |

#### What was the proportion of sustainability-related investments?

#### What was the asset allocation?

At the end of the reference period, the Sub-Fund allocated 83.81% of its assets to companies that exhibited positive environmental and / or social characteristics and 67.31% of assets to sustainable investments. The Sub-Fund did not commit to investing any proportion of assets specifically in securities exhibiting positive environmental characteristics or specifically in positive social characteristics nor is there any commitment to any specific individual or combination of environmental or social objectives.

Ancillary cash, cash equivalents, money market funds and derivatives for EPM are not included in the % of assets set out in the table below. These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

# #1 Aligned with E/S characteristics: 83.81% #18 Other E/S characteristics: 16.50% Taxonomy-aligned: 0.00% Other Environmental: 48.53% Social: 18.78%

#### Asset allocation

describes the share of investments in specific assets.

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made?

Although the Sub-Fund promoted certain environmental and social characteristics through its inclusion and exclusion criteria, it may have invested across a broad range of sectors – please refer to the list below. In addition, the Investment Manager engaged on an ongoing basis with selected underlying investee companies. Investments within sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels, will be included in the table below if held. Ancillary cash, cash equivalents, money market funds and derivatives for EPM are included in the denominator for the % of assets set out in the table below.

| Sector                 | Sub-sector                                | % Assets |
|------------------------|---|----------|
| Communication Services | Telecommunication Services                | 1.39     |
| Communication Services | Media & Entertainment                     | 4.81     |
| Consumer Discretionary | Automobiles And Components                | 1.82     |

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the

# To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Data on EU Taxonomy alignment is currently very limited, in particular with regards to fossil gas and nuclear energy. We expect this to improve over time as more companies disclose their alignment, and the data becomes more available.

The Sub-Fund has made no minimum commitment to sustainable investment with environmental objectives aligned to the EU Taxonomy.

Therefore, the precontractual disclosure document for the Sub-Fund indicates the extent of targeted sustainable

criteria include comprehensive safety and waste management rules. Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee company today.
- capital expenditure (Capex) shows the green investments made by investee companies, relevant to a transition to a green economy.
- operational expenditure (Opex) reflects the green operational activities of investee companies.

investments with an environmental objective aligned with the EU Taxonomy as 0.00%. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have environmental and / or social characteristics and sustainable investments (as defined by SFDR).

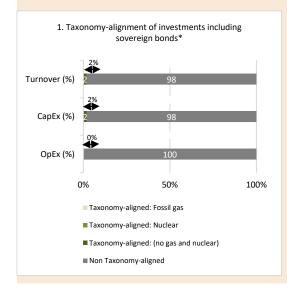

The below graphs illustrate the actual extent of investments in sustainable investments with an environmental objective aligned with the EU Taxonomy as measured at the end of the reference period.

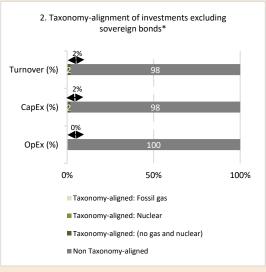

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes
In fossil gas
In nuclear energy

X No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 4% of the total investment

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Further to the above, the Sub-Fund has made no minimum commitment to making EU Taxonomy aligned investments – including Transitioning and Enabling activities. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have environmental and / or social characteristics and sustainable investments.

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The calculated share of Transitioning activities represents 0.09% and the calculated share of Enabling activities represents 1.20%, at the end of the reference period.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

# What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 48.53% of assets at the end of the reference period.

#### What was the share of socially sustainable investments?

The share of socially sustainable investments was 18.78% of assets at the end of the reference period.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 16.19% of assets in "other" investments were comprised of companies that did not meet the criteria described in response to above question entitled, "How did the sustainability indicators perform?" to qualify as exhibiting positive environmental or social characteristics. They are investments for diversification purposes. Ancillary cash, cash equivalents, money market funds and derivatives for EPM are not included in the % of assets included in the asset allocation diagram above, including under "other". These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

All investments, including "other" investments were subject to the following ESG Minimum Safeguards / principle:

- The minimum safeguards as outlined by Article 18 of the EU Taxonomy Regulation (including alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights), as implemented by the Investment Manager.
- Application of good governance practices (these include sound management structures, employee relations, remuneration of staff and tax compliance), as implemented by the Investment Manager.
- Compliance with the Do No Significant Harm principle as prescribed under the definition of sustainable investment in EU SFDR.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The following binding elements of the investment strategy were applied during the reference period to select the investments to attain each of the environmental or social characteristics:

- The requirement to invest at least 51% of assets in companies with positive environmental and / or social characteristics.
- The values and norms based screening to implement full exclusions in relation to companies that are involved in certain activities such as manufacturing controversial weapons and applying maximum revenue, production or distribution percentage thresholds to others such as those that are involved in thermal coal and tobacco.
- The requirement for all companies in the portfolio to follow good governance practices.

The Sub- Fund also committed to investing at least 10% of assets in sustainable investments.

Further information on engagement is available in the answer to the question "How were the indicators for adverse impacts on sustainability factors taken into account?"

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. How does the reference benchmark differ from a broad market index?

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: JPMorgan ETFs (Ireland) ICAV - Japan Research Enhanced Index Equity (ESG) UCITS ETF

Legal entity identifier: 549300U3RUHUSBSR2F25

#### Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                             |  |  |

| investments with a social objective: %  | It promoted E/S characteristics, but did not make any sustainable investments  |  |

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund set out to promote a broad range of environmental, social and governance characteristics through its investment inclusion criteria, specifically with a minimum asset allocation of 51% of investments having environmental and / or social characteristics and a minimum of 10% of investments being sustainable investments. This commitment was met throughout the reference period (29 March 2022 - 31 December 2022). At the end of the reference period, the Sub-Fund held 81.23% of investments with environmental and / or social characteristics and 48.70% of sustainable investments.

These investments were determined by the application of an inclusion and exclusion criteria which applied at both an asset and product level. The inclusion criteria is underpinned by an ESG score assigned to all investments within the strategy to identify those that may be considered to have environmental and / or social characteristics and those that meet the thresholds for being considered as sustainable investment.

The ESG score takes into account the following indicators: effective management of toxic emissions, waste, good environmental record and social characteristics such as effective sustainability disclosures, positive scores on labour relations and management of safety issues.

Through its exclusion criteria (which applied both full and partial exclusions); the Sub-Fund promoted certain norms and values including supporting the protection of internationally proclaimed human rights. The Sub-Fund fully excluded companies that are involved in the manufacture of controversial weapons and applied maximum revenue or production thresholds to others such as those that are involved in thermal coal and tobacco.

In relation to the consideration of Good Governance, all investments (excluding cash and derivatives) were screened to exclude known violators of good governance practices. In addition, for those investments considered to have environmental and/or social characteristics or qualifying sustainable investments, additional considerations applied. For these investments, the Sub-Fund incorporated a peer group comparison and screened out companies that did not score in the top 80% relative to peers based on good governance indicators.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics. The extent to which the promoted environmental and social characteristics were met may be understood by considering the actual % of assets allocated to the relevant companies for the Reference Period exhibiting such characteristics.

In summary: the Sub-Fund met its pre-contractual committed minimums related to environmental and / or social characteristics and sustainable investments policy throughout the reference period. The Sub-Fund applied screens with the aim of excluding all potential investments prohibited under its exclusion policy throughout this period. The extent to which the norms and values promoted by the Sub-Fund were met is based on whether the Sub-Fund held any companies during the Reference Period that would have been prohibited under the exclusion policy. The Investment Manager has no indication that such companies were held. The Investment Manager informs that the continuity of the percentage values and information disclosed cannot be guaranteed in the future and is subject to the constantly evolving legal and regulatory landscape. The duration of the reference period can be less than 12 months if the fund was launched, closed or changed its Article 8/9 status during this time.

#### Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

#### How did the sustainability indicators perform?

A combination of the Investment Manager's proprietary ESG scoring methodology: consisting of the Investment Manager's proprietary ESG score, and / or third-party data was used as part of the inclusion criteria to measure the attainment of the environmental and / or social characteristics that the Sub-Fund promotes.

The methodology was based on a company's management of relevant environmental or social issues such as its toxic emissions, waste management, labour relations and safety issues, diversity / independence of the board of directors and data privacy. To be included in the 51% of assets considered to be promoting environmental and/or social characteristics, a company must score in the top 80% relative to its peers on either its environmental score or social score and meet the good governance conditions outlined above.

At the end of the reference period, the Sub-Fund held 81.23% of investments with environmental and / or social characteristics and 48.70% of sustainable investments.

In respect of the applied norms and values based exclusions, the Investment Manager utilised data to measure a company's participation in the relevant activities. Screening on that data resulted in full exclusions on certain potential investments and partial exclusions based on maximum percentage thresholds on revenue or production as envisaged through the exclusions policy. Throughout the reference period, and at no point, were the exclusion rules breached. A subset of the "Adverse Sustainability Indicators" as set out in the EU SFDR Regulatory Technical Standards was also incorporated in the screening.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics and therefore the performance of the indicators in respect of specific environmental or social characteristics is not set out here.

#### ...and compared to previous periods?

Not applicable for 2022

#### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the Sub-Fund partially made was comprised of any individual or combination of the following during the Reference Period:

Environmental Objectives: (i) climate risk mitigation, (ii) transition to a circular economy

Social Objectives: (i) inclusive and sustainable communities - increased female executive representation, (ii) inclusive and sustainable communities - increased female representation on boards of directors, and (iii) provision of a decent working environment and culture

Contribution to such objectives may be understood by considering the actual % of assets allocated to sustainable investments for the Reference Period. The Sub-Fund was required to invest 10% in sustainable investments. At no time during the period did the Sub-Fund hold sustainable investments below its committed minimum. At the end of the reference period, 48.70% of its assets were sustainable investments.

# Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and

anti-bribery matters.

#### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments that the Sub-Fund intended to make were subject to a screening process that sought to identify and exclude, from qualifying as a sustainable investment, those companies which the Investment Manager considered the worst performing companies, based on a threshold determined by the Investment Manager, in relation to certain environmental considerations. As a consequence, only those companies demonstrating the best indicators relative to both absolute and relative measures were considered sustainable investments.

Such considerations include climate change, protection of water and marine resources, transition to a circular economy, pollution and protection of biodiversity and ecosystems. In addition, the Investment Manager also applied a screen that sought to identify and exclude those companies that the Investment Manager considers to be in violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights based on data supplied by third-party service providers.

### \_\_ How were the indicators for adverse impacts on sustainability factors taken into account?

The indicators for adverse impacts on sustainability factors in Table 1 of Annex 1 and certain indicators, as determined by the Investment Manager, in Tables 2 and 3 of Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account as further described below. The Investment Manager used either the metrics in the EU SFDR Regulatory Technical Standards, or where this was not possible due to data limitations or other technical issues, a representative proxy. The Investment Manager consolidated the consideration of certain indicators into a "primary" indicator as set out further below and may have used an additional broader set of indicators than referenced below.

The relevant indicators in Table 1 of Annex 1 of the EU SFDR Regulatory Technical Standards consist of 9 environmental and 5 social and employee related indicators. The environmental indicators are listed at 1-9 and relate to green-house gas emissions (1-3), exposure to fossil fuel, share of non-renewable energy consumption and production, energy consumption intensity, activities negatively affecting biodiversity sensitive areas, emissions to water and hazardous waste (4-9 respectively). Indicators 10 – 14 relate to a company's social and employee matters and cover violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises, lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles, unadjusted gender pay gap, Board gender diversity and exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons) respectively.

The Investment Manager's approach included both quantitative and qualitative aspects to take the above indicators into account. It used particular indicators for screening, seeking to exclude companies that may cause significant harm. It used a subset for engagement with certain companies, seeking to influence best practice and it used certain of them as indicators of positive sustainability performance, by applying a minimum threshold in respect of the indicator to qualify as a sustainable investment. The data needed to take the indicators into account, where available, may have been obtained from investee companies themselves and / or supplied by third-party service providers (including proxy data). Data inputs that are self-reported by companies or supplied by third-party providers may be based on data sets and assumptions that may be insufficient, of poor quality or contain biased information. Due to dependency on third-parties, the Investment Manager cannot guarantee the accuracy or completeness of such data.

#### Screening

Certain of the indicators were taken into account through the values and norms-based screening to implement exclusions. These exclusions took into account indicators 10 and 14 in relation to UN Global Compact principles and OECD Guidelines for Multinational Enterprises and controversial weapons. The Investment Manager also applied a purpose-built screen. Due to certain technical considerations, such as data coverage in respect of specific indicators, the Investment Manager either applied the specific indicator per Table 1 or a representative proxy, as determined by the Investment Manager to screen investee companies in respect of the relevant environmental or social & employee matters. For example, greenhouse gas emissions are associated with several indicators and corresponding metrics in Table 1, such as greenhouse gas emissions, carbon footprint and greenhouse gas intensity (indicators 1-3). The Investment Manager used greenhouse gas intensity data (indicator 3), data in respect of non-renewable

energy consumption and production (indicator 5) and data on energy consumption intensity (indicator 6) to perform its screening in respect of greenhouse gas emissions.

In connection with the purpose-built screening and in respect of activities negatively affecting biodiversity sensitive areas and the emissions to water (indicators 7 and 8), due to data limitations, third-party representative proxy data was used, rather than the specific indicators per Table 1. The Investment Manager also took into account indicator 9 in relation to hazardous waste in respect of the purpose built screen.

#### Engagement

In addition to screening out certain companies as described above, the Investment Manager engaged on an ongoing basis with selected underlying investee companies. A subset of the indicators were used, subject to certain technical considerations such as data coverage, as the basis for engaging with selected underlying investee companies in accordance with the approach taken by the Investment Manager on stewardship and engagement. The indicators used in respect of such engagement include indicators 3, 5 and 13 in relation to greenhouse gas intensity, share of non-renewable energy and board gender diversity from Table 1. It also used indicators 2 in Table 2 and 3 in Table 3 in relation to emissions or air pollutants and number of days lost to injuries, accidents, fatalities or illness.

#### Indicators of sustainability

The Investment Manager used indicators 3 and 13 in relation to GHG Intensity and board gender diversity as indicators of sustainability to assist in qualifying an investment as a sustainable investment. One of the pathways required a company to be considered as an operational peer group leader to qualify as a sustainable investment. This required scoring against the indicator in the top 20% relative to peers.

#### \_\_ Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms based portfolio exclusions as described above under "To what extent were the environmental and / or social characteristics promoted by this financial product met?" were applied to seek alignment with these guidelines and principles. Third-party data was used to identify potential violators. Unless an exception was granted, the Sub-Fund prohibited relevant investments in these issuers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered select principal adverse impacts on sustainability factors through values and norms-based screening to implement exclusions. Indicators 10 and 14 in relation to violations of the UN Global Compact and controversial weapons from the EU SFDR Regulatory Technical Standards were used in respect of such screening. The Sub-Fund also used certain of the indicators as part of the "Do No Significant Harm" screen as detailed in the response to the question directly above to demonstrate that an investment qualified as a sustainable investment.

A subset of the above-mentioned Adverse Sustainability Indicators were used to determine engagement with investee companies based on their respective PAI performance.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 29/03/2022 - 31/12/2022

#### What were the top investments of this financial product?

| Largest Investments                     | Sector                 | % Assets | Country |
|---|------------------------|----------|---------|
| TOYOTA MOTOR CORPORATION                | Consumer Discretionary | 4.26     | Japan   |
| SONY GROUP CORPORATION                  | Consumer Discretionary | 3.46     | Japan   |
| MITSUBISHI UFJ FINANCIAL<br>GROUP, INC. | Financials             | 3.33     | Japan   |
| KEYENCE CORPORATION                     | Information Technology | 2.77     | Japan   |

| HONDA MOTOR CO., LTD.                   | Consumer Discretionary | 1.62     | Japan   |

# -

#### What was the proportion of sustainability-related investments?

#### What was the asset allocation?

At the end of the reference period, the Sub-Fund allocated 81.23% of its assets to companies that exhibited positive environmental and / or social characteristics and 48.70% of assets to sustainable investments. The Sub-Fund did not commit to investing any proportion of assets specifically in securities exhibiting positive environmental characteristics or specifically in positive social characteristics nor is there any commitment to any specific individual or combination of environmental or social objectives.

Ancillary cash, cash equivalents, money market funds and derivatives for EPM are not included in the % of assets set out in the table below. These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

# #1A Sustainable: 48.70% #1A Sustainable: 48.70% Other Environmental: 32.43% #1B Other E/S characteristics: 32.53% Social: 16.27%

#### Asset allocation

describes the share of investments in specific assets.

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made?

Although the Sub-Fund promoted certain environmental and social characteristics through its inclusion and exclusion criteria, it may have invested across a broad range of sectors – please refer to the list below. In addition, the Investment Manager engaged on an ongoing basis with selected underlying investee companies. Investments within sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels, will be included in the table below if held. Ancillary cash, cash equivalents, money market funds and derivatives for EPM are included in the denominator for the % of assets set out in the table below.

| Sector                 | Sub-sector                                | % Assets |
|------------------------|---|----------|
| Communication Services | Media & Entertainment                     | 3.75     |
| Communication Services | Telecommunication Services                | 5.27     |
| Consumer Discretionary | Automobiles And Components                | 9.38     |
| Consumer Discretionary | Consumer Durables And<br>Apparel          | 4.56     |
| Consumer Discretionary | Consumer Services                         | 0.65     |
| Consumer Discretionary | Retailing                                 | 2.82     |
| Consumer Staples       | Food And Staples Retailing                | 1.39     |
| Consumer Staples       | Food Beverage And Tobacco                 | 2.88     |
| Consumer Staples       | Household And Personal<br>Products        | 2.18     |

| Real Estate            | Real Estate                               | 3.47     |
| Utilities              | Utilities                                 | 1.15     |

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the

# To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Data on EU Taxonomy alignment is currently very limited, in particular with regards to fossil gas and nuclear energy. We expect this to improve over time as more companies disclose their alignment, and the data becomes more available.

The Sub-Fund has made no minimum commitment to sustainable investment with environmental objectives aligned to the EU Taxonomy.

Therefore, the precontractual disclosure document for the Sub-Fund indicates the extent of targeted sustainable

criteria include comprehensive safety and waste management rules. Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee company today.
- capital expenditure (Capex) shows the green investments made by investee companies, relevant to a transition to a green economy.
- operational expenditure (Opex) reflects the green operational activities of investee companies.

investments with an environmental objective aligned with the EU Taxonomy as 0.00%. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have environmental and / or social characteristics and sustainable investments (as defined by SFDR).

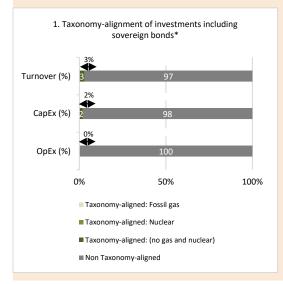

The below graphs illustrate the actual extent of investments in sustainable investments with an environmental objective aligned with the EU Taxonomy as measured at the end of the reference period.

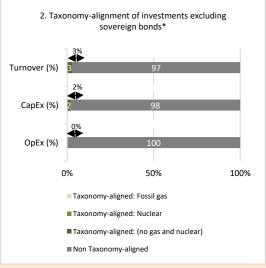

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes
In fossil gas
In nuclear energy

X No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 5% of the total investment

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

#### What was the share of investments made in transitional and enabling activities?

Further to the above, the Sub-Fund has made no minimum commitment to making EU Taxonomy aligned investments – including Transitioning and Enabling activities. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have environmental and / or social characteristics and sustainable investments.

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The calculated share of Transitioning activities represents 1.38% and the calculated share of Enabling activities represents 0.43%, at the end of the reference period.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 32.43% of assets at the end of the reference period.

#### What was the share of socially sustainable investments?

The share of socially sustainable investments was 16.27% of assets at the end of the reference period.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 18.77% of assets in "other" investments were comprised of companies that did not meet the criteria described in response to above question entitled, "How did the sustainability indicators perform?" to qualify as exhibiting positive environmental or social characteristics. They are investments for diversification purposes. Ancillary cash, cash equivalents, money market funds and derivatives for EPM are not included in the % of assets included in the asset allocation diagram above, including under "other". These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

All investments, including "other" investments were subject to the following ESG Minimum Safeguards / principle:

- The minimum safeguards as outlined by Article 18 of the EU Taxonomy Regulation (including alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights), as implemented by the Investment Manager.
- Application of good governance practices (these include sound management structures, employee relations, remuneration of staff and tax compliance), as implemented by the Investment Manager.
- Compliance with the Do No Significant Harm principle as prescribed under the definition of sustainable investment in EU SFDR.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The following binding elements of the investment strategy were applied during the reference period to select the investments to attain each of the environmental or social characteristics:

- The requirement to invest at least 51% of assets in companies with positive environmental and / or social characteristics.
- The values and norms based screening to implement full exclusions in relation to companies that are involved in certain activities such as manufacturing controversial weapons and applying maximum revenue, production or distribution percentage thresholds to others such as those that are involved in thermal coal and tobacco.
- The requirement for all companies in the portfolio to follow good governance practices.

The Sub- Fund also committed to investing at least 10% of assets in sustainable investments.

Further information on engagement is available in the answer to the question "How were the indicators for adverse impacts on sustainability factors taken into account?"

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. How does the reference benchmark differ from a broad market index?

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: JPMorgan ETFs (Ireland) ICAV - US Research Enhanced Index Equity (ESG) UCITS ETF

Legal entity identifier: 549300NSUZYEVW9Y4071

#### Environmental and/or social characteristics

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund set out to promote a broad range of environmental, social and governance characteristics through its investment inclusion criteria, specifically with a minimum asset allocation of 51% of investments having environmental and / or social characteristics and a minimum of 10% of investments being sustainable investments. This commitment was met throughout the reference period (1 January 2022 - 31 December 2022). At the end of the reference period, the Sub-Fund held 83.34% of investments with environmental and / or social characteristics and 69.00% of sustainable investments.

These investments were determined by the application of an inclusion and exclusion criteria which applied at both an asset and product level. The inclusion criteria is underpinned by an ESG score assigned to all investments within the strategy to identify those that may be considered to have environmental and / or social characteristics and those that meet the thresholds for being considered as sustainable investment.

The ESG score takes into account the following indicators: effective management of toxic emissions, waste, good environmental record and social characteristics such as effective sustainability disclosures, positive scores on labour relations and management of safety issues.

Through its exclusion criteria (which applied both full and partial exclusions); the Sub-Fund promoted certain norms and values including supporting the protection of internationally proclaimed human rights. The Sub-Fund fully excluded companies that are involved in the manufacture of controversial weapons and applied maximum revenue or production thresholds to others such as those that are involved in thermal coal and tobacco.

In relation to the consideration of Good Governance, all investments (excluding cash and derivatives) were screened to exclude known violators of good governance practices. In addition, for those investments considered to have environmental and/or social characteristics or qualifying sustainable investments, additional considerations applied. For these investments, the Sub-Fund incorporated a peer group comparison and screened out companies that did not score in the top 80% relative to peers based on good governance indicators.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics. The extent to which the promoted environmental and social characteristics were met may be understood by considering the actual % of assets allocated to the relevant companies for the Reference Period exhibiting such characteristics.

In summary: the Sub-Fund met its pre-contractual committed minimums related to environmental and / or social characteristics and sustainable investments policy throughout the reference period. The Sub-Fund applied screens with the aim of excluding all potential investments prohibited under its exclusion policy throughout this period. The extent to which the norms and values promoted by the Sub-Fund were met is based on whether the Sub-Fund held any companies during the Reference Period that would have been prohibited under the exclusion policy. The Investment Manager has no indication that such companies were held. The Investment Manager informs that the continuity of the percentage values and information disclosed cannot be guaranteed in the future and is subject to the constantly evolving legal and regulatory landscape. The duration of the reference period can be less than 12 months if the fund was launched, closed or changed its Article 8/9 status during this time.

#### Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

#### How did the sustainability indicators perform?

A combination of the Investment Manager's proprietary ESG scoring methodology: consisting of the Investment Manager's proprietary ESG score, and / or third-party data was used as part of the inclusion criteria to measure the attainment of the environmental and / or social characteristics that the Sub-Fund promotes.

The methodology was based on a company's management of relevant environmental or social issues such as its toxic emissions, waste management, labour relations and safety issues, diversity / independence of the board of directors and data privacy. To be included in the 51% of assets considered to be promoting environmental and/or social characteristics, a company must score in the top 80% relative to its peers on either its environmental score or social score and meet the good governance conditions outlined above.

At the end of the reference period, the Sub-Fund held 83.34% of investments with environmental and / or social characteristics and 69.00% of sustainable investments.

In respect of the applied norms and values based exclusions, the Investment Manager utilised data to measure a company's participation in the relevant activities. Screening on that data resulted in full exclusions on certain potential investments and partial exclusions based on maximum percentage thresholds on revenue or production as envisaged through the exclusions policy. Throughout the reference period, and at no point, were the exclusion rules breached. A subset of the "Adverse Sustainability Indicators" as set out in the EU SFDR Regulatory Technical Standards was also incorporated in the screening.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics and therefore the performance of the indicators in respect of specific environmental or social characteristics is not set out here.

#### ...and compared to previous periods?

Not applicable for 2022

#### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the Sub-Fund partially made was comprised of any individual or combination of the following during the Reference Period:

Environmental Objectives: (i) climate risk mitigation, (ii) transition to a circular economy

Social Objectives: (i) inclusive and sustainable communities - increased female executive representation, (ii) inclusive and sustainable communities - increased female representation on boards of directors, and (iii) provision of a decent working environment and culture

Contribution to such objectives may be understood by considering the actual % of assets allocated to sustainable investments for the Reference Period. The Sub-Fund was required to invest 10% in sustainable investments. At no time during the period did the Sub-Fund hold sustainable investments below its committed minimum. At the end of the reference period, 69.00% of its assets were sustainable investments.

# Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and

anti-bribery matters.

#### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments that the Sub-Fund intended to make were subject to a screening process that sought to identify and exclude, from qualifying as a sustainable investment, those companies which the Investment Manager considered the worst performing companies, based on a threshold determined by the Investment Manager, in relation to certain environmental considerations. As a consequence, only those companies demonstrating the best indicators relative to both absolute and relative measures were considered sustainable investments.

Such considerations include climate change, protection of water and marine resources, transition to a circular economy, pollution and protection of biodiversity and ecosystems. In addition, the Investment Manager also applied a screen that sought to identify and exclude those companies that the Investment Manager considers to be in violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights based on data supplied by third-party service providers.

### \_\_ How were the indicators for adverse impacts on sustainability factors taken into account?

The indicators for adverse impacts on sustainability factors in Table 1 of Annex 1 and certain indicators, as determined by the Investment Manager, in Tables 2 and 3 of Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account as further described below. The Investment Manager used either the metrics in the EU SFDR Regulatory Technical Standards, or where this was not possible due to data limitations or other technical issues, a representative proxy. The Investment Manager consolidated the consideration of certain indicators into a "primary" indicator as set out further below and may have used an additional broader set of indicators than referenced below.

The relevant indicators in Table 1 of Annex 1 of the EU SFDR Regulatory Technical Standards consist of 9 environmental and 5 social and employee related indicators. The environmental indicators are listed at 1-9 and relate to green-house gas emissions (1-3), exposure to fossil fuel, share of non-renewable energy consumption and production, energy consumption intensity, activities negatively affecting biodiversity sensitive areas, emissions to water and hazardous waste (4-9 respectively). Indicators 10 – 14 relate to a company's social and employee matters and cover violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises, lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles, unadjusted gender pay gap, Board gender diversity and exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons) respectively.

The Investment Manager's approach included both quantitative and qualitative aspects to take the above indicators into account. It used particular indicators for screening, seeking to exclude companies that may cause significant harm. It used a subset for engagement with certain companies, seeking to influence best practice and it used certain of them as indicators of positive sustainability performance, by applying a minimum threshold in respect of the indicator to qualify as a sustainable investment. The data needed to take the indicators into account, where available, may have been obtained from investee companies themselves and / or supplied by third-party service providers (including proxy data). Data inputs that are self-reported by companies or supplied by third-party providers may be based on data sets and assumptions that may be insufficient, of poor quality or contain biased information. Due to dependency on third-parties, the Investment Manager cannot guarantee the accuracy or completeness of such data.

#### Screening

Certain of the indicators were taken into account through the values and norms-based screening to implement exclusions. These exclusions took into account indicators 10 and 14 in relation to UN Global Compact principles and OECD Guidelines for Multinational Enterprises and controversial weapons. The Investment Manager also applied a purpose-built screen. Due to certain technical considerations, such as data coverage in respect of specific indicators, the Investment Manager either applied the specific indicator per Table 1 or a representative proxy, as determined by the Investment Manager to screen investee companies in respect of the relevant environmental or social & employee matters. For example, greenhouse gas emissions are associated with several indicators and corresponding metrics in Table 1, such as greenhouse gas emissions, carbon footprint and greenhouse gas intensity (indicators 1-3). The Investment Manager used greenhouse gas intensity data (indicator 3), data in respect of non-renewable

energy consumption and production (indicator 5) and data on energy consumption intensity (indicator 6) to perform its screening in respect of greenhouse gas emissions.

In connection with the purpose-built screening and in respect of activities negatively affecting biodiversity sensitive areas and the emissions to water (indicators 7 and 8), due to data limitations, third-party representative proxy data was used, rather than the specific indicators per Table 1. The Investment Manager also took into account indicator 9 in relation to hazardous waste in respect of the purpose built screen.

#### Engagement

In addition to screening out certain companies as described above, the Investment Manager engaged on an ongoing basis with selected underlying investee companies. A subset of the indicators were used, subject to certain technical considerations such as data coverage, as the basis for engaging with selected underlying investee companies in accordance with the approach taken by the Investment Manager on stewardship and engagement. The indicators used in respect of such engagement include indicators 3, 5 and 13 in relation to greenhouse gas intensity, share of non-renewable energy and board gender diversity from Table 1. It also used indicators 2 in Table 2 and 3 in Table 3 in relation to emissions or air pollutants and number of days lost to injuries, accidents, fatalities or illness.

#### Indicators of sustainability

The Investment Manager used indicators 3 and 13 in relation to GHG Intensity and board gender diversity as indicators of sustainability to assist in qualifying an investment as a sustainable investment. One of the pathways required a company to be considered as an operational peer group leader to qualify as a sustainable investment. This required scoring against the indicator in the top 20% relative to peers.

#### \_\_ Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms based portfolio exclusions as described above under "To what extent were the environmental and / or social characteristics promoted by this financial product met?" were applied to seek alignment with these guidelines and principles. Third-party data was used to identify potential violators. Unless an exception was granted, the Sub-Fund prohibited relevant investments in these issuers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered select principal adverse impacts on sustainability factors through values and norms-based screening to implement exclusions. Indicators 10 and 14 in relation to violations of the UN Global Compact and controversial weapons from the EU SFDR Regulatory Technical Standards were used in respect of such screening. The Sub-Fund also used certain of the indicators as part of the "Do No Significant Harm" screen as detailed in the response to the question directly above to demonstrate that an investment qualified as a sustainable investment.

A subset of the above-mentioned Adverse Sustainability Indicators were used to determine engagement with investee companies based on their respective PAI performance.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/01/2022 - 31/12/2022

#### What were the top investments of this financial product?

| Largest Investments   | Sector                 | % Assets | Country       |
|---|------------------------|----------|---------------|
| APPLE INC   | Information Technology | 6.00     | United States |
| MICROSOFT CORPORATION                                       | Information Technology | 5.90     | United States |

| BRISTOL-MYERS SQUIBB<br>COMPANY                             | Health Care            | 0.95     | United States |
| CONOCOPHILLIPS  | Energy                 | 0.90     | United States |

#### What was the proportion of sustainability-related investments?

#### What was the asset allocation?

At the end of the reference period, the Sub-Fund allocated 83.34% of its assets to companies that exhibited positive environmental and / or social characteristics and 69.00% of assets to sustainable investments. The Sub-Fund did not commit to investing any proportion of assets specifically in securities exhibiting positive environmental characteristics or specifically in positive social characteristics nor is there any commitment to any specific individual or combination of environmental or social objectives.

Ancillary cash, cash equivalents, money market funds and derivatives for EPM are not included in the % of assets set out in the table below. These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

# #1A Sustainable: 69.00% #1A Sustainable: 69.00% Other Environmental: 48.92% #2 Other: 16.66% #3 Aligned with E/S characteristics: 14.34% Social: 20.08%

#### Asset allocation

describes the share of investments in specific assets.

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made?

Although the Sub-Fund promoted certain environmental and social characteristics through its inclusion and exclusion criteria, it may have invested across a broad range of sectors – please refer to the list below. In addition, the Investment Manager engaged on an ongoing basis with selected underlying investee companies. Investments within sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels, will be included in the table below if held. Ancillary cash, cash equivalents, money market funds and derivatives for EPM are included in the denominator for the % of assets set out in the table below.

| Sector                 | Sub-sector                                 | % Assets |
|------------------------|--|----------|
| Communication Services | Media & Entertainment                      | 6.56     |
| Communication Services | Telecommunication Services                 | 0.68     |
| Consumer Discretionary | Automobiles And Components                 | 1.21     |
| Consumer Discretionary | Consumer Durables And<br>Apparel           | 1.08     |

| Real Estate            | Real Estate                                | 2.68     |
| Utilities              | Utilities                                  | 3.20     |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For

# To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Data on EU Taxonomy alignment is currently very limited, in particular with regards to fossil gas and nuclear energy. We expect this to improve over time as more companies disclose their alignment, and the data becomes more available.

The Sub-Fund has made no minimum commitment to sustainable investment with environmental objectives aligned to the EU Taxonomy.

nuclear energy, the criteria include comprehensive safety and waste management rules. Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

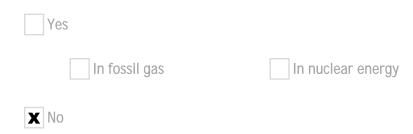

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee company today.
- capital expenditure (Capex) shows the green investments made by investee companies, relevant to a transition to a green economy.
- operational expenditure (Opex) reflects the green operational activities of investee companies.

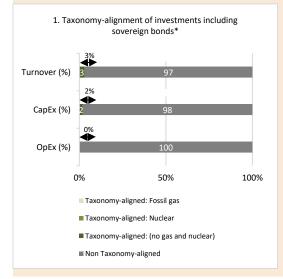

Therefore, the precontractual disclosure document for the Sub-Fund indicates the extent of targeted sustainable investments with an environmental objective aligned with the EU Taxonomy as 0.00%. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have environmental and / or social characteristics and sustainable investments (as defined by SFDR).

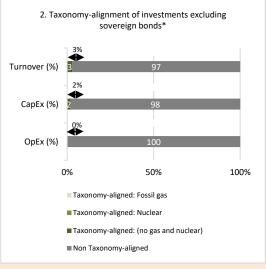

The below graphs illustrate the actual extent of investments in sustainable investments with an environmental objective aligned with the EU Taxonomy as measured at the end of the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 5% of the total investment

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

#### What was the share of investments made in transitional and enabling activities?

Further to the above, the Sub-Fund has made no minimum commitment to making EU Taxonomy aligned investments – including Transitioning and Enabling activities. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have environmental and / or social characteristics and sustainable investments.

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The calculated share of Transitioning activities represents 0.00% and the calculated share of Enabling activities represents 1.43%, at the end of the reference period.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 48.92% of assets at the end of the reference period.

#### What was the share of socially sustainable investments?

The share of socially sustainable investments was 20.08% of assets at the end of the reference period.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 16.66% of assets in "other" investments were comprised of companies that did not meet the criteria described in response to above question entitled, "How did the sustainability indicators perform?" to qualify as exhibiting positive environmental or social characteristics. They are investments for diversification purposes. Ancillary cash, cash equivalents, money market funds and derivatives for EPM are not included in the % of assets included in the asset allocation diagram above, including under "other". These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

All investments, including "other" investments were subject to the following ESG Minimum Safeguards / principle:

- The minimum safeguards as outlined by Article 18 of the EU Taxonomy Regulation (including alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights), as implemented by the Investment Manager.
- Application of good governance practices (these include sound management structures, employee relations, remuneration of staff and tax compliance), as implemented by the Investment Manager.
- Compliance with the Do No Significant Harm principle as prescribed under the definition of sustainable investment in EU SFDR.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The following binding elements of the investment strategy were applied during the reference period to select the investments to attain each of the environmental or social characteristics:

- The requirement to invest at least 51% of assets in companies with positive environmental and / or social characteristics.
- The values and norms based screening to implement full exclusions in relation to companies that are involved in certain activities such as manufacturing controversial weapons and applying maximum revenue, production or distribution percentage thresholds to others such as those that are involved in thermal coal and tobacco.
- The requirement for all companies in the portfolio to follow good governance practices.

The Sub- Fund also committed to investing at least 10% of assets in sustainable investments.

Further information on engagement is available in the answer to the question "How were the indicators for adverse impacts on sustainability factors taken into account?"

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- How does the reference benchmark differ from a broad market index?
  Not applicable
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: JPMorgan ETFs (Ireland) ICAV - USD Corporate Bond Research Enhanced Index (ESG) UCITS ETF

Legal entity identifier: 549300GTL7CR1N46RB89

#### Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?   |  |  |
|---|--|--|
| • • Yes   | • No   |  |
| It made sustainable investments with an environmental objective: %  | It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 43.73% of sustainable investments   |  |
| in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective |  |
| It made sustainable investments with a social objective: %  | It promoted E/S characteristics, but did not make any sustainable investments  |  |

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund set out to promote a broad range of environmental, social and governance characteristics through its investment inclusion criteria, specifically with a minimum asset allocation of 51% of investments having environmental and / or social characteristics and a minimum of 10% of investments being sustainable investments. This commitment was met throughout the reference period (1 March 2022 - 31 December 2022). At the end of the reference period, the Sub-Fund held 78.83% of investments with environmental and / or social characteristics and 43.73% of sustainable investments.

These investments were determined by the application of an inclusion and exclusion criteria which applied at both an asset and product level. The inclusion criteria is underpinned by an ESG score assigned to all investments within the strategy to identify those that may be considered to have environmental and / or social characteristics and those that meet the thresholds for being considered as sustainable investment.

The ESG score takes into account the following indicators: effective management of toxic emissions, waste, good environmental record and social characteristics such as effective sustainability disclosures, positive scores on labour relations and management of safety issues.

Through its exclusion criteria (which applied both full and partial exclusions); the Sub-Fund promoted certain norms and values including supporting the protection of internationally proclaimed human rights. The Sub-Fund fully excluded issuers that are involved in the manufacture of controversial weapons and applied maximum revenue or production thresholds to others such as those that are involved in thermal coal and tobacco.

In relation to the consideration of Good Governance, all investments (excluding cash and derivatives) were screened to exclude known violators of good governance practices. In addition, for those investments considered to have environmental and/or social characteristics or qualifying sustainable investments, additional considerations applied. For these investments, the Sub-Fund incorporated a peer group comparison and screened out issuers that did not score in the top 80% relative to peers based on good governance indicators.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics. The extent to which the promoted environmental and social characteristics were met may be understood by considering the actual % of assets allocated to the relevant issuers for the Reference Period exhibiting such characteristics.

In summary: the Sub-Fund met its pre-contractual committed minimums related to environmental and / or social characteristics and sustainable investments policy throughout the reference period. The Sub-Fund applied screens with the aim of excluding all potential investments prohibited under its exclusion policy throughout this period. The extent to which the norms and values promoted by the Sub-Fund were met is based on whether the Sub-Fund held any issuers during the Reference Period that would have been prohibited under the exclusion policy. The Investment Manager has no indication that such issuers were held. The Investment Manager informs that the continuity of the percentage values and information disclosed cannot be guaranteed in the future and is subject to the constantly evolving legal and regulatory landscape. The duration of the reference period can be less than 12 months if the fund was launched, closed or changed its Article 8/9 status during this time.

#### Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

#### How did the sustainability indicators perform?

A combination of the Investment Manager's proprietary ESG scoring methodology: consisting of the Investment Manager's proprietary ESG score, and / or third-party data was used as part of the inclusion criteria to measure the attainment of the environmental and / or social characteristics that the Sub-Fund promotes.

The methodology was based on an issuer's management of relevant environmental or social issues such as its toxic emissions, waste management, labour relations and safety issues, diversity / independence of the board of directors and data privacy. To be included in the 51% of assets considered to be promoting environmental and / or social characteristics, an issuer must score in the top 80% relative to its peers on either its environmental score or social score and meet the good governance conditions outlined above.

At the end of the reference period, the Sub-Fund held 78.83% of investments with environmental and / or social characteristics and 43.73% of sustainable investments.

In respect of the applied norms and values-based exclusions, the Investment Manager utilised data to measure an issuer's participation in the relevant activities. Screening on that data resulted in full exclusions on certain potential investments and partial exclusions based on maximum percentage thresholds on revenue or production as envisaged through the exclusions policy. Throughout the reference period, and at no point, were the exclusion rules breached. A subset of the "Adverse Sustainability Indicators" as set out in the EU SFDR Regulatory Technical Standards was also incorporated in the screening.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics and therefore the performance of the indicators in respect of specific environmental or social characteristics is not set out here.

#### ...and compared to previous periods?

Not applicable for 2022

#### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the Sub-Fund partially made was comprised of any individual or combination of the following or be linked to an environmental or social objective through the use of proceeds of the issue:

Environmental Objectives: (i) climate risk mitigation, (ii) transition to a circular economy

Social Objectives: (i) inclusive and sustainable communities - increased female executive representation, (ii) inclusive and sustainable communities - increased female representation on boards of directors and (iii) providing a decent working environment and culture.

Contribution to such objectives was determined by either: (i) products and services sustainability indicators, which may have included the percentage of revenue derived from providing products and / or services that contribute to the relevant sustainable objective, such as an issuer producing solar panels or clean energy technology that meets the Investment Manager's proprietary thresholds contributing to climate risk mitigation; (ii) the use of proceeds of the issue, if such use was designated as linked to a specific environmental or social objective, or (iii) was an operational peer group leader contributing to the relevant objective. Being a peer group leader is defined as scoring in the top 20% relative to the SubFund's benchmark based on certain operational sustainability indicators. For example, scoring in the top 20% relative to the Benchmark on total waste impact contributes to a transition to a circular economy. The test for supranational and sovereign issuers may consider the issuer's mission or contributions, as peer group leaders or improvers, to positive environmental and social objectives subject to certain criteria.

The Sub-Fund was required to invest 10% in sustainable investments. At no time during the period did the Sub-Fund hold sustainable investments below its committed minimum. At the end of the reference period, 43.73% of its assets were sustainable investments.

#### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments that the Sub-Fund intended to make were subject to a screening process that sought to identify and exclude, from qualifying as a sustainable investment, those issuers which the Investment Manager considered the worst performing issuers, based on a threshold determined by the Investment Manager, in relation to certain environmental considerations. As a consequence, only those issuers demonstrating the best indicators relative to both absolute and relative measures were considered sustainable investments.

Such considerations include climate change, protection of water and marine resources, transition to a circular economy, pollution and protection of biodiversity and ecosystems. In addition, the Investment Manager also applied a screen that sought to identify and exclude those issuers that the Investment Manager considers to be in violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights based on data supplied by third-party service providers.

### \_\_ How were the indicators for adverse impacts on sustainability factors taken into account?

The indicators for adverse impacts on sustainability factors in Table 1 of Annex 1 and certain indicators, as determined by the Investment Manager, in Tables 2 and 3 of Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account as further described below. The Investment Manager used either the metrics in the EU SFDR Regulatory Technical Standards, or where this was not possible due to data limitations or other technical issues, a representative proxy. The Investment Manager consolidated the consideration of certain indicators into a "primary" indicator as set out further below and may have used an additional broader set of indicators than referenced below.

The relevant indicators in Table 1 of Annex 1 of the EU SFDR Regulatory Technical Standards consist of 9 environmental and 5 social and employee related indicators. The environmental indicators are listed at 1-9 and relate to green-house gas emissions (1-3), exposure to fossil fuel, share of non-renewable energy consumption and production, energy consumption intensity, activities negatively affecting biodiversity sensitive areas, emissions to water and hazardous waste (4-9 respectively).

Indicators 10 - 14 relate to an issuer's social and employee matters and cover violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises, lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles, unadjusted gender pay gap, Board gender diversity and exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons) respectively.

The Investment Manager also took into account PAI 16 in relation to Investee countries subject to social violations.

The Investment Manager's approach included both quantitative and qualitative aspects to take the above indicators into account. It used particular indicators for screening, seeking to exclude issuers that may cause significant harm. It used a subset for engagement with certain issuers, seeking to influence best practice and it used certain of them as indicators of positive sustainability performance, by applying a minimum threshold in respect of the indicator to qualify as a sustainable investment. The data needed to take the indicators into account, where available, may have been obtained from investee issuers

# Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and

anti-bribery matters.

themselves and / or supplied by third-party service providers (including proxy data). Data inputs that are self-reported by issuers or supplied by third-party providers may be based on data sets and assumptions that may be insufficient, of poor quality or contain biased information. Due to dependency on third-parties, the Investment Manager cannot guarantee the accuracy or completeness of such data.

#### Screening

Certain of the indicators were taken into account through the values and norms-based screening to implement exclusions. These exclusions took into account indicators 10, 14 and 16 in relation to UN Global Compact principles and OECD Guidelines for Multinational Enterprises, controversial weapons and investee countries subject to social violations. The Investment Manager also applied a purpose-built screen. Due to certain technical considerations, such as data coverage in respect of specific indicators, the Investment Manager either applied the specific indicator per Table 1 or a representative proxy, as determined by the Investment Manager to screen investee issuers in respect of the relevant environmental or social & employee matters. For example, greenhouse gas emissions are associated with several indicators and corresponding metrics in Table 1, such as greenhouse gas emissions, carbon footprint and greenhouse gas intensity (indicators 1-3). The Investment Manager currently uses greenhouse gas intensity data (indicator 3), data in respect of non-renewable energy consumption and production (indicator 5) and data on energy consumption intensity (indicator 6) to perform its screening in respect of greenhouse gas emissions. In connection with the purpose-built screening and in respect of activities negatively affecting biodiversity sensitive areas and the emissions to water (indicators 7 and 8), due to data limitations, the Investment Manager used a third-party representative proxy rather than the specific indicators per Table 1. The Investment Manager also took into account indicator 9 in relation to hazardous waste in respect of the purpose-built screen.

#### Engagement

In addition to screening out certain issuers as described above, the Investment Manager engaged on an ongoing basis with selected underlying investee issuers. A subset of the indicators was used, subject to certain technical considerations such as data coverage, as the basis for engaging with selected underlying investee issuers in accordance with the approach taken by the Investment Manager on stewardship and engagement. The indicators used in respect of such engagement include indicators 3, 5 and 13 in relation to greenhouse gas intensity, share of non-renewable energy and board gender diversity from Table 1. It also used indicators 2 in Table 2 and 3 in Table 3 in relation to emission of air pollutants and number of days lost to injuries, accidents, fatalities or illness.

#### Indicators of sustainability

The Investment Manager used indicators 3 and 13 in relation to GHG Intensity and board gender diversity as indicators of sustainability to assist in qualifying an investment as a sustainable investment. One of the pathways requires an issuer to be considered as an operational peer group leader to qualify as a sustainable investment. This requires scoring against the indicator in the top 20% relative to the Benchmark.

#### \_\_ Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms based portfolio exclusions as described above under "To what extent were the environmental and / or social characteristics promoted by this financial product met?" were applied to seek alignment with these guidelines and principles. Third-party data was used to identify potential violators. Unless an exception was granted, the Sub-Fund prohibited relevant investments in these issuers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered select principal adverse impacts on sustainability factors through values and norms-based screening to implement exclusions. Indicators 10, 14 and 16 in relation to violations of the UN Global Compact and

controversial weapons from the EU SFDR Regulatory Technical Standards were used in respect of such screening. The Sub-Fund also used certain of the indicators as part of the "Do No Significant Harm" screen as detailed in the response to the guestion directly above to demonstrate that an investment gualified as a sustainable investment.

A subset of the above-mentioned Adverse Sustainability Indicators were used to determine engagement with investee issuers based on their respective PAI performance.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/03/2022 - 31/12/2022

### What were the top investments of this financial product?

Asset allocation

assets.

describes the share of

investments in specific

### What was the proportion of sustainability-related investments?

### What was the asset allocation?

At the end of the reference period, the Sub-Fund allocated 78.83% of its assets to issuers that exhibited positive environmental and / or social characteristics and 43.73% of assets to sustainable investments. The Sub-Fund did not commit to investing any proportion of assets specifically in securities exhibiting positive environmental characteristics or specifically in positive social characteristics nor is there any commitment to any specific individual or combination of environmental or social objectives.

Ancillary cash, cash equivalents, money market funds and derivatives for EPM are not included in the % of assets set out in the table below. These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

# #1 Aligned with E/S characteristics: 78.83% #18 Other E/S characteristics: 35.10% Taxonomy-aligned: 0.00% Other Environmental: 30.10% Social: 13.63%

### JPMorgan ETFs (Ireland) ICAV - USD Corporate Bond Research Enhanced Index (ESG) UCITS ETF

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### In which economic sectors were the investments made?

Although the Sub-Fund promoted certain environmental and social characteristics through its inclusion and exclusion criteria, it may have invested across a broad range of sectors - please refer to the list below. In addition, the Investment Manager engaged on an ongoing basis with selected underlying investee issuers. Investments within sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels, will be included in the table below if held. Ancillary cash, cash equivalents, money market funds and derivatives for EPM are included in the denominator for the % of assets set out in the table below.

| Sector     | Sub-sector           | % Assets |
|------------|----------------------|----------|
| Finance    | Banking              | 23.70    |
| Finance    | Brokerage            | 0.57     |
| Finance    | Finance Companies    | 0.85     |
| Finance    | Insurance            | 5.30     |
| Finance    | REITs                | 3.31     |
| Industrial | Basic Industry       | 3.03     |
| Industrial | Capital Goods        | 4.53     |
| Industrial | Communications       | 8.91     |
| Industrial | Consumer Cyclical    | 6.58     |
| Industrial | Consumer Noncyclical | 14.47    |
| Industrial | Energy               | 6.90     |
| Industrial | Industrial Other     | 0.51     |
| Industrial | Technology           | 9.89     |
| Industrial | Transportation       | 1.79     |
| Utilities  | Electric             | 7.68     |
| Utilities  | Natural Gas          | 1.27     |

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. Transitional activities

are economic activities

# To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Data on EU Taxonomy alignment is currently very limited, in particular with regards to fossil gas and nuclear energy. We expect this to improve over time as more issuers disclose their alignment, and the data becomes more available.

The Sub-Fund has made no minimum commitment to sustainable investment with environmental objectives aligned to the EU Taxonomy.

Therefore, the precontractual disclosure document for the Sub-Fund indicates the extent of targeted sustainable investments with an environmental objective aligned with the EU Taxonomy as 0.00%. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have environmental and / or social characteristics and sustainable investments (as defined by SFDR).

The below graphs illustrate the actual extent of investments in sustainable investments with an environmental objective aligned with the EU Taxonomy as measured at the end of the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

| Yes |
|-----|
|     |

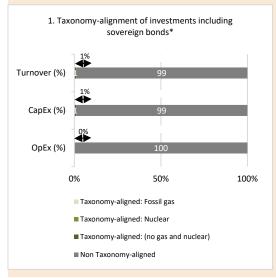

for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

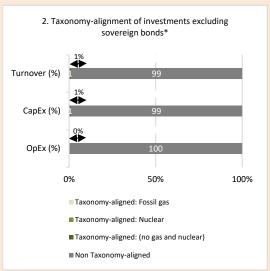

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee company today.
- capital expenditure (Capex) shows the green investments made by investee companies, relevant to a transition to a green economy.
- operational expenditure (Opex) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 2% of the total investment

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

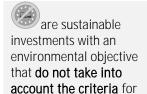

### What was the share of investments made in transitional and enabling activities?

Further to the above, the Sub-Fund has made no minimum commitment to making EU Taxonomy aligned investments – including Transitioning and Enabling activities. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have environmental and / or social characteristics and sustainable investments.

The calculated share of Transitioning activities represents 0.00% and the calculated share of Enabling activities represents 0.05%, at the end of the reference period.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

# What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 30.10% of assets at the end of the reference period.

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments?

The share of socially sustainable investments was 13.63% of assets at the end of the reference period.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 21.17% of assets in "other" investments were comprised of issuers that did not meet the criteria described in response to above question entitled, "How did the sustainability indicators perform?" to qualify as exhibiting positive environmental or social characteristics. They are investments for diversification purposes. Ancillary cash, cash equivalents, money market funds and derivatives for EPM were not included in the % of assets included in the asset allocation diagram above, including under "other". These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

All investments, including "other" investments were subject to the following ESG Minimum Safeguards / principle:

- The minimum safeguards as outlined by Article 18 of the EU Taxonomy Regulation (including alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights), as implemented by the Investment Manager.
- Application of good governance practices (these include sound management structures, employee relations, remuneration of staff and tax compliance), as implemented by the Investment Manager.
- Compliance with the Do No Significant Harm principle as prescribed under the definition of sustainable investment in EU SFDR.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The following binding elements of the investment strategy were applied during the reference period to select the investments to attain each of the environmental or social characteristics:

- The requirement to invest at least 67% of assets in issuers with positive or improving E/S characteristics.
- The values and norms-based screening to implement full exclusions in relation issuers that are involved in certain activities such as manufacturing controversial weapons and applying maximum revenue, production or distribution percentage thresholds to others such as those that are involved in thermal coal and tobacco.
- The requirement for all issuers in the portfolio to follow good governance practices.
- The Sub-Fund also committed to investing at least 40% of assets in sustainable investments.

Further information on engagement is available in the answer to the question "How were the indicators for adverse impacts on sustainability factors taken into account?"

# How did this financial product perform compared to the reference sustainable benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

| • | How did this financial product perform compared with the reference benchmark?  Not applicable |
|---|---|
| • | How did this financial product perform compared with the broad market index?  Not applicable  |

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: JPMorgan ETFs (Ireland) ICAV - USD Ultra-Short Income UCITS ETF

Legal entity identifier: 549300PSLK006UTVQ256

### Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective? Yes X No It made sustainable investments It promoted Environmental/Social (E/S) characteristics and while it did with an environmental objective: not have as its objective a sustainable investment, it had a proportion of 50.58% of sustainable investments in economic activities that qualify with an environmental objective in as environmentally sustainable economic activities that qualify as under the EU Taxonomy environmentally sustainable under the EU Taxonomy in economic activities that do not with an environmental objective in X qualify as environmentally economic activities that do not qualify sustainable under the EU as environmentally sustainable under Taxonomy the EU Taxonomy X with a social objective It made sustainable It promoted E/S characteristics, but investments with a social did not make any sustainable investments objective: %

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund set out to promote a broad range of environmental, social and governance characteristics through its investment inclusion criteria, specifically with an asset allocation of 51% of investments having environmental and / or social characteristics and 10% of investments being sustainable investments. This commitment was met throughout the reference period (21 February 2022 - 31 December 2022). At the end of the reference period, the Sub-Fund held 76.16% of investments with environmental and / or social characteristics and 50.58% of sustainable investments.

These investments were determined by the application of an inclusion and exclusion criteria which applied at both an asset and product level. The inclusion criteria is underpinned by an ESG score assigned to all investments within the strategy to identify those that may be considered to have environmental and / or social characteristics and those that meet the thresholds for being considered as sustainable investment.

The ESG score takes into account related indicators, including (but not limited to) effective management of toxic emissions, waste, good environmental record and social characteristics such as effective sustainability disclosures, positive scores on labour relations and management of safety issues.

Through its exclusion criteria (which applied both full and partial exclusions); the Sub-Fund promoted certain norms

and values including supporting the protection of internationally proclaimed human rights. The Sub-Fund fully excluded issuers that are involved in the manufacture of controversial weapons and applied maximum revenue or production thresholds to others such as those that are involved in thermal coal and tobacco.

In relation to the consideration of Good Governance, all investments (excluding cash and derivatives) were screened to exclude known violators of good governance practices. In addition, for those investments considered to have environmental and/or social characteristics or qualifying sustainable investments, additional considerations applied. For these investments, the Sub-Fund incorporated a peer group comparison and screened out issuers that did not score in the top 80% relative to peers based on good governance indicators.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics. The extent to which the promoted environmental and social characteristics were met may be understood by considering the actual % of assets allocated to the relevant companies for the reference period exhibiting such characteristics.

In summary: the Sub-Fund met its pre-contractual committed minimums related to environmental and / or social characteristics and sustainable investments policy throughout the reference period. The Sub-Fund applied screens with the aim of excluding all potential investments prohibited under its exclusion policy throughout this period. The extent to which the norms and values promoted by the Sub-Fund were met is based on whether the Sub-Fund held any issuers during the reference period that would have been prohibited under the exclusion policy. The Investment Manager has no indication that such issuers were held. The Investment Manager informs that the continuity of the percentage values and information disclosed cannot be guaranteed in the future and is subject to the constantly evolving legal and regulatory landscape.

### Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

A combination of the Investment Manager's proprietary ESG scoring methodology: consisting of the Investment Manager's proprietary ESG score, and / or third-party data was used as part of the inclusion criteria to measure the attainment of the environmental and / or social characteristics that the Sub-Fund promotes.

The methodology was based on an issuer's management of relevant environmental or social issues such as its toxic emissions, waste management, labour relations and safety issues, diversity / independence of the board of directors and data privacy. To be included in the 51% of assets considered to be promoting environmental and/or social characteristics, an issuer must score in the top 80% relative to its peers on either its environmental score or social score and meet the good governance conditions outlined above.

At the end of the reference period, the Sub-Fund held 76.16% of investments with environmental and / or social characteristics and 50.58% of sustainable investments.

In respect of the applied norms and values-based exclusions, the Investment Manager utilised data to measure an issuer's participation in the relevant activities. Screening on that data resulted in full exclusions on certain potential investments and partial exclusions based on maximum percentage thresholds on revenue or production as envisaged through the exclusions policy. Throughout the reference period, and at no point, were the exclusion rules breached. A subset of the "Adverse Sustainability Indicators" as set out in the EU SFDR Regulatory Technical Standards was also incorporated in the screening.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics and therefore the performance of the indicators in respect of specific environmental or social characteristics is not set out here.

### ...and compared to previous periods?

Not applicable for 2022

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the Sub-Fund partially made was comprised of any individual or combination of the following or be linked to an environmental or social objective through the use of proceeds of the issue:

Environmental Objectives: (i) climate risk mitigation, (ii) transition to a circular economy

Social Objectives: (i) inclusive and sustainable communities - increased female executive representation, (ii) inclusive and sustainable communities - increased female representation on boards of directors and (iii) providing a decent working environment and culture.

Contribution to such objectives was determined by either (i) products and services sustainability indicators, which may include the percentage of revenue derived from providing products and / or services that contribute to the relevant sustainable objective, such as company producing solar panels or clean energy technology that meets the Investment Manager's proprietary thresholds contributing to climate risk mitigation; or (ii) being an operational peer group leader contributing to the relevant objective. Being a peer group leader is defined as scoring in the top 20% relative to the Sub-Fund's benchmark based on certain operational sustainability indicators. For example, scoring in the top 20% relative to the Benchmark on total waste impact contributes to a transition to a circular economy.

The Sub-Fund was required to invest 10% in sustainable investments. At no time during the period did the Sub-Fund hold sustainable investments below its committed minimum. At the end of the reference period, 50.58% of its assets were sustainable investments.

# Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee

matters, respect for human

rights, anti-corruption and

anti-bribery matters.

### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments that the Sub-Fund intended to make were subject to a screening process that sought to identify and exclude, from qualifying as a sustainable investment, those companies which the Investment Manager considered the worst performing companies, based on a threshold determined by the Investment Manager, in relation to certain environmental considerations. As a consequence, only those companies demonstrating the best indicators relative to both absolute and relative measures were considered sustainable investments.

Such considerations include climate change, protection of water and marine resources, transition to a circular economy, pollution and protection of biodiversity and ecosystems. In addition, the Investment Manager also applied a screen that sought to identify and exclude those companies that the Investment Manager considers to be in violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights based on data supplied by third party service providers.

# \_ How were the indicators for adverse impacts on sustainability factors taken into account?

The indicators for adverse impacts on sustainability factors in Table 1 of Annex 1 and certain indicators, as determined by the Investment Manager, in Tables 2 and 3 of Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account as further described below. The Investment Manager used either the metrics in the EU SFDR Regulatory Technical Standards, or where this was not possible due to data limitations or other technical issues, a representative proxy. The Investment Manager consolidated the consideration of certain indicators into a "primary" indicator as set out further below and may have used an additional broader set of indicators than referenced below.

The relevant indicators in Table 1 of Annex 1 of the EU SFDR Regulatory Technical Standards consist of 9 environmental and 5 social and employee related indicators. The environmental indicators are listed at 1-9 and relate to green-house gas emissions (1-3), exposure to fossil fuel, share of non-renewable energy consumption and production, energy consumption intensity, activities negatively affecting biodiversity sensitive areas, emissions to water and hazardous waste (4-9 respectively).

Indicators 10 - 14 relate to an issuer's social and employee matters and cover violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises, lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles, unadjusted gender pay gap, Board gender diversity and exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons) respectively.

The Investment Manager also took into account PAI 16 in relation to Investee countries subject to social violations.

The Investment Manager's approach included both quantitative and qualitative aspects to take the above indicators into account. It used particular indicators for screening, seeking to exclude issuers that may cause significant harm. It used a subset for engagement with certain issuers, seeking to influence best practice and it used certain of them as indicators of positive sustainability performance, by applying a minimum threshold in respect of the indicator to qualify as a sustainable investment. The data needed to take the indicators into account, where available, may have been obtained from investee companies themselves and / or supplied by third-party service providers (including proxy data). Data inputs that are self-reported by companies or supplied by third-party providers may be based on data sets and assumptions that may be insufficient, of poor quality or contain biased information. Due to dependency on third-parties, the Investment Manager cannot guarantee the accuracy or completeness of such data.

Screening

Certain of the indicators were taken into account through the values and norms-based screening to implement exclusions. These exclusions took into account indicators 10, 14 and 16 in relation to UN Global Compact principles and OECD Guidelines for Multinational Enterprises, controversial weapons and investee countries subject to social violations. The Investment Manager also applied a purpose-built screen. Due to certain technical considerations, such as data coverage in respect of specific indicators, the Investment Manager either applied the specific indicator per Table 1 or a representative proxy, as determined by the Investment Manager to screen investee issuers in respect of the relevant environmental or social & employee matters. For example, greenhouse gas emissions are associated with several indicators and corresponding metrics in Table 1, such as greenhouse gas emissions, carbon footprint and greenhouse gas intensity (indicators 1-3). The Investment Manager currently uses greenhouse gas intensity data (indicator 3), data in respect of non-renewable energy consumption and production (indicator 5) and data on energy consumption intensity (indicator 6) to perform its screening in respect of greenhouse gas emissions. In connection with the purpose-built screening and in respect of activities negatively affecting biodiversity sensitive areas and the emissions to water (indicators 7 and 8), due to data limitations, the Investment Manager used a third-party representative proxy rather than the specific indicators per Table 1. The Investment Manager also took into account indicator 9 in relation to hazardous waste in respect of the purpose-built screen.

### Engagement

In addition to screening out certain issuers as described above, the Investment Manager engaged on an ongoing basis with selected underlying investee issuers. A subset of the indicators was used, subject to certain technical considerations such as data coverage, as the basis for engaging with selected underlying investee issuers in accordance with the approach taken by the Investment Manager on stewardship and engagement. The indicators used in respect of such engagement include indicators 3, 5 and 13 in relation to greenhouse gas intensity, share of non-renewable energy and board gender diversity from Table 1. It also used indicators 2 in Table 2 and 3 in Table 3 in relation to emission of air pollutants and number of days lost to injuries, accidents, fatalities or illness.

### Indicators of sustainability

The Investment Manager used indicators 3 and 13 in relation to GHG Intensity and board gender diversity as indicators of sustainability to assist in qualifying an investment as a sustainable investment. One of the pathways requires an issuer to be considered as an operational peer group leader to qualify as a sustainable investment. This requires scoring against the indicator in the top 20% relative to the Benchmark.

### \_\_ Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms based portfolio exclusions as described above under "To what extent were the environmental and / or social characteristics promoted by this financial product met?" were applied to seek alignment with these guidelines and principles. Third-party data was used to identify potential violators. Unless an exception was granted, the Sub-Fund prohibited relevant investments in these issuers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered select principal adverse impacts on sustainability factors through values and norms-based screening to implement exclusions. Indicators 10, 14 and 16 in relation to violations of the UN Global Compact and controversial weapons from the EU SFDR Regulatory Technical Standards were used in respect of such screening. The Sub-Fund also used certain of the indicators as part of the "Do No Significant Harm" screen as detailed in the response to the question directly above to demonstrate that an investment qualified as a sustainable investment.

A subset of the above-mentioned Adverse Sustainability Indicators were used to determine engagement with investee companies based on their respective PAI performance.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 21/02/2022 - 31/12/2022

### What were the top investments of this financial product?

| Largest Investments                 | Sector                     | % Assets | Country             |

### What was the proportion of sustainability-related investments?

### What was the asset allocation?

At the end of the reference period, the Sub-Fund allocated 76.16% of its assets to issuers that exhibited positive environmental and / or social characteristics and 50.58% of assets to sustainable investments. The Sub-Fund did not commit to investing any proportion of assets specifically in securities exhibiting positive environmental characteristics or specifically in positive social characteristics nor is there any commitment to any specific individual or combination of environmental or social objectives.

Ancillary cash, cash equivalents, money market funds and derivatives for EPM are not included in the % of assets set out in the table below. These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

# #1 Aligned with E/S characteristics: 76.16% #18 Other E/S characteristics: 25.58% #2 Other: 23.84% #18 Other E/S characteristics: 25.58% #2 Other: 23.84%

### Asset allocation

describes the share of investments in specific assets.

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### In which economic sectors were the investments made?

Although the Sub-Fund promoted certain environmental and social characteristics through its inclusion and exclusion criteria, it may have invested across a broad range of sectors - please refer to the list below. In addition, the Investment Manager engaged on an ongoing basis with selected underlying investee issuers. Investments within sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels, will be included in the table below if held. Ancillary cash, cash equivalents, money market funds and derivatives for EPM are included in the denominator for the % of assets set out in the table below.

| Sector                     | Sub-sector              | % Assets |
|----------------------------|-------------------------|----------|
| CLO                        | ABS CLO                 | 8.49     |
| Finance                    | Banking                 | 57.45    |
| Finance                    | Brokerage               | 0.02     |
| Finance                    | Finance Companies       | 0.73     |
| Finance                    | Insurance               | 4.69     |
| Industrial                 | Basic Industry          | 0.66     |
| Industrial                 | Capital Goods           | 0.77     |
| Industrial                 | Communications          | 2.99     |
| Industrial                 | Consumer Cyclical       | 5.94     |
| Industrial                 | Consumer Noncyclical    | 3.21     |
| Industrial                 | Energy                  | 1.22     |
| Industrial                 | Industrial Other        | 0.43     |
| Industrial                 | Technology              | 1.79     |
| Industrial                 | Transportation          | 0.96     |
| Non-US Govt Related Credit | Foreign Agencies        | 1.92     |
| US Treasury                | US Treasury Bonds/Bills | 0.09     |
| Utilities                  | Electric                | 2.82     |
| Utilities                  | Natural Gas             | 0.60     |

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial

contribution to an

# To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Data on EU Taxonomy alignment is currently very limited, in particular with regards to fossil gas and nuclear energy. We expect this to improve over time as more issuers disclose their alignment, and the data becomes more available.

The Sub-Fund has made no minimum commitment to sustainable investment with environmental objectives aligned to the EU Taxonomy.

Therefore, the precontractual disclosure document for the Sub-Fund indicates the extent of targeted sustainable investments with an environmental objective aligned with the EU Taxonomy as 0.00%. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have environmental and / or social characteristics and sustainable investments (as defined by SFDR).

The below graphs illustrate the actual extent of investments in sustainable investments with an environmental objective aligned with the EU Taxonomy as measured at the end of the reference period.

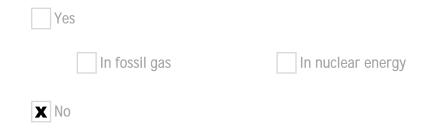

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

environmental objective.

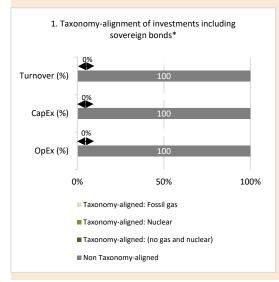

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

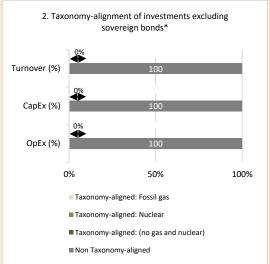

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee company today.
- capital expenditure (Capex) shows the green investments made by investee companies, relevant to a transition to a green economy.
- operational expenditure (Opex) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0% of the total investment

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

Further to the above, the Sub-Fund has made no minimum commitment to making EU Taxonomy aligned investments – including Transitioning and Enabling activities. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have environmental and / or social characteristics and sustainable investments.

The calculated share of Transitioning activities represents 0.00% and the calculated share of Enabling activities represents 0.16%, at the end of the reference period.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

# What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 28.71% of assets at the end of the reference period.

### What was the share of socially sustainable investments?

The share of socially sustainable investments was 21.87% of assets at the end of the reference period.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 23.84% of assets in "other" investments were comprised of issuers that did not meet the criteria described in response to above question entitled, "How did the sustainability indicators perform?" to qualify as exhibiting positive environmental or social characteristics. They are investments for diversification purposes. Ancillary cash, cash equivalents, money market funds and derivatives for EPM were not included in the % of assets included in the asset allocation diagram above, including under "other". These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

All investments, including "other" investments were subject to the following ESG Minimum Safeguards / principle:

- The minimum safeguards as outlined by Article 18 of the EU Taxonomy Regulation (including alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights), as implemented by the Investment Manager.
- Application of good governance practices (these include sound management structures, employee relations, remuneration of staff and tax compliance), as implemented by the Investment Manager.
- Compliance with the Do No Significant Harm principle as prescribed under the definition of sustainable investment in EU SFDR.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The following binding elements of the investment strategy were applied during the reference period to select the investments to attain each of the environmental or social characteristics:

- The requirement to invest at least 51% of assets in issuers with positive environmental and / or social characteristics.
- The values and norms based screening to implement full exclusions in relation to issuers that are involved in certain activities such as manufacturing controversial weapons and applying maximum revenue, production or distribution percentage thresholds to others such as those that are involved in thermal coal and tobacco.
- The requirement for all issuers in the portfolio to follow good governance practices.

The Sub- Fund also committed to investing at least 10% of assets in sustainable investments.

Further information on engagement is available in the answer to the question "How were the indicators for adverse impacts on sustainability factors taken into account?"

# How did this financial product perform compared to the reference sustainable benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

- How did this financial product perform compared with the reference benchmark?
  Not applicable
- How did this financial product perform compared with the broad market index?
  Not applicable

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# Product name: JPMorgan ETFs (Ireland) ICAV - Carbon Transition Global Equity (CTB) UCITS ETF

Legal entity identifier: 549300315LCWQJ0PPF15

### Sustainable investment objective

| Did this financial product have a sustainable investment objective?   |  |  |  |
|---|--|--|--|
| •• X Yes  | • No   |  |  |
| It made sustainable investments with an environmental objective: 89.49%   | It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of _% of sustainable investments   |  |  |
| in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy |  |  |
| It made sustainable investments with a social objective: 0.00%  | with a social objective  It promoted E/S characteristics, but did not make any sustainable investments   |  |  |

# To what extent was the sustainable investment objective of this financial product met?

The Sub-Fund's sustainable investment objective was to provide lower carbon emission exposure relative to the MSCI World Index (the "Investable Universe") with a view to achieving the long-term global warming objectives of the Paris Agreement. The Sub-Fund aimed to achieve this objective by tracking the performance of the Solactive J.P.Morgan Asset Management Carbon Transition Global Equity Index (the "Index") as closely as possible. The Index aims to meet the requirements for EU Climate Transition Benchmarks as defined in the EU Climate Benchmarks Regulation and provide lower carbon emission exposure relative to the Investable Universe.

The Index is designed to capture the performance of companies which have been identified through its rules-based process as best positioned to benefit from a transition to a low carbon economy by effectively managing their emissions, resources and climate-related risks whilst achieving a reduction of the greenhouse gas intensity of the Index of at least 7% on average per annum and an overall reduction of the greenhouse gas intensity of the Index compared to the Investable Universe of at least 30%.

The Sub-Fund tracked to the index with an error rate of less than 1% throughout the reference period (30 September 2022 - 31 December 2022). Further details can be found in the annual report by searching under 'tracking error' in the web link below.

https://am.jpmorgan.com/gb/en/asset-management/adv/products/jpm-carbon-transition-global-equity-ctb-ucits-etf-usd-acc-ie00bmdwvz92#/documents

The index also met its objectives - more information is available in the Index Provider's Factsheet:

https://www.solactive.com/wp-content/uploads/solactiveip/en/Factsheet\_DE000SL0BE72.pdf

The Sub-Fund was also required to invest a minimum of 80% in assets qualified as sustainable investments. This commitment was met throughout the reference period. At the end of the reference period, the Sub-Fund held 89.49% of sustainable investments. These investments were determined by the application of an inclusion and exclusion criteria which applied at both an asset and product level. The inclusion criteria was underpinned by an ESG score assigned to all investments within the strategy to identify those that met the thresholds for being considered as sustainable investments.

The primary sustainability indicator used to measure the attainment of the sustainable investment objective was the overall weighted carbon intensity of the portfolio, as defined by its Weighted-Average Carbon Intensity ("WACI"). This was the weighted sum of the Enterprise Value Including Cash adjusted Green House Gas emissions of the underlying constituents of the portfolio.

- Carbon Transition Score: this metric assesses a company's alignment to the move towards a lower carbon
  economy by aggregating a broad range of underlying metrics covering emissions, resource management and
  risk management; and
- Company Level Carbon intensity, based on Scope 1, 2 and 3 GHG emissions.

In order to qualify as a sustainable investment a security must meet a predefined threshold in relation to the aggregate score relative to the Investable Universe, in relation to either of the two indicators referenced directly above.

In summary: the Sub-Fund met its pre-contractual committed minimums related to its sustainable investments policy throughout the reference period. The Sub-Fund closely tracked the index, and applied screens excluding potential investments prohibited under its exclusion policy.

The Investment Manager informs that the continuity of the percentage values and information disclosed cannot be guaranteed in the future and is subject to the constantly evolving legal and regulatory landscape. The duration of the reference period can be less than 12 months if the fund was launched, closed or changed its Article 8/9 status during this time.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

### How did the sustainability indicators perform?

The index tracked by the fund met its sustainable investment objective by achieving a reduction of the Weighted-Average Carbon Intensity ("WACI") of the Index of at least 7% on average per annum and an overall reduction of the Weighted-Average Carbon Intensity of the Index compared to the Investable Universe of at least 30%, and the Sub-Fund tracked this index with an error rate of less than 1%. In addition, at the end of the reference period, the Sub-Fund held 89.49% of sustainable investments using the above criteria. As outlined above, at an individual asset level, the primary sustainability indicators applied to assess whether an asset qualified as a sustainable investment were:

- Carbon Transition Score: this metric assesses a company's alignment to the move towards a lower carbon economy by aggregating a broad range of underlying metrics covering emissions, resource management and risk management; and
- Company Level Carbon intensity, based on Scope 1, 2 and 3 GHG emissions.

### ...and compared to previous periods?

Not applicable for 2022

# How did the sustainable investments not cause significant harm to any sustainable investment objective?

All companies in the index were subject to a screening process that sought to identify and exclude, from qualifying as a sustainable investment, those companies which the Investment Manager considered the worst performing companies, based on a threshold determined by the Investment Manager, in relation to certain environmental considerations. As a consequence, only those companies demonstrating the best indicators relative to both absolute and relative measures were considered sustainable investments.

Such considerations include climate change, protection of water and marine resources, transition to a circular economy, pollution and protection of biodiversity and ecosystems. In addition, the Investment Manager also applied a screen that sought to identify and exclude those companies that the Investment

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Manager considers to be in violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights based on data supplied by third-party service providers.

## \_\_ How were the indicators for adverse impacts on sustainability factors taken into account?

The indicators for adverse impacts on sustainability factors in Table 1 of Annex 1 and certain indicators, as determined by the Investment Manager, in Tables 2 and 3 of Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account as further described below. The Investment Manager used either the metrics in the EU SFDR Regulatory Technical Standards, or where this was not possible due to data limitations or other technical issues, a representative proxy. The Investment Manager consolidated the consideration of certain indicators into a "primary" indicator as set out further below and may have used an additional broader set of indicators than referenced below.

The relevant indicators in Table 1 of Annex 1 of the EU SFDR Regulatory Technical Standards consist of 9 environmental and 5 social and employee related indicators. The environmental indicators are listed at 1-9 and relate to green-house gas emissions (1-3), exposure to fossil fuel, share of non-renewable energy consumption and production, energy consumption intensity, activities negatively affecting biodiversity sensitive areas, emissions to water and hazardous waste (4-9 respectively). Indicators 10 - 14 relate to a company's social and employee matters and cover violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises, lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles, unadjusted gender pay gap, Board gender diversity and exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons) respectively.

The Investment Manager's approach included both quantitative and qualitative aspects to take the above indicators into account. It used particular indicators for screening, seeking to exclude companies that may cause significant harm. It used a subset for engagement with certain companies, seeking to influence best practice and it used certain of them as indicators of positive sustainability performance, by applying a minimum threshold in respect of the indicator to qualify as a sustainable investment. The data needed to take the indicators into account, where available, may have been obtained from investee companies themselves and / or supplied by third-party service providers (including proxy data). Data inputs that are self-reported by companies or supplied by third-party providers may be based on data sets and assumptions that may be insufficient, of poor quality or contain biased information. Due to dependency on third-parties, the Investment Manager cannot guarantee the accuracy or completeness of such data.

### Screening

Certain of the indicators were taken into account through the values and norms-based screening to implement exclusions. These exclusions took into account indicators 10 and 14 in relation to UN Global Compact principles and OECD Guidelines for Multinational Enterprises and controversial weapons.

The Investment Manager also applied a purpose-built screen. Due to certain technical considerations, such as data coverage in respect of specific indicators, the Investment Manager either applied the specific indicator per Table 1 or a representative proxy, as determined by the Investment Manager to screen investee companies in respect of the relevant environmental or social & employee matters. For example, greenhouse gas emissions are associated with several indicators and corresponding metrics in Table 1, such as greenhouse gas emissions, carbon footprint and greenhouse gas intensity (indicators 1-3). The Investment Manager used greenhouse gas intensity data (indicator 3), data in respect of non-renewable energy consumption and production (indicator 5) and data on energy consumption intensity (indicator 6) to perform its screening in respect of greenhouse gas emissions.

In connection with the purpose-built screening and in respect of activities negatively affecting biodiversity sensitive areas and the emissions to water (indicators 7 and 8), due to data limitations, third-party representative proxy data was used, rather than the specific indicators per Table 1. The Investment Manager also took into account indicator 9 in relation to hazardous waste in respect of the purpose-built screen.

### Engagement

In addition to screening out certain companies as described above, the Investment Manager engaged on an ongoing basis with selected underlying investee companies. A subset of the indicators were used, subject to certain technical considerations such as data coverage, as the basis for engaging with selected underlying investee companies in accordance with the approach taken by the Investment Manager on stewardship and engagement. The indicators used in respect of such engagement include indicators 3, 5 and 13 in relation to greenhouse gas intensity, share of non-renewable energy and board gender diversity from Table 1. It also used indicators 2 in Table 2 and 3 in Table 3 in relation to emissions or air pollutants

\_ Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The methodology applied a screen to align with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as provided for under the Minimum Safeguards in the EU Taxonomy Regulation. Third-party data was used to identify potential violators. Unless an exception was granted, the Sub-Fund prohibited relevant investments in these issuers.

# How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered principal adverse impacts on sustainability factors through values and norms based screening to implement exclusions and active engagement with select investee companies.

The Sub-Fund used a comprehensive range of indicators from Annex 1 of the EU SFDR Regulatory Technical Standards in respect of such screening. It used indicators 1-14 in table 1 of this Annex which covers adverse sustainability impacts such as violations of the UN Global Compact, controversial weapons, GHG intensity, share of non renewable energy consumption and production, energy consumption and hazardous waste. It also considered select indicators in tables 2 and 3.

A subset of the above-mentioned Adverse Sustainability Indicators were used to determine engagement with investee companies based on their respective PAI performance.

### What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

30/09/2022 - 31/12/2022

| Largest Investments                    | Sector               | % Assets | Country        |
|--|----------------------|----------|----------------|
| APPLE INC                              | Technology           | 4.63     | United States  |
| MICROSOFT CORPORATION                  | Technology           | 3.83     | United States  |
| ALPHABET INC                           | Communications       | 2.47     | United States  |
| JOHNSON & JOHNSON                      | Consumer Noncyclical | 1.38     | United States  |
| AMAZON.COM, INC.                       | Industrial Other     | 1.32     | United States  |
| ELI LILLY AND COMPANY                  | Consumer Noncyclical | 1.11     | United States  |
| MERCK & CO INC.                        | Consumer Noncyclical | 1.05     | United States  |
| ABBVIE INC.                            | Consumer Noncyclical | 1.04     | United States  |
| NVIDIA CORPORATION                     | Electric             | 1.01     | United States  |
| PEPSICO, INC                           | Consumer Noncyclical | 0.99     | United States  |
| NESTLE SA                              | Consumer Noncyclical | 0.93     | Switzerland    |
| LVMH MOET HENNESSY LOUIS<br>VUITTON SE | Consumer Cyclical    | 0.88     | France         |
| ASTRAZENECA PLC                        | Consumer Noncyclical | 0.85     | United Kingdom |
| NEXTERA ENERGY, INC.                   | Electric             | 0.85     | United States  |
| TESLA, INC.                            | Consumer Cyclical    | 0.80     | United States  |

### What was the proportion of sustainability-related investments?

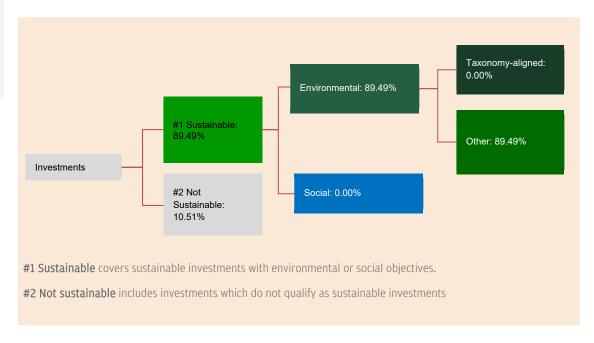

### Asset allocation

describes the share of investments in specific assets.

### What was the asset allocation?

At the end of the reference period, the Sub-Fund allocated 89.49% of assets to sustainable investments.

Ancillary cash, cash equivalents, money market funds and derivatives for EPM are not included in the % of assets set out in the table below. These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

### In which economic sectors were the investments made?

Although the Sub-Fund had a Sustainable Objective, it may have invested across a broad range of sectors – please refer to the list below. In addition, the Investment Manager engaged on an ongoing basis with selected underlying investee companies. Investments within sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels, will be included in the table below if held. Ancillary cash, cash equivalents, money market funds and derivatives for EPM are included in the denominator for the % of assets set out in the table below.

| Sector               | Sub-sector                | % Assets |
|----------------------|---------------------------|----------|
| Banking              | Banking                   | 6.11     |
| Basic Industry       | Chemicals                 | 2.59     |
| Basic Industry       | Metals & Mining           | 1.05     |
| Basic Industry       | Paper                     | 0.15     |
| Capital Goods        | Aerospace/Defense         | 0.66     |
| Capital Goods        | Building Materials        | 1.52     |
| Capital Goods        | Construction Machinery    | 1.50     |
| Capital Goods        | Diversified Manufacturing | 1.18     |
| Capital Goods        | Environmental             | 0.54     |
| Capital Goods        | Packaging                 | 0.18     |

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomyaligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies

# To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Data on EU Taxonomy alignment is currently very limited, in particular with regards to fossil gas and nuclear energy. We expect this to improve over time as more companies disclose their alignment, and the data becomes more available.

The Sub-Fund has made no minimum commitment to sustainable investment with environmental objectives aligned to the EU Taxonomy.

Therefore, the precontractual disclosure document for the Sub-Fund indicates the extent of targeted sustainable investments with an environmental objective aligned with the EU Taxonomy as 0.00%. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have environmental and / or social characteristics and sustainable investments (as defined by SFDR).

The below graphs illustrate the actual extent of investments in sustainable investments with an environmental objective aligned with the EU Taxonomy as measured at the end of the reference period.

| Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ? |
|--|
|  |

| Yes           |                   |
|---------------|-------------------|
| In fossil gas | In nuclear energy |
| <b>X</b> No   |                   |

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

This graph represents 6% of the total investment.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

### What was the share of investments made in transitional and enabling activities?

Further to the above, the Sub-Fund has made no minimum commitment to making EU Taxonomy aligned investments – including Transitioning and Enabling activities. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have sustainable investments.

The calculated share of Transitioning activities represents 0.01% and the calculated share of Enabling activities represents 0.93%, at the end of the reference period.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

# What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 89.49% of assets at the end of the reference period.

### What was the share of socially sustainable investments?

The share of socially sustainable investments was 0.00% of assets at the end of the reference period.

# What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The 10.51% of investments in this category were comprised of companies that did not meet a minimum aggregate score in relation to a threshold set by the Investment Manager. The scoring was based on the Index inclusion methodology as set out in the answer above to the question "How did the Sustainability Indicators Perform".

This category may also include investments required to facilitate other characteristics or binding constraints in relation to the Index , such as minimum exposures to high impact sectors.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

# What actions have been taken to attain the sustainable investment objective during the reference period?

The following binding elements of the investment strategy were applied during the reference period to attain the sustainable objective:

- The requirement for the Sub-Fund to seek to replicate the Index by holding all of the Index Securities in a similar proportion to their weighting in the Index. (The Index methodology is binding in its design to capture the performance of companies which have been identified through its rules-based process as best positioned to benefit from a transition to a low carbon economy by effectively managing their emissions, resources and climate-related risks whilst achieving a reduction of the greenhouse gas intensity of the Index of at least 7% on average per annum and an overall reduction of the greenhouse gas intensity of the Index compared to the Investable Universe of at least 30%)
- The requirement for the Index to meet the requirements for EU Climate Transition Benchmarks as defined in the EU Climate Benchmarks Regulation.
- The requirement that all companies in the portfolio follow good governance practices.

Further information on engagement is available in the answer to the question "How were the indicators for adverse impacts on sustainability factors taken into account?"

# How did this financial product perform compared to the reference sustainable benchmark?

The Sub-Fund sought to achieve returns corresponding to those of its Reference Sustainable Benchmark. The sustainability indicators also performed in line with the index. Further details on the performance of the Sub-Fund and the index can be found on the website: www.jpmorganassetmanagement.lu by searching for the Sub-Fund and clicking on the Performance and Fees section.

Details on the Index, including its methodology, components and performance, are available at https://www.solactive.com/indices/?se=1&index=DE000SL0BE72, and further details on the Investable Universe, including its components and performance, are available at https://www.msci.com

How did the reference benchmark differ from a broad market index?

The Index applied this rules-based non-financial analysis process to select components from a broad market index, the MSCI World Index. The Index is designed to capture the performance of companies which have been identified through its rules-based process as best positioned to benefit from a transition to a low carbon economy by effectively managing their emissions, resources and climate-related risks.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

The Sub-Fund's sustainable investment objective was to provide lower carbon emission exposure relative to the MSCI World Index (the "Investable Universe"). The Sub-Fund aimed to achieve this objective by tracking the performance of the Solactive J.P.Morgan Asset Management Carbon Transition Global Equity Index (the "Index") as closely as possible. The Index is designed to capture the performance of companies which have been identified through its rules-based process as best positioned to benefit from a transition to a low carbon economy by effectively managing their emissions, resources and climate-related risks whilst achieving a reduction of the greenhouse gas intensity of the Index of at least 7% on average per annum and an overall reduction of the greenhouse gas intensity of the Index compared to the Investable Universe of at least 30%. The index met these objectives, as confirmed by the index provider. More information is available in the Index Provider's Factsheet:

https://www.solactive.com/wp-content/uploads/solactiveip/en/Factsheet DE000SL0BE72.pdf

The Sub-Fund delivered a reduction in weighted average carbon intensity vs. MSCI World of 69.21% which is consistent with the index.

The performance of the Sub-Fund closely tracked that of the index, as can been seen by the answer to the question directly below.

The Sub-Fund was also required to invest 80% in assets qualified as sustainable. At the end of the reference period, 89.49% of investments were classified as sustainable.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

### How did this financial product perform compared with the reference benchmark?

The performance of the Sub-Fund was -18.66% net of fees over the reference period, whilst the benchmark returned -18.71%.

### How did this financial product perform compared with the broad market index?

The performance of the Sub-Fund was -18.66% net of fees over the reference period, whilst the broad market index, the MSCI World Index, returned -18.14%.

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: JPMorgan ETFs (Ireland) ICAV - Climate Change Solutions UCITS ETF

Legal entity identifier: 5493006UW36ZSXHP0G74

### Sustainable investment objective

| Did this financial product have a sustainable investment objective?   |  |  |  |
|---|--|--|--|
| •• X Yes  | • No   |  |  |
| It made sustainable investments with an environmental objective: 100.00%  | It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of _% of sustainable investments   |  |  |
| in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective |  |  |
| It made sustainable investments with a social objective: 0.00%  | It promoted E/S characteristics, but did not make any sustainable investments  |  |  |

# To what extent was the sustainable investment objective of this financial product met?

The Sub-Fund's sustainable investment objective was to provide exposure to the theme of climate change solutions. It was required to invest 100% of its assets in such securities. This commitment was met throughout the reference period (14 June 2022 - 31 December 2022). At the end of the reference period, the Sub-Fund held 100.00% of sustainable investments. The duration of the reference period can be less than 12 months if the fund was launched, closed or changed its Article 8/9 status during this time.

Through its inclusion criteria, the Sub-Fund set out to invest in sustainable investments which provided solutions in relation to key subthemes of climate change such as Renewables & Electrification, Sustainable Construction, Sustainable Food & Water, Sustainable Transport and Recycling & Re-Use.

How did the sustainability indicators perform?

The Investment Manager considered the key drivers of climate change as the key drivers of greenhouse gas emissions, which include energy in industry, energy in buildings, energy in transport, agriculture,

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

chemicals/cement and wastewater / landfill. The Investment Manager sought to identify and invest in companies producing products and / or services (solutions) to mitigate each of these key drivers.

It was required to invest 100% of its assets in such securities.

Through its inclusion criteria, the Sub-Fund set out to achieve its sustainable objective by investing in companies best positioned to develop solutions to address climate change.

This commitment was met throughout the reference period. At the end of the reference period, the Sub-Fund held 100.00% of sustainable investments. The Investment Manager informs that the continuity of the percentage values and information disclosed cannot be guaranteed in the future and is subject to the constantly evolving legal and regulatory landscape.

### ...and compared to previous periods?

Not applicable for 2022

### How did the sustainable investments not cause significant harm to any sustainable investment objective?

The sustainable investments that the Sub-Fund intended to make were subject to a screening process that sought to identify and exclude, from qualifying as a sustainable investment, those issuers which the Investment Manager considered the worst performing companies, based on a threshold determined by the Investment Manager, in relation to certain environmental considerations. As a consequence, only those companies demonstrating the best indicators relative to both absolute and relative measures were considered sustainable investments.

Such considerations include climate change, protection of water and marine resources, transition to a circular economy, pollution and protection of biodiversity and ecosystems. In addition, the Investment Manager also applied a screen that sought to identify and exclude those companies that the Investment Manager considers to be in violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights based on data supplied by third-party service providers.

# \_\_ How were the indicators for adverse impacts on sustainability factors taken into account?

The indicators for adverse impacts on sustainability factors in Table 1 of Annex 1 and certain indicators, as determined by the Investment Manager, in Tables 2 and 3 of Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account as further described below. The Investment Manager used either the metrics in the EU SFDR Regulatory Technical Standards, or where this was not possible due to data limitations or other technical issues, a representative proxy. The Investment Manager consolidated the consideration of certain indicators into a "primary" indicator as set out further below and may have used an additional broader set of indicators than referenced below.

The relevant indicators in Table 1 of Annex 1 of the EU SFDR Regulatory Technical Standards consist of 9 environmental and 5 social and employee related indicators. The environmental indicators are listed at 1-9 and relate to green-house gas emissions (1-3), exposure to fossil fuel, share of non-renewable energy consumption and production, energy consumption intensity, activities negatively affecting biodiversity sensitive areas, emissions to water and hazardous waste (4-9 respectively). Indicators 10 – 14 relate to a company's social and employee matters and cover violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises, lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles, unadjusted gender pay gap, Board gender diversity and exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons) respectively.

The Investment Manager's approach included both quantitative and qualitative aspects to take the above indicators into account. It used particular indicators for screening, seeking to exclude companies that may cause significant harm. It used a subset for engagement with certain companies, seeking to influence best practice and it used certain of them as indicators of positive sustainability performance, by applying a minimum threshold in respect of the indicator to qualify as a sustainable investment. The data needed to take the indicators into account, where available, may have been obtained from investee companies themselves and / or supplied by third-party service providers (including proxy data). Data inputs that are self-reported by companies or supplied by third-party providers may be based on data sets and assumptions that may be insufficient, of poor quality or contain biased information. Due to dependency on third-parties, the Investment Manager cannot guarantee the accuracy or completeness of such data.

### Screening

Certain of the indicators were taken into account through the values and norms-based screening to implement exclusions. These exclusions took into account indicators 10 and 14 in relation to UN Global

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Compact principles and OECD Guidelines for Multinational Enterprises and controversial weapons.

The Investment Manager also applied a purpose-built screen. Due to certain technical considerations, such as data coverage in respect of specific indicators, the Investment Manager either applied the specific indicator per Table 1 or a representative proxy, as determined by the Investment Manager to screen investee companies in respect of the relevant environmental or social & employee matters. For example, greenhouse gas emissions are associated with several indicators and corresponding metrics in Table 1, such as greenhouse gas emissions, carbon footprint and greenhouse gas intensity (indicators 1-3). The Investment Manager used greenhouse gas intensity data (indicator 3), data in respect of non-renewable energy consumption and production (indicator 5) and data on energy consumption intensity (indicator 6) to perform its screening in respect of greenhouse gas emissions.

In connection with the purpose-built screening and in respect of activities negatively affecting biodiversity sensitive areas and the emissions to water (indicators 7 and 8), due to data limitations, third-party representative proxy data was used, rather than the specific indicators per Table 1. The Investment Manager also took into account indicator 9 in relation to hazardous waste in respect of the purpose-built screen.

### Engagement

In addition to screening out certain companies as described above, the Investment Manager engaged on an ongoing basis with selected underlying investee companies. A subset of the indicators were used, subject to certain technical considerations such as data coverage, as the basis for engaging with selected underlying investee companies in accordance with the approach taken by the Investment Manager on stewardship and engagement. The indicators used in respect of such engagement include indicators 3, 5 and 13 in relation to greenhouse gas intensity, share of non-renewable energy and board gender diversity from Table 1. It also used indicators 2 in Table 2 and 3 in Table 3 in relation to emissions or air pollutants and number of days lost to injuries, accidents, fatalities or illness.

\_\_ Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund applied a screen to align with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as provided for under the Minimum Safeguards in the EU Taxonomy Regulation. Third-party data was used to identify potential violators. Unless an exception was granted, the Sub-Fund prohibited relevant investments in these issuers.

# How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered principal adverse impacts on sustainability factors through values and norms based screening to implement exclusions and active engagement with select investee companies.

The Sub-Fund used a comprehensive range of indicators from Annex 1 of the EU SFDR Regulatory Technical Standards in respect of such screening. It used indicators 1-14 in table 1 of this Annex which covers adverse sustainability impacts such as violations of the UN Global Compact, controversial weapons, GHG intensity, share of non renewable energy consumption and production, energy consumption and hazardous waste. It also considered select indicators in tables 2 and 3

A subset of the above-mentioned Adverse Sustainability Indicators were used to determine engagement with investee companies based on their respective PAI performance.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

14/06/2022 - 31/12/2022

### What were the top investments of this financial product?

| Largest Investments                       | Sector                 | % Assets | Country       |
|---|------------------------|----------|---------------|
| XYLEM INC.                                | Industrials            | 4.26     | United States |

# -

### Asset allocation

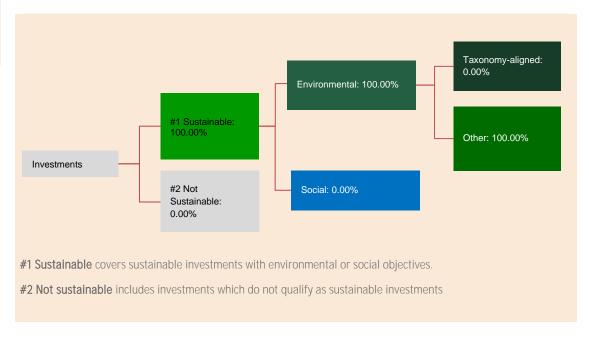

describes the share of investments in specific assets.

### What was the proportion of sustainability-related investments?

### What was the asset allocation?

At the end of the reference period, allocated 100.00% of its assets to companies aligned to the theme of climate change solutions and other assets for a specific purpose such as liquidity management.

Ancillary cash, cash equivalents, money market funds and derivatives for EPM were not considered as part of the "other" investments nor included in the % of assets set out in the table below as these holdings are minimal, fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

### In which economic sectors were the investments made?

Although the Sub-Fund had a Sustainable Objective, it may have invested across a broad range of sectors – please refer to the list below. In addition, the Investment Manager engaged on an ongoing basis with selected underlying investee companies. Investments within sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels, will be included in the table below if held. Ancillary cash, cash equivalents, money market funds and derivatives for EPM are included in the denominator for the % of assets set out in the table below.

| Sector                 | Sub-sector                                | % Assets |
|------------------------|---|----------|
| Consumer Discretionary | Automobiles And Components                | 3.20     |
| Consumer Discretionary | Consumer Durables And<br>Apparel          | 0.21     |
| Consumer Staples       | Food Beverage And Tobacco                 | 1.04     |
| Industrials            | Capital Goods                             | 43.50    |
| Industrials            | Commercial & Professional<br>Services     | 4.97     |
| Information Technology | Semiconductors And<br>Semiconductor Equip | 7.39     |
| Information Technology | Software And Services                     | 5.74     |
| Information Technology | Technology Hardware And Equipment         | 6.42     |
| Materials              | Materials                                 | 10.25    |
| Real Estate            | Real Estate                               | 4.06     |
| Utilities              | Utilities                                 | 10.52    |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomyaligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing

# To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Data on EU Taxonomy alignment is currently very limited, in particular with regards to fossil gas and nuclear energy. We expect this to improve over time as more companies disclose their alignment, and the data becomes more available.

The Sub-Fund has made no minimum commitment to sustainable investment with environmental objectives aligned to the EU Taxonomy.

Therefore, the precontractual disclosure document for the Sub-Fund indicates the extent of targeted sustainable investments with an environmental objective aligned with the EU Taxonomy as 0.00%. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have environmental and / or social characteristics and sustainable investments (as defined by SFDR).

The below graphs illustrate the actual extent of investments in sustainable investments with an environmental objective aligned with the EU Taxonomy as measured at the end of the reference period.

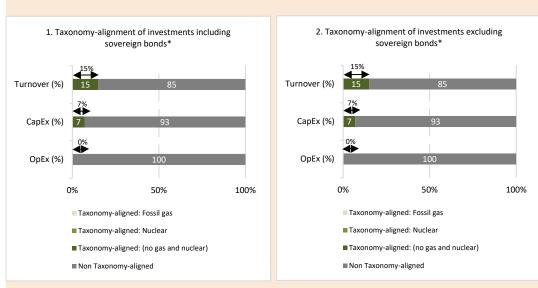

| Did the financial product invest in fossil gas and/or nuclear energy related |
|--|
| activities complying with the EU Taxonomy¹?                                  |

| Yes           |                   |
|---------------|-------------------|
| In fossil gas | In nuclear energy |
| <b>X</b> No   |                   |

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

This graph represents 22% of the total investment

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

### What was the share of investments made in transitional and enabling activities?

Further to the above, the Sub-Fund has made no minimum commitment to making EU Taxonomy aligned investments – including Transitioning and Enabling activities. Any alignment outlined below is a by-product of the Sub-Fund's framework which considers investments that have sustainable investments.

The calculated share of Transitioning activities represents 0.00% and the calculated share of Enabling activities represents 9.03%, at the end of the reference period.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

# What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 100.00% of assets at the end of the reference period.

### What was the share of socially sustainable investments?

The share of socially sustainable investments was 0.00% of assets at the end of the reference period.

# What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Not Applicable - The Sub-Fund invests exclusively in sustainable investments in pursuit of its sustainable investment objective.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

# What actions have been taken to attain the sustainable investment objective during the reference period?

The following binding elements of the investment strategy were applied during the reference period to select the investments to attain the sustainable objective:

- To invest in companies that have been identified by the Investment Manager, at the time of purchase, as best positioned to develop solutions to address climate change, by being significantly engaged in developing such solutions, whilst not significantly harming any environmental or social objectives and following good governance practices.
- The values and norms-based screening to implement full exclusions in relation to issuers that are involved in certain activities such as manufacturing controversial weapons and applying maximum revenue, production or distribution percentage thresholds to others such as those that are involved in thermal coal and tobacco.
- The requirement for all issuers in the portfolio to follow good governance practices.

The Sub-Fund's strategy can be considered in respect of its general investment approach and ESG approach as follows:

Investment approach

- Used a ThemeBot which, through natural language processing, determined textual relevance and revenue attribution to identify companies exposed to the theme of climate change solutions and its related sub-themes.
- Used the results of Themebot as the basis for company selection, applying an active, bottom-up
  investment approach to stock selection, drawing on a fundamental research-based investment
  process.
- As above, applied values and norms based screening to implement exclusions.

ESG approach: Thematic

- Excluded certain sectors, companies / issuers or practices based on specific values or norms based criteria
- Objective to deliver a sustainability related theme with intentional environmental/ social outcome.
- A above, all issuers / companies follow good governance practices.
