WHAT IS THIS PRODUCT?

Type: This product is a sub-fund of First Trust Global Funds ICAV (the "ICAV"), an open-ended investment fund established as an Irish collective asset-management vehicle with segregated liability between sub-funds. The product is an exchange-traded fund.

Term: The ICAV is open-ended, however, the shares of the Fund or a class may be redeemed by the ICAV with notice to shareholders in the circumstances described in the Prospectus.

Objectives:

- The objective of the Fund is to seek to provide investors with long term returns, through capital growth. The Fund intends to pursue an actively managed investment strategy. In order to achieve its investment objective, the Fund will invest primarily in a diversified portfolio of global equity securities issued by companies which the Investment Manager considers to have leading or superior metrics based on environmental, social and governance ("ESG") related criteria (relative to their industry peers) and which, in addition, the Investment Manager considers to exhibit "Capital Strength" in that they are well capitalised and have strong balance sheets. The Fund's starting investment universe is the Nasdaq Global Index, a float adjusted market capitalization-weighted index designed to track the performance of global equities covering over 98% of the entire listed market capitalization of the global equity space. The Investment Manager applies the following criteria (the "ESG Selection Criteria"), using Sustainalytics data, to refine that universe into the issuers that the Investment Manager considers to have leading or superior ESG metrics: Screen out companies that (i) are in the bottom 50% in their industry in terms of the Sustainalytics ESG Risk Score; (ii) have an ESG Risk Score above 30 (on a scale of 0 to 50); or (iii) have a Sustainalytics ESG Controversy Score of 4 or 5 (High and Severe). Next, the Investment Manager will apply business involvement screens; and screen out companies that have business involvement above specified revenue thresholds in controversial weapons (0%), oil sands extraction (5% or higher), or adult entertainment (5% or higher). The Investment Manager applies several exclusionary screens in accordance with the Paris-Aligned Benchmarks Regulation related to controversial weapons; tobacco; coal, oil and natural gas exploitation; electricity generation with high greenhouse gas intensity; and compliance with United Nations Global Compact principals and Organization for Economic Cooperation and Development guidelines for multinational enterprises. The investment manager then applies its proprietary "capital strength" investment methodology to the remaining stocks to screen issuers for inclusion in the Fund's portfolio (the "Capital Strength Selection Criteria"). The capital strength methodology evaluates issuers on the following criteria: minimum three-month average trading volume of USD 5 million, minimum of USD 1 billion in cash and short-term investments, long-term debt to market capitalisation ratio of less than 30%, and return on equity of greater than 15%. Issuers that do not meet those criteria are discarded, and the resulting portfolio is then adjusted to 50 stocks by taking the issuers with the lowest combined 3 and 12 month volatility and applying the following concentration limits: country weighting in the Fund's portfolio must be within 15 percentage points of the country weight in the Nasdaq Global Index, and sector concentration is limited to 30%. The 50 stocks are then equally weighted. The Fund's portfolio is screened using the ESG Selection Criteria on a weekly basis and may be adjusted at the Investment Manager's discretion; in such cases the portfolio may consist of slightly fewer than 50 stocks. The Fund's portfolio is reconstituted on a semi-annual basis in June and December of each year, at which points the Investment Manager re-applies both the ESG Selection Criteria and the Capital Strength Selection Criteria. There may be circumstances where a security creates new shares of its existing business in a separate company which could result in holdings in excess of 50 holdings. The Fund's portfolio is subject to the Investment Manager's ongoing internal research and analysis, and may be adjusted in the Investment Manager's discretion at or between the weekly and semi-annual evaluations in line with the Fund's investment objective; in such cases the portfolio may consist of slightly more or fewer than 50 stocks. The Fund's performance is compared against the Nasdaq Global Index.

Income is reinvested into the Fund for this share class.

You may sell your shares usually by sending your request to the administrator on any day on which the London Stock Exchange is open for business.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

1	2	**3**	4	5	6	7

Lower risk — Higher risk

The risk indicator assumes you keep the product for 5 Years.

Risk indicator

The summary risk indicator ("SRI") is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity of the fund to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance.

For other risks materially relevant to the product which are not taken into account in the summary risk indicator, please read the Prospectus available at www.ftgportfolios.com.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.
The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions.

Recommended holding period: 5 Years **Example Investment: 10 000 USD**			
Scenarios		**If you exit after 1 Year**	**If you exit after 5 Years** (recommended holding period)
Minimum: There is no minimum guaranteed return. You could lose some or all of your investment.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

- Unfavourable: This type of scenario occurred for an investment (and benchmark) between October 2025 and September 2026.
- Moderate: This type of scenario occurred for an investment (and benchmark) between February 2020 and January 2025.
- Favourable: This type of scenario occurred for an investment (and benchmark) between January 2017 and December 2021.

The return is not guaranteed.

WHAT HAPPENS IF FIRST TRUST GLOBAL PORTFOLIOS MANAGEMENT LIMITED IS UNABLE TO PAY OUT?

You may not face financial loss should the Manager default on its obligations to the Fund. The assets of the Fund are held in the safekeeping by the Depositary. In the event of the insolvency of the Depositary, the Fund's assets should not be subject to a claim by the Depositary's liquidator. In the event of any loss, there is no compensation or guarantee scheme in place which may offset, all or any of, such loss.

WHAT ARE THE COSTS?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and should show you the impact that all costs will have on your investment over time.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- USD 10 000 is invested

Investment: 10 000 USD	**If you exit after 1 Year**	**If you exit after 5 Years** (recommended holding period)
Total Costs	**USD 82**	**USD 678**
Annual Cost Impact (*)	0.8% each year	0.9% each year

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 0.1% before costs and 0.1% after costs.

Composition of Costs
