Japan Research Enhanced Index Equity (ESG) UCITS ETF

Class: JPM Japan Research Enhanced Index Equity (ESG) UCITS ETF - USD (acc)

Fund overview

ISIN

IE00BP2NF958

Valor

111459283

Investment objective:

The Sub-Fund aims to achieve a long-term return in excess of MSCI Japan Index (Total Return Net) (the "Benchmark") by actively investing primarily in a portfolio of Japanese companies.

Investment policy:

The Sub-Fund pursues an actively-managed investment strategy.

Investment approach

• Uses a fundamental, bottom-up stock selection process.

• Enhanced index approach that builds a portfolio in reference to the benchmark by overweighting securities with the highest potential to outperform and underweighting securities considered most overvalued.

• Diversified portfolio with disciplined, risk-controlled portfolio construction.

• Applies values and norms based screening and implements minimum investment thresholds on companies with positive ESG characteristics.

Investor profile:

Es wird davon ausgegangen, dass es sich bei den Anlegern des Teilfonds typischerweise um Anleger handelt, die ein breites Engagement am japanischen Aktienmarkt eingehen wollen, die von potenziellen Überschussrenditen bei gleichen Risiken wie bei der Direktanlage in die Wertpapiere, die von dem Vergleichsindex repräsentiert werden, profitieren wollen und die bereit sind, die mit einer derartigen Anlage verbundenen Risiken, darunter das mit einem solchen Markt verbundene Volatilitätsrisiko, zu akzeptieren.

Key risks

The value of your investment may fall as well as rise and you may get back less than you originally invested.

The value of equity securities may go down as well as up in response to the performance of individual companies and general market conditions, sometimes rapidly or unpredictably. If a company goes through bankruptcy or a similar financial restructuring, its shares in issue typically lose most or all of their value.

Since the instruments held by the Sub-Fund may be denominated in currencies other than the Base Currency, the Sub-Fund may be affected unfavourably by exchange control regulations or fluctuations in currency rates. For this reason, changes in currency exchange rates can affect the value of the Sub-Fund's portfolio and may impact the value of the Shares.

The Sub-Fund may invest in securities of smaller companies which may be less liquid, more volatile and tend to carry greater financial risk than securities of larger companies.

Exclusion of companies that do not meet certain ESG criteria from the Sub-Fund's investment universe may cause the Sub-Fund to perform differently compared to similar funds that do not have such a policy.

The Sub-Fund seeks to provide a return above the Benchmark; however the Sub-Fund may underperform the Benchmark.

Due to the composition of the Benchmark, the Sub-Fund's portfolio may be more concentrated geographically than other Sub-Funds with more diversified portfolios and may, consequently, be subject to greater volatility than such Sub-Funds.
