Index Description

The Index is designed to reflect the performance of stocks of large and mid-capitalization dividend paying US companies that exhibit quality fundamental characteristics. The Index constituents are screened according to fundamental measures such as free cash flow margin, return on invested capital and free cash flow stability with the objective of identifying financially robust companies. The companies with highest dividend yield are then selected for inclusion within the index. For more information please refer to the index methodology at www.fidelity-etfs.com/documents.

Important Information:

Before investing you should read the Key Investor Information Document (KIID). The value of investments and any income from them may go down as well as up and an investor may not get back the amount invested. Where an investor's own currency is different to the currency of the fund's investments, the fund's returns can be affected by fluctuations in currency exchange rates. The use of financial derivative instruments may result in increased gains or losses within the fund.

Risk and Reward Profile

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean a "risk free" investment.
- The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.
- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- Movements in currency exchange rates can adversely affect the return of your investment. Currency hedging may be used to minimise the effect of this but may not always be successful.
