

Key Investor Information for Investors in the United Kingdom

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Xtrackers II iTraxx Crossover Swap UCITS ETF

Share class: 1C, ISIN: LU0290359032, Security code: DBX0AR, Currency: EUR

a sub-fund of Xtrackers II. The management company is DWS Investment S.A., a member of the DWS Group.

Objectives and investment policy

The fund is passively managed. The aim is for your investment to reflect the performance of the iTraxx® Crossover 5-year TOTAL RETURN Index (index). The risk that a borrower fails to perform its payment obligations is known as credit risk. A person may obtain protection against credit risk by entering into a financial contract to pass on this risk to a credit protection seller (credit derivative transaction) subject to certain credit events. The index measures the return for a credit protection seller holding the most current issue of the iTraxx® Crossover credit derivative transaction with a term of 5 years. The performance of the index will depend on several factors including the market value of 5-year iTraxx® Crossover credit derivative transactions, returns generated by selling credit protection in respect of the issuers included in the index and losses paid following defaults by those issuers. The index is comprised of up to 50 European companies with credit ratings of below investment grade and is calculated on a total return basis meaning that any balance that remains after acquiring the credit exposure will earn interest at the rate at which banks in the

Eurozone lend to each other on an overnight basis (as calculated by the European Central Bank). The index is administered by IHS Markit Benchmark Administration Limited. Certain costs may be deducted from the index. To achieve the aim, the fund will invest in transferable securities and enter into financial contracts (derivatives) with one or more swap counterparties relating to the transferable securities and the index, in order to obtain the return on the index. Certain information (including the latest share prices of the fund, indicative net asset values, full disclosure on the composition of the fund's portfolio and information on the index constituents) are available on your local DWS website or at www.Xtrackers.com. Transaction costs and taxes, unexpected fund costs and market conditions such as volatility or liquidity issues may affect the ability of the fund to track the index. The anticipated level of tracking error in normal market conditions is 1 per cent. The currency of the fund is EUR. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares generally on a daily basis.

Risk and reward profile

The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 4 because its share price fluctuates and the likelihood of both losses and gains may therefore be relatively high. The following risks could be of particular significance for the fund: The fund does not invest directly in the components of the index and its returns will be dependent on the performance of the bonds and/or cash deposits and the performance of the derivatives used. DWS entities and related companies may act in several roles in relation to the fund such as distributor and management company which may involve conflicts of interest. The fund will enter into a

derivative with one or more counterparties. If any of the counterparties fails to make payment (for example, it becomes insolvent) this may result in your investment suffering a loss. The fund may invest in bonds the value of which depends on the issuer being able to make its payments. There is always a risk that the issuer will fail to do so which may result in your investment suffering a loss. The fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up. The index provides a notional exposure to the value and/or return of certain credit derivative transactions which may fall. Markets in these asset classes may at times become volatile or illiquid. The relevant index may be affected. The fund is intended for investors who wish to take a very short term view on the index and whose investments are not intended as buy and hold investments. The fund invests in non-investment grade bonds which generally have a higher risk of default and are more susceptible to market fluctuations than investment grade bonds. This may affect the value of your investment.

A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the fund over a year	
Ongoing charges	0.24 %
Charges taken from the fund under certain specific conditions	
Performance fee	None

Secondary market investors (those who buy or sell shares on a stock exchange) may be charged certain fees by their stock broker. These charges, if any, can be obtained from such stock broker. Authorised participants dealing directly with the fund will pay the transaction costs related to their subscriptions and redemptions.

The ongoing charges figure is based on expenses for the fiscal year ending 31.12.2022. It may vary from year to year. It excludes portfolio transaction costs and performance fees, if any.

Additional information on costs can be found in the cost section(s) of the prospectus.

Past performance

Past performance is not a reliable indicator of future performance. All costs and fees that were withdrawn from the 1C share class of Xtrackers II iTraxx Crossover Swap UCITS ETF were deducted during the calculation. The 1C share class of Xtrackers II iTraxx Crossover Swap UCITS ETF was launched in 2007.
