Bloomberg ex-Agriculture & Livestock 15/30 Capped 3 Month Forward Index

The Bloomberg ex-Agriculture & Livestock 15/30 Capped 3 Month Forward Index aims to reflect the performance of the following market:

- Diversified basket of commodities from 3 broad commodity sectors
 - Covers over 10 different commodities drawn from the Energy, Precious Metals and Industrial Metals sectors, excluding the Softs, Livestock and Grains sectors
 - Commodities are weighted according to their liquidity and economic significance, as determined annually by Bloomberg. The Index is a 3 Month Forward index, meaning the index includes commodity futures that have expiry dates 3 months further into the future than the commodity futures featured in the Bloomberg Commodity Index. The Index features capping with an aim to ensure UCITS compliance, and excludes futures linked to livestock and agriculture.
 - 2021 target weights were: Energy: 45%, Industrial Metals: 31.3%, Precious Metals: 23.7%
- Additional information on the index, selection and weighting methodology is available at www.bloomberg.com

Key Risks

- The Fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up.
- The Fund provides exposure to commodities. Commodity prices react, among other things, to economic factors such as changing supply and demand relationships, weather conditions and other natural events, the agricultural, trade, fiscal, monetary, and other policies of governments and other unforeseeable events all of which may affect your investment.
- The Fund will use financial contracts (known as derivatives) to try to reduce the effect of currency fluctuations between the currency of its assets and the currency of the shares. This may not be effective and may prevent the Fund from benefitting from an increase in the value of (or expose a Fund to the decrease in value of) a particular currency.
- The Fund will enter into a derivative with a counterparty (initially Deutsche Bank). If the counterparty fails to make payments (for example, it becomes insolvent) this may result in your investment suffering a loss.

Additional Information

A Glossary of Terms is available at Xtrackers.com.

ETF performance is shown on NAV basis, net of fees and index replication costs. Index performance is calculated on a total return basis. The performance of currency hedged share classes may differ significantly from the performance of the index which is unhedged. Unhedged share class fees may vary from hedged share class fees. On restructuring event dates, index values are re-based to match the index level of the previous index. Volatility is calculated since launch of the share class.

Key Risk Factors

Investments in funds involve numerous risks including, among others, general market risks, credit risks, foreign exchange risks, interest rate risks and liquidity risks. As such, the value of an investment in an Xtrackers ETF may go down as well as up and can result in losses, up to and including a total loss of the amount initially invested. Movements in exchange rates can impact the value of your investment. If the currency of your country of residence is different from the currency in which the underlying investments of the fund are made, the value of your investment may increase or decrease subject to movements in exchange rates.
