Reference Index key features

The IBOXX € GERMANY COVERED® index aims to reflect the performance of the following market:

- EUR-denominated German covered bonds
- Exposure across the whole yield curve (minimum time to maturity of 1 year)
- Investment grade only
- Minimum amount outstanding of EUR 1 billion per bond (bonds with amount outstanding between EUR 500mn and EUR 1bn are included if they have at least three lead managers other than the issuer itself or if they are tranche bonds with parent bond eligible for inclusion)

Additional information on the Index and the general methodology behind the Markit iBoxx indices can be found on Markit iBoxx website (www.markit.com).

Key Risks

- **The value of your investment may go down as well as up and past performance does not predict future returns. Investor capital may be at risk up to a total loss.**
- The Fund is exposed to market movements in a single country or region which may be adversely affected by political or economic developments, government action or natural events that do not affect a fund investing in broader markets.
- Bonds are exposed to credit risk and interest rate risk. There is a risk that the bond issuer may be unable to pay interest or repay the bond principal, resulting in your investment suffering a loss. If interest rates rise, typically the value of the bond will fall, which could also affect the value of your investment.
- The Fund will enter into a derivative with a counterparty. If the counterparty fails to make payments (for example, it becomes insolvent) this may result in your investment suffering a loss.
