Key Risks

- The Fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up.
- The value of an investment in shares will depend on a number of factors including, but not limited to, market and economic conditions, sector, geographical region and political events.
- The Fund is exposed to market movements in a single country or region which may be adversely affected by political or economic developments, government action or natural events that do not affect a fund investing in broader markets.
- The Fund will enter into a derivative with a counterparty (initially Deutsche Bank). If the counterparty fails to make payments (for example, it becomes insolvent) this may result in your investment suffering a loss.
- The Index is constructed to track the performance of a negative (known as a short) position on the Underlying Index, meaning that the level of the Index should rise when the Underlying Index falls and fall when the Underlying Index rises. The Index is designed to do this on a daily basis only which should not be equated with seeking a short position for periods longer than a day. The performance of the Fund over periods longer than one day may not be inversely proportional or symmetrical with the returns of the Underlying Index.

Additional Information

A Glossary of Terms is available at Xtrackers.com.
 ETF performance is shown on NAV basis, net of fees and index replication costs. Index performance is calculated on a total return basis. Volatility is calculated since launch of the share class.

Key Risk Factors

Investments in funds involve numerous risks including, among others, general market risks, credit risks, foreign exchange risks, interest rate risks and liquidity risks. As such, the value of an investment in an Xtrackers ETF may go down as well as up and can result in losses, up to and including a total loss of the amount initially invested. Movements in exchange rates can impact the value of your investment. If the currency of your country of residence is different from the currency in which the underlying investments of the fund are made, the value of your investment may increase or decrease subject to movements in exchange rates.
