Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

MSCI Pacific ex Japan Min TE, a subfund of the SICAV BNP PARIBAS EASY

Class "UCITS ETF Capitalisation" - ISIN code LU1291106356
This Fund is managed by BNP PARIBAS ASSET MANAGEMENT Luxembourg, part of the BNP Paribas Group.

Objectives and investment policy

The Product is passively managed.
The Product seeks to replicate (with a maximum tracking error* of 1%) the performance of the MSCI Pacific ex Japan ESG Filtered Min TE (NTR) Index (Bloomberg: MXPJEFMT index) (the Index) by investing in shares issued by companies included in the Index, respecting the Index's weightings (full replication), or in a sample of shares issued by companies included in the Index (optimised replication). When investing in a sample of shares, the Product's tracking error may be higher.
The Index is a Pacific ex Japan equity index including large and mid-cap securities. The objective of the Index is to build a portfolio with an improved extra-financial profile while minimizing the Tracking Error compared to MSCI Pacific ex Japan Index (the "Parent Index"). The components of the Parent Index represent the investment universe (the "Investment Universe").
As a first step, the Index selects securities based on Environmental, Social and Corporate Governance (ESG) criteria (such as environmental opportunity, pollution and waste, human capital, corporate governance, etc.) and based on their efforts to reduce their exposure to coal and unconventional fossil fuels.

As a result, companies involved in sectors with a potentially high negative ESG impact, i.e. that generate more than a certain percentage of their revenue from sectors such as tobacco, oil and gas and thermal coal power generation those subject to significant violations of the UN Global Compact principles and those involved in severe ESG-related controversies are excluded from the Index. In addition, the Index applies an optimization process with respect to the Parent Index with a view to minimizing the tracking error. The optimization process is applied under the following constraints so as to select securities from the Investment Universe to consistently achieve the following targets:• An ESG score higher than the ESG score of the Parent Index and
• a GHG intensity lower than the GHG intensity of the Parent Index by at least 20% ("extra-financial indicator improvement approach").

The ESG rating and research methodology provided by MSCI ESG Research is available on MSCI's website at the following address as of the date of preparation of the Prospectus: www.msci.com/esg-ratings. MSCI ESG ratings aims to determine how well companies that have demonstrated their ability to manage their ESG risks and opportunities.
The ESG analysis is carried out on all the constituents composing the Index.
It cannot be guaranteed that all constituents will comply with the ESG criteria set out herein at all times. For example, between two Index rebalancing dates as set out above, if a constituent no longer complied with the extra-financial criteria applied in constructing the Index, that constituent may not be excluded until the next Index rebalancing date, following the Index provider rules.
The Index is a Net Total Return index (calculated with net dividends reinvested).
Further information on the Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the MSCI indices can be found on www.msci.com.
*The tracking error is a risk indicator that measures how closely a fund tracks the performance of its reference index.
Incomes are systematically reinvested.
Investors are able to redeem on a daily basis (on Luxembourg bank business days) as described in the prospectus.

Risk and reward profile

Lower risk — Higher risk

Potentially lower rewards — Potentially higher rewards

1	2	3	4	5	**6**	7

- Historical data may not be reliable indication for the future.
- The risk category of a Fund is an indicator but not a target or a guarantee and may shift over time.
- The lowest category does not mean a risk-free investment.
- Why is the Fund in this specific category?
  The risk category is justified by the investment mainly in stocks and shares, the value of which can fluctuate considerably. These fluctuations are often amplified in the short term.
- The higher the risk, the longer the recommended investment horizon.

Other risks materially relevant to the Fund which are not adequately captured by the indicator are described below:

- Operational and Custody Risk: Some markets are less regulated than most of the international markets; hence, the services related to custody and liquidation for the subfund on such markets could be more risky.

For more information on risks, please see the risks section of the Fund's prospectus, which is available at http://www.bnpparibas-am.com.

Charges

The charges you pay are used to pay the Fund's running costs, including the costs of marketing and distribution. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Primary market (authorised investors)	
Maximum entry charge (not paid to the UCITS)	3.00%
Maximum exit charge (not paid to the UCITS)	3.00%
Secondary market (all investors)	
Maximum entry charge (not paid to the UCITS)	None
Maximum exit charge (not paid to the UCITS)	None
This is the maximum that might be taken out of your money (before the proceeds of your investment are paid out).	
Charges taken from the Fund over each year	
Ongoing charges	0.15% (*)
Charges taken from the fund under specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less. You can find this out from your financial adviser.

(*) The **ongoing charges** figure is based on past expenses determined as of 31 December 2025.

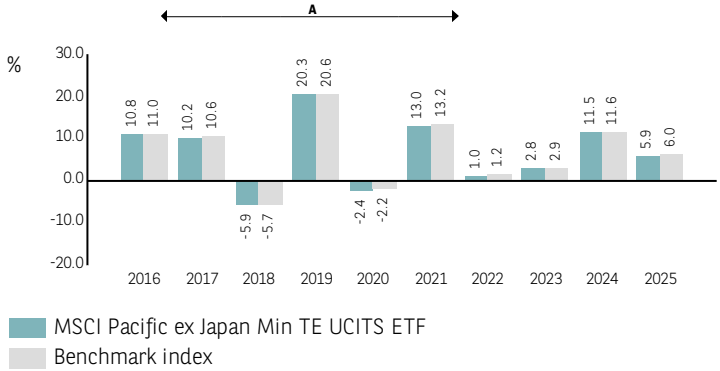

This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

Conversions not allowed.

For more information about charges, please see the "Fees and Costs" section of the Fund's prospectus, which is available at http://www.bnpparibas-am.com.

Past performance

A: 02/2016 - 12/2021: During this period, the benchmark index was MSCI Pacific ex Japan ex Controversial Weapons (NTR).

- Performance figures are shown for shares classes, for which NAV was continuously calculated during the period from 1st January to 31st December.
- Past performance is not an indicator of future results.
- The ongoing charges of the Fund are included in the calculation of past performance. The entry/exit and conversion fees are excluded from the calculation of the past performance.
- The share class came into existence in 2015.
- Past performance has been calculated in EUR.
- Performance returns are based on the net asset value with distribuable income reinvested.
