

# Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

## JPM ESG EMBI GLOBAL DIVERSIFIED COMPOSITE, a subfund of the SICAV BNP PARIBAS EASY

Class "UCITS ETF H EUR Capitalisation" - ISIN code LU1547515137

This Fund is managed by BNP PARIBAS ASSET MANAGEMENT Luxembourg, part of the BNP Paribas Group.

### Objectives and investment policy

The Product is an index-tracking passively managed fund. The Product seeks to replicate (with a maximum tracking error\* of 1%) the performance of the JPM ESG EMBI Global Diversified Composite (TR) index (the Index) by investing in the debt securities issued by countries included in the Index, respecting the Index's weightings (full replication), or in a sample of debt securities issued by countries included in the Index (optimised replication). When investing in a sample of debt securities, the Product's tracking error may be higher.

The Index is composed of emerging market debt securities with an Environmental, Social and Governance (ESG) scoring and screening methodology (such as environmental conventions, labour rights conventions, human rights, etc.) to tilt toward issuers ranked higher on ESG criteria, and to underweight or remove issuers that rank lower. As a result, those subject to significant violations of the UN Global Compact principles and those involved in severe ESG-related controversies are excluded from the Index. The type of approach implemented here is Best-effort (a type of ESG selection consisting of giving priority to the issuers demonstrating an improvement in or good prospects for their ESG practices and performance over time). The extra-financial strategy of the Index may comprise methodological limitations such as the risk related to ESG investment or the Index rebalancing. Further information on the index, its composition, calculation and rules for monitoring and periodic rebalancing, as well as information on the general methodology common to all J.P. Morgan ESG indices, can be found at [www.jpmorgan.com](http://www.jpmorgan.com).

\*The tracking error is a risk indicator that measures how closely a fund tracks the performance of its reference index. Environmental, social and governance (ESG) criteria contribute to, but are not a determining factor in, the manager's decision making.

Incomes are systematically reinvested.

Investors are able to redeem on a daily basis (on Luxembourg bank business days) as described in the prospectus.

This share class aims at hedging its currency exchange risk against the Fund's portfolio exposure currency. However, the currency exchange risk cannot be completely neutralized as the hedging technique is based on the Fund's NAV.

### Risk and reward profile

- Historical data may not be reliable indication for the future.
- The risk category of a Fund is an indicator but not a target or a guarantee and may shift over time.
- The lowest category does not mean a risk-free investment.
- Why is the Fund in this specific category?  
The risk category is justified by the investment mainly in Interest Rate instruments. The investor's attention is drawn to the fact that an increase in interest rates results in a decrease in the value of investments in bonds and debt instruments and more generally fixed income instruments.
- The higher the risk, the longer the recommended investment horizon.

Other risks materially relevant to the Fund which are not adequately captured by the indicator are described below:

- **Credit Risk:** This risk relates to the ability of an issuer to honour its commitments: downgrades of an issue or issuer rating may lead to a drop in the value of associated bonds.
- **Liquidity Risk:** This risk arises from the difficulty of selling an asset at a fair market price and at a desired time due to lack of buyers.
- **Operational and Custody Risk:** Some markets are less regulated than most of the international markets; hence, the services related to custody and liquidation for the subfund on such markets could be more risky.

For more information on risks, please see the risks section of the Fund's prospectus, which is available at <http://www.bnpparibas-am.com>.

## Charges

The charges you pay are used to pay the Fund's running costs, including the costs of marketing and distribution. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Primary market (authorised investors)	
Maximum entry charge (not paid to the UCITS)	3.00%
Maximum exit charge (not paid to the UCITS)	3.00%
Secondary market (all investors)	
Maximum entry charge (not paid to the UCITS)	None
Maximum exit charge (not paid to the UCITS)	None
This is the maximum that might be taken out of your money (before the proceeds of your investment are paid out).	
Charges taken from the Fund over each year	
Ongoing charges	0.26% (*)
Charges taken from the fund under specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less. You can find this out from your financial adviser.

(\*) The **ongoing charges** figure is based on past expenses determined as of December 2023.

This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

In addition, the investor's subscription, conversion or redemption order may be subject to an anti-dilution levy (maximum 2% for subscription or conversion in, and maximum 1.5% for redemption or conversion out) paid to the sub-fund in order to cover transaction costs.

Conversions not allowed.

For more information about charges, please see the "Fees and Costs" section of the Fund's prospectus, which is available at <http://www.bnpparibas-am.com>.

## Past performance

- Performance figures are shown for shares classes, for which NAV was continuously calculated during the period from 1st January to 31st December.
- Past performance is not an indicator of future results.
- The ongoing charges of the Fund are included in the calculation of past performance. The entry/exit and conversion fees are excluded from the calculation of the past performance.
- The share class came into existence in 2021.
- Past performance has been calculated in EUR.
- Performance returns are based on the net asset value with distributable income reinvested.
