Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Energy & Metals Enhanced Roll, a subfund of the SICAV BNP PARIBAS EASY

Class "UCITS ETF RH EUR Capitalisation" - ISIN code LU1547516291
This Fund is managed by BNP PARIBAS ASSET MANAGEMENT Luxembourg, part of the BNP Paribas Group.

Objectives and investment policy

The Product is passively managed.
The Product seeks to replicate (with a maximum tracking error* of 1%) the performance of the BNP Paribas Energy & Metals Enhanced Roll (TR)* index (Bloomberg: BNPIC52T) (the Index) by investing in a substitute basket, composed of, inter alia, shares of companies, debt securities or cash (synthetic replication). When investing in a basket of securities called substitute basket the performance is swapped with the performance of the index, generating counterparty risk. When employing synthetic replication, the sub-fund will achieve exposure to the Index by entering into total return swaps (TRS).
At least, 75% of the assets will be invested at all times in equities.
The Index represents a diversified investment in a basket of commodity futures indices, excluding commodities classified as agriculture and livestock, with the objective to optimise the roll mechanism and reduce the carry costs usually associated to commodities futures contracts holding. Each single commodity is represented by its own reference index.
The allocation between the commodities futures indices is derived from the composition of the Bloomberg Commodity Ex-Agriculture and Livestock Capped Total Return Index (Bloomberg code: BBUXALCT Index) following any monthly rebalancing of such index.
Further information on the Index, its composition, calculation and rules for monitoring and periodic rebalancing, as well as information on the general methodology of the Index can be found at the administrator website: https://indx.bnpparibas.com
*The tracking error is a risk indicator that measures how closely a fund tracks the performance of its reference index.
Incomes are systematically reinvested.
Investors are able to redeem on a daily basis (on Luxembourg bank business days) as described in the prospectus.
This share class aims at hedging the portfolio return from USD to EUR.

Risk and reward profile

Lower risk — Higher risk

Potentially lower rewards — Potentially higher rewards

1	2	3	4	5	**6**	7

- Historical data may not be reliable indication for the future.
- The risk category of a Fund is an indicator but not a target or a guarantee and may shift over time.
- The lowest category does not mean a risk-free investment.
- Why is the Fund in this specific category?
  The risk category is justified by the investment in Commodity markets that may experience significant, sudden price variations. Thus, the underlying assets may evolve in a markedly different way from traditional securities markets (share markets, bond markets etc).
- The higher the risk, the longer the recommended investment horizon.

Other risks materially relevant to the Fund which are not adequately captured by the indicator are described below:

- Counterparty Risk: This risk is associated with the ability of a counterparty in an Over The Counter financial transaction to fulfil its commitments like payment, delivery and reimbursement.
- Operational and Custody Risk: Some markets are less regulated than most of the international markets; hence, the services related to custody and liquidation for the subfund on such markets could be more risky.

For more information on risks, please see the risks section of the Fund's prospectus, which is available at http://www.bnpparibas-am.com.

Charges

The charges you pay are used to pay the Fund's running costs, including the costs of marketing and distribution. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Primary market (authorised investors)	
Maximum entry charge (not paid to the UCITS)	3.00%
Maximum exit charge (not paid to the UCITS)	3.00%
Secondary market (all investors)	
Maximum entry charge (not paid to the UCITS)	None
Maximum exit charge (not paid to the UCITS)	None
This is the maximum that might be taken out of your money (before the proceeds of your investment are paid out).	
Charges taken from the Fund over each year	
Ongoing charges	0.39% (*)
Charges taken from the fund under specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less. You can find this out from your financial adviser.

(*) The **ongoing charges** figure is based on past expenses determined as of 31 December 2025.

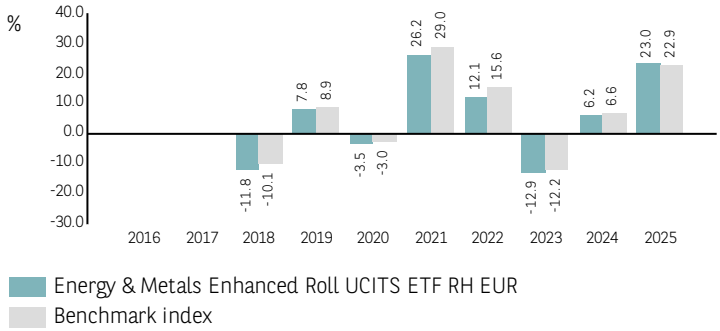

This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

Conversions not allowed.

For more information about charges, please see the "Fees and Costs" section of the Fund's prospectus, which is available at http://www.bnpparibas-am.com.

Past performance

- Performance figures are shown for shares classes, for which NAV was continuously calculated during the period from 1st January to 31st December.
- Past performance is not an indicator of future results.
- The ongoing charges of the Fund are included in the calculation of past performance. The entry/exit and conversion fees are excluded from the calculation of the past performance.
- The share class came into existence in 2017.
- Past performance has been calculated in EUR.
- Performance returns are based on the net asset value with distribuable income reinvested.
