The investments in the funds are subject to market fluctuations and the risks inherent in investments in securities. The value of investments and the income they generate may go down as well as up and it is possible that investors will not recover their initial outlay, the fund described being at risk of capital loss.

Why is the Fund in this specific category?

La catégorie de risque se justifie par l'investissement principalement sur les marchés de matières premières, lesquelles peuvent connaître des fluctuations de prix soudaines et d'ampleur. Les actifs sous-jacents peuvent donc évoluer de façon sensiblement différente de ceux des marchés de valeurs traditionnels (marchés d'actions, obligataires, etc.).

This fund may be exposed to other risks, listed below :

- Counterparty Risk:this risk is associated with the ability of a counterparty in an Over The Counter financial transaction to fulfil its commitments like payment, delivery and reimbursement.
- Operational risk:In the event of an operational breakdown within the management company, one of its representatives or the depositary, investors could face various disruptions (late payment, delivery etc.).

GLOSSARY

Tracking Error
The tracking error measures the volatility of a portfolio's relative return in relation to its benchmark index.

Volatility
An asset's volatility is the standard deviation of its return. As a measure of dispersion, it evaluates the uncertainty of asset prices, which is often equated to their risk. Volatility can be calculated ex post (retrospectively) or estimated ex ante (anticipatively).
