Objective and Investment Policy

This Sub-Fund is passively managed. The objective of this Sub-Fund is to track the performance of MSCI EMU Value Index (the "Index"), and to minimize the tracking error between the net asset value of the Sub-Fund and the performance of the Index. The anticipated level of the tracking error, under normal market conditions is indicated in the prospectus of the Sub-Fund. The Index is a Net Total Return Index : dividends net of tax paid by the index constituents are included in the Index return. MSCI EMU Value Index is an equity index representative of large and mid cap securities exhibiting overall value style characteristics across developed countries in the European Economic and Monetary Union ("EMU"). More information about the composition of the Index and its operating rules are available in the prospectus and at: www.msci.com. The Index value is available via Bloomberg (M7EM000V). The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index. The Investment Manager will be able to use derivatives in order to deal with inflows and outflows and which relate to the Index or constituents of the Index for investment and/or efficient portfolio management. In order to generate additional income to offset its costs, the Sub-Fund may also enter into securities lending operations. The Sub-Fund is eligible to the French equity savings plans (PEA) which means that the Sub-Fund invests at least 75% of its assets in a diversified portfolio of equities issued by an issuer incorporated either in European Union member state or in a member state of the European Economic Area. Please refer to the Prospectus of the Sub-Fund for more information.
