Objectives: The Fund is an Index UCITS passively managed.
The investment objective of Fund is to reflect the performance of the Bloomberg Barclays Euro Government Inflation-Linked Bond Index (the Benchmark Index") denominated in Euros, while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Benchmark Index (the "Tracking Error").
The anticipated level of Tracking Error in normal market conditions is indicated in the prospectus.
The Bloomberg Barclays Euro Government Inflation-Linked Bond Index consists of inflation-linked bonds issued by investment grade sovereign countries participating in the European Monetary Union. Only bonds denominated in euros are included.

The Benchmark Index is a net total return index. A net total return index calculates the performance of the index constituents on the basis that any dividends or distributions are included in the index returns after withholding tax retention.
The Fund seeks to achieve its objective via a direct replication, by investing primarily in the securities comprising the Benchmark Index.
To optimize the Benchmark Index replication, the Fund may use a sampling replication strategy, and may also engage in securities lending.
