Objective and Investment Policy

The Fund is an index-tracking UCITS passively managed. The investment objective of the Fund is to track both the upward and the downward evolution of the FTSE 100 Total Return Index (net dividends reinvested) (the "Benchmark Index") denominated in GBP in order to offer an exposure to the performance of the 100 largest companies traded on the London Stock Exchange that pass screening for size and liquidity-while minimizing the volatility of the difference between the return of the Fund and the return of the Index (Tracking Error"). The anticipated level of tracking error in normal market conditions is indicated in the prospectus. Additional information about the Benchmark Index can be found at www.ftse.com. The Fund seeks to achieve its objective via indirect replication by entering into an over-the-counter swap contract (financial derivative instrument, the "FDI"). The Fund may also invest in a diversified portfolio of international equities, whose performance will be exchanged against the performance of the benchmark Index via the FDI. Updated composition of the Fund holdings is available on www.amundietf.com. In addition, the indicative net asset value is published on the Reuters and Bloomberg pages of the Fund, and might also be mentioned on the websites of the stock exchanges where the Fund is listed.
