Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

UBS Sustainable Development Bank Bonds UCITS ETF, class hCHF acc (ISIN: LU1852211561)
a sub-fund of UBS (Lux) Fund Solutions SICAV
This fund is managed by UBS Asset Management (Europe) S.A., a part of UBS AG.

Objectives and investment policy

This sub-fund is passively managed and will take proportionate exposure on the components of the Solactive Global Multilateral Development Bank Bond USD 25% Issuer Capped hedged to CHF Index (Total Return).
The Index is mostly composed of Multilateral Development Banks bonds. The consideration of non-financial criteria have a significant impact, more than 90% of the assets are invested into bonds providing exposure to Multilateral Development Banks. By adopting the ESG methodology of the Reference Benchmark Index, the Fund applies the extra-financial indicator upgrade approach for the purposes of the AMF Rules, aiming for a better non financial indicator value. The MSCI ESG Score of the Fund as the relevant extra-financial indicator of the Fund will be at least 20% higher than the MSCI ESG Score of the Parent Index. For each security, a decision is made based on its investment characteristics as whether it should be considered for inclusion in the sub-fund replicating the index. The proportionate exposure by the sub-fund to the component securities will be substantially achieved either through direct investment or through the use of derivatives or through a combination of both techniques. The sub-fund may hold securities which are not comprised in its Index if the portfolio manager believes this to be appropriate considering the sub-fund's investment objective and the investment restrictions or other factors. The sub-fund can make use of derivatives in particular where it may not be possible or practicable to replicate the index through direct investments or in order to generate efficiencies in gaining exposure to the index. Exposure to the index through direct replication may be affected by rebalancing costs, while exposure to the index through derivatives may be affected by derivative trading costs. The use of OTC derivatives engenders counterparty risk which is however mitigated by UBS (Lux) Fund Solutions collateral policy.
This sub-fund has a sustainable investment objective.
The Fund will not enter into any securities lending.

The return of the fund depends mainly on the performance of the tracked index.

Investors other than Authorized Participants may not subscribe shares directly with UBS (Lux) Fund Solution, but may purchase and sell shares, through an intermediary, on one of the stock exchanges listed for the share class on the website **www.ubs.com/etf.** Direct redemptions with UBS (Lux) Fund Solutions are however possible on each business day in Luxembourg. Authorized Participants may subscribe and redeem shares with UBS (Lux) Fund Solutions under the conditions detailed in the relevant Authorized Participant Agreement.

Fund income is not paid out, but instead will be reinvested.

This share class is currency-hedged meaning that it aims to reduce the impact of currency fluctuations between its reference currency and the currency of the Index. For that purpose it sells currency forwards at the one-month forward rate in accordance with the hedging methodology of the Index's currency-hedged index variant, the Solactive Global Multilateral Development Bank Bond 25% Issuer Capped hedged to CHF Index (Total Return).

Risk and reward profile

Lower risk ← → Higher risk
Typically lower rewards — Typically higher rewards

More about the risk category
- The risk category is based on the estimated future volatility of the fund. The method used for this estimate depends on the fund type and historical data.
- Historical performance is not a reliable indicator for future performance.
- The risk category allocated is not static and may vary over time.
- Allocation to the lowest risk category does not mean that an investment in this fund is free of risk.

Why is this fund in this Category?
The fund is in risk category 3 because the volatility of its returns is low. The fund invests in bonds and may therefore be subject to volatility. This requires corresponding risk tolerance and capacity. The value of a unit may fall below the purchase price. Changes in interest rates have an effect on the value of the portfolio. The value of a unit may be influenced by currency fluctuations.

Further material risks
- Investment in fixed income securities are usually considered as carrying credit risk (i.e. potential loss due to failure of issuer).
- The fund may use derivatives which can reduce investor risks or give rise to market risks as well as potential loss due to failure of counterparty.
- Investment grade bonds are usually considered as carrying low to medium credit risk (i.e. potential loss due to failure of issuer).
- Every fund reveals specific risks, a detailed and comprehensive list of risk descriptions can be found in the prospectus.
- Sustainability characteristics and risks are considered as part of the Index selection process.

The benchmark is the intellectual property of the index provider. The Share Class is not sponsored or endorsed by the index provider. Please refer to the Fund's prospectus for full disclaimer.

Charges

The charges you pay are used to pay the costs of running the sub-fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest[1]	
Entry charge	0.00%[2]
Exit charge	0.00%[2]
Charges taken from the fund over a year	
Ongoing charges	0.18%
Charges taken from the fund under certain specific conditions	
Performance fee	none

[1] This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

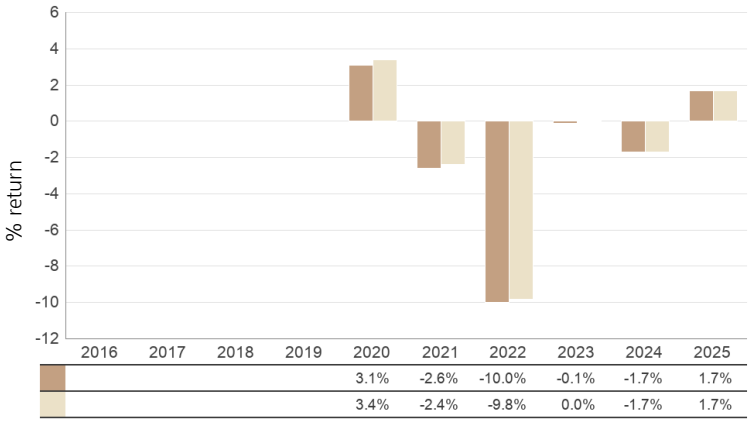

[2] Investors who deal on secondary markets will pay fees as charged by their stock brokers. These fees are publicly available on exchanges on which the shares are listed and traded and may also be obtained from the relevant stock brokers.

The **ongoing charges** figure is based on the last twelve months prior to the preparation of this document. This figure may vary from year to year. It generally excludes:

- Portfolio transaction costs, except in the case of an entry/ exit charge paid by the sub-fund when buying or selling units in another collective investment undertaking

For more information, please see the charges section of the Fund's prospectus, which is available at **www.ubs.com/etf**.

Past performance

hCHF acc - LU1852211561

Benchmark: Solactive Global Multilateral Development Bank Bond USD 25% Issuer Capped hedged to CHF Index (Total Return)

Performance in the past is not a reliable indicator of future results.

The chart shows the class's investment returns calculated as percentage year-end over year-end change of the class net asset value. In general any past performance takes account of all ongoing charges, but not the entry charge. If the sub-fund is managed against a benchmark, its return is also shown.

The class was launched in 2019. The fund was launched in 2018

The past performance of this sub-fund is calculated in CHF.
