

## Lyxor Daily LevDAX UCITS ETF - Dist

### 1. FUND INFORMATION

#### Investment objective

The Lyxor Daily LevDAX UCITS ETF - Dist is a UCITS compliant exchange traded fund that aims to track the benchmark index LevDAX Index.

The LevDAX Index delivers twice the daily performance of the DAX index, positive or negative, minus the financing cost. The investor will also benefit from close to twice the dividends paid by the stocks composing the index. The complete methodology is available on [www.deutsche-boerse.com](http://www.deutsche-boerse.com).

Lyxor ETFs are efficient investment vehicles listed on exchange that offer transparent, liquid and low-cost exposure to the underlying benchmark index.

The figures relating to [past performances / simulated past performances / past performances and simulated past performances] refer or relate to past periods and are not a reliable indicator of future results. This also applies to historical market data.

Performances related to distributing ETF are calculated reinvesting dividends into the ETF performance  
Performance gap represents the performance differences between the ETF and the Index  
The Tracking Error represents the annualised volatility of the performance differences between the ETF and the benchmark

Changes of benchmark may occur. To compare the track of the ETF with its benchmark, we will use the below indexes:

	From	To
LevDAX Index	01/06/2006	

	1Y	3Y	5Y
Fund volatility	-	-	-
Benchmark volatility	-	-	-
Sharpe ratio	-	-	-

## Important information for Investors

Parties entering into transactions (such as a derivative or financing transaction) or investing in financial instruments that use an index or a variable interest rate (benchmark) are exposed to the risk that:

- (1) such benchmark may be subject to methodological or other changes which could affect the value of the relevant transaction; or
- (2) (i) may become not compliant with applicable laws and regulations (such as the European Benchmark Regulation), (ii) may cease to be published (possible cessation of LIBOR publication or planned cessation of EONIA both after December 2021), or (iii) the supervisor or administrator of any such benchmark may make a statement that the relevant benchmark is no longer representative, and as a consequence the relevant benchmark may be replaced by another benchmark which may have an adverse and material impact on the economics of the relevant transactions.

You should conduct your own independent investigation and analysis of the potential consequences of any relevant risks such as those mentioned above, particularly in light of the ongoing industry initiatives related to the development of alternative reference rates and the update of the relevant market standard documentation.

## Risk Factors

It is important for potential investors to evaluate the risks described below and in the fund prospectus which can be found on [www.lyxoretf.com](http://www.lyxoretf.com)

**CAPITAL AT RISK:** ETFs are tracking instruments: Their risk profile is similar to a direct investment in the Underlying Index. Investors' capital is fully at risk and investors may not get back the amount originally invested.

**REPLICATION RISK:** The fund objectives might not be reached due to unexpected events on the underlying markets which will impact the index calculation and the efficient fund replication.

**COUNTERPARTY RISK:** Investors are exposed to risks resulting from the use of an OTC Swap with Societe Generale. In-line with UCITS guidelines, the exposure to Societe Generale cannot exceed 10% of the total fund assets. Physically replicated ETFs may have counterparty risk resulting from the use of a Securities Lending Programme.

**UNDERLYING RISK:** The Underlying Index of a Lyxor ETF may be complex and volatile. When investing in commodities, the Underlying Index is calculated with reference to commodity futures contracts exposing the investor to a liquidity risk linked to costs such as cost of carry and transportation. ETFs exposed to Emerging Markets carry a greater risk of potential loss than investment in Developed Markets as they are exposed to a wide range of unpredictable Emerging Market risks.

**CURRENCY RISK:** ETFs may be exposed to currency risk if the ETF is denominated in a currency different to that of the Underlying Index they are tracking. This means that exchange rate fluctuations could have a negative or positive effect on returns.

**LIQUIDITY RISK:** Liquidity is provided by registered market-makers on the respective stock exchange where the ETF is listed, including Societe Generale. On-exchange liquidity may be limited as a result of a suspension in the underlying market represented by the Underlying Index tracked by the ETF; a failure in the systems of one of the relevant stock exchanges, Societe Generale or other market-maker systems; or an abnormal trading situation or event.

## Investor's Notice

\*\*The Total Expense Ratio (TER) covers all costs incurred by the Management Company to manage the underlying assets. It comprises a Management Fee and Structural Costs described as follows. The Management Fee represents the compensation for the Management Company services. The Structural Costs represent the custodian fee, the administrative fee, the audit fee and all other operating costs that will be paid by the Management Company to operate the funds.

This document was prepared by Lyxor Asset Management. This document, and the information contained therein, does not constitute an issue prospectus according to articles 652a and 1156 of the Swiss Code of Obligations ("CO") or a listing prospectus according to the Listing Rules of the SIX Swiss Exchange. The information in this document is illustrative and provided for informational purposes only.
