### Lyxor Global High Yield Sustainable Exposure UCITS ETF - Acc A Sub-Fund of the SICAV Lyxor Index Fund

ISIN code: (A) LU2099295466

Managed by Amundi Asset Management, a subsidiary of Amundi Group

#### Objectives and Investment Policy

The Sub-Fund is a financial product that promotes among other characteristics ESG characteristics pursuant to Article 8 of the Disclosure Regulation.

The Fund is an index-tracking UCITS passively managed.

The investment objective of the Fund is to track both the upward and the downward evolution of the Bloomberg Barclays MSCI Global Corporate High Yield SRI Sustainable Index (the Benchmark Index) denominated in US Dollar (USD), while minimizing the volatility of the difference between the return of the Fund and the return of the Benchmark Index (the "Tracking Error"). The anticipated level of Tracking Error in normal market conditions is indicated in the prospectus.

The Benchmark Index is representative of the performance of high yield corporate bonds denominated in USD, EUR and GBP issued by entities meeting Environmental, Social and Governance ("ESG") criteria, based on an ESG rating. The ESG rating methodology is based on ESG key issues including but not limited to water stress, carbon emissions, labor management or business ethics. The Benchmark Index uses a "Best-in-class" approach that permits the reduction by at least 20% of the Eligible Universe (expressed in number of issuers). Limits of the methodology of the Benchmark Index are described in the prospectus of the Fund through risk factors, such as the market risk linked to controversies and the risks linked to ESG methodologies and to ESG score computation.

Additional information about the Benchmark Index can be found at <https://www.bloomberg.com/professional/product/indices/bloomberg-barclays-indices/>.

The Benchmark Index is a total return index. A total return index calculates the performance of the index constituents on the basis that any coupons or distributions are included in the index returns.

The Fund seeks to achieve its objective via indirect replication by entering into an over-the-counter swap contract (financial derivative instrument, the "FDI"). The Fund may also invest in a diversified portfolio of debt securities, whose performance will be exchanged against the performance of the benchmark Index via the FDI. On top of complying with the securities eligibility criteria as described in the prospectus, the basket of securities held by the Fund will also satisfy additional constraints such that the Fund's assets are in line with the ESG standards of the Benchmark Index. For further information on these additional constraints please refer to the Investment Policy section of the Fund prospectus.

Updated composition of the Fund holdings is available on [www.amundiETF.com](http://www.amundiETF.com).

In addition, the indicative net asset value is published on the Reuters and Bloomberg pages of the Fund, and might also be mentioned on the websites of the stock exchanges where the Fund is listed.

Information on how the Index is consistent with environmental, social and governance characteristics is available in the prospectus.

The share currency is the US Dollar (USD).

Dividend Policy : the accumulation share automatically retains, and re-invests, all attributable income within the Sub-Fund; thereby accumulating value in the price of the accumulation shares.
