Lyxor Euro Government Green Bond (DR) UCITS ETF - Acc A Sub-Fund of the SICAV MULTI UNITS LUXEMBOURG

ISIN code: (A) LU2356220926

Managed by Amundi Asset Management, a subsidiary of Amundi Group

Objectives and Investment Policy

The Sub-Fund is a financial product that pursuant to Article 9(3) of the Disclosure Regulation aims at reducing carbon emissions through the replication of the Index.

The Fund is an index-tracking UCITS passively managed.

The investment objective of the Fund is to reflect both the upward and the downward evolution of the Solactive Euro Government Green Bond Index" (the "Index"), denominated in EUR, in order to offer an exposure to the European Government Green Bond market, while minimising the volatility of the difference between the return of the Fund and the return of the Index (the "Tracking Error").

The anticipated level of Tracking Error in normal market conditions is indicated in the prospectus.

The Index is representative of the performance of investment grade rated Green Bonds issued by European countries and denominated in EUR.

Green bonds are issued in order to fund projects that have positive environmental outcomes. To be eligible in the Index, Green Bonds shall meet the criteria defined by the Climate Bonds Initiative, through a four-step process that includes: identification of environmentally themed bonds, reviewing eligible bond structures, evaluating the use of proceeds and screening eligible green projects or assets for adherence with the Climate Bonds Taxonomy. More information can be found on the website: <http://www.climatebonds.net/> and <https://www.climatebonds.net/standard/taxonomy>.

The Index follows an extra-financial approach significantly engaging that contributes to the energy and ecological transition by investing at least 90% of the net asset value of the Fund in Green Bonds comprising the Index. Limits of the methodology of the Index are described in the prospectus of the Fund through risk factors, such as the market risk linked to controversies.

Solactive's website (<https://www.solactive.com/>) contains more detailed information about the Solactive indexes.

The Index is a total return index. A total return index calculates the performance of the index constituents on the basis that any coupons or distributions are included in the index returns.

The Fund seeks to achieve its objective via a direct replication, by investing primarily in the securities comprising the Index.

To optimize the Index replication, the Fund may use a sampling replication strategy.

The potential use of these techniques is published on Lyxor's website: www.lyxoretf.com.

Updated composition of the Fund holdings is available on www.lyxoretf.com.

In addition, the indicative net asset value is published on the Reuters and Bloomberg pages of the Fund, and might also be mentioned on the websites of the stock exchanges where the Fund is listed.

The share currency is the Euro (EUR).

Dividend Policy : the accumulation share automatically retains, and re-invests, all attributable income within the Sub-Fund; thereby accumulating value in the price of the accumulation shares.

The minimum recommended holding term is 3 years.

The Sub-Fund's shares are listed and traded on one or more stock exchanges. In normal circumstances, you may deal in shares during the trading hours of the stock exchanges, provided that the Market Makers can maintain market liquidity. Only authorised participants (e.g. selected financial institutions) may deal in shares directly with the Sub-Fund on the primary market. Further details are provided in the prospectus of the UCITS.
