ESG Enhanced Europe, a subfund of the SICAV BNP PARIBAS EASY

Class "UCITS ETF Capitalisation" - ISIN code LU2881684745
This Fund is managed by BNP PARIBAS ASSET MANAGEMENT Luxembourg, part of the BNP Paribas Group.

Objectives and investment policy

The Product's investment universe (the "Investment Universe") consists of the securities of the MSCI Europe NTR Index (M7EU Index) (the "Benchmark"). The Benchmark is used for performance comparison.
The Product is Benchmark-constrained as further described.
To achieve its investment objective, the Product implements an active strategy which consists of applying a binding and significant ESG integration approach to select securities from the Investment Universe with a view to improving the Product's ESG profile compared to that of the Benchmark which is a broad market index (the "Strategy").
The Strategy is constructed to select securities to consistently achieve especially the following targets:
- a portfolio's ESG score higher than the ESG score of the Benchmark after eliminating at least 30% of securities based on ESG Score ("rating improvement approach"); - exclusions applied to the Product;
- a carbon footprint at least 50% lower than that of the Benchmark;
- a portfolio's GHG intensity lower than the GHG intensity of the Benchmark;
- a portfolio of companies with a board gender diversity ratio higher than that of the Benchmark; and
- a minimum proportion of 60% of sustainable investments as defined in Article 2 (17) of SFDR.

The ESG integration approach involves especially the evaluation of the three below non-financial criteria at the level of the issuers in which the Strategy invests:
- Environmental: such as energy efficiency, reduction of emissions of greenhouse gases, treatment of waste;
- Social: such as respect of human rights and workers' rights, human resources management (workers' health and safety, diversity);
- Governance: such as board of directors independence, managers' remuneration, respect of minority shareholders rights.

ESG scores enable to assist in the ESG evaluation of securities' issuers.
The extra-financial analysis coverage is at least 90% of the assets of the Product (excluding ancillary liquid assets) and is based on the BNP PARIBAS ASSET MANAGEMENT proprietary extra-financial framework.
In addition, and in the framework of the implementation of the Strategy, the Investment Universe is reduced by removing companies that do not comply with the BNP PARIBAS ASSET MANAGEMENT Responsible Business Conduct ("RBC") Policy based on 1) norms-based screens, such as the UN Nations Global Compact principles and OECD Guidelines for Multinational Enterprises, and 2) BNP Paribas Asset Management sector policies.
While the Investment Universe consists of the Benchmark constituents, further to the application of the ESG integration approach and stock selection, the weightings of the Product's portfolio will deviate from those of the Benchmark and the Product may not invest in some of the Benchmark constituents.
As such, the Product is actively managed.
In addition though, and as part of the application of the Strategy, the Product uses tracking-error and sector controls to limit performance deviation from the Benchmark. As a result, the Product's returns may be close to those of the Benchmark.
MSCI's website (www.msci.com) contains more detailed information about the MSCI indexes.
Incomes are systematically reinvested.
Investors are able to redeem on a daily basis (on Luxembourg bank business days) as described in the prospectus.

Risk and reward profile

Lower risk ← → Higher risk

- Historical data may not be reliable indication for the future.
- The risk category of a Fund is an indicator but not a target or a guarantee and may shift over time.
- The lowest category does not mean a risk-free investment.
- Why is the Fund in this specific category?
  The risk category is justified by the investment mainly in stocks and shares, the value of which can fluctuate considerably. These fluctuations are often amplified in the short term.
- The higher the risk, the longer the recommended investment horizon.

Other risks materially relevant to the Fund which are not adequately captured by the indicator are described below:

- Operational and Custody Risk: Some markets are less regulated than most of the international markets; hence, the services related to custody and liquidation for the subfund on such markets could be more risky.

For more information on risks, please see the risks section of the Fund's prospectus, which is available at http://www.bnpparibas-am.com.
