Alpha Enhanced EUR Corp Bond, a subfund of the SICAV BNP PARIBAS EASY

Class "UCITS ETF Capitalisation" - ISIN code LU2993394241
This Fund is managed by BNP PARIBAS ASSET MANAGEMENT Luxembourg, part of the BNP Paribas Group.

Objectives and investment policy

The Product is actively managed. The benchmark Bloomberg Euro Aggregate Corporate Total Return index is used for performance comparison. The Product is not benchmark constrained and its performance may deviate significantly from that of the benchmark.
The Product seeks to increase the value of its assets over the medium term by investing in investment grade corporate bonds and / or securities treated as equivalent.
The Product's portfolio will be built based on a systematic approach, combining several factor criteria such as, but not limited to, (i) cash flow generation (quality), (ii) relative valuation compared to peers (value), (iii) medium term performance trend (momentum) and (iv) low indebtedness ("low-risk").
The Product is not directly invested in equities, but it may hold equities or equity equivalent securities as a result of corporate actions, such as debt restructuring.
The Product's exposure to currencies other than EUR may not exceed 5%.
Investment grade structured debts may represent up to 20% of the assets.
In addition, the Product applies a binding and significant ESG integration approach and improves its ESG profile while aiming at reducing its environmental footprint, as measured by greenhouse gas (GHG) intensity, compared to the investment universe.
The Product's portfolio is constructed to select securities to consistently achieve especially the following targets:
- a portfolio's ESG score higher than that of the investment universe
- a portfolio's GHG intensity at least 20% lower than that of the investment universe. ("extra-financial indicator improvement approach")

The ESG integration approach involves especially the evaluation of the three below non-financial criteria at the level of the issuers in which the Strategy invests:
- Environmental: such as energy efficiency, reduction of emissions of greenhouse gases, treatment of waste;
- Social: such as respect of human rights and workers' rights, human resources management (workers' health and safety, diversity);
- Governance: such as Board of Directors independence, managers' remuneration, respect of minority shareholders rights.

ESG scores enable to assist in the ESG evaluation of securities' issuers.
The extra-financial analysis coverage is at least 90% of the assets of the Product (excluding ancillary liquid assets) and is based on the BNP PARIBAS ASSET MANAGEMENT proprietary extra-financial framework as further described in the Sustainable Investment Policy of the prospectus.
Furthermore, the sub-fund applies sectorial and controversial exclusions, and especially does not select companies that do not comply with the BNP PARIBAS ASSET MANAGEMENT Responsible Business Conduct ("RBC") Policy based on 1) norms-based screens, such as the UN Nations Global Compact principles and OECD Guidelines for Multinational Enterprises, 2) BNP Paribas Asset Management sector policies, as set out in Book I, and 3) companies that are the worst ESG rated per sector, assessed in accordance with the ESG Scores methodology.
Total Costs as defined below are preferential for the launch of the Product and will be applicable for a period of 12 months from the date of the launch of the Product. Performance Scenarios have been calculated taking into account these preferential costs.
Bloomberg's website (www.bloomberg.com) contains more detailed information about the Bloomberg indexes.
Incomes are systematically reinvested.
Investors are able to redeem on a daily basis (on Luxembourg bank business days) as described in the prospectus.

Risk and reward profile

- Historical data may not be reliable indication for the future.
- The risk category of a Fund is an indicator but not a target or a guarantee and may shift over time.
- The lowest category does not mean a risk-free investment.
- Why is the Fund in this specific category?
  The risk category is justified by the investment mainly in Interest Rate instruments. The investor's attention is drawn to the fact that an increase in interest rates results in a decrease in the value of investments in bonds and debt instruments and more generally fixed income instruments.
- The higher the risk, the longer the recommended investment horizon.
