a sub-fund of UBS (Lux) Fund Solutions SICAV
This fund is managed by UBS Asset Management (Europe) S.A., a part of UBS AG.

Objectives and investment policy

The Fund is passively managed and will take proportionate exposure on the components of the Solactive Global Multilateral Development Bank Bond USD 25% Issuer Capped 1-5 Index (Total Return) using a stratified approach (stratified sampling strategy) by investing in a representative sample of components of the index selected by the portfolio manager using a 'portfolio optimisation' technique.
The proportionate exposure by the Fund to the component securities will be substantially achieved either through direct investment or through the use of derivatives or through a combination of both techniques.
The Fund may further hold securities which are not comprised in its Index if the portfolio manager believes this to be appropriate considering the sub-fund's investment objective and the investment restrictions or other factors.
The Fund will invest its net assets predominantly in bonds, transferable securities, money market instruments, units of undertakings for collective investment, deposits with credit institutions, structured notes listed or dealt in on a regulated market and other assets eligible under the prospectus.
This sub-fund has a sustainable investment objective.
The Fund will not enter into any securities lending.
The return of the fund depends mainly on the performance of the tracked index.

This class distributes its net income in order to maintain the maximum tracking accuracy of the Solactive Global Multilateral Development Bank Bond USD 25% Issuer Capped 1-5 Index (Total Return).

You can buy and sell your investment on any business day in Luxembourg up until 3:00 pm (Luxembourg time) on the business day prior to the relevant dealing day.
