Bloomberg US Treasury 1-3Y, a subfund of the SICAV BNP PARIBAS EASY

Class "UCITS ETF Capitalisation" - ISIN code LU3086267096
This Fund is managed by BNP PARIBAS ASSET MANAGEMENT Luxembourg, part of the BNP Paribas Group.

Objectives and investment policy

The Product is passively managed. The investment objective of the Product is to replicate the performance of the Bloomberg US Treasury 1-3Y (TR) Index (Bloomberg: LT01TRUU Index) (the "Index") by investing in the debt securities issued by government entities included in the Index, respecting the Index's weightings (full replication), or in a sample of debt securities issued by government entities included in the Index (optimised replication).
The Index aims to track the performance of eligible short-term U.S. dollar-denominated, fixed-rate, nominal debt issued by the U.S. Treasury. The maturity range is between one year and less than three years.
The securities are weighted based on their free float-adjusted market capitalisation.
The Index is a Total Return index (calculated with gross coupons reinvested).
The Product may hold ancillary liquid assets.
Total Costs as defined below are preferential for the launch of the Product and will be applicable for a period of 12 months from the date of the launch of the Product. Performance Scenarios have been calculated taking into account these preferential costs.
MSCI's website (www.msci.com) and Bloomberg's website (www.bloomberg.com) contains more detailed information about the Bloomberg MSCI ESG indexes.
Incomes are systematically reinvested.
Investors are able to redeem on a daily basis (on Luxembourg bank business days) as described in the prospectus.

Risk and reward profile

- Historical data may not be reliable indication for the future.
- The risk category of a Fund is an indicator but not a target or a guarantee and may shift over time.
- The lowest category does not mean a risk-free investment.
- Why is the Fund in this specific category?
  The risk category is justified by the investment mainly in Interest Rate instruments. The investor's attention is drawn to the fact that an increase in interest rates results in a decrease in the value of investments in bonds and debt instruments and more generally fixed income instruments.
- The higher the risk, the longer the recommended investment horizon.
