PORTFOLIO ANALYSIS BY INSTRUMENT TYPE

SECURED VS NON-SECURED LENDING % OF NET ASSETS

Objective and Investment Policy

The investment objective of the Sub-Fund is to reflect the performance of the euro short-term rate ("SARON") compounded rate (the "Benchmark Index") and to minimize the tracking error between the net asset value of the Sub-Fund and the performance of the Benchmark Index. For hedged share classes, the Sub-Fund will also use a daily currency-hedge strategy, in order to minimize the impact of the evolution of each respective share class currency against Euro. The Benchmark Index for investments in these share-classes not denominated in Euro and hedged against Euro is the equivalent overnight money market rate for the currency of the related share class (SARON for CHF-hedged share classes).
