Objective and Investment Policy

This Sub-Fund is passively managed. The objective of this Sub-Fund is to track the performance of Euronext European Strategic Autonomy (the "Index"), and to minimize the tracking error between the net asset value of the Sub-Fund and the performance of the Index. The anticipated level of the tracking error, under normal market conditions, is indicated in the prospectus of the Sub-Fund. The Index is a Total Return Index : the dividends paid by the Index constituents are included in the index return. The Index is an equity index based on Euronext Developed Europe Total Market index (the "Parent Index") designed to capture the performance of European companies, incorporated within the European Economic Area (EEA) and that play a critical role in strengthening Europe's strategic autonomy across essential sectors such as aerospace and defense, financials, energy production and distribution. More information about the composition of the Index and its operating rules are available in the prospectus and at: www.euronext.com. The Index value is available via Bloomberg (EUSTAUNR). The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents. The Sub-Fund intends to implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the Sub-Fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The Sub-Fund may also hold some securities which are not underlying components of the Index. The Investment Manager will be able to use derivatives in order to deal with inflows and outflows and which relate to the Index or constituents of the Index for investment and/or efficient portfolio management. In order to generate additional income to offset its costs, the Sub-Fund may also enter into securities lending operations. Updated composition of the Sub-Fund holdings is available on www.amundietf.com.

Under the ESMA rules or the FCA rules, funds distributed in the EU or the UK are not allowed to report performance returns if the fund is less than 12 months old.

Policy regarding portfolio transparency and warning on secondary market
The policy regarding portfolio transparency and information on the funds assets are available on amundietf.com. Shares purchased on the secondary market cannot usually be sold directly back to the fund. Investors must buy and sell shares on a secondary market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees for doing so. Investors may pay more than the current net asset value when buying shares and may receive less than the current net asset value when selling them.

« Technical net asset values may be calculated and published for any calendar day (excluding Saturdays and Sundays) that is neither a business day nor a transaction day. These technical net asset values are merely indicative and will not be the basis for purchasing, switching, redeeming and/or transferring shares."
