The Commission de Surveillance du Secteur Financier ("CSSF") is responsible for supervising the Product and BNPP AM Luxembourg.
Date of production of the KID: 10/08/2026

WHAT IS THIS PRODUCT?

Type

This Product is an undertaking for collective investment in transferable securities (UCITS) qualifying as an exchange-traded fund (ETF). It is a sub-fund of BNP PARIBAS EASY, an open-ended investment company (société d'investissement à capital variable "SICAV") governed by the provisions of Part I of the Luxembourg Law of 17 December 2010 (the "2010 Law") relating to undertakings for collective investment as well as by UCITS Directive 2009/65.

Term

This Product has no maturity date.
BNPP AM Luxembourg is not entitled to terminate the Product unilaterally. The board of directors of the SICAV has the authority to decide on the merger, split, liquidation or the closure of the sub-fund. Furthermore, the SICAV may be wound up by decision of an extraordinary general meeting of shareholders.

Objectives

The Product is actively managed. The benchmark Euro Stoxx 50 Index (the Benchmark) is used for performance comparison. The Product is not benchmark constrained and its performance may deviate significantly from that of the Benchmark. The Product implements a model driven strategy (the "Strategy") that takes synthetically positions on call and put options. Exposure to the Strategy is achieved synthetically by entering TRS. Details and costs regarding synthetic exposure through derivatives (including TRS) are further described in the Prospectus.
For a given one-year period of time (an "Outcome Period"), the Strategy seeks to provide protection against the negative performance of the Benchmark within a range of -5% to -15%, before any fees and expenses. Losses of the Benchmark that fall within this range are intended to be absorbed by the Buffer which limits the reduction of the value of the Product. Losses beyond -15% or within the first -5% are not covered by the Buffer and will therefore reduce the value of the sub-fund.
The Outcome Periods run from the first Business Day of July to the final Business Day of June of the next year and are reset on a yearly basis. The first Outcome Period will start on the 1st of July 2026. Outcome Periods will run consecutively until the sub-fund is terminated in accordance with the terms of the Prospectus.
In exchange for this downside protection, the Product's participation in the positive performance of the Benchmark is limited by an upside cap (the "Cap"). Such Cap represents the maximum positive return that may be achieved over each Outcome Period and is adjusted at the beginning of each Outcome Period, depending on the prevailing market conditions.
During the Outcome Period, every three months from the first Business Day of July, the level of the Benchmark is compared to the level of the Cap to determine the levels of the Buffer. At those quarterly observation dates during the Outcome Period, (i) if the Benchmark is below the Cap, the levels of the Buffer remains unchanged until the next observation date, (ii) if at one observation date, the Benchmark is at or above the Cap, the Buffer is automatically extended to provide full downside protection for the remainder of that Outcome Period. In this case, the Product will not incur negative returns (before fees and expenses) over the Outcome Period (i.e. its value at the end of the Outcome Period will be no less than the level at the start of the Outcome Period, before any fees and expenses). The sub-fund's participation in any positive Benchmark performance remains subject to the upside Cap.
At the start of each Outcome Period, the Buffer and Cap levels are reset based on the Benchmark value at that date. These parameters apply to shares held from the beginning to the end of the relevant Outcome Period.
The Buffer and Cap for an Outcome Period are defined in relation to the Benchmark level at the start of that Outcome Period. As a result, investors who purchase or redeem shares after that date may benefit from only a portion of the remaining downside protection and be subject to a different level of the remaining upside potential than that stated for the Outcome Period. To obtain the full benefit of the Buffer and to be subject to the stated Cap, investors should purchase Shares at the start of an Outcome Period and hold them until its end.
Shares purchased or redeemed during an ongoing Outcome Period are not expected to deliver the same performance outcomes as those associated with the Buffer and Cap levels determined at the start of that Outcome Period.
A dividend may be distributed.
Investors are able to redeem on a daily basis (on Luxembourg bank business days) as described in the prospectus.

Intended retail investors

This Product is designed for investors who have some financial expertise and/or average knowledge to understand the Product but nevertheless may bear total capital loss. It is suited for clients who seek growth of and/or income from capital. Potential investors should have an investment horizon of at least 5 years.

Practical Information

- Depositary: BNP PARIBAS, Luxembourg Branch
- This key information document is prepared for the aforementioned share class and describes a sub-fund of BNP PARIBAS EASY. Further information about the Product is contained in the prospectus and periodical reports which are issued at the level of the SICAV. Under the 2010 Law, there is segregated liability between sub-funds, meaning that the assets of the sub-fund will not be available to meet a claim of a creditor or another third-party made against another sub-fund.
- Further information about the Product including the latest prospectus, Articles of Association, key information document, net asset values, latest published prices of share(s), periodical report, investment description, may be obtained free of cost, in English, from BNPP AM Luxembourg or online at https://www.bnpparibas-am.com.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk Indicator

The risk indicator assumes you keep the Product for 5 years.

You may not be able to sell your Product easily or you may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of this Product compared to other Products. It shows how likely it is that the Product will lose money because of movements in the markets or because we are not able to pay you.
We have classified this Product as 3 out of 7, which is a medium-low risk class. Investment in equity type instruments justifies the risk category. These are subject to significant price fluctuations, which are often amplified in the short term.
Be aware of currency risk. If the currency of your account is different from the currency of this Product, the payments you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.
Other risks materially relevant to the Product not included in the summary risk indicator:

- Counterparty Risk: this risk is associated with the ability of a counterparty in an Over The Counter financial transaction to fulfil its commitments like payment, delivery and reimbursement.
- Risk linked to derivatives: the use of derivatives can amplify fluctuations in the value of investments, thus increasing the volatility of returns.

For additional details regarding the risks, please refer to the prospectus.
This Product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances.

Recommended holding period: 5 years Example Investment: EUR 10,000		If you exit after 1 year	If you exit after 5 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	**What you might get back after costs**	3,266.9 EUR	5,524.05 EUR
	Average return each year	-67.33%	-11.19%
Unfavourable	**What you might get back after costs**	8,234.37 EUR	7,432.33 EUR
	Average return each year	-17.66%	-5.76%
Moderate	**What you might get back after costs**	10,597.27 EUR	14,273 EUR
	Average return each year	5.97%	7.37%
Favourable	**What you might get back after costs**	11,672.32 EUR	18,484.27 EUR
	Average return each year	16.72%	13.07%

The unfavourable, moderate and favourable scenarios presented represent examples using some of the best and worst performances, as well as the median performance of the Product and/or appropriated benchmark simulated from scenarios drawn from the last 10 years.

WHAT HAPPENS IF BNPP AM LUXEMBOURG IS UNABLE TO PAY OUT?

The SICAV is incorporated as a separate entity distinct from BNPP AM Luxembourg. In the event BNPP AM Luxembourg would default, the assets of the Product/SICAV, held by a depositary, would not be affected by this default.
In case of default of the depositary, the risk of financial loss of the Product/SICAV is mitigated by the legal segregation of the assets of the depositary from those of the Product/SICAV.

WHAT ARE THE COSTS?

The person advising on or selling you this Product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.
We have assumed:

- in the first year, you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the Product performs as shown in the moderate scenario.
- EUR 10,000 is invested.

	If you exit after 1 year	If you exit after 5 years
Total Cost	79.11 EUR	573.57 EUR
Annual Cost Impact (*)	0.79%	0.85% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 8.22% before costs and 7.37% after costs.

Composition of costs

One-off entry or exit costs	If you exit after 1 year	
Entry costs (*)	We do not charge an entry cost.	0 EUR
Exit costs (*)	We do not charge an exit cost.	0 EUR
Recurring costs levied annually		
Management costs and other administrative and operating costs	0.55% of the value of your investment per year. The amount is based on an estimate of the charges that will be taken out of your money.	55.11 EUR
Transaction costs	0.24% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the Product. The actual amount may vary. This figure is therefore indicative and may be revised upwards or downwards.	24 EUR
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this Product.	0 EUR

(*) We do not charge an entry or exit cost on the secondary market. Retail investors who are neither authorised participants nor authorised investors will indeed generally be able to buy or sell shares only on the secondary market where shares of the Product are traded with the assistance of an intermediary (e.g. a broker). In this case, those investors may incur fees and costs which are payable to the intermediary but not charged by the Product itself or its Manufacturer. You can find this out from your financial adviser. It shall be noted that the prospectus describes the maximum costs applicable on the primary market usually for authorised participants and authorised investors and/or in exceptional circumstances.

Conversions not allowed.

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

Recommended holding period ("RHP"): 5 years.
The RHP has been defined and based on the risk and reward profile of the Product.
Investors are able to redeem on a daily basis (on Luxembourg bank business days) as described in the prospectus.
Any redemption occurring before the end of the RHP may adversely impact the performance profile of the Product. The Product has a share redemption cap scheme that allows redemption requests to be postponed in exceptional circumstances and in accordance with the conditions set out in the Product's prospectus.

HOW CAN I COMPLAIN?

For any claim, you are invited to contact your usual relationship manager that advised you on the Product. You can also contact BNPP AM Luxembourg, as described on its website www.bnpparibas-am.lu (Footnote 'Complaints management policy'), by sending an email to amlu.complaints@bnpparibas.com or by writing to BNPP AM Luxembourg - Client Services - 60, avenue John F. Kennedy L-1855 Luxembourg.
